Telehealth Immersion Program: Events

Virtual Discussion: Telehealth Immersion Program Session Follow Up Q&A

Ongoing

In follow up to the Telehealth Immersion Program live virtual events, we will be hosting an ongoing virtual discussion thread as a way for participants to continue the conversation with panelists.

To join the discussion, sign up free on the Physician Innovation Network and we invite you to post questions and comments in the discussion thread.

Clinical Case Study: Telehealth for Neurology

June 1, 2022, noon Eastern

In this virtual session, participants will explore telehealth use in neurology. Presentations during this event will highlight current use trends, models of care, available resources, and will deep dive into telehealth use for neurology sub-specialty care including sleep medicine, epilepsy and stroke.

This event is interactive, and participants will have the opportunity to ask questions and engage live with speakers. Looking ahead, presenters will also highlight recognized opportunities for the future.

Neurology speakers:

- Neil Busis, MD, Clinical Professor and Associate Chair, Technology and Innovation, Department of Neurology at NYU Langone Health, Chair Sub-Committee
- Anne Marie Morse, DO, Director, Division of Pediatric Sleep Medicine, and Clinical Associate Professor at Geisinger Commonwealth School of Medicine
- Nassim Zecavati, MD, Director of Epilepsy at the Children’s Hospital of Richmond and an Associate Professor of Neurology at Virginia Commonwealth University

Accelerating Behavioral Health Integration Through Telehealth

Jun 21, 2022, 11 a.m. Eastern

Behavioral health integration (BHI), or the integrated delivery of both behavioral and physical health care, is essential to reaching more individuals who need behavioral health treatment and solving the nation’s growing behavioral health crisis. Appropriately applied, the incorporation of virtual care, among other digital tools, presents a unique opportunity to enhance the effectiveness and accelerate the adoption of BHI.

Join this interactive session to learn more about the opportunities and challenges with incorporating technology to advance more coordinated and equitable behavioral health care. You'll also hear about the practical solutions stakeholders across the health care ecosystem can pursue to advance digitally-enabled BHI. Lastly, the session will feature experts from Penn Medicine and the Department of Veteran Affairs who will discuss their BHI models, how digital tools have been incorporated, and the comprehensive value it has generated.

Speakers:

- Edward Post, MD, PhD, clinical professor at the University of Michigan
- Matthew Press, MD, physician executive of Penn Primary Care, medical director of the Primary Care Service Line, associate professor of medicine at the Hospital of the University of Pennsylvania
- Jared Augenstein, MBA, director, Manatt Health
