Practice innovation strategies: Physician burnout

Physician well-being is influenced by both organizational and individual factors. This collection of AMA STEPS Forward® Practice Innovation Strategies offers proven approaches on how to engage health system leadership, understanding physician burnout and how to address it, and developing a culture that supports physician well-being.

Toolkits?? and playbooks

With a majority of American physicians experiencing some signs of burnout, it is a condition that affects all specialties and all practice settings. AMA's open-access toolkits offer innovative strategies that allow physicians and their staff to address physician burnout and thrive in the health care environment.
