There is significant evidence that supports the work the American Medical Association does to aid physicians and care teams to reduce BP and improve BP control rates across patient populations. The following list of publications should provide valuable resources and highlight the effectiveness of the AMA’s Measure Accurately, Act Rapidly and Partner with Patients (AMA MAP BP™) hypertension quality improvement program, the importance of accurate BP measurement and effective management of hypertension and the need for enhancing health equity and reducing disparities in hypertension control and treatment.

These publications highlight the importance of accurate BP measurement and effective treatment of hypertension to achieve improved BP control in effort to reduce the impact of cardiovascular disease and help improve heart health in U.S. adults with hypertension.

**AMA MAP BP™**

- Measure Accurately, Act Rapidly, and Partner with Patients: An Intuitive and Practical Three-Part Framework to Guide Efforts to Improve Hypertension Control
- Measure Accurately, Act Rapidly, and Partner With Patients (MAP) Improves Hypertension Control in Medically Underserved Patients: Care Coordination Institute and American Medical Association Hypertension Control Project Pilot Study Results
- Improving Hypertension Control in Primary Care With the Measure Accurately, Act Rapidly, and Partner With Patients Protocol
- The PCORnet Blood Pressure Control Laboratory: A Platform for Surveillance and Efficient Trials
Accurate blood pressure measurement

- Lancet Commission on Hypertension Group Position Statement on the Global Improvement of Accuracy Standards for Devices that Measure Blood Pressure
- The Accuracy in Measurement of Blood Pressure Collaborative: Background and Rationale, Policy Statement from the World Hypertension League
- Optimizing Observer Performance of Clinic Blood Pressure Measurement: A Position Statement from the Lancet Commission on Hypertension Group
- Blood Pressure Assessment in Adults in Clinical Practice and Clinic-Based Research: JACC Scientific Expert Panel

Self-Measured Blood Pressure (SMBP)

- Self-Measured Blood Pressure Monitoring at Home: A Joint Policy Statement from the American Heart Association and American Medical Association
- Return on Investment of Self-Measured Blood Pressure Is Associated with Its Use in Preventing False Diagnoses, not Monitoring Hypertension
- Self-Measured Blood Pressure Monitoring Among Adults With Self-Reported Hypertension in 20 US States and the District of Columbia, 2019

Hypertension treatment and control
