

Practice Transformation

AMA's work in practice transformation aims to create the conditions where joy, purpose and meaning are possible for physicians and other health professionals.

About practice transformation

Physician well-being is essential for high-quality patient care. Through the AMA's Practice Transformation framework, we provide guidance to health system leaders on how to create the conditions where joy, purpose and meaning are possible for physicians and care teams.

Five-step process

Through our five-step process (Research, Measure, Act, Recognize, Convene) our evidence-based, field-tested and targeted solutions help guide physicians, care teams and health system leaders on developing and implementing strategies to optimize practice efficiencies, reduce burnout and improve professional well-being.
