2022 Speakers' candidate interviews

The following candidate interviews were conducted by your speakers May 12-15 upon the request of our House of Delegates. Interviews were recorded in a single take to simulate a live interview. Candidates were invited to make a one minute introductory statement and then presented a series of three or four questions. The recording was stopped at the one minute time limit for each segment. The questions were not shared with the candidates in advance, the same questions were asked of all candidates in a given contest and the questions followed by the candidates’ responses were recorded without delay.
