

AMA PRA Frequently Asked Questions for CME Providers

General Questions

1. What must an organization do in order to certify and award *AMA PRA Category 1 Credit™* for educational activities?

In order to certify activities for *AMA PRA Category 1 Credit™* and award credit to physicians that complete the certified activities the organization must:

- a. Plan and implement educational activities that meet all of the AMA PRA core requirements and the format-specific requirements for the chosen AMA approved learning format. For information on these requirements refer to the AMA PRA informational booklet at www.ama-assn.org/go/prabooklet; and
- b. Be a U.S. based organization that is accredited by either the Accreditation Council for Continuing Medical Education (ACCME) or an ACCME-recognized state medical society (SMS). To learn more about becoming accredited and/or to find a list of accredited CME providers, please visit the ACCME Web site (www.accme.org). An accredited CME provider must follow all of the requirements of both the AMA and its accreditor (ACCME or SMS) in order to certify a CME activity for *AMA PRA Category 1 Credit™*.

2. What is certified CME?

Certified CME is defined as:

- a. Nonpromotional learning activities certified for credit prior to the activity by an organization authorized by the credit system owner, or
- b. Nonpromotional learning activities for which the credit system owner directly awards credit

Certified CME encompasses all activities certified for *AMA PRA Category 1 Credit™* by ACCME/SMS accredited CME providers, activities certified through the American Academy of Family Physicians (AAFP) or American Osteopathic Association (AOA) credit systems, and activities certified directly by the AMA for *AMA PRA Category 1 Credit™* or through one of the AMA's international agreements.

3. How does the AMA monitor compliance with the AMA PRA Credit System requirements?

The AMA monitors for compliance with AMA PRA credit system requirements through the ACCME/SMS accreditation self study process, the investigation of complaints received and the review of information found in the public domain. Whenever warranted, the AMA will proceed with follow-up inquiries to ascertain and address compliance with AMA PRA credit system requirements. In most cases, the AMA is able to assist accredited CME providers with finding strategies that will bring their program and activities into compliance with AMA PRA standards.

The AMA reserves the right to withdraw an accredited CME provider's privilege to certify activities for *AMA PRA Category 1 Credit™* should the accredited CME provider fail to bring the program and activities into compliance with AMA PRA policies, regardless of accreditation status.

4. How Is AMA PRA Category 1 Credit™ calculated for each activity format?

The credit for two of the AMA approved learning formats, live activities and enduring materials, is based on a legitimate estimate of the participation time. The estimate of participation time should be designated in 15 minute, or 0.25 credit, increments, rounded to the nearest quarter hour. The minimum number of credits is 0.25 but there is not a maximum limit to the number of credits that can be designated for live or enduring materials.

The credit for the other five of the seven AMA approved learning formats are value-based rather than time-based; these learning formats have a specified number of credits designated for the successful completion of the activity.

The table below summarizes the credit designation for each of the seven AMA approved learning formats:

Live activity	Time based – 60 minutes = 1 AMA PRA Category 1 Credit™
Enduring Material	Time based – 60 minutes = 1 AMA PRA Category 1 Credit™
Journal-based CME	1 AMA PRA Category 1 Credit™ per article
Test Item Writing	10 AMA PRA Category 1 Credits™ per complete test item writing activity
Manuscript Review	3 AMA PRA Category 1 Credits™ per accepted manuscript review
Performance Improvement CME	20 AMA PRA Category 1 Credits™ per PI CME activity (5 credits per stage if physician completes only one or two stages (Stage A and/or B))
Internet Point-of-Care	0.5 AMA PRA Category 1 Credit™ per three part PoC cycle

Eligibility for Credit

5. What content may be certified for AMA PRA Category 1 Credit™?

The content of all activities certified for AMA PRA Category 1 Credit™ must meet the AMA's definition of CME, be nonpromotional and be appropriate in depth and scope for the intended physician audience. The AMA's definition of CME is:

CME consists of educational activities which serve to maintain, develop, or increase the knowledge, skills, and professional performance and relationships that a physician uses to provide services for patients, the public or the profession. The content of CME is the body of knowledge and skills generally recognized and accepted by the profession as within the basic medical sciences, the discipline of clinical medicine and the provision of health care to the public. (AMA HOD policy #300.988)

Accredited CME providers may certify nonclinical subjects (e.g. office management, patient-physician communications, faculty development) for AMA PRA Category 1 Credit™ as long as these are appropriate to a physician audience and benefit the profession, patient care or public health.

CME activities may describe or explain complementary and alternative health care practices. As with any CME activity, these need to include discussion of the existing level of scientific evidence that supports the practices. However, education that advocates specific alternative therapies or teaches how to perform associated procedures, without scientific evidence or general acceptance among the profession that supports their efficacy and safety, cannot be certified for AMA PRA Category 1 Credit™.

In addition to ensuring that the content meets the AMA's definition of CME, activities certified for AMA PRA Category 1 Credit™ must also comply with all AMA PRA core and format-specific requirements.

Eligibility for Credit, continued

6. Who can be awarded *AMA PRA Category 1 Credit™*?

Only physicians are eligible to be awarded *AMA PRA Category 1 Credit™*. The AMA defines physicians as those individuals who have obtained an MD, DO or equivalent medical degree from another country. A list of equivalent medical degrees may be found on the website of the Educational Commission for Foreign Medical Graduates at www.ecfmg.org. No other healthcare providers may be awarded *AMA PRA Category 1 Credit™*.

7. May a non-US licensed physician be awarded *AMA PRA Category 1 Credit™*?

Yes. *AMA PRA Category 1 Credit™* may be awarded to any physician (defined by the AMA as MDs, DOs, or international physicians with equivalent degrees from other countries). The requirements for awarding *AMA PRA Category 1 Credit™* to US and non-US licensed physicians are the same.

8. May non-physicians be awarded *AMA PRA Category 1 Credit™*?

No. Non-physician health professionals and other participants may not be awarded *AMA PRA Category 1 Credit™*. However, accredited CME providers may issue documentation of participation to nonphysicians that states that the activity was certified for *AMA PRA Category 1 Credit™*.

AMA PRA Category 1 Credit™ may only be awarded to MDs or DOs (or physicians with equivalent degrees from other countries).

9. What types of activities may not be claimed for *AMA PRA credit*?

CME credit may not be claimed for learning which is incidental to the regular professional activities or practice of a physician, such as learning that occurs from:

- Clinical experience
- Charity or mission work
- Mentoring
- Surveying
- Serving on a committee, council task force, board, house of delegates or other professional workgroup
- Passing examinations that are not integrated with a certified activity

Core Requirements

10. What are the *AMA* core requirements to certify any activity for *AMA PRA Category 1 Credit™*?

The *AMA*'s Core Requirements for all activities that are certified for *AMA PRA Category 1 Credit™* are that each activity must:

1. Conform to the *AMA*'s definition of CME.
2. Address demonstrated educational needs.
3. Communicate to prospective participants a clearly identified educational purpose and/or objectives in advance of participation in the activity.

4. Be designed using AMA approved learning formats and learning methodologies appropriate to the activity's educational purpose and/or objectives; credit must be based on AMA guidelines for the type of learning format used.
5. Present content appropriate in depth and scope for the intended physician audience.
6. Be planned in accordance with the relevant CEJA opinions and the ACCME Standards for Commercial SupportSM, and be nonpromotional in nature.
7. Evaluate the effectiveness in achieving its educational purpose and/or objectives.
8. Document credits claimed by physicians for a minimum of six years.
9. Be certified for *AMA PRA Category 1 Credit*TM in advance of the activity; i.e. an activity may not be retroactively approved for credit.
10. Include the AMA Credit Designation Statement in any activity materials that reference CME credit with the exception of "save the date" or similar notice.

In addition, activities must comply with specific requirements for the AMA approved learning formats.

11. Does an activity have to be certified for *AMA PRA Category 1 Credit*TM prior to the activity?

Yes. Educational activities must be certified for *AMA PRA Category 1 Credit*TM before physicians begin participating in the activity. Activities may not be retroactively certified for AMA PRA credit.

12. What are CME providers' responsibilities with regard to record keeping for AMA PRA credit?

The AMA requires that accredited CME providers must be able to provide documentation to participating physicians of the credit awarded, at the request of the physician, for at least six years after completion of each activity. When an accredited CME provider issues a certificate, transcript or other means of documentation, it must reflect the actual number of credits claimed by the physician and not record the designated maximum credits for the activity.

Documentation provided to participating physicians must accurately reflect, at a minimum, the following:

- Physician's name
- Name of accredited CME provider
- Title of activity
- Learning format of the activity
- Location of activity (if applicable)
- Date(s) of the live activity or date that the physician completed the activity
- Number of *AMA PRA Category 1 Credits*TM awarded

Accredited CME providers also need to check with their accreditor (either the ACCME or SMS) for additional record keeping requirements.

13. Can an activity be certified for *AMA PRA Category 1 Credit*TM if it isn't developed as one of the AMA approved learning formats?

No. All activities certified for *AMA PRA Category 1 Credit*TM must meet all requirements for one of the seven AMA approved learning formats.

Learning Formats – Live Activity

14. How do you determine the amount of credit for certified live activities that are not in one hour increments?

The credit for live activities may be designated in 15 minute or 0.25 credit increments; rounded to the nearest quarter hour. Credit is only designated for the educational portions of an activity, i.e. time for breaks and lunches is not included when calculating credit.

15. What if there are segments of a certified live activity that aren't planned in accordance with the requirements to certify them for *AMA PRA Category 1 Credit™*?

There may be segments of a certified CME activity that do not meet the requirements for *AMA PRA Category 1 Credit™*, e.g. segments that are promotional in nature, those targeted at non-physicians, or that do not meet the definition of CME. In such cases, accredited CME providers must clearly differentiate in activity materials between segments that are designated for *AMA PRA Category 1 Credit™* and those that are not.

16. May committee work be certified for *AMA PRA Category 1 Credit™*?

No. Participation in the work of a committee does not qualify for *AMA PRA Category 1 Credit™*.

However, CME providers may structure a live learning activity that occurs during a committee meeting and certify that portion for *AMA PRA Category 1 Credit™*.

As an example, a CME Committee may need to be educated about the revised AMA requirements in order to perform the task of certifying activities for AMA PRA credit. An educational session to meet this need can be developed following all the requirements for any live activity certified for *AMA PRA Category 1 Credit™*. This educational portion of the meeting may be certified for credit, but the work of the committee involved in certifying activities using the updated requirements would not be eligible for credit.

When certifying committee education for *AMA PRA Category 1 Credit™*, a provider must comply with all of the requirements for certifying a live activity for *AMA PRA Category 1 Credit™*.

17. Can an accredited CME provider certify a prepared course (i.e. ACLS, PALS, etc) for *AMA PRA Category 1 Credit™*?

Yes. ACLS and similar forms of training that are at a depth and scope for a physician audience may be certified for *AMA PRA Category 1 Credit™* by an accredited CME provider. The provider is still required to document that all of the core and format-specific requirements for certifying the activity have been met.

Faculty Credit

18. May an accredited CME provider award a faculty member *AMA PRA Category 1 Credit™* for preparing and presenting an original presentation at a live activity that it certifies for credit?

Yes. Accredited CME providers may award *AMA PRA Category 1 Credit™* to their physician faculty to recognize the learning associated with the preparation and teaching of an original presentation at the accredited CME provider's live activities that are certified for *AMA PRA Category 1 Credit™*.

Credit is awarded to physician faculty for a live activity that is certified for *AMA PRA Category 1 Credit™* in the following manner:

- Physician faculty may be awarded credit based on a 2-to-1 ratio to presentation time. For example, faculty may be awarded 2 *AMA PRA Category 1 Credits™* for a one-hour presentation or 1.5 *AMA PRA Category 1 Credits™* for a 45-minute presentation for sessions that were designated for *AMA PRA Category 1 Credit™*. Credit should be rounded to the nearest one-quarter credit.
- Credit may only be claimed once for an original presentation; credit may not be claimed for subsequent presentations of the same material.
- Physician faculty may not claim credit as a participant for their own presentations; however, they may claim credit for other segments they attend as a participant at a certified live activity.

19. Is there another mechanism for a physician who serves as faculty to receive credit if a CME provider does not award credit for serving as faculty?

Yes. A physician who prepares and presents an original presentation at a live activity that has been certified for *AMA PRA Category 1 Credit™* may apply directly to the AMA for credit if the accredited CME provider for the activity did not award faculty credit. Information about direct credit can be found at www.ama-assn.org/go/directcredit.

20. Are faculty eligible for *AMA PRA Category 1 Credit™* for enduring materials or other formats of learning?

No. The AMA has not approved the awarding of *AMA PRA Category 1 Credit™* for serving as faculty for other than live activities that are certified for *AMA PRA Category 1 Credit™*. A physician may choose to claim *AMA PRA Category 2 Credit™* for other types of teaching, e.g. teaching medical students, residents, other healthcare professionals or for medical writing if he/she determines that it meets the requirements. (pg 10 in the AMA PRA booklet)

21. May a physician faculty member be awarded *AMA PRA Category 1 Credit™* for a live presentation outside the US during a certified CME activity sponsored by an accredited CME provider?

Yes. If the CME provider is accredited by the ACCME or an ACCME-recognized state medical society, the location of the activity has no bearing on the credit given to faculty or learners. These activities have the same requirements as if the activity took place within the United States.

22. May a physician be awarded credit if he prepares a presentation but does not actually do the presenting? If he presents but did not prepare the materials?

No. Faculty credit is a two-part process. The physician must prepare the original material and present it in order to be awarded faculty credit.

23. If a physician gives a one hour lecture more than once, how many credits may she claim?

Provided the live activity itself is certified for 1.0 *AMA PRA Category 1 Credit™*, the physician may only claim 2.0 *AMA PRA Category 1 Credits™* as faculty the first time she gives the presentation. The credit is for the learning that occurs as the physician prepares the lecture, and may only be claimed once regardless of the number of times it is repeated.

Learning Formats – Enduring Materials

24. How do the new requirements announced in 2010 affect an enduring material that has already been released or will be released prior to July 2011?

It is the AMA's expectation that all activities released or renewed on or after July 1, 2011 will be in compliance with the new requirements. A CME provider is not expected to make changes to activities that were released prior to July 2011.

25. How is credit determined for an enduring material?

Credit designation for each enduring material must be determined by a mechanism developed by the accredited CME provider to establish a good faith estimate of the amount of time a physician who is part of the intended audience will take to complete the activity (e.g. the average time it takes a small sample group of the target audience to complete the material). Credit is designated in 15 minute or 0.25 credit increments; accredited CME providers must round to the nearest quarter hour.

26. What type of assessment must be included as part of an enduring material?

Effective for activities released or renewed on or after July 1, 2011, the AMA requires that an enduring material provide an assessment of the learner that measures achievement of the educational purpose and/or objective(s) of the activity with an established minimum performance level. Examples include, but are not limited to, patient-management case studies, a post-test, and/or application of new concepts in response to simulated problems. Whatever type of assessment is chosen the accredited CME provider must be able to determine if the physician met an established performance level before awarding credit.

Learning Formats – Enduring Materials and Journal-based CME

27. What is the minimum performance level that must be achieved in the assessment portion of enduring materials/journal-based CME activities?

The AMA doesn't specify what the minimum performance level must be, but the intent is that physician participants demonstrate a mastery of the activity content by meeting the objectives. It is the responsibility of the accredited CME provider to determine what is appropriate for the activity and implement a mechanism to ensure that credit is only awarded to physicians who achieve at least the minimum performance level.

28. If an accredited CME provider uses a post-test as the assessment method for enduring materials and journal-based CME, how many questions must be included?

The AMA does not have a requirement for a specific number of questions. The expectation of the AMA is that the assessment will include sufficient questions to demonstrate physician participants have met the objectives of the activity. The number of questions will vary depending on the content and the objectives/purpose of the enduring material.

Learning Formats – Journal-based CME

29. What is the difference between Journal-based CME and journal clubs?

A Journal-based CME activity is a certified CME activity in which an article, within a peer-reviewed, professional journal is certified for *AMA PRA Category 1 Credit™* prior to the publication of the journal. Each article is designated for one (1) *AMA PRA Category 1 Credit™*.

A journal club is a certified live activity structured around the discussion of a journal article(s) that do not have to be certified as journal-based CME. Generally physicians will read the article(s) prior to the activity and discuss the article(s) during the journal-club meeting. In this example, the activity is certified for *AMA PRA Category 1 Credit™* for the discussion and learning that occurs at the live activity, not for reading the article(s). The accredited CME provider must comply with all core and live activity format-specific requirements in order to certify the activity for *AMA PRA Category 1 Credit™*.

30. How is credit determined for journal-based CME?

Accredited CME providers should designate individual articles certified as Journal-based CME for one (1) *AMA PRA Category 1 Credit™*. The credit for this type of activity is value-based rather than time based. If a CME provider wishes to designate journal-based CME for a different amount of credit, then it should be designed as an enduring material instead of journal-based CME and should comply with all requirements for an enduring material.

Learning Formats – Test Item Writing

31. What types of activities qualify for test item writing?

Test Item Writing activities may **only** be certified for credit if the questions are developed for:

- National Board of Medical Examiners (NBME) examinations
- American Board of Medical Specialties (ABMS) member board certification examinations
- National medical specialty society peer-reviewed, published, self-assessment activities

Activities designed to write other types of test questions (i.e. ARS, enduring material, journal-based CME questions) are not eligible to be certified for *AMA PRA Category 1 Credit™*. Please see the next question for more information on test-item writing requirements.

32. What is required for an accredited CME provider to certify a test item writing activity?

The following are required in order for an accredited CME provider to certify a test-item writing activity and award credit to physician participants:

- The activity must have been developed to meet all of the AMA PRA core requirements
- The questions being developed must only be for NBME examinations, ABMS member board certification examinations or national specialty society peer-reviewed, published, self-assessment activities
- Writers must be given guidance on how to use evidence for writing quality questions
- The assigned questions must be at a depth and scope that require a review of the literature and a knowledge for the evidence base for the questions
- Physician question writers must personally participate in a group peer review of the questions.

33. Does writing questions for an enduring material or other CME activity pre- or post-tests qualify as a Test-Item Writing activity?

No. Writing questions for enduring materials or other CME activity pre- or post-tests does not qualify as a Test-Item Writing activity and *AMA PRA Category 1 Credit™* may not be awarded for these.

Learning Formats – Manuscript Review

34. In a manuscript review activity, what happens if a physician’s review is deemed unacceptable by the journal editor?

If a manuscript review is deemed to be unacceptable by the journal editor, a physician may not be awarded *AMA PRA Category 1 Credit™* for that review since the physician has not demonstrated successful completion of the learning activity.

Learning Formats – PI CME

35. Can a physician start a Performance Improvement CME activity (PI CME) during Stage B or Stage C?

No. Physicians must start a PI CME activity with Stage A. This ensures that a physician has done an assessment of his/her practice to determine the baseline performance that will be reassessed in Stage C.

36. What is considered to be an appropriate performance measure for a PI CME activity?

PI CME activities must be based on evidence-based performance measures, defined by the Institute of Medicine as “a mechanism that enables the user to quantify the quality of a selected aspect of care by comparing it to a criterion.” A fully developed performance measure will have three parts: a) numerator statement, b) denominator statement, and c) a list of any denominator exclusions. The performance measures for PI CME activities must address a facet of the physician’s practice with direct implication for patient care.

37. Where can developed performance measures be found that might be used in a PI CME activity?

Evidence-based performance measures have already been developed by several organizations and are available for use. One such organization, the AMA-convened Physician Consortium for Performance Improvement (www.physicianconsortium.org) has developed measures and worksheets for many clinical conditions. Royalty-free permission is available to CME providers to use these Consortium measures. Performance measures are also available from the National Committee for Quality Assurance (<http://www.ncqa.org>), National Quality Measures Clearinghouse (www.qualitymeasures.ahrq.gov), Physician Quality Reporting Initiative (www.cms.hhs.gov/pqri), and the Joint Commission (<http://www.jointcommission.org>).

38. How many performance measures must be used in a PI CME activity?

The AMA does not specify how many performance measures must be used in a PI CME activity; the number of measures would depend on the purpose of the activity, the identified gaps, the physician’s practice and the patient population. Accredited CME providers may develop a PI CME activity around one or more measures.

39. Could interventions used in Stage B of a PI CME activity include systems improvements such as record-keeping in the office or a tickler system for tracking patients needing the flu vaccine?

Yes. Stage B of the PI CME activity can include a variety of different interventions depending on the evidence-based performance measure(s) addressed and identified gaps of the participants. Examples of interventions include developing a tickler file to remind staff to give the flu vaccine to appropriate patients, tracking forms in patient records, patient education materials, skill-workshops, live activities or enduring materials if the reason for the gap is a lack of knowledge or strategies, etc.

Learning Formats – Internet Point of Care (PoC)

40. What's the difference between PoC and online searching and learning?

An Internet Point-of-Care (PoC) activity is a certified CME activity that is structured by an accredited CME provider and credit is only awarded for completion of a three-stage learning cycle. PoC activities only utilize databases that have been vetted by the accredited CME provider as meeting the requirement for professional, peer-reviewed literature using unbiased search algorithms. The accredited provider must provide clear instructions to the physician on how to access the portal/database, which databases have been vetted for use, how participation will be tracked and how credit will be awarded.

Online searching and learning is not structured by an accredited CME provider as a learning activity and may involve the use of sources that are not professional, peer-reviewed literature. This type of activity is not an AMA approved learning format that may be certified for *AMA PRA Category 1 Credit™*. Physicians may determine that it is appropriate to self-claim as *AMA PRA Category 2 Credit™* for online searching and learning.

41. What is the AMA's expectation of accredited CME providers regarding the vetting of databases for use in PoC?

Accredited CME providers must ensure the databases used in a PoC activity are peer reviewed and scientifically valid. It is the responsibility of the accredited CME provider to oversee the appropriate selection and use of professional, peer-reviewed literature, and ensure that search algorithms are unbiased. Providers should periodically review the chosen databases to ensure that they are still valid.

Awarding Credit

42. May providers award additional credit for time spent completing surveys/evaluations/commitments to change, etc., that are not integrated with a certified CME activity, e.g., at three or six months?

No. The completion of surveys, evaluations, commitments to change, etc. that are not included as part of an educational activity, are not an approved AMA learning format and may not be certified for *AMA PRA Category 1 Credit™*.

43. Are there limits to the amount of *AMA PRA Category 1 Credit™* that physicians can earn during a year for specific learning formats, such as Journal-based CME or Manuscript Review?

No. The AMA places no limits on the amount of credit a physician may earn in any format. There are limits to some of the learning format categories that may be used when applying for the AMA Physician's Recognition Award. These limits may be found on page 12 in the AMA PRA booklet.

Credit Designation Statement

44. What is the correct AMA Credit Designation Statement?

The correct AMA Credit Designation Statement*, which must be written without paraphrasing and be listed separately from accreditation or other statements, is:

The [name of accredited CME provider] designates this [learning format] for a maximum of [number of credits] *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity

*This version is required for all activities that occur or are released on or after July 1, 2011

45. When should the AMA Credit Designation Statement be used?

The AMA Credit Designation Statement must be used in relevant announcement and activity materials and any document that references the number of *AMA PRA Category 1 Credits*[™] for which the activity has been designated.

46. May accredited CME providers modify the required AMA Credit Designation Statement?

No. The AMA Credit Designation Statement must be written without paraphrasing and be listed separately from accreditation or other statements.

The following required AMA Credit Designation Statement must be used in both activity* announcements and any program materials, in both print and electronic formats (e.g. a course syllabus, enduring material publication, landing page of an internet activity), that reference CME credit:

The [name of accredited CME provider] designates this [learning format] for a maximum of [number of credits] *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity

The (s) at the end of *AMA PRA Category 1 Credit(s)*[™] is intended to indicate that providers should make the sentence grammatically correct, e.g. activities would be designated for 1 *AMA PRA Category 1 Credit*[™], 2.5 *AMA PRA Category 1 Credits*[™].

*Activity announcements include all materials, in both print and electronic formats, that are designed to build awareness of the activity's educational content among the target physician audience. The complete AMA Credit Designation Statement must always be used on any document or publication that references the number of *AMA PRA Category 1 Credits*[™] designated for the activity.

A "save the date" announcement (such as a card mailer with limited space) may indicate that the activity has been approved for *AMA PRA Category 1 Credit*[™] without stating an exact number of credits if the accredited CME provider has already certified the activity. This announcement may read, "This activity has been approved for *AMA PRA Category 1 Credit*[™]" or similar language. Accredited CME providers may never indicate that "*AMA PRA Category 1 Credit*[™] has been applied for, is pending, or any similar wording.

47. Why was the AMA credit designation statement changed?

The AMA Credit Designation Statement was modified to clarify to physicians and consumers of credit that it was planned to meet the AMA's requirements for the specific activity type. The new version is required for all certified activities that occur or are released on or after July 1, 2011.

48. What are the learning formats that should be indicated in the AMA credit designation statement?

The AMA Credit Designation Statement is now required to include the learning format of the activity that is designated for credit. The seven approved learning formats are:

1. Live Activity
2. Enduring Material
3. Journal-based CME activity
4. Test Item Writing activity
5. Manuscript Review activity
6. Performance Improvement CME
7. Internet Point-of-Care activity

All activities certified for *AMA PRA Category 1 Credit™* must meet all the requirements for one of these AMA learning formats.

Credit Phrase

49. Must the credit phrase (*AMA PRA Category 1 Credit™*) always be italicized and with the trademark symbol?

Yes. Due to confusion over when the phrase “AMA PRA Category 1 Credit” should be trademarked and italicized, or otherwise set apart, the AMA now requires that the phrase always be trademarked and italicized. Accredited CME providers must always use the complete italicized, trademarked phrase. The phrase “Category 1 Credit” must never be used when referring to *AMA PRA Category 1 Credit™*.

Documentation Requirements

50. Must CME providers use specific language on certificates, transcripts or documentation issued to the physician?

No. The AMA requires that an accredited CME provider must provide documentation to participating physicians of the credit awarded at the request of the physician. The documentation must reflect the number of credits claimed by the physician as well as other required elements but the AMA does not specify the wording that must be used. Please see the next questions for a list of the required elements for this documentation.

The AMA does not require that accredited CME providers issue certificates. The AMA does provide certificate language in the AMA PRA booklet that serves as an example but this language is not mandatory.

CME providers must ensure they do not give non-physicians certificates or transcripts that state or imply the non-physician has been awarded *AMA PRA Category 1 Credit™*.

51. What elements must be included on documentation provided to participating physicians?

Documentation provided to participating physicians must accurately reflect, at a minimum, the following:

- Physician’s name
- Name of accredited CME provider
- Title of activity

- Learning format
- Location of activity (if applicable, e.g. live activities)
- Date(s) of live activity or date that physician completed the activity
- Number of *AMA PRA Category 1 Credits™* awarded

AMA PRA Category 2 Credit™

52. May accredited CME providers certify activities for *AMA PRA Category 2 Credit™*?

No. Providers may not certify any CME activities for *AMA PRA Category 2 Credit™*, nor may they provide documentation or otherwise indicate to a physician that an activity qualifies for such credit. *AMA PRA Category 2 Credit™* activities are entirely self claimed and self documented by a physician.

Organizations may choose to maintain records of physician participation in activities that have not been certified for *AMA PRA Category 1 Credit™* but, since they may not certify or award such credit, should not record them as *AMA PRA Category 2 Credit™*.

53. What are the requirements for *AMA PRA Category 2 Credit™*?

AMA PRA Category 2 Credit™ is self-designated and claimed by individual physicians for participation in activities not certified for *AMA PRA Category 1 Credit™* that:

- Comply with the AMA definition of CME, and
- Comply with the relevant AMA ethical opinions; at the time of this writing this includes 8.061 “Gifts to Physicians from Industry” and 9.011 “Continuing Medical Education,” and
- Are not promotional, and
- A physician finds to be a worthwhile learning experience related to his/her practice.

54. What activities may a physician claim for *AMA PRA Category 2 Credit™*?

AMA PRA Category 2 Credit™ is self-designated and claimed by individual physicians for participation in activities not certified for *AMA PRA Category 1 Credit™* that:

- Comply with the AMA definition of CME; and
- Comply with the relevant AMA ethical opinions; at the time of this writing this includes 8.061 “Gifts to Physicians from Industry” and 9.011 “Continuing Medical Education,” and
- Are not promotional; and
- A physician finds to be a worthwhile learning experience related to his/her practice.

Examples of learning activities that might meet the requirements for *AMA PRA Category 2 Credit™* include, but are not limited to:

- Participation in activities that have not been certified for *AMA PRA Category 1 Credit™*
- Teaching physicians, residents, medical students or other health professionals
- Unstructured online searching and learning (i.e., not Internet PoC)
- Reading authoritative medical literature
- Consultation with peers and medical experts
- Small group discussions
- Self assessment activities
- Medical writing

- Preceptorship participation
- Research
- Peer review and quality assurance participation

A physician must individually assess the educational value for each learning experience in which he or she participates to determine if it is appropriate to claim *AMA PRA Category 2 Credit™*.

Direct Credit

55. What are direct credit activities?

The AMA awards credit directly to physicians for participation in certain activities that have not been developed by an accredited CME provider but that the AMA Council on Medical Education feels are valuable learning experiences. These include:

- Preparing and presenting an original presentation at a live activity that has been certified for *AMA PRA Category 1 Credit™* (if the accredited CME provider has not already awarded credit for this)
- Publishing, as the lead author (first listed), a peer-reviewed article in a journal indexed in the MEDLINE bibliographic database
- Preparing a poster presentation, as the first author, which is included in the published abstracts, at a live activity that is certified for *AMA PRA Category 1 Credit™*
- Obtaining a medically-related advanced degree, such as a masters in public health
- Successful completion of an ABMS member board certification or maintenance of certification process.
- Successful participation in an ACGME accredited residency or fellowship program

With the exception of faculty credit, accredited CME providers must not award credit to physicians for these types of activities; the physician must apply directly to the AMA to be awarded credit for these activities. More information about direct credit can be found at www.ama-assn.org/go/directcredit.
