

47 million uninsured isn't just a statistic.

It's a tragedy.

**The 47 million uninsured are your constituents. And our patients.
Let's work together to provide health insurance coverage for all Americans.**

The American Medical Association (AMA) and Congress serve the same people and share the same challenge—ensuring all Americans have access to affordable health insurance. That's why the AMA has developed a comprehensive plan to enable every American to obtain health insurance that is individually chosen, affordable and fair. Keeping America healthy means making health care coverage affordable for everyone.

Visit www.voicefortheuninsured.org to find out how together, we can make that happen.
