Most-viewed residency programs by state

Desired geographic location is an important factor many students consider when choosing residency programs. This past year, FREIDA™ users tallied more than 8.5 million views of medical residency programs, sorting the options with numerous filters. The most-used filter narrows residency programs by state.

With this collection, we reveal the 10 states that were most viewed by FREIDA™ users based on number of programs.

Rankings are based on FREIDA™ data updated from Jan. 1–Dec. 31, 2021. FREIDA™, the AMA Residency & Fellowship Database®, allows medical students to search for a residency or fellowship from more than 12,000 programs—all accredited by the Accreditation Council for Graduate Medical Education.

Most viewed states of 2021

1. New York – 1,134,246 total views
2. California – 739,032 total views
3. Florida – 634,196 total views
4. Pennsylvania – 562,390 total views
5. Illinois – 510,690 total views
