Subject: RUC Recommendations

Dear Mr. Cavanaugh:

The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2018*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the April 27-May 1, 2016 RUC meeting.

*CPT 2018 New and Revised Codes – May 2016 RUC Submission*

The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 15 new/revised/related family CPT codes at the April 2016 meeting. The RUC submits work value and/or practice expense inputs for 15 new/ revised/related family CPT codes from the April meeting.

- Three codes (Pulmonary Diagnostic Tests) will be resurveyed in October 2016
- Nine codes (Psychiatric Collaborative Care Management and Esophagectomy) were deferred to the October 2016 RUC meeting.

*Existing Services Identified by RUC and CMS for Review*

In addition to the new/revised CPT code submission, the RUC submits recommendations for 78 services identified by the RUC or CMS as potentially misvalued and reviewed at the April 2016 RUC meeting. The RUC recommends work relative values for 52 codes; direct practice expense inputs only for 2 codes; deferral to the October 2016 meeting for 6 codes; deletion of 1 code and 17 codes referred to the CPT Editorial Panel.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,156 potentially misvalued services through objective screening criteria and has completed review of 1,921 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter.*

*Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project*

Time Ratios and Physician Intensity

The RUC continues to have significant concern regarding CMS' recent reliance on time ratio formulas to derive physician work values and requests for the Agency to not employ them when reviewing the enclosed or future RUC recommendations. Time ratios completely disregard the physician intensity involved in performing a service and instead simply distill valuation into a basic formula with the only variable being either the new total physician time or the new intra-service physician time. The rationale behind their usage incorrectly assumes that the per minute physician work intensity originally established was permanent for all services regardless of how or when they were last valued.

Furthermore, inconsistently applying this valuation methodology to only certain services under review creates inherent payment disparities in a payment system which is based on relative valuation. Time ratios also appear to be in opposition to statute Sec. 1848. [42 U.S.C. 1395w-4] (a) (i), which states: The Secretary shall determine a number of work relative value units for the service based on the relative resources incorporating physician time and intensity required in furnishing the service.

**The RUC is increasingly concerned that CMS is eschewing the bedrock principles of valuation within the RBRVS (namely, magnitude estimation, survey data and clinical expertise) in favor of arbitrary mathematical formulas. The RUC urges CMS to continue to value services using the established methodology of magnitude estimation. Relative values should accurately reflect relative resources by incorporating the physician time and intensity required in furnishing each service.**

*Practice Expense Subcommittee*

*Emergent Procedures Pre-Service Clinical Staff Time*

At the January 2016 RUC meeting the Practice Expense (PE) Subcommittee discussed a subset of emergent procedures identified by the Emergent Procedures Workgroup and referred to the PE Subcommittee for review of pre-service clinical staff time in the facility setting only. The PE Subcommittee reviewed the recommendations submitted by the specialties. For the majority of the codes under review the specialties recommended 20 minutes of pre-service clinical staff time in the facility setting. The 20 minutes is divided in the following breakdown of clinical staff time.

	<b>Description of Clinical Activities - 090</b>	Non-emergent standard	Emergent standard
1	Complete pre-service diagnostic and referral forms	5	5
2	Coordinate pre-service surgery services	20	7
3	Schedule space and equipment in facility	8	4
4	Provide pre-service education/obtain consent	20	0
5	Follow-up phone call and prescriptions	7	4
6	Other Clinical Activity	0	0
	<b>TOTAL</b>	<b>60</b>	<b>20</b>

As part of the Emergent Procedures Workgroup's review, they identified 34 services (closed treatment of fracture and CPT code 40650) that have 60 minutes of pre-service clinical staff time in the facility-only setting that involved issues beyond the emergent procedure issue. The Emergent Procedures Workgroup referred these issues to the Relativity Assessment Workgroup (RAW) to review as potentially misvalued at the January 2016 meeting. Specialty societies submitted action plans addressing the appropriateness of site of service, global period, and dominant specialty for these services. At the January 2016 RUC meeting the RAW had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services.

The RAW referred these 34 emergent procedure codes identified back to the PE Subcommittee for review at the April 2016 meeting. The PE Subcommittee reviewed the recommendations submitted by the specialties. For 33 codes the specialties recommended application of the new emergent 090 day global pre-service clinical staff time standard (20 minutes) for the facility setting. Also included is CPT code 28660 a 010 day global that currently has 5 minutes of pre-service clinical staff time in the facility. The RUC agreed with the specialty that this service should have 0 minutes of pre-service clinical staff time in the facility setting. **The 34 emergent procedure code recommendations were reviewed and approved by the RUC.** *The list of codes and recommendations are attached to this letter.*

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed CD are:

- RUC Recommendation Status Report for New and Revised Codes
- RUC Recommendation Status Report for 2,156 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.
- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.
- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the April 2016 RUC meeting.
- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.
- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.
- BETOS Assignment Table: The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change. Starting for the February 2016 submission, the RUC will now include a separate BETOS assignment table to better assist the Agency in assigning these important classifications, based off clinical input.
- Source Code Utilization Crosswalk Table: A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2018 conversion factor increase.
- New Technology List and Flow Chart: In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 527 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

**AMA/Specialty Society RVS Update Committee  
Practice Expense Subcommittee**

**Emergent Procedures Pre-Service Clinical Staff Time Review**

At the April 2016 RUC meeting the PE Subcommittee discussed the following list of 33 90 day globals and 1 010 day global. The RUC recommendations to CMS are listed below:

CPT Code	Code Descriptor	Global	Pre-Service Clinical Staff Time in the Facility Setting Recommendation
21820	Closed treatment of sternum fracture	090	20
23650	Closed treatment of shoulder dislocation, with manipulation; without anesthesia	090	20
24600	Treatment of closed elbow dislocation; without anesthesia	090	20
25675	Closed treatment of distal radioulnar dislocation with manipulation	090	20
26700	Closed treatment of metacarpophalangeal dislocation, single, with manipulation; without anesthesia	090	20
26750	Closed treatment of distal phalangeal fracture, finger or thumb; without manipulation, each	090	20
26755	Closed treatment of distal phalangeal fracture, finger or thumb; with manipulation, each	090	20
26770	Closed treatment of interphalangeal joint dislocation, single, with manipulation; without anesthesia	090	20
27265	Closed treatment of post hip arthroplasty dislocation; without anesthesia	090	20
27762	Closed treatment of medial malleolus fracture; with manipulation, with or without skin or skeletal traction	090	20
27818	Closed treatment of trimalleolar ankle fracture; with manipulation	090	20
27840	Closed treatment of ankle dislocation; without anesthesia	090	20
28660	Closed treatment of interphalangeal joint dislocation; without anesthesia	010	0
23540	Closed treatment of acromioclavicular dislocation; without manipulation	090	20
23625	Closed treatment of greater humeral tuberosity fracture; with manipulation	090	20
23655	Closed treatment of shoulder dislocation, with manipulation; requiring anesthesia	090	20
23665	Closed treatment of shoulder dislocation, with fracture of greater humeral tuberosity, with manipulation	090	20
24505	Closed treatment of humeral shaft fracture; with manipulation, with or without skeletal traction	090	20
24605	Treatment of closed elbow dislocation; requiring anesthesia	090	20
25565	Closed treatment of radial and ulnar shaft fractures; with manipulation	090	20

25605	Closed treatment of distal radial fracture (eg, Colles or Smith type) or epiphyseal separation, includes closed treatment of fracture of ulnar styloid, when performed; with manipulation	090	20
27230	Closed treatment of femoral fracture, proximal end, neck; without manipulation	090	20
27232	Closed treatment of femoral fracture, proximal end, neck; with manipulation, with or without skeletal traction	090	20
27240	Closed treatment of intertrochanteric, peritrochanteric, or subtrochanteric femoral fracture; with manipulation, with or without skin or skeletal traction	090	20
27252	Closed treatment of hip dislocation, traumatic; requiring anesthesia	090	20
27266	Closed treatment of post hip arthroplasty dislocation; requiring regional or general anesthesia	090	20
27502	Closed treatment of femoral shaft fracture, with manipulation, with or without skin or skeletal traction	090	20
27510	Closed treatment of femoral fracture, distal end, medial or lateral condyle, with manipulation	090	20
27550	Closed treatment of knee dislocation; without anesthesia	090	20
27552	Closed treatment of knee dislocation; requiring anesthesia	090	20
27752	Closed treatment of tibial shaft fracture (with or without fibular fracture); with manipulation, with or without skeletal traction	090	20
27810	Closed treatment of bimalleolar ankle fracture (eg, lateral and medial malleoli, or lateral and posterior malleoli or medial and posterior malleoli); with manipulation	090	20
27825	Closed treatment of fracture of weight bearing articular portion of distal tibia (eg, pilon or tibial plafond), with or without anesthesia; with skeletal traction and/or requiring manipulation	090	20
40650	Repair lip, full thickness; vermilion only	090	20

## The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,156 services through 16 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the “new technology” list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining over 2,100 potentially misvalued services accounting for \$39 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,206 services, redistributing nearly \$4 billion. Here are the outcomes for the committee’s review of 2,156 codes:

### Potentially Misvalued Services Project

Source: American Medical Association

### New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 527 services. In September 2010, the re-review cycle began and since then the RUC has recommended 25 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 238 services every September after three years of Medicare claims data is available for each service.

### **Methodology Improvements**

The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

### **Site of Service Anomalies**

The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 13 codes and the RUC will re-review two services in the CPT® 2019 cycle after more data is available.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These four services were referred to CPT and will be reviewed by the RUC for the 2018 Medicare Physician Payment Schedule.

### **High Volume Growth**

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 22 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 23 codes. The RUC submitted 49 recommendations to CMS for services for the 2012-2015 Medicare Physician Payment Schedules. In September 2011, the RUC began review of services after two years of utilization data were collected. The RUC will continue to review the remaining three services after additional utilization data is available.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 57 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC referred seven services to the CPT® Editorial Panel for revision and recommended review of five services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted six codes and the RUC submitted recommendations for 43 services for the 2015-2016 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 21 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC referred ten services to the CPT Editorial Panel for revision and recommended the review of four services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted one code and the RUC submitted recommendations for five services for the 2017 and 2018 Medicare Physician Payment Schedules. The RUC will continue to review the remaining four services after additional utilization data is available.

### **CMS Fastest Growing**

In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 39 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 33 recommendations to CMS for the 2012-2016 Medicare Physician Payment Schedules. The RUC will review the remaining five services after additional utilization data is available.

## **High IWPUT**

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWPUT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWPUT was considered appropriate. The RUC completed review of services under this screen.

## **Services Surveyed by One Specialty – Now Performed by a Different Specialty**

In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

## **Harvard Valued**

### *Utilization over 1 Million*

CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### *Utilization over 100,000*

The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### *Utilization over 30,000*

In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### *Medicare Allowed Charges >\$10 million*

In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > \$10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately \$1

million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### **CMS/Other**

#### *Utilization over 500,000*

In April 2011, the RUC identified 410 codes with a source of “CMS/Other.” CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. “CMS/Other” source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service after additional utilization data is available.

#### *Utilization over 250,000*

In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC referred one service to the CPT® Editorial Panel and submitted 31 recommendations to CMS for the 2015-2017 Medicare Physician Payment Schedules. The RUC will review nine services for the 2018 Medicare Physician Payment Schedule.

### **Bundled CPT® Services**

#### *Reported 95% or More Together*

The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

#### *Reported 75% or More Together*

In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar “groups” to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 125 new and/or revised codes that described the bundles of services. The CPT® Editorial Panel and the RUC are currently working on one service and expect to complete this screen for final implementation in the 2018 Medicare Physician Payment Schedule.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The

Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 162 total codes under review, the CPT® Editorial Panel deleted 50 services and is scheduled to review eight codes in the 2018 cycle. The RUC has submitted 104 code recommendations for the 2014-2018 Medicare Physician Payment Schedules.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions. Of the 37 total codes under review, the CPT Editorial Panel deleted 12 services and is scheduled to review nine codes in the 2018 cycle. The RUC has submitted 16 code recommendations for the 2017 Medicare Physician Payment Schedule.

### **Low Value/Billed in Multiple Units**

CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

### **Low Value/High Volume Codes**

CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

### **Multi-Specialty Points of Comparison List**

CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100 of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### **CMS High Expenditure Procedural Codes**

In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes and will review four codes for the 2017 cycle. The RUC submitted 120 recommendations to CMS for the 2013-2017 Medicare Physician Payment Schedules will review utilization data for one service after additional data is available.

In the Proposed Rule for 2016, CMS requested that the RUC review a list of 118 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of \$10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010. The RUC expanded the list of services to 197 services to include additional codes as part of the family.

The CPT Editorial Panel deleted 15 codes and will review 36 codes for the 2018 cycle. The RUC submitted 88 recommendations to CMS for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining services for 2018.

### **Services with Stand-Alone PE Procedure Time**

In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of \$100,000 or more, include direct equipment inputs that amount to \$100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

### **Pre-Time Analysis**

In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments. The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule.

### **Post-Operative Visits**

#### *010-Day Global Codes*

In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

### *090-Day Global Codes*

In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

### **High Level E/M in Global Period**

In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to ten services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The RUC submitted recommendations for eight services for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining two services for the 2018 Medicare Physician Payment Schedule. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward.

### **Public Comment Requests**

In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

### *Final Rule for 2013*

In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 38 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thorascopic procedures. The RUC submitted recommendations for 28 services for the 2014-2017 Medicare Physician Payment Schedules. The RUC will review two services after additional utilization data is available.

### *Final Rule for 2014*

CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 91 services. The CPT® Editorial Panel deleted 10 services. The RUC submitted recommendations to CMS for 80 services for the 2015-2018 Medicare Physician Payment Schedules and will review one service after additional data is available.

### *Final Rule for 2015*

In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 44 services to include additional codes as part of this family. The CPT Editorial Panel deleted 13 services and will review three additional services. The RUC submitted 28 recommendations for the 2016-2017 Medicare Physician Payment Schedules.

### *Final Rule for 2016*

In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 28 services to include an additional code as part of the family. The RUC referred 17 codes to the CPT Editorial Panel for revision. The RUC submitted eight recommendations for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining three services for the 2018 Medicare Physician Payment Schedule.

### **Other Issues**

In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT<sup>®</sup> Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

### **CMS Requests and RUC Relativity Assessment Workgroup Code Status**

<b>Total Number of Codes Identified*</b>	<b>2,156</b>
<b><i>Codes Completed</i></b>	<b>1,921</b>
Work and PE Maintained	538
Work Increased	177
Work Decreased	693
Direct Practice Expense Revised (beyond work changes)	150
Deleted from CPT <sup>®</sup>	363
<b><i>Codes Under Review</i></b>	<b>235</b>
Referred to CPT <sup>®</sup> Editorial Panel	94
RUC to Review October 2016 and January 2017	117
RUC future review after additional data obtained	24

*\*The total number of codes identified will not equal the number of codes from each screen as some codes have been identified in more than one screen.*

The RUC's efforts for 2009-2015 have resulted nearly \$4 billion for redistribution within the Medicare Physician Payment Schedule.

## *RUC Referrals to CPT Editorial Panel - Incomplete Issues*

00740	<b>Anesthesia for upper gastrointestinal endoscopic procedures, endoscope introduced proximal to duodenum</b>	<a href="#">Screen</a> CMS Request - Final Rule for 2016	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> ASA	<a href="#">CPT Meeting</a> September 2016
-------	---	---	---	---	---

**Background:** In April 2016, an Ad Hoc Anesthesia Workgroup was formed to discuss the issues surrounding these services. The specialty society requested and the Workgroup agreed that CPT codes 00740 and 00810 are too broad in the range of endoscopic procedures covered under each code and should be referred to the CPT Editorial Panel September 29-October 1, 2016 meeting to request a new family of anesthesia codes to describe anesthesia for GI endoscopic procedures. The revised codes will specifically identify those patients undergoing both upper and lower gastrointestinal endoscopic procedures. The RUC recommends CPT codes 00740 and 00810 be referred to CPT to better define these services.

00810	<b>Anesthesia for lower intestinal endoscopic procedures, endoscope introduced distal to duodenum</b>	<a href="#">Screen</a> CMS Request - Final Rule for 2016	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> ASA	<a href="#">CPT Meeting</a> September 2016
-------	---	---	---	---	---

10021	<b>Fine needle aspiration; without imaging guidance</b>	<a href="#">Screen</a> CMS Request - Final Rule for 2016	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> AACE, ASBS, CAP, ES, AAOHNS, ACS	<a href="#">CPT Meeting</a> February 2017
-------	---	---	---	--	--

**Background:** The specialty societies gave two reasons why these codes need to be referred to the CPT Editorial Panel prior to receiving a RUC survey. First, both codes need clarifying language stating that they should be reported per lesion rather than for every pass on the same lesion. Second, CPT code 10022 is reported with 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 75% of the time together and a bundled code solution will be developed. The specialty societies also requested that these two codes be moved to the 2019 CPT cycle, due to the high workload currently involving the societies.

10022	<b>Fine needle aspiration; with imaging guidance</b>	<a href="#">Screen</a> CMS Fastest Growing / CMS High Expenditure Procedural Codes2 / CMS Request - Final Rule for 2016	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> AACE, ACR, ASBS, CAP, ES, SIR	<a href="#">CPT Meeting</a> February 2017
-------	--	--	---	---	--

**Background:** The specialty societies gave two reasons why these codes need to be referred to the CPT Editorial Panel prior to receiving a RUC survey. First, both codes need clarifying language stating that they should be reported per lesion rather than for every pass on the same lesion. Second, CPT code 10022 is reported with 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 75% of the time together and a bundled code solution will be developed. 11100	<b>Biopsy of skin, subcutaneous tissue and/or mucous membrane (including simple closure), unless otherwise listed; single lesion</b>	<a href="#">Screen</a> MPC List / CMS High Expenditure Procedural Codes2	<a href="#">RUC Meeting</a> January 2016	<a href="#">Specialty Society:</a> AAD	<a href="#">CPT Meeting</a> September 2016
-------	--	---	---	---	---

**Background:** Prior to the January 2016 RUC meeting, the specialty society notified the RUC that their survey data displayed a bimodal distribution of responses with more outliers than usual. The specialty explained that the code descriptions do not distinguish between different types of biopsies and thus they would like to bring the biopsy of skin lesion codes back to the CPT Editorial Panel in May 2016 for refinement of the codes. The RUC recommends referring CPT codes 11100 and 11101 to the CPT Editorial Panel. At the May CPT meeting the Editorial Panel requested that the specialty society resubmit a new CCP for September 2016.

## ***RUC Referrals to CPT Editorial Panel - Incomplete Issues***

11101	<b>Biopsy of skin, subcutaneous tissue and/or mucous membrane (including simple closure), unless otherwise listed; each separate/additional lesion (List separately in addition to code for primary procedure)</b>	<u><a href="#">Screen</a></u> Low Value Billed in Multiple Units / CMS High Expenditure Procedural Codes2	<u><a href="#">RUC Meeting</a></u> January 2016	<u><a href="#">Specialty Society:</a></u> AAD	<u><a href="#">CPT Meeting</a></u> September 2016
-------	--	---	--	--	--

**Background:** Prior to the January 2016 RUC meeting, the specialty society notified the RUC that their survey data displayed a bimodal distribution of responses with more outliers than usual. The specialty explained that the code descriptions do not distinguish between different types of biopsies and thus they would like to bring the biopsy of skin lesion codes back to the CPT Editorial Panel in May 2016 for refinement of the codes. The RUC recommends referring CPT codes 11100 and 11101 to the CPT Editorial Panel. 15731	<b>Forehead flap with preservation of vascular pedicle (eg, axial pattern flap, paramedian forehead flap)</b>	<u><a href="#">Screen</a></u> High Level E/M in Global Period	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> ASPS	<u><a href="#">CPT Meeting</a></u> September 2016
-------	---	--	--	---	--

**Background:** In April 2016 the RUC reviewed code 15731 and the specialty society explained that just like the three previous surveys for this procedure, the results indicate the typical patient will have inpatient status (72%) and the typical length of stay will be four days. As in the past, this conflicts with the Medicare utilization data that shows the primary place of service as outpatient hospital. Therefore, the specialty society determined that the code needs to be referred to the CPT Editorial Panel to better differentiate and describe the work of large flaps performed on patients with head and neck cancer who will have inpatient status and be similar to the other procedures in this family. This is in contrast to smaller flaps that may be accomplished in an office or outpatient setting and would be best coded by the adjacent tissue transfer codes. In addition, during the discussion CMS requested that CPT code 15731 be added to the family of codes for the subsequent RUC review. The RUC recommends referral of CPT code 15732 to the CPT Editorial Panel. Additionally, CPT code 15731 will be added as part of the family for review.

15732	<b>Muscle, myocutaneous, or fasciocutaneous flap; head and neck (eg, temporalis, masseter muscle, sternocleidomastoid, levator scapulae)</b>	<u><a href="#">Screen</a></u> Site of Service Anomaly / High Level E/M in Global Period	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> ASPS	<u><a href="#">CPT Meeting</a></u> September 2016
-------	--	---	--	---	--

36516	<b>Therapeutic apheresis; with extracorporeal selective adsorption or selective filtration and plasma reinfusion</b>	<a href="#">Screen</a> CMS Fastest Growing / CMS Request - Final Rule for 2016	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> CAP	<a href="#">CPT Meeting</a> September 2016
-------	--	--	---	---	---

**Background:** CPT code 36516 was identified by Centers for Medicare and Medicaid Services (CMS) as potentially misvalued in the final rule for 2016. At the April 2016 RUC meeting, Therapeutic Apheresis code 36516 was discussed. During the discussion, the Renal Physicians Association (RPA) and the College of American Pathologists (CAP) indicated there is a concern that the service is misplaced within the CPT coding structure and this misplacement may have resulted in recent inaccuracy of coding. Specifically, the service is an extracorporeal therapy that is more akin to dialysis services (CPT codes 90935-90999) than to surgical procedures, and the code may need to reside in the 909XX series of codes within the CPT coding structure. The two specialties plan to submit a code change proposal to CPT that will address CPT code 36516 as well as any others in the coding family that may be impacted by a change. The RUC refers CPT code 36516 to the CPT Editorial Panel.

## *RUC Referrals to CPT Editorial Panel - Incomplete Issues*

---

57240	<b>Anterior colporrhaphy, repair of cystocele with or without repair of urethrocele</b>	<a href="#">Screen</a> Site of Service Anomaly - 2015	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> ACOG	<a href="#">CPT Meeting</a> September 2016
-------	---	--	---	--	---

**Background:** In October 2015, CPT code 57240 was identified in which the Medicare data from 2011-2013 indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. In April 2016, the specialty society indicated they are working with CMS and its contractor NCCI on issues related to the colporrhaphy codes. NCCI instituted edits that prohibit reporting a Cystourethroscopy (CPT code 52000) with these services. The specialty society determined that the most appropriate way to address this issue is through the CPT process. The specialty will submit a CCP for the September 2016 CPT meeting to address these concerns. The RUC recommends 57240, 57250, 57260 and 57265 be referred to the CPT Editorial Panel.

---

57250	<b>Posterior colporrhaphy, repair of rectocele with or without perineorrhaphy</b>	<a href="#">Screen</a> Site of Service Anomaly - 2015	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> ACOG	<a href="#">CPT Meeting</a> September 2016
-------	---	--	---	--	---

**Background:** In October 2015, CPT code 57240 was identified in which the Medicare data from 2011-2013 indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. In April 2016, the specialty society indicated they are working with CMS and its contractor NCCI on issues related to the colporrhaphy codes. NCCI instituted edits that prohibit reporting a Cystourethroscopy (CPT code 52000) with these services. The specialty society determined that the most appropriate way to address this issue is through the CPT process. The specialty will submit a CCP for the September 2016 CPT meeting to address these concerns. The RUC recommends 57240, 57250, 57260 and 57265 be referred to the CPT Editorial Panel.

---

57260	<b>Combined anteroposterior colporrhaphy;</b>	<a href="#">Screen</a> Site of Service Anomaly - 2015	<a href="#">RUC Meeting</a> April 2016	<a href="#">Specialty Society:</a> ACOG	<a href="#">CPT Meeting</a> September 2016

## ***RUC Referrals to CPT Editorial Panel - Incomplete Issues***

63090	<b>Vertebral corpectomy (vertebral body resection), partial or complete, transperitoneal or retroperitoneal approach with decompression of spinal cord, cauda equina or nerve root(s), lower thoracic, lumbar, or sacral; single segment</b>	<a href="#"><u>Screen</u></a> Codes Reported Together 75% or More- Part3	<a href="#"><u>RUC Meeting</u></a>	<a href="#"><u>Specialty Society:</u></a> AAOS, AANS	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	--	--	------------------------------------	---	--

**Background:** In January 2015 the Joint CPT/RUC Workgroup accepted the specialty society's bundling solution for codes 22558 and 63090.

64553	<b>Percutaneous implantation of neurostimulator electrode array; cranial nerve</b>	<a href="#"><u>Screen</u></a> Final Rule for 2015	<a href="#"><u>RUC Meeting</u></a> April 2015	<a href="#"><u>Specialty Society:</u></a> AANS/CNS, AAPMR, ASA, NASS	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	--	--	--	--	--

**Background:** The RUC discussed the confusion that survey respondents experienced valuing this service. The description only states the nerve that the neurostimulator is implanted in, and most respondents completed the survey as if it is performed in the facility setting. The Medicare data conflicts with this site of service, reporting that 65% of the time this service is performed in the physician's office. Additionally the supplies and equipment may be different for the temporary and permanent implantation. The RUC recommends referring CPT code 64553 to the CPT Editorial Panel to better define this service, such as having one code to describe temporary or testing implantation and another code to describe permanent implantation.

64555	<b>Percutaneous implantation of neurostimulator electrode array; peripheral nerve (excludes sacral nerve)</b>	<a href="#"><u>Screen</u></a> High Volume Growth1 / CMS Fastest Growing / Final Rule for 2015	<a href="#"><u>RUC Meeting</u></a> April 2015	<a href="#"><u>Specialty Society:</u></a> AANS/CNS, AAPMR, ASA, NASS	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	---	---	--	--	--

**Background:** The RUC discussed the confusion that survey respondents experienced valuing this service. The description only states the nerve that the neurostimulator is implanted in, and most respondents completed the survey as if it is performed in the facility setting. The Medicare data conflicts with this site of service, reporting that 68% of the time this service is performed in the physician's office. In the Medicaid data it is even higher reporting that 92% of the time it is performed in the physician's office. Additionally the supplies and equipment may be different for the temporary and permanent implantation. The RUC recommends referring CPT code 64555 to the CPT Editorial Panel to better define this service, such as having one code to describe temporary or testing implantation and another code to describe permanent implantation.

75894	<b>Transcatheter therapy, embolization, any method, radiological supervision and interpretation</b>	<a href="#"><u>Screen</u></a> Codes Reported Together 75% or More- Part1	<a href="#"><u>RUC Meeting</u></a> January 2013	<a href="#"><u>Specialty Society:</u></a> ACC, ACR, SIR, SVS	<a href="#"><u>CPT Meeting</u></a>
-------	---	--	--	---	------------------------------------

**Background:** The Workgroup accepts the specialties' recommendation to submit a code change proposal that would address any duplication when this service is reported with 37201 on the same date by the same physician. Previous notes indicated that ACC submitted a CCP for October 2012 CPT related to 75894, creating a new code for a particular cardiac procedure that is currently reported using that code. At the January 2013 RUC meeting the RUC recommended that 75894 be referred to CPT for revision.

75984	<b>Change of percutaneous tube or drainage catheter with contrast monitoring (eg, genitourinary system, abscess), radiological supervision and interpretation</b>	<a href="#"><u>Screen</u></a> Codes Reported Together 75% or More- Part2	<a href="#"><u>RUC Meeting</u></a> October 2012	<a href="#"><u>Specialty Society:</u></a> ACR, SIR	<a href="#"><u>CPT Meeting</u></a>
-------	---	--	--	---	------------------------------------

**Background:** The Joint Workgroup recommends bundling 50392 and 74475, 50393 and 74480, 50394 and 74425, 50398 and 75984 and 50392 by the CPT 2016 cycle.

## ***RUC Referrals to CPT Editorial Panel - Incomplete Issues***

77014	<b>Computed tomography guidance for placement of radiation therapy fields</b>	<a href="#"><u>Screen</u></a> CMS Request - Practice Expense Review / CMS-Other - Utilization over 500,000 / CMS High Expenditure Procedural Codes1 / High Volume Growth3	<a href="#"><u>RUC Meeting</u></a> January 2016	<a href="#"><u>Specialty Society:</u></a> ASTRO, ACR	<a href="#"><u>CPT Meeting</u></a>
-------	---	---	--	---	------------------------------------

**Background:** Revise based on CMS input regarding the radiation oncology services.

92275	<b>Electroretinography with interpretation and report</b>	<a href="#"><u>Screen</u></a> CMS High Expenditure Procedural Codes2	<a href="#"><u>RUC Meeting</u></a> January 2016	<a href="#"><u>Specialty Society:</u></a> AAO, ASRS, AOA (optometry)	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	---	---	--	---	--

**Background:** In January 2016, the specialty society noted that they became aware of inappropriate use of this code for a less intensive version of this test for diagnosis and indications that are not clinically proven and for which less expensive and less intensive tests already exist. The utilization of CPT code 92275 was appropriately low until 2013 when it suddenly increased by 300%. CPT changes are necessary to ensure that the service for which 92275 was intended is clearly described as well as an accurate vignette and work descriptor is developed. The RUC recommends CPT code 92275 be referred to the CPT Editorial Panel. In May 2016 this issue was postponed until September 2016.

95970	<b>Electronic analysis of implanted neurostimulator pulse generator system (eg, rate, pulse amplitude, pulse duration, configuration of wave form, battery status, electrode selectability, output modulation, cycling, impedance and patient compliance measurements); simple or complex brain, spinal cord, or peripheral (ie, cranial nerve, peripheral nerve, sacral nerve, neuromuscular) neurostimulator pulse generator/transmitter, without reprogramming</b>	<a href="#"><u>Screen</u></a> Harvard Valued - Utilization over 100,000 / CMS Request - Final Rule for 2016 / High Volume Growth3	<a href="#"><u>RUC Meeting</u></a> January 2016	<a href="#"><u>Specialty Society:</u></a> AAN, AAPM, NASS, ACO, ACNS, ISIS, AAPMR	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	---	--	--	---	--

**Background:** In January 2016, the specialty societies indicated they have actively worked with the CPT Assistant Editorial Board to alleviate incorrect reporting of these services, however, confusion remains giving the existing code language. The specialty societies indicated that they will revise the code language to more clearly define what is required for one of the parameters to be considered "changed" as well as correct the reporting of simple programming for cranial neurostimulators. The RUC refers 95970 and 95974-95982 to the CPT Editorial Panel for revision. At the May 2016 CPT meeting the Editorial postponed this issue until September 2016.

95974	<b>Electronic analysis of implanted neurostimulator pulse generator system (eg, rate, pulse amplitude, pulse duration, configuration of wave form, battery status, electrode selectability, output modulation, cycling, impedance and patient compliance measurements); complex cranial nerve neurostimulator pulse generator/transmitter, with intraoperative or subsequent programming, with or without nerve interface testing, first hour</b>	<a href="#"><u>Screen</u></a> CMS Request - Final Rule for 2016	<a href="#"><u>RUC Meeting</u></a> January 2016	<a href="#"><u>Specialty Society:</u></a> AAN	<a href="#"><u>CPT Meeting</u></a> September 2016
-------	---	--	--	--	--

-------	---	--	---	---	---

**Background:** In January 2016, the specialty societies requested that the entire family of codes be referred to the CPT Editorial Panel to be revised. The testing practice has been significantly altered by the growth and availability of technology. The current codes do not reflect the multiple standards of practice and therefore result in confusion about how to report the codes. The RUC recommends the entire psychological and neuropsychological testing codes be referred to the CPT Editorial Panel for revision. CMS requested that CPT codes 96101 - 96127 be reviewed as an entire family.

## *RUC Referrals to CPT Editorial Panel - Incomplete Issues*

96567	<b>Photodynamic therapy by external application of light to destroy premalignant and/or malignant lesions of the skin and adjacent mucosa (eg, lip) by activation of photosensitive drug(s), each phototherapy exposure session</b>	<u><a href="#">Screen</a></u> High Volume Growth1 / CMS Fastest Growing / CMS High Expenditure Procedural Codes2	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> AAD	<u><a href="#">CPT Meeting</a></u> September 2016
-------	---	---	--	--	--

**Background:** CPT code 96567 Photodynamic therapy by external application of light to destroy premalignant and/or malignant lesions of the skin and adjacent mucosa (eg, lip) by activation of photosensitive drug(s), each phototherapy exposure session was identified by Centers for Medicare and Medicaid Services (CMS) in the high expenditure services screen. The RUC recommended that this service be removed from the screen because the work RVU=0.00. In the Final Rule for 2016 CMS indicated that the work and practice expense for this service should be reviewed.

In April 2001 CPT code 96567 was reviewed as new technology. The procedure involves application of a photo-sensitizing agent followed by exposure to special ultra-violet light. A survey of 39 dermatologists using this new technology indicated that there was some physician work for this XXX global period procedure. However, upon review of the survey responses, the specialty society concluded that the respondents did not accurately assess the time required by the physician for this procedure using the new technology and included a written recommendation that for the typical patient receiving this procedure, there is no physician work. The RUC agreed that the procedure, using this new technology, does not involve physician work but does involve practice expense direct inputs. Years later the service was nominated to be considered in 2005 Five-Year Review. The final Five-Year Workgroup report indicate that after extensive discussion with the RUC regarding the potential need for further CPT revisions the RUC advised the specialty society that if physician work is part of the code the specialty would need to submit a coding proposal to CPT to clarify the language to include physician work. At that time the specialty decided to instead withdraw the code from the Five-Year Review.

At the April 2016 RUC meeting the specialty society recommended that the service be deferred to the October 2016 RUC meeting in order for a survey of work to be conducted. The specialty explained that in reviewing the service closely, they realized that there is now physician work involved in providing this service. In order to confirm this observation the specialty conducted an informal survey that was sent to a few Dermatologists. The specialty contends that the results confirm that physicians are involved in the actual delivery of care to patients by performing tasks such as: curettage of thick lesions, real time tailoring of the PDT regimen, explaining side effects, and providing post care instructions. A RUC member questioned if any of the aforementioned services were separately billable and the specialty clarified that they are not. The specialty added that there has been no change to the service and that it is not necessary to refer to the code to the CPT Editorial Panel. A RUC member questioned why the specialty would be claiming that there is physician work now, when it was stated by the specialty that the service has not changed and in 2001 the specialty concluded that for the typical patient there is no physicians work as noted above. A RUC member suggested that there may be the need to two separate codes one for a simple procedure that clinical staff can provide and one that is more complex and needs physician involvement. Another RUC member stated that we do not have enough information to determine if the service should or should not go to CPT and ultimately that decision is up to the specialty society. The RUC member continued that this is an unusual service in that it usually is a two encounter service yet it is a single XXX global code. If they are going to survey work for work it is advisable to go to CPT in order to separate this into two codes or at a minimum seek advice from the Research Subcommittee about how to survey for this type of service. The specialty indicated that it would submit a code change application to split code 96567 into two codes—one to describe physician work and one to describe the technical component. The RUC refers CPT code 96567 to the CPT Editorial Panel.

97010	<b>Application of a modality to 1 or more areas; hot or cold packs</b>	<u><a href="#">Screen</a></u> Physical Medicine and Rehabilitation Services	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> APTA, AOTA	<u><a href="#">CPT Meeting</a></u> September 2016
-------	--	--	--	---	--

**Background:** In February 2010, Physical Medicine and Rehabilitation services were first identified through the RUC's High Volume Growth Screen and subsequently by Codes Reported Together 75% of the Time and from CMS via the High Expenditure screen. Since the original identification in 2010, the organizations have maintained that the section of CPT must be updated to describe today's practice, prior to any analysis of valuation. A CPT Workgroup was formed in 2012 to address the coding issues. To date, there has not been any resolution. The specialty societies developed an action plan to describe the work plan moving forward for the Relativity Assessment Workgroup to review at the April 2016 meeting. The Workgroup discussed the timeline and recommends to refer to CPT to bundle 14 modality codes into 3 codes. If no resolution at CPT with development of new codes, specialties should plan to survey existing modality codes at the Jan 2017 RUC meeting.

97036	<b>Application of a modality to 1 or more areas; Hubbard tank, each 15 minutes</b>	<u><a href="#">Screen</a></u> Physical Medicine and Rehabilitation Services	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> APTA, AOTA	<u><a href="#">CPT Meeting</a></u> September 2016
-------	--	--	--	---	--

**Background:** In February 2010, Physical Medicine and Rehabilitation services were first identified through the RUC's High Volume Growth Screen and subsequently by Codes Reported Together 75% of the Time and from CMS via the High Expenditure screen. Since the original identification in 2010, the organizations have maintained that the section of CPT must be updated to describe today's practice, prior to any analysis of valuation. A CPT Workgroup was formed in 2012 to address the coding issues. To date, there has not been any resolution. The specialty societies developed an action plan to describe the work plan moving forward for the Relativity Assessment Workgroup to review at the April 2016 meeting. The Workgroup discussed the timeline and recommends to refer to CPT to bundle 14 modality codes into 3 codes. If no resolution at CPT with development of new codes, specialties should plan to survey existing modality codes at the Jan 2017 RUC meeting.

97110	<b>Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility</b>	<u><a href="#">Screen</a></u> Codes Reported Together 75% or More-Part1 / MPC List / CMS High Expenditure Procedural Codes2	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> AOTA, APTA, AAPM&R	<u><a href="#">CPT Meeting</a></u> February 2017
-------	--	--	--	---	---

**Background:** In April 2016, the Relativity Assessment Workgroup reviewed the timeline submitted in the action plan and recommends the codes 97110 and 97112 be referred to CPT to be bundled into one exercise code.

97112	<b>Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities</b>	<u><a href="#">Screen</a></u> CMS High Expenditure Procedural Codes1 / CMS High Expenditure Procedural Codes2	<u><a href="#">RUC Meeting</a></u> April 2016	<u><a href="#">Specialty Society:</a></u> APTA, AOTA	<u><a href="#">CPT Meeting</a></u> February 2017

## ***RUC Recommendations to Develop CPT Assistant Articles - Incomplete Issues***

17250	<b>Chemical cauterization of granulation tissue (proud flesh, sinus or fistula)</b>	<u><b>Screen:</b></u> High Volume Growth3	<u><b>RUC Meeting:</b></u> January 2016	<u><b>RUC Rec:</b></u> Refer to CPT Editorial Panel and CPT Assistant.	<u><b>Specialty Society:</b></u> AAFP, ACS, APMA	<u><b>CPT Asst Status:</b></u> Sep 2016
-------	---	--	--	---	---	--

**Background:** In October 2015, AMA Staff assembled a list of all services with total Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The RUC review this list and recommends that the specialty societies submit an action plan for January 2016 explaining the high volume growth. In January 2016, the Relativity Assessment Workgroup recommends refer to CPT to revise the descriptor or include a parenthetical regarding appropriately reporting 17250 or 97597 and 97598. Refer to CPT Assistant to describe when to appropriately report 17250 or 97597 and 97598. The Workgroup should review utilization data and who is providing this service in October 2019.

21820	<b>Closed treatment of sternum fracture</b>	<u><b>Screen:</b></u> CMS Request - Final Rule for 2014 / Emergent Procedures	<u><b>RUC Meeting:</b></u> April 2016	<u><b>RUC Rec:</b></u> PE Clinical staff pre-time revised	<u><b>Specialty Society:</b></u> AAOS, ACEP, and orthopaedic subspecialties	<u><b>CPT Asst Status:</b></u> Article submitted to be published Sep or Oct 2016
-------	---	--	--	--	--	---

**Background:** Added as part of 21800 family for Final Rule issue. In October 2015, the Emergent Procedures Workgroup identified 34 services that have 60 minutes of pre-service clinical staff time in the facility-only setting. The Emergent Procedures Workgroup referred these issues to the RAW to review as potentially misvalued. Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of "requiring anesthesia" and "with anesthesia" as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

23540	<b>Closed treatment of acromioclavicular dislocation; without manipulation</b>	<u><b>Screen:</b></u> Emergent Procedures	<u><b>RUC Meeting:</b></u> April 2016	<u><b>RUC Rec:</b></u> PE Clinical staff pre-time revised	<u><b>Specialty Society:</b></u> AAOS, ACEP, and orthopaedic subspecialties	<u><b>CPT Asst Status:</b></u> Article submitted to be published Sep or Oct 2016

Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of "requiring anesthesia" and "with anesthesia" as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services. The Workgroup agreed with the specialty societies that the appropriate providers (emergency medicine and orthopaedic surgery) are reporting these services. The Workgroup noted that the emergency physicians are appropriately appending modifier -54. The specialty societies indicated that for these services that require anesthesia, it is unlikely that some of the specialties indicated in the Medicare utilization data actually perform the service under general anesthesia or regional block. The Workgroup agreed and recommends that the specialty societies develop a CPT Assistant article to reinforce correct coding and modifier use for all fracture codes and guidance on the meaning of "requiring anesthesia" and "with anesthesia" as it relates to restorative fracture care. The CPT Assistant article should also address the issue of restorative care for closed treatment without manipulation. The Workgroup determined that the Practice Expense Subcommittee are revising codes clinical staff time in the facility-only setting pre-time from 60 minutes and implementing a standard change to 20 minutes. The Workgroup refers these 34 emergent procedure codes identified back to the PE Subcommittee to apply this new standard. The Workgroup noted that for these low volume services any additional aberrations will be identified in future screens if applicable and the Workgroup does not need to examine these services further at this time. In April 2016, the PE Subcommittee reviewed this service and recommends 20 minutes of clinical staff pre-service time.

27266	<b>Closed treatment of post hip arthroplasty dislocation; requiring regional or general anesthesia</b>	<u>Screen:</u> Emergent Procedures	<u>RUC Meeting:</u> April 2016	<u>RUC Rec:</u> PE Clinical staff pre-time revised	<u>Specialty Society:</u> AAOS, ACEP, and orthopaedic subspecialties	<u>CPT Asst Status:</u> Article submitted to be published Sep or Oct 2016
-------	--	---------------------------------------	-----------------------------------	---	---	--

**Background:** In October 2015, the Emergent Procedures Workgroup identified 34 services that have 60 minutes of pre-service clinical staff time in the facility-only setting. The Emergent Procedures Workgroup referred these issues to the RAW to review as potentially misvalued. Specialty societies should submit action plans addressing the appropriateness of site of service, global period, and dominant specialty for these services. The RAW will review the action plans in January 2016. The Workgroup had a robust discussion on these codes and determined that the 090 day global period is correct and an efficient bundling of the required services as well as share the same global period for all fracture care services.
