AMA Private Practice Simple Solutions

Overview
AMA Private Practice Simple Solutions are free, open access rapid learning cycles designed to provide opportunities to implement actionable changes that can immediately increase efficiency in private practices.

Each multi-week learning session will be focused on one topic area. Busy private practice physicians can access pre-recorded content presented by subject matter experts at a pace and time that works best for them.

Running concurrently to the releases of the pre-recorded webinars will be a discussion board offering opportunities to interact with fellow cohort members and submit questions to the subject matter experts who oversee the sessions. Pre- and post-session surveys will measure the relevance of the topic, adoption of content and impact of the sessions. The surveys will also allow participants to suggest topics to be covered in future sessions.

Details for each session will be added as information becomes available.

**Session: E/M documentation**

An eight-week learning session using the AMA STEPS Forward® E/M Documentation Burden Reduction Toolkit as a guide.

**Recording one: Released July 7 (view recording)**

- Understand guidelines
- Engage key players
