AMA Private Practice Simple Solutions

Overview
AMA Private Practice Simple Solutions are free, open access rapid learning cycles designed to provide opportunities to implement actionable changes that can immediately increase efficiency in private practices.

Each multi-week learning session will be focused on one topic area. Busy private practice physicians can access pre-recorded content presented by subject matter experts at a pace and time that works best for them.

Running concurrently to the releases of the pre-recorded webinars will be a discussion board offering opportunities to interact with fellow cohort members and submit questions to the subject matter experts who oversee the sessions. Post-session surveys will measure the relevance of the topic, adoption of content and impact of the sessions. The surveys will also allow participants to suggest topics to be covered in future sessions.

**Upcoming sessions**

**Jan. 24, 2023 | Telehealth**

**Speakers**

- Stacy Lloyd, MPH, Director of Digital Health & Operations, American Medical Association

**Webinar details**

This Private Practice Simple Solutions session, hosted in collaboration with the AMA Telehealth Immersion Program, is a four-week learning session using the AMA Telehealth Implementation Playbook as a guide and is aimed to support private practices in continuing to leverage telehealth and virtual care to provide patient care. Topics addressed will include platform evaluation and selection, as well as workflow and team-based care optimization.
