International medical graduate (IMG) physicians represent over 25% of the physician workforce and are a critical part of organized medicine. The IMG Section presents this toolkit to help IMG physicians navigate through the process of practicing medicine in the U.S.

The AMA continues to advocate for IMG physicians, whether currently licensed to practice in the U.S. or seeking licensure and helps to ensure that visa-related issues do not stop their ability to care for patients.

Practicing medicine in the U.S.
A high-level overview of topics ranging from professionalism in the practice of medicine to starting education over in a new country to the pros and cons of practicing medicine in the U.S.

Types of visas & FAQs
In the 2020 academic year, 4,222 IMG physicians from over 100 countries were offered visas to facilitate residency training in different specialties. Different visas have different requirements.

Academic opportunities & scope of practice
IMG physicians face several barriers in their goals and aspirations towards a career in academic medicine.

Finding a residency
The steps needed to obtain a residency program in the U.S.

Mentorship
Definitions, types of mentorship programs, the basics of beginning and maintaining a mentor-mentee relationships and more.

State medical licensure
There are many nuances and other issues which will determine the attainability of an unlimited license to practice medicine in U.S.

Financial planning

Physicians have an opportunity to work with vetted financial professionals who offer interactive, web-based financial planning services.

IMGS toolkit contributors

The toolkit was developed with the assistance of the IMG Section staff and the IMGS Governing Council members.

- Deepak Kumar, MD, chair
- Kamalika Roy, MD, chair-elect
- Ricardo Correa, MD, delegate
- Sabesan Karuppiah, MD, MPH, alternate delegate
- Parth Mehta, MD, MPH, member at-large
- Natalia Solenkova, MD, PhD, member at-large
- Toms Vengaloor Thomas, MD, resident
