WHERE DEPRESSION LIVES

About 7.65% of adults experienced at least one major depressive episode in 2004 or 2005. The Substance Abuse and Mental Health Services Administration issued a report in June detailing how rates varied from state to state. More information is available online (<http://oas.samhsa.gov/2k7/states/depression.htm>). The state rankings are as follows:

Percentage of major depressive episodes, adults
