The American Medical Association has created resources to help guide physician practices through the successful implementation of telehealth and remote patient monitoring.

**Telehealth Quick Guide**

In an effort to keep our health care workers and patients safe amid the COVID-19 pandemic, the AMA has designed resources to support physicians and practices in expediting the implementation of telemedicine, so care can continue to be provided to those who need it most.

**Telehealth Implementation Playbook**

Telehealth can be used as an alternative to traditional in-person care delivery and, in certain circumstances, can be used to deliver care such as the diagnosis, consultation, treatment, education, care management and self-management of patients.

**Remote Patient Monitoring Implementation Playbook**

Remote patient monitoring (RPM) captures and records patient physiological data outside of the traditional health care environment. RPM provides the opportunity to improve diagnosis and management of chronic disease and engage patients in their own care.

**Telehealth reports & white papers**

**Telehealth impact report 2020 (PDF)**
A comprehensive overview of AMA’s efforts to aggressively expand telehealth advocacy, research and resources to engage key industry stakeholders to better understand key needs around coding, coverage and physician and patient pain points.

**Telehealth impact study: Physician survey (PDF)**

The complete survey focuses on the experiences and attitudes of physicians during the COVID-19 pandemic. The "Research findings" tab within these resources offers a summary.

**AMA digital health care 2016 & 2019 study**

AMA's findings on physicians' motivations & requirements for adopting digital health and adoption & attitudinal shifts from 2016 to 2019.

**Telehealth webinars**

**Telehealth and team-based care: The shift to telemedicine and navigating through potential pitfalls**

Experts discuss the shift to telemedicine in team-based care (TBC) and identify potential pitfalls that can come with the transition.

**Telehealth & team-based care: How to engage support staff to implement team-based care in telehealth**

The webinar explored how to best engage support staff to successfully implement the team-based care (TBC) model in telemedicine.

**Telehealth vendor evaluation, selection and contracting**
