AMA Digital Health Research: 2022 Trends, Takeaways and the Transformation of Care

New AMA digital health research for 2022 shows increased rates of digital health adoption among physicians, provides deep insight into the essential qualities that physicians expect from digital health technologies and illustrates changes during the last six years.

Attend this webinar to learn:

- Adoption trends among physicians—areas of growth, areas of intent, factors influencing physician interest and more.
- Why these insights matter to the digital transformation of health care.

Speakers

- Meg Barron, AMA vice president of digital health innovations
- Leslie Prellwitz, AMA director of CPT® content management and development

When

- Tuesday, Oct. 25, 2022, noon Central
