

### **National Doctors Back To School Program 2007-2008**

More minority children should grow up to be doctors. Let's do our part to make that happen. To increase the number of minority physicians practicing medicine, and to help end disparities in health care, the Commission to End Health Care Disparities encourages children from underrepresented groups to consider a career in medicine.

#### **DBTS Coordinators:**

Errington Thompson, MD
