

Health systems science peer reviewed articles

Enjoy the following sample of articles as we continue to expand this library of peer-reviewed articles.

Principles of teamwork and team science

Ayala N, MacDonnell CP, Dumenco L, Dollase R, George P. A cross-sectional analysis of perceptions of interprofessional education in medical students, *Ann Behav Sci Med Educ.* 2014;20:6-9.

This article describes a longitudinal study examining medical students' attitudes toward other health professions and interprofessional collaboration throughout their four years of medical school training.

Clinical informatics

Banerjee R, George P, Priebe C, Alper E. Medical student awareness of and interest in clinical informatics, *J AM Med Inform Assoc.* 2015;22:e42-e47.

This article describes a study about medical students' attitudes toward clinical informatics (CI) training and careers. A web-based survey was distributed to the students at four allopathic medical schools.

Patient safety

Clay AS, Chudgar SM, Turner KM, et al. How prepared are medical and nursing students to identify common hazards in the intensive care unit?, *Ann Am Thorac Soc.* 2017;14:543-549.

This study explores how often nursing and medical students identify patient safety issues in hospital settings, as well as the differences in individual and team performance.
