

Transitional year programs with the most residency positions

In 2019 so far, FREIDA™ users have tallied more than 3.5 million views of medical residency programs. With this collection, we draw from the over 1,630 first-year positions for family medicine and reveal which residency programs offer the most positions.

Rankings are based on FREIDA™ data updated as of Oct. 10, 2019. FREIDA™, the AMA Residency & Fellowship Database®, allows medical students to search for a residency or fellowship from more than 11,000 programs—all accredited by the Accreditation Council for Graduate Medical Education.

Specialty description

Transitional year is an intern experience that many fields require or prefer where the student experiences a global training before beginning residency training. In this training, the graduate would experience both surgical and internal medicine rotations and be well prepared to enter a specialty where a thorough understanding of pathology, physiology and surgical procedures are necessary.
