

PROMOTION, PARITY AND PROGRESS: **SHARED ISSUES. SHARED ACTION.**

Join the AMA in celebrating **Women in Medicine Month**

The American Medical Association (AMA) Women Physicians Congress (WPC) works on issues that concern us all:

- Work/life balance
- Mentorship
- Reentry into practice
- Pay disparity: Gender inequality in physician salaries

Learn how the AMA-WPC provides resources to women in medicine, from educational events to mentor recognition to opportunities for networking and leadership. The AMA-WPC consists of more than 67,000 female members of the AMA working to increase the number and influence of women physicians in leadership roles—and to advocate for and advance the understanding of women's health issues.

Visit the AMA-WPC website at ama-assn.org/go/wpc for updates, downloads and links. Add your voice to the conversation.
