Baltimore, MD 21244-1850

Subject: RUC Recommendations

Dear Mr. Cavanaugh:

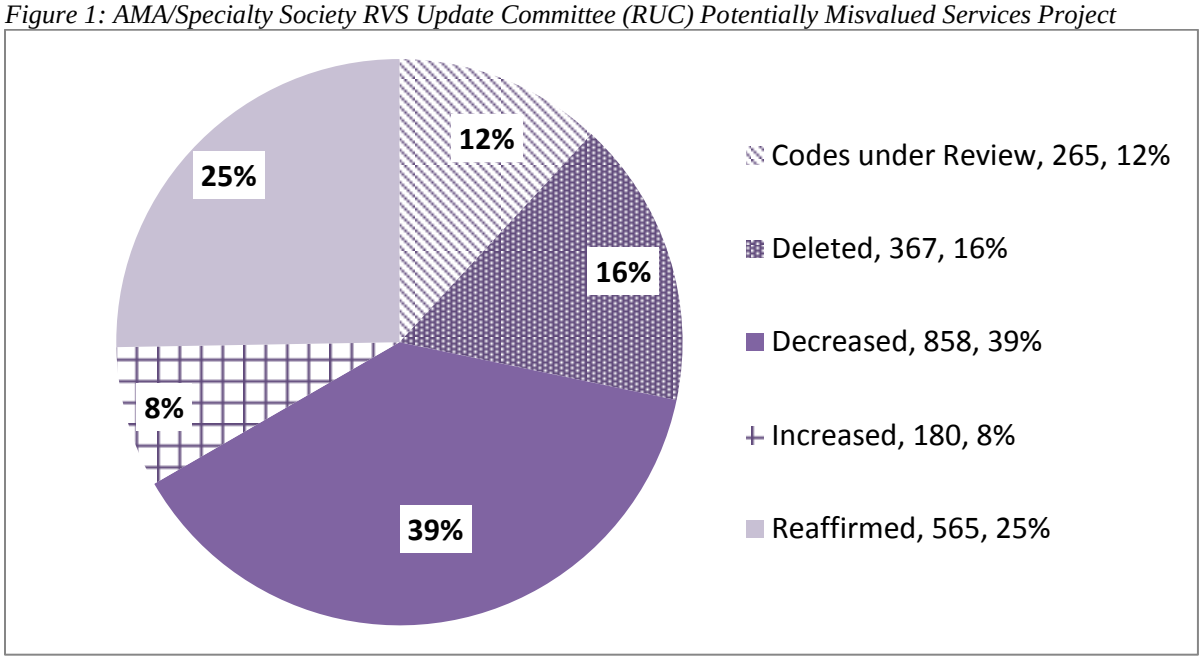
The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2018*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the October 5-8, 2016 RUC meeting.

CPT 2018 New and Revised Codes – *October 2016 RUC Submission*

The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 15 new/revised/related family CPT codes at the October 2016 meeting. The RUC submits work value and/or practice expense inputs for 15 new/ revised/related family CPT codes from the October meeting.

- Four codes (Psychiatric Collaborative Care Management) were deferred to the January 2017 RUC meeting.



Existing Services Identified by RUC and CMS for Review

In addition to the new/revised CPT code submission, the RUC submits recommendations for 58 services identified by the RUC or CMS as potentially misvalued and reviewed at the October 2016 RUC meeting. The RUC recommends work relative values for 47 codes; direct practice expense inputs only for 3 codes; deferral to the January 2017 meeting for 5 codes; and 3 codes referred to the CPT Editorial Panel.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,235 potentially misvalued services through objective screening criteria and has completed review of 1,970 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter.*

Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project

RUC Identified Potentially Misvalued Services

The RUC established a screen to examine services that were established by CMS/Other methodology. These services have not been reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more and identified Physician Recertification codes G0179 and G0180, Home Healthcare Supervision codes 99375, 99378, G0181 and G0182 and Annual Wellness Visit codes G0438 and G0439.

Over several meetings the RUC reviewed the history of these G-codes and recommended that these services be surveyed for physician work and direct practice expense inputs for the October 2016 meeting. These services were placed on the standard level of interest (LOI) form for survey. However, no specialty societies indicated an interest to survey these services, stating they are not potentially misvalued because these are Medicare established codes and CMS has not identified them as potentially misvalued. However, they would surely endorse a RUC survey of this code if identified by CMS as misvalued and requested by the RUC for review.

In the past, specialty societies have conducted RUC surveys and the RUC has provided recommendations on G-codes without the initial identification by CMS. **The RUC is notifying the Agency that it has identified G0179, G0180, 99375, 99378, G0181, G0182, G0438 and G0439 as potentially misvalued, but will not be submitting recommendations for these services due to the lack of specialty society interest.**

Reaffirmation of Previous RUC Recommendations

In the *Notice for Proposed Rulemaking for 2017*, CMS proposes options for Improving Payment Accuracy for Primary Care, Care Management, and Patient-Centered Services. The RUC has previously evaluated and provided recommendations for many non-face-to-face services. **The RUC requests that CMS unbundle these services and implement the previous RUC recommendations for Medicare payment of the following services:**

- Medical Team Conference, CPT codes 99366-99368
- Telephone Services, CPT codes 99441-99443 and 98966-98969
- Education and Training for Patient Self-Management, CPT codes 98960-98962
- Analysis of Computer Transmitted Data, CPT codes 99091
- Interprofessional Consultations, CPT codes 99446-99449

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed CD are:

- RUC Recommendation Status Report for New and Revised Codes

- RUC Recommendation Status Report for 2,235 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.

- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.

- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the October 2016 RUC meeting.

- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.

- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.

- BETOS Assignment Table: The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change. Starting for the February 2016 submission, the RUC will now include a separate BETOS assignment table to better assist the Agency in assigning these important classifications, based off clinical input.

- Source Code Utilization Crosswalk Table: A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2018 conversion factor increase.

- New Technology List and Flow Chart: In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 528 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

We appreciate your consideration of these RUC recommendations. If you have any questions regarding the attached materials, please contact Sherry Smith at (312) 464-5604.

Sincerely,

Peter K. Smith, MD

AMA/Specialty Society RVS Update Committee
Summary of Recommendations

April 2005

Education and Training for Patient Self Management

The CPT Editorial Panel created three new codes to describe educational and training services prescribed by a physician and provided by a qualified, non-physician healthcare professional. There is no physician work associated with these services. The RUC considered recommendations for direct practice expense inputs only. The RUC reviewed inputs for CPT code 98960 *Education and training for patient self-management by a qualified, non-physician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient*, 98961 *2-4 patients* and 98962 *5-8 patients*. **The RUC assessed and modified the practice expense inputs, which are attached to this recommendation.**

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
• 98960	K1	Education and training for patient self-management by a qualified, non-physician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient	XXX	0.00 (PE Inputs Only)
• 98961	K2	2-4 patients	XXX	0.00 (PE Inputs Only)
• 98962	K3	5-8 patients	XXX	0.00 (PE Inputs Only)

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

AMA/Specialty Society Update Process
PERC Summary of Recommendation
XXX Global Period
Non Facility Direct Inputs

CPT Long Descriptor: Education and training for patient self-management by a qualified, non-physician health care professional, e.g. RD or RN, using a standardized curriculum

[Note: The CPT panel approved this generic code set with the intent it would be used by many qualified health care professionals. While the code is 'generic,' there may be instances where the service includes different equipment based on the practitioner's skill set, the patient/client's educational objectives/desired outcomes, and the specific nature of the education and training provided.]

The American Dietetic Association (ADA) and the American Association of Clinical Endocrinologists (AACE) compiled this PE summary of recommendations which represents the "typical" clinical labor time, supplies and equipment performed by clinical endocrinologists and dieticians.

Please provide a brief description of the process used to develop your recommendation and the composition of your Specialty Society Practice Expense Committee:

Both the American Dietetic Association (ADA) and the American Association of Clinical Endocrinologists (AACE) individually convened expert practice expense panels to collect data for the Education and Training codes. Both groups' expert panelists represent a variety of practice settings and geographic locations.

Once each group's data was obtained, ADA and AACE then compiled each group's respective data obtained from the PE expert panel for clinical labor time, supplies and equipment.

CPT Long Descriptor:
Education and training for patient self-management by a qualified, non-physician health care professional e.g. RD or RN, using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes;

98961	Group 2-4
98962	Group 5-8

[Note: The CPT panel approved this generic code set with the intent it would be used by many qualified health care professionals. While the code is 'generic,' there may be instances where the service includes different equipment based on the practitioner's skill set, the patient/client's educational objectives/desired outcomes, and the specific nature of the education and training provided.]

CPT Code: 98960, 98961 and 98962

The American Dietetic Association (ADA) and the American Association of Clinical Endocrinologists (AACE) compiled this PE summary of recommendations, which represents the "typical" clinical labor time, supplies and equipment performed by registered dietitians and clinical endocrinologists' staff.

Please provide a brief description of the process used to develop your recommendation and the composition of your Specialty Society Practice Expense Committee:

Both the American Dietetic Association (ADA) and the American Association of Clinical Endocrinologists (AACE) individually convened expert practice expense panels to collect data for the Education and Training codes. Both groups' expert panelists represent a variety of practice settings and geographic locations.

Once each group's data was obtained, ADA and AACE then compiled each group's respective data obtained from the PE expert panel for clinical labor time, supplies and equipment.

Please describe the clinical activities of your staff:

98960 Disease Education Vignette
Typical Patient: A 35 year-old woman with a symptomatic established illness or disease, e.g. diabetes or asthma, or the desire to delay disease co-morbidities, e.g. cardiovascular co-morbidities, is referred by a physician to a qualified, non-physician health care professional for education/training, eg. RD or RN.

The qualified, non-physician health care professional:
Pre-Service

- Reviews relevant parts of the patient's medical record
- Reviews the physician referral

Intra-Service

- Assesses the individual's psychological, social, environmental factors, lifestyle habits, health literacy, and learning styles;
- Using a standardized curriculum, provides education/training to self-manage the illness/disease, or delay the disease co-morbidities, or use a device;
- Answers the patient's questions as part of the education and training group session

Post-Service

- Establishes a plan for follow-up evaluation and ongoing assessment of outcomes, and communicates to the patient;
- Documents the education/training provided and describes the plan for follow-up

98961 and 98962 Group Education & Training Vignette

Typical Patient: A 60 year-old man with a symptomatic established illness or disease, e.g. diabetes or asthma, or the desire to delay disease co-morbidities, e.g. cardiovascular co-morbidities, is referred by a physician to a qualified, non-physician health care professional, e.g. RD or RN, for group education/training.

The qualified, non-physician health care professional:
Pre-Service

- Reviews relevant parts of the patient's medical record for all patients involved in the group
- Reviews the physician referral for each patient

Intra-Service

- Assesses the groups' psychological, social, environmental factors, lifestyle habits, health literacy, and learning styles;
- Using a standardized curriculum, provides education/training to self-manage the illness/disease, or delay the disease co-morbidities, or use a device;
- Answers the patients' questions as part of the education and training group session

Post-Service

- Establishes a plan for follow-up evaluation and ongoing assessment of outcomes, and communicates to each patient in the group;
- Documents the education/training provided and describes the plan for follow-up education/training for each patient in the group.

AMA/Specialty Society RVS Update Committee
Summary of Recommendations

February and April 2007

Team Conferences

In November 2006, the CPT Editorial Panel created CPT codes 99365 *Medical team conference with interdisciplinary team of health care professionals, face to face with patient and/or family, 30 minutes or more; participation by physician* and 99367 *Medical team conference with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by physician* to differentiate team conferences at which the patient is present and when the patient is not present.

The CPT Editorial Panel also developed new codes corresponding to non-physician services. The RUC reviewed and submitted the following recommendations on the physician (MD/DO) services only. The HCPAC independently reviewed and submitted separate recommendations on the non-physicians services.

The CPT Executive Committee subsequently reconsidered CPT code 99365. Discussions initiated by the RUC process indicated that team conference services by the physician with the patient and/or family present may be reported using appropriate E/M codes. A research of materials from the creation of the E/M codes indicates that the language concerning face-to-face time and counseling and coordination of care appears to have been included so as to address meetings conducted for the purpose of coordinating care. The Executive Committee confirmed that the E/M codes would be appropriate when counseling and coordination of care dominate the service and the patient and/or family is present. It is unlikely any significant number of team conferences would not be for the purpose of counseling and/or coordination of care. The E/M codes have greater flexibility than a single code for a team conference by a physician, patient and/or family present. Therefore, the RUC proposed the CPT code 99365 be rescinded. The introductory text from the team conference section is revised to account for this interpretation by removing other restrictions and referencing E/M. The requirement for direct participation in the care of the patient remains in response to concerns that the E/M codes would be improperly reported when the physician role was simply to attend a conference about the patient. **The CPT Executive Committee recommends that CPT code 99365 be rescinded.**

The RUC reviewed the survey data for 99367 and compared it to its reference code 99374 *Physician supervision of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment* (Work RVU=1.10). The RUC agreed that 99374 was a good reference for the surveyed code as both codes are non-face-to-face services. Although, when comparing the two codes, the RUC noted that 99374 was deemed to be a slightly more intense procedure to perform and had slightly more total service time associated with it as compared to the surveyed code (40 minutes and 34 minutes, respectively), the RUC believed these two codes to be equal in overall work. Therefore, the RUC recommends a

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

work RVU of 1.10 RVUs for 99367 which is a value slightly below the 25th percentile of the survey data. **The RUC recommends 1.10 work RVUs for 99367.**

Practice Expense:
The RUC recommends no practice expense inputs for 99367.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
~~Physician case management is a process in which a physician is responsible for direct care of a patient, and for coordinating and controlling access to or initiating and/or supervising other health care services needed by the patient.~~ Case management is a process in which a physician or another qualified health care professional is responsible for direct care of a patient and, additionally, for coordinating, managing access to, initiating and/or supervising other healthcare services needed by the patient. **Medical Team Conferences** Medical team conferences include face-to-face participation by a minimum of three qualified health care professionals from different specialties or disciplines (each of whom provide direct care to the patient), with or without the presence of the patient, family member(s), community agencies, surrogate decision maker(s) (eg, legal guardian) and/or caregivers(s). The participants are actively involved in the development, revision, coordination and implementation of healthcare services needed by the patient. Reporting participants shall have performed face to face evaluations/treatments of the patient, independent of any team conference, within the previous 60 days. Physicians may report their time spent in a team conference with the patient and/or family present using Evaluation and Management codes and time as the key controlling factor for code selection when counseling and/or coordination of care dominates the service. These introductory guidelines do not apply to services reported using Evaluation and Management codes (see E/M services guidelines). However, the physician must be directly involved with the patient, providing face to face services outside of the conference visit with other providers or agencies. Reporting participants shall document their participation in the team conference as well as their contributed information and subsequent treatment recommendations No more than one individual from the same specialty may report 99365-99368 at the same encounter. Individuals should not report when their participation in the medical team conference is part of a facility or organizational service contractually provided by the organizational or facility provider.				

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
The team conference starts at the beginning of the review of an individual patient and ends at the conclusion of the review. Time related to record keeping and report generation is not reported. The reporting participant shall be present for all time reported. The time reported is not limited to the time that the participant is communicating to the other team members or patient and/or family. Time reported for medical team conferences may not be used in the determination of time for other services such as care plan oversight (99374-99380), home, domiciliary or rest home care plan oversight (99339-99340), prolonged services (99354-99359), psychotherapy, or any Evaluation and Management service. For team conferences where the patient is present for any part of the duration of the conference, report the team conference face-to-face codes.

SUMMARY OF RECOMMENDATION

CPT Code:99367 Tracking Number C3 Specialty Society Recommended RVU: **1.10**
Global Period: XXX RUC Recommended RVU: **1.10**

CPT Descriptor: Medical team conference with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by physician

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A patient with a neurological disorder, weight loss and functional limitations lives at home with a caregiver. The functional limitations include impaired cognition, mobility, communication and dependencies in basic activities of daily living. The condition is such that the problems and functional limitations are likely to be alleviated with appropriate care and therapies. The optimal care plan needs to be devised in a coordinated manner given the multiple domains requiring attention (biomedical, psychological, social and functional) and multiple healthcare professionals involved in the care of the patient. After undergoing evaluations (each reported separately) by the appropriate disciplines/specialties a team conference is convened.

Percentage of Survey Respondents who found Vignette to be Typical: 83%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: Chart review prior to conference.

Description of Intra-Service Work: The conference is attended by the physician and/or non-physician providers.

Description of Post-Service Work: This service includes the individual clinician's post conference creation of documentation of his/her participation in the team conference, including documenting contributed information and treatment recommendations, and review of the care plan for the patient.

Modifier -51 Exempt Status

Is the recommended value for the new/revised procedure based on its modifier -51 exempt status? No

New Technology/Service:

Is this new/revised procedure considered to be a new technology or service? No

KEY REFERENCE SERVICE:

Key CPT Code	Global	Work RVU	Time Source
99374	XXX	1.10	**RUC Time**

CPT Descriptor Physician supervision of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment (eg, Alzheimer's facility) requiring complex and multidisciplinary care modalities involving regular physician development and/or revision of care plans, review of related laboratory and other studies, communication (including telephone calls) for purposes of assessment or care decisions with health care professional(s), family member(s), surrogate decision maker(s) (eg, legal guardian) and/or key caregiver(s) involved in patient's care, integration of new information into the medical treatment plan and/or adjustment of medical therapy, within a calendar month; 15-29 minutes

KEY MPC COMPARISON CODES:

Compare the surveyed code to codes on the RUC's MPC List. Reference codes from the MPC list should be chosen, if appropriate that have relative values higher and lower than the requested relative values for the code under review.

MPC CPT Code 1	Global	Most Recent Medicare Utilization	Work RVU	Time Source
99375	XXX	214,339	1.73	**RUC Time**

CPT Descriptor 1 Physician supervision of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment (eg, Alzheimer's facility) requiring complex and multidisciplinary care modalities involving regular physician development and/or revision of care plans, review of related laboratory and other studies, communication (including telephone calls) for purposes of assessment or care decisions with health care professional(s), family member(s), surrogate decision maker(s) (eg, legal guardian) and/or key caregiver(s) involved in patient's care,

integration of new information into the medical treatment plan and/or adjustment of medical therapy, within a calendar month; 30 minutes or more

MPC CPT Code 2	Global	Most Recent Medicare Utilization	Work RVU	Time Source

CPT Descriptor 2

Other Reference CPT Code	Global	Work RVU	Time Source
99242	XXX	1.34	**RUC Time**

CPT Descriptor Office consultation for a new or established patient, which requires these three components: an expanded problem focused history; an expanded problem focused examination; straightforward medical decision making. Counseling and coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of moderate severity. Physicians typically spend 30 minutes face-to-face with the patient and/or family.

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):

Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

Number of respondents who choose Key Reference Code: 11 **% of respondents:** 47.8 **%**

TIME ESTIMATES (Median)	**CPT Code: 99367**	**Key Reference CPT Code:** 99374	**Source of Time** **RUC Time**

Time Segments (Mean)

Pre-Service intensity/complexity	3.35	2.91
Intra-Service intensity/complexity	3.74	3.22
Post-Service intensity/complexity	3.13	2.91

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

An expert panel was convened with representatives from AGS. AAP, APA, and AAPMR reviewed changes in recommendations and support the AGS changes.

The description of pre service work says: N/A – this did not go to the respondents and the N/A was incorrect – there is chart review involved before the conference – the surveyees thought this took 10 min – our expert panel thought 5 min was sufficient; the description of post-service work, which also did not go to surveyees, incorrectly included some intraservice work. The only post-service work is the last sentence of the post service work description – specifically, documentation of the physicians participation and any management plan, as appropriate and review of the summary report when it comes out. The surveyees estimated that this took 15 min. We believe that the surveyees may have incorrectly assumed that post service work also included a phone call to the patient or preparing the post conference summary. Therefore, our expert panel reduced the post service time to 5 min.

Work RVUs – Our expert panel recommends 1.1 RVUs for 99367 and 1.20 RVUs for X1. The most appropriate comparator code to 99367 is 99374 which was the reference service chosen most often by respondents. Both codes are non-face-to-face codes and the intensity of 99367 is slightly lower than 99374 because multiple physicians are present at the conference and only a single physician performs 99374. 99374 has an intraservice time of 20 min and a total time of 34 minutes while 99367 has an intraservice time of 30 min and a total time of 40 minutes. The recommended work RVU of 1.1, which is identical to 99374, is based on the longer intraservice time and slightly lower intensity of 99367 as compared to 99374. This RVU is below the survey 25th percentile and places the two codes in proper rank order.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) 99361

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty Pediatrics How often? Commonly

Specialty Geriatrics How often? Commonly

Specialty Physical Medicine & Rehabilitation How often? Sometimes

Estimate the number of times this service might be provided nationally in a one-year period? 802000
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty.

Specialty Pediatrics Frequency 200000 Percentage 24.93 %

Specialty Geriatrics Frequency 550000 Percentage 68.57 %

Specialty Physical Medicine & Rehabilitation Frequency 2000 Percentage 0.24 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 538,900 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty.

Specialty Pediatrics Frequency 0 Percentage 0.00 %

Specialty Geriatrics Frequency 522500 Percentage 96.95 %

Specialty Physical Medicine & Rehabilitation Frequency 1400 Percentage 0.25 %

Do many physicians perform this service across the United States? Yes

---

Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? Yes

If no, please select another crosswalk and provide a brief rationale.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical

RUC HCPAC Review Board
Summary of Recommendations

February 2007

Team Conferences

The CPT Editorial Panel created CPT codes 99366 *Medical team conference with interdisciplinary team of health care professionals, face to face with patient and/or family, 30 minutes or more; participation by non-physician qualified health care professional* and 99368 *Medical team conference with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by non-physician qualified health care professional* to differentiate team conferences at which the patient is present and when the patient is not present and differentiate the various healthcare professionals who may participate in the team conference.

The HCPAC reviewed the specialty societies survey results for codes 99366 and 99368. These services are performed by a health care professionals from various professions. Therefore, six different professions were involved in surveying these services to appropriately capture the typical time and work involved. Approximately 160 health care professionals completed the surveys for 99366 and 145 completed surveys for 99368, with median annual service performance rates of 30 and 35, respectively.

The HCPAC thoroughly reviewed the specialty societies survey results and recommendations for codes 99366 *Team Conference, health care professionals, patient present* and 99368 *Team Conference, health care professionals, patent not present*. The HCPAC agreed that 99366 would involve slightly more physician work than 99368 because there is more involvement when the patient and/or family is present. The HCPAC concluded that the survey results were flawed because the survey respondents had overestimated physician time due to the key reference service chosen 99242 *Office consultation for a new or established patient* (work RVU=1.34). CPT code 99242 is not a service typically performed by these health care professionals. The reference service poorly compared to the work and time involved to perform these team conference services. The survey resulted in inappropriately high RVUs compared to other health care professional services and there was not appropriate rationale for the health care professionals' recommended work relative value units.

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

In order to standardized the time to 30 minutes and properly value these team conference services, the HCPAC then performed a weighted average based on the survey median work values per specialty, with an intra-service time of 30 minutes. The weighted RVU for 99366 was calculated as follows:

Weighted Average for 99366

A	B	C	D	E
HCPAC Society	**Proposed Intra-Service Time / Survey Median Intra-Time**	**Column B x Survey Median Work Value**	**Column C x Percentage of Total Respondents**	**Total**
ASHA	30/35 = 0.86	0.86 x 1.13 = 0.97	0.97 x 28% = 0.27	0.27
ADA	30/45 = 0.66	0.66 x 1.37 = 0.91	0.91 x 24% = 0.22	0.22
APA	30/60 = 0.50	0.50 x 1.25 = 0.63	0.63 x 21% = 0.13	0.13
AOTA	30/52.5 = 0.57	0.57 x 1.20 = 0.68	0.68 x 16% = 0.11	0.11
APTA	30/35 = 0.86	0.86 x 1.10 = 0.94	0.94 x 7% = 0.06	0.06
NASW	30/45 = 0.66	0.66 x 1.30 = 0.86	0.86 x 4% = 0.03	0.03
			Weighted RVU =	**0.82**

The weighted average calculation produced a work relative value of 0.82. The HCPAC determined that a 0.82 work RVU was appropriate when compared to commonly reported codes by other health care professionals such as occupational therapists, physical therapists and dieticians. For example, code 97110 *Therapeutic procedure, one or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility* valued at (RVU=0.45) or code 97803 *Medical nutrition therapy; re-assessment and intervention, individual, face-to-face with the patient, each 15 minutes* valued at (RVU=0.37), both which are valued at 15 minute increments. Therefore, if these services are doubled to 30 minutes, for a comparable reference to code 99366, the RVUs equal 0.90 and 0.74 respectively. Thus placing the RVU recommendation of 0.82 for 99366 appropriately relative to similar health care professional services. **The HCPAC recommends a work RVU of 0.82 for code 99366.**

The HCPAC analyzed the survey pre-, intra-, and post-service survey times and determined that these times were too high, relative to similar services performed by health care professionals. The HCPAC compared the surveyed pre/intra/post times to the aforementioned commonly reported codes by other health care professionals, 97110 (2/14/2 minutes) and 97803 (0/15/0 minutes). If these 15 minute timed reference codes are doubled to adequately compare this 30 minute service, the times of 5/30/5 for 99366 and 99368 are appropriate. Additionally, these timed codes state 30 minutes or more in the code descriptor and the HCPAC felt that 30 minutes intra-service time appropriately measured the intensity and complexity involved in performing these services. **The HCPAC recommends a pre-service time of 5 minutes, intra-service time of 30 minutes, and immediate post-service time of 5 minutes for 99366.**

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

The HCPAC analyzed the specialty societies survey data for code 99368 *Team Conference, health care professionals, patent not present*. The HCPAC determined to crosswalk the percentage difference of the survey recommended RVU with the final recommended RVU for code 99366 (0.82/1.25) and apply this percentage difference to the survey recommended RVU to establish an appropriate rank order. The resulting work RVU recommendation is 0.72. **The HCPAC recommends a pre-service time of 5 minutes, intra-service time of 30 minutes, and immediate post-service time of 5 minutes for 99368. The HCPAC recommends a work RVU of 0.72 for code 99368.**

Practice Expense

The HCPAC reviewed the practice expense associated with 99366 and determined that typically when a patient is present they are greeted and receive a educational booklet. However, there are at least three health care professionals involved, so the greet time and one booklet are divided by 3 to apportion between providers who will all bill for this service. The HCPAC recommends less than one minute of greeting the patient (0.33 minutes, 1 minute of meet and greet time divided by 3 health care professionals). The HCPAC determined that a blended RN/LPN/MTA clinical labor mix typically provides the greeting. Additionally, the HCPAC recommends 1/3 or 0.33 of a patient education booklet as part of the medical supplies for code 99366. The HCPAC determined that there is no practice expense associated with code 99368.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
~~Physician case management is a process in which a physician is responsible for direct care of a patient, and for coordinating and controlling access to or initiating and/or supervising other health care services needed by the patient.~~ Case management is a process in which a physician or another qualified health care professional is responsible for direct care of a patient and, additionally, for coordinating, managing access to, initiating and/or supervising other healthcare services needed by the patient. **Medical Team Conferences** Medical team conferences include face-to-face participation by a minimum of three qualified health care professionals from different specialties or disciplines (each of whom provide direct care to the patient), with or without the presence of the patient, family member(s), community agencies, surrogate decision maker(s) (eg, legal guardian) and/or caregivers(s). The participants are actively involved in the development, revision, coordination and implementation of healthcare services needed by the patient. Reporting participants shall have performed face to face evaluations/treatments of the patient, independent of any team conference, within the previous 60 days.				

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
Reporting participants shall document their participation in the team conference as well as their contributed information and subsequent treatment recommendations. No more than one individual from the same specialty may report 99365-99368 at the same encounter. Individuals should not report when their participation in the medical team conference is part of a facility or organizational service contractually provided by the organizational or facility provider. The team conference starts at the beginning of the review of an individual patient and ends at the conclusion of the review. Time related to record keeping and report generation is not reported. The reporting participant shall be present for all time reported. The time reported is not limited to the time that the participant is communicating to the other team members or patient and/or family. Time reported for medical team conferences may not be used in the determination of time for other services such as care plan oversight (99374-99380), home, domiciliary or rest home care plan oversight (99339-99340), prolonged services (99354-99359), psychotherapy, or any Evaluation and Management service. For team conferences where the patient is present for any part of the duration of the conference, report the team conference face-to-face codes. (When evaluation and management services are performed separate from the team conference, the appropriate E/M service may be reported with modifier 25)

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: Typical Patient - A patient with a neurological disorder, weight loss and functional limitations lives at home with a caregiver. The functional limitations include impaired cognition, mobility, communication and dependencies in basic activities of daily living. The condition is such that the problems and functional limitations are likely to be alleviated with appropriate care and therapies. The optimal care plan needs to be devised in a coordinated manner given the multiple domains requiring attention (biomedical, psychological, social and functional) and multiple healthcare professionals involved in the care of the patient. After undergoing evaluations (each reported separately) by the appropriate disciplines/specialties a team conference is convened.

Percentage of Survey Respondents who found Vignette to be Typical: 79%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The non-physician providers gather data and review the patient's chart and other pertinent information to prepare for the team consultation. Documentation and records from the individual provider is also collected and reviewed for the team consultation

Description of Intra-Service Work: The conference is attended by the non-physician and/or physician providers and the patient/patient's family member(s). After discussion, the group devises and approves a plan which includes specified goals, use of medical, nutrition and rehabilitative services and referral to community support services. All participants are engaged in the development, review and formulation of the care plan for the patient. Patient/patient's family member(s) receive educational brochure pertinent to the care plan.

Description of Post-Service Work: A summary report is written and made available to all participants and patient/patient's caregiver but its generation/compilation are reported separately.

Follow-up phone call to the patient/patient's family member(s) to assess understanding and implementation of the patient care plan.

This service does include the individual clinician's post conference creation of documentation of his/her participation in the team conference, including documenting contributed information and treatment recommendations, and review of the care plan for the patient.

Modifier -51 Exempt Status

Is the recommended value for the new/revised procedure based on its modifier -51 exempt status? No

New Technology/Service:

Is this new/revised procedure considered to be a new technology or service? No

KEY REFERENCE SERVICE:

Key CPT Code	Global	Work RVU	Time Source
99242	XXX	1.34	**RUC Time**

CPT Descriptor Office consultation for a new or established patient, which requires these three key components: an expanded problem focused history; an expanded problem focused examination; and straightforward medical decision making. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low severity. Physicians typically spend 30 minutes face-to-face with the patient and/or family.

KEY MPC COMPARISON CODES:

Compare the surveyed code to codes on the RUC's MPC List. Reference codes from the MPC list should be chosen, if appropriate that have relative values higher and lower than the requested relative values for the code under review.

MPC CPT Code 1	Global	Most Recent Medicare Utilization	Work RVU	Time Source
99243	XXX	4,897,411	1.88	**RUC Time**

CPT Descriptor 1 Office consultation for a new or established patient, which requires these three key components: a detailed history; a detailed examination; and medical decision making of low complexity. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of moderate severity. Physicians typically spend 40 minutes face-to-face with the patient and/or family.

MPC CPT Code 2	Global	Most Recent Medicare Utilization	Work RVU	Time Source

CPT Descriptor 2

Other Reference CPT Code	Global	Work RVU	Time Source
99374	XXX	1.10	**RUC Time**

CPT Descriptor Physician supervision of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment (eg, Alzheimer's facility) requiring complex and multidisciplinary care modalities involving regular physician development and/or revision of care plans, review of subsequent reports of patient status, review of related laboratory and other studies, communication (including telephone calls) for purposes of assessment or care decisions with health care professional(s), family member(s), surrogate decision maker(s) (eg, legal guardian) and/or key caregiver(s) involved in patient's care, integration of new information into the medical treatment plan and/or adjustment of medical therapy, within a calendar month; 15-29 minutes

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):
Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

Number of respondents who choose Key Reference Code: 49 **% of respondents:** 30.8 **%**

TIME ESTIMATES (Median)	**CPT Code: 99366**	**Key Reference CPT Code:** 99242	**Source of Time Harvard Time**

Outcome depends on the skill and judgment of physician	3.98	3.82
Estimated risk of malpractice suit with poor outcome	2.82	2.78

INTENSITY/COMPLEXITY MEASURES	CPT Code	Reference Service 1

Time Segments (Mean)

Pre-Service intensity/complexity	3.12	3.04
Intra-Service intensity/complexity	3.98	3.92
Post-Service intensity/complexity	3.35	3.29

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

After completing a convenience survey among HCPAC (non-physician) society providers (159 responses obtained), an expert panel (including APA, APTA, AOTA, ASHA, NASW and ADA) was convened to review and determine final work RVU recommendations for team conference codes 993699366 and 99368. After noting similarities in the reference service code and work RVU proposed values across all of these societies, the HCPAC societies contacted the physician groups who surveyed the team conference codes 993699365 and 99367 (AAP, APA, AGS and AAPMR) to review and discuss the work RVU recommendations.

While the HCPAC and physician groups have different experiences with completing the AMA work surveys, based on the collective number of survey responses and similar data across all groups, the work RVU data was merged. The HCPAC and physician panel agreed on the survey median work RVU of 1.34 for 99366 and 99365. This decision was based on the expert panel's agreement that the work effort is the same regardless of provider type who participates in the team conference. The 1.34 work RVU for 99366 is further supported based on the HCAPC survey data indicating the service involves 45 minutes intra-service time, longer than many of the intra-services times for codes included on the reference service list.

Additionally, the panel felt 99365 and 99366 include more intense work effort than 99367 and 99368 since the patient and/or family member are present during the team conference. A dynamic, highly engaged conference is required to plan and implement the care plan with the patient and family member(s). In the 99365 and 99366 work effort, the healthcare provider(s) translate clinical information in layman's terms for increased comprehension by the family/patient, respond to the family/patient questions, incorporate new information from the family/patient

into the decision-making process, and adjust the care plan based on new information and family/patient input. All these activities increase the healthcare provider's work effort. The recommended work value is also supported by the complexity of the patient/patient's condition that requires active participation of at least 3 healthcare providers who participate on the team conference.

The expert panel feels the recommended work RVU of 1.34 for team conference codes 99366 and 99365 places these codes in correct rank order with the reference service code (99242; work RVU 1.34) as well as other E/M codes. The panel reviewed E/M codes which represent much less time with the patient- 99214 (work RVU 1.42 for 25 minutes) and 99213 (work RVU = 0.92 for 15 minutes). The panel feels the recommended work value for 99366 and 99365 represents correct rank order based on this E/M code review.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) 99361 however this code does not match the new description of 9936X2

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty ADA and ASHA	How often? Commonly
Specialty APTA and AOTA	How often? Commonly
Specialty APA and NASW	How often? Commonly

Estimate the number of times this service might be provided nationally in a one-year period? 100000
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty.

Specialty ADA and ASHA	Frequency 33333	Percentage 33.33 %
Specialty APTA and AOTA	Frequency 33333	Percentage 33.33 %
Specialty APA and NASW	Frequency 33333	Percentage 33.33 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 100,000 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty.

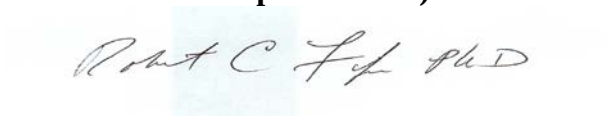
Specialty ADA and ASHA	Frequency 33333	Percentage 33.33 %
Specialty APTA and AOTA	Frequency 33333	Percentage 33.33 %
Specialty APA and NASW	Frequency 33333	Percentage 33.33 %

Do many physicians perform this service across the United States? Yes

---

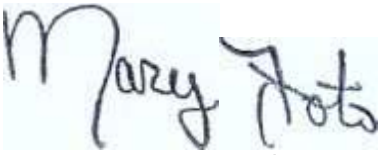
Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? No



If no, please select another crosswalk and provide a brief rationale. 97110 (times 2) or 97803 (times 2) or a blend of these two codes.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical



---

Attestation Statement

As a RUC Advisor, I attest that the integrity of the RUC survey and summary of recommendation forms are based on accurate and complete data to the best of my knowledge. As a RUC Advisor, I acknowledge that violations would be addressed by the executive committee (i.e., RUC Chair, AMA Representative and Alternate AMA Representative).

Robert C. Fifer, PhD, CCC-A; American Speech-Language Hearing Association

Mary Foto, OTR; American Occupational Therapy Association

James Georgoulakis, PhD; American Psychological Association

Doris F. Tomer MSW, LCSW; National Association of Social Workers

Jane White, PhD, RD, FADA; American Dietetic Association

Erik Van Doorne, PT; American Physical Therapy Association

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:99368 Tracking Number C4 Specialty Society Recommended RVU: **1.30**
Global Period: XXX RUC Recommended RVU: **0.72**

CPT Descriptor: Medical team conference with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by non-physician qualified health care professional

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: Typical Patient - A patient with a neurological disorder, weight loss and functional limitations lives at home with a caregiver. The functional limitations include impaired cognition, mobility, communication and dependencies in basic activities of daily living. The condition is such that the problems and functional limitations are likely to be alleviated with appropriate care and therapies. The optimal care plan needs to be devised in a coordinated manner given the multiple domains requiring attention (biomedical, psychological, social and functional) and multiple healthcare professionals involved in the care of the patient. After undergoing evaluations (each reported separately) by the appropriate disciplines/specialties a team conference is convened.

Percentage of Survey Respondents who found Vignette to be Typical: 74%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The non-physician providers gather and review the patient's chart and other pertinent information to prepare for the team consultation. Documentation and records from the individual provider is collected and reviewed for the team consultation

Description of Intra-Service Work: The conference is attended by the non-physician and/or physician providers. After presentation of the case, all providers present their findings and recommendations. After discussion, the group devises and approves a plan which includes specified goals, use of medical, nutrition and rehabilitative services and referral to community support services. All participants are engaged in the development, review and formulation of the care plan for the patient.

Description of Post-Service Work: A summary report is written and made available to all participants and patient/patient's family but its generation/compilation are reported separately. A patient brochure regarding the care plan is also provided separately to the patient/patient's family member(s).

Follow-up phone call to the patient/patient's caregiver assess understanding and implementation of the patient care plan.

This service does include the individual clinician's post conference creation of documentation of his/her participation in the team conference, including documenting contributed information and treatment recommendations, and review of the care plan for the patient.

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

After completing a convenience survey among HCPAC (non-physician) society providers (144 responses obtained), an expert panel (including APA, APTA, AOTA, ASHA, NASW and ADA) was convened to review and determine final work RVU recommendations for team conference codes 99366 and 99368. After noting similarities in the reference service code and work RVU proposed values across all of these societies, the HCPAC societies contacted the physician groups who surveyed the team conference codes 99365 and 99367 (AAP, APA, AGS and AAPMR) to review and discuss the work RVU recommendations.

While the HCPAC and physician groups have different experiences with completing the AMA work surveys, based on the collective number of survey responses and similar data across all groups, the work RVU data was merged. The HCPAC and physician panel agreed on the survey median work RVU of 1.30 for 99368 and 99367. This decision was based on the expert panel's agreement that the work effort is the same regardless of provider type who participates in the team conference.

The 1.30 recommended work value demonstrates rank order between 993899366 and 99368 where 99368 has a lower work RVU since the patient and/or family member are not present during the team conference. Survey data supports the lower value for 99368 with an intra-service time of 30 minutes compared to 99366 intra-service time of 45 minutes.

The HCPAC and physician expert panel feels the recommended work RVU of 1.30 for team conference codes 99368 and 99367 places these codes in correct rank order with other reference service codes that have lower pre-, intra- and post service times (99379 work RVU 1.10, and 99374 work RVU 1.10). Rank order for the proposed 99368 and 99367 RVU of 1.30 is also supported through the expert panels' review of E/M codes 99213 and 99214; both represent less time with the patient (99213 work RVU 0.92 for 15 minutes and 99214 work RVU 1.42 for 25 minutes).

The recommended work value is also supported by the complexity of the patient/patient's condition that requires active participation of at least 3 healthcare providers who participate on the team conference. The conferences are 30 minutes or more, requiring interpretation of the multi-disciplinary clinical findings and spontaneous decision making to formulate the care plan.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) 99361

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty ADA and ASHA	How often? Commonly
Specialty APTA and AOTA	How often? Commonly
Specialty APA and NASW	How often? Commonly

Estimate the number of times this service might be provided nationally in a one-year period? 100000
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty.

Specialty ADA and ASHA	Frequency 33333	Percentage 33.33 %
Specialty APTA and AOTA	Frequency 33333	Percentage 33.33 %
Specialty APA and NASW	Frequency 33333	Percentage 33.33 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 100,000 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty.

Specialty ADA and ASHA	Frequency 33333	Percentage 33.33 %
Specialty APTA and AOTA	Frequency 33333	Percentage 33.33 %
Specialty APA and NASW	Frequency 33333	Percentage 33.33 %

Do many physicians perform this service across the United States? Yes

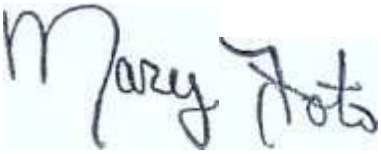
---

Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? No

If no, please select another crosswalk and provide a brief rationale. 97110 (times 2) or 97803 (times 2) or a blend of these two codes.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical



---

Attestation Statement

As a RUC Advisor, I attest that the integrity of the RUC survey and summary of recommendation forms are based on accurate and complete data to the best of my knowledge. As a RUC Advisor, I acknowledge that violations would be addressed by the executive committee (i.e., RUC Chair, AMA Representative and Alternate AMA Representative).

PERC Summary of Recommendation
XXX Global Period
Non Facility Direct Inputs

CPT Long Descriptor: Medical Team Conference with interdisciplinary team of health care professionals, face-to-face with patient and/or family, 30 minutes or more; participation by non-physician qualified health care professional.

An expert consensus panel was used to develop direct practice expense inputs for the team conference code 99366. The expert panel included HCPAC representatives from American Physical Therapy Association; American Psychological Association; American Speech, Language, and Hearing Association and the American Dietetic Association. These groups based their discussions on PE data obtained from the respective group's members.

Please describe the clinical activities of your staff:

Pre-Service Clinical Labor Activities:
None

Intra-Service Clinical Labor Activities:
The clinical staff person greets the patient and/or family member(s) and takes them to the conference room.

Post-Service Clinical Labor Activities:
None.

Supplies: (see PERC spreadsheet)
One patient education booklet

DATE: January 9, 2007

TO: William Rich, MD
Chair, AMA/Specialty Society RVS Update Committee

FROM: The American Occupational Therapy Association; American Physical Therapy Association; American Psychological Association; American Speech, Language, and Hearing Association; National Association of Social Workers, and the American Dietetic Association

Re: Direct Practice Expense Inputs for Code 99368 (team conference code without patient/family member present; Tracking Code C4)

Dear Dr Rich:

Code 99368 (*Medical team conference with interdisciplinary team of health care professionals, patient and/or family not present, 30 minutes or more; participation by non-physician qualified health care professional*) is one of the team conference codes being considered at the February 2007 RUC meeting.

The American Occupational Therapy Association; American Physical Therapy Association; American Psychological Association; American Speech, Language, and Hearing Association; National Association of Social Workers, and the American Dietetic Association convened an expert panel to review direct practice expense for this code, 99368, and 99366. The panel determined there is no direct practice expense for 99368 in either the facility or non-facility setting.

If you have any questions, please contact Pam Michael, MBA, RD, American Dietetic Association staff, at 312-899-4747 or PMichael@eatright.org. Thank you.

AMA/Specialty Society RVS Update Committee
Summary of Recommendations

February 2007

Non Face-to-Face Physician Services

The CPT Editorial Panel created four new codes describing Evaluation and Management services performed by a physician via telephone or on-line. Typically these calls involve the physician obtaining a history of the patient, assessing the patient's condition, making a medical decision and communicating that decision via the phone/e-mail to the patient. Over the last two decades medicine has seen the rapid increase of medical information and communications technology. Combined with changing consumer and health plan expectations for enhanced access to care, a new focus on chronic disease management and continued pressure to reduce the codes of medical services, physicians are providing more care to patients in a "non-face-to-face" manner. Additionally, these services describe physician work that is currently not captured in any other CPT codes.

The CPT Editorial Panel also developed new codes corresponding to non-physician services. The RUC reviewed and submitted the following recommendations on the physician (MD/DO) services only. The HCPAC independently reviewed and submitted separate recommendations on the non-physicians services.

The RUC reviewed the specialty societies' survey results for codes 99441-99444 *Telephone and Online Evaluation and Management services.* Physicians from various specialties perform these services. Therefore, seven different specialties were involved in surveying these services to appropriately capture the typical physician time and work involved. Approximately 500 physicians completed the surveys for 99441-99443, with median annual service performance rates of 190, 100, and 35, respectively. Additionally, 150 physicians completed the survey for code 99444 *Online Evaluation and Management*, indicating a median annual performance rate of 10.

99441
The RUC reviewed the specialty societies survey results for code 99441 *Telephone Evaluation and Management, 5-10 minutes of medical discussion* and thoroughly discussed the physician time and work involved in this service. The RUC determined that the physician time for 99441 was slightly lower than the survey reference service code 99212 *Office or other outpatient visit for the Evaluation and Management of an established patient* (RVU=0.45, 2 minutes pre-, 10 minutes intra- and 4 minutes post-service time). The presenting specialty societies and the RUC agreed that the physician work for code 99441 should be lower than the survey

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

reference code 99212 but slightly higher than 99211 *Office or other outpatient visit for the Evaluation and Management of an established patient, that may not require the presence of a physician* (RVU=0.17, 5 minutes intra-service and 2 minutes post-service time). The RUC determined that using a magnitude estimation of 150% of the work RVUs for code 99211 would appropriately place 99441 in the proper rank order within the Evaluation and Management services family (0.17 x 150% = 0.25**). The RUC recommends a work RVU of 0.25 for code 99441. The RUC recommends 1 minute pre-service, 8 minutes intra-service and 4 minutes post-service time for code 99441.**

99442 and 99443

The RUC reviewed the specialty societies survey results for codes 99442 *Telephone Evaluation and Management, 11-20 minutes of medical discussion* and 99443 *Telephone Evaluation and Management, 21-30 minutes of medical discussion* and thoroughly discussed the physician time and work involved in these services. The RUC determined that the RVU presented by the specialty societies for 99442, the 25th percentile work relative value of 0.60, was slightly high in relation to the RUC recommended value for 99441 (0.25 RVUs). The presenting specialty societies and the RUC agreed using a magnitude estimation for 99442 and 99443 would be appropriate to properly values these services within the Evaluation and Management family of services. The RUC determined that 99442 would be twice the recommended value for 99441 (0.25 x 2 = 0.50). Additionally, the RUC determined that 99443 would be three times the recommended value for 99441 (0.25 x 3 = 0.75). **The RUC recommends a work RVU of 0.50 for code 99442 and 1 minute pre-service, 15 minutes intra-service and 5 minutes post-service physician time. The RUC recommends a work RVU of 0.75 for code 99443 and 1 minute pre-service, 25 minutes intra-service and 10 minutes post-service physician time.**

99444

The RUC discussed code 99444 *Online Evaluation and Management* and concluded that the definition of work and physician time and complexity involved in this service were unclear, therefore making it difficult to recommend a specific work relative value. The specialty societies agreed and recommended that code 99444 be carrier-priced. The specialty societies indicated that they will bring this code back to CPT in order to develop a clearer definition of this service. **The RUC recommends that code 99444 be carrier-priced for CY 2008.**

Practice Expense

The PERC and RUC reviewed the direct practice expenses for 99441-99443 and slightly modified the conduct phone calls/call in prescriptions by the RN/LPN/MTA from 4 to 3 minutes and "other clinical activity" to zero. The presumption was that the typical service would include the clinical staff calling in a prescription. **The RUC recommends the modified practice expense as attached.**

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

New Technology and New Physician Work

The RUC recommends that codes 99441-99443 be added to the new technology list to review potential changes in valuation after experience in reporting of these services has occurred. Additionally, the RUC recommends that these services involve new physician work not currently compensated within the physician payment system.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
Telephone services are non-face-to-face E/M services provided by a physician to a patient using the telephone. These codes are used to report episodes of care by the physician initiated by an established patient or guardian of an established patient. If the telephone service ends with a decision to see the patient within 24 hours or next available urgent visit appointment, the code is not reported; rather the encounter is considered part of the preservice work of the subsequent E/M service, procedure and visit. Likewise if the telephone call refers to an E/M service performed and reported by the physician within the previous seven days (either physician requested or unsolicited patient follow-up) or within the period of the previously completed procedure, then the service(s) are considered part of that previous E/M service or procedure. (Do not report 99441-99443 if reporting 99441-99444 performed in the previous seven days.)				
●99441	O1	Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion	XXX	0.25
●99442	O2	11-20 minutes of medical discussion	XXX	0.50
●99443	O3	21-30 minutes of medical discussion (Do not report 99441-99443 when using 99339-99340, 99374-99380 for the same call(s)) (Do not report 99441-99443 for anticoagulation management when reporting 99363-99364)	XXX	0.75
Online Medical Evaluation An online electronic medical evaluation is a non-face-to-face E/M service by a physician to a patient using Internet resources in response to a patient's online inquiry. Reportable services involve the physician's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service is reported only once for the same episode of care during a secen day period, although multiple physicians				

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
could report their exchange with the same patient. If the online medical evaluation refers to an E/M service previously performed and reported by the physician within the previous seven days (either physician requested or unsolicited patient follow-up) or within the postoperative period of the previously completed procedure, then the service(s) are considered covered by the previous E/M service or procedure. A reportable service encompasses the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the online patient encounter.				
●99444	O4	Online evaluation and management service provided by a physician to an established patient, guardian or health care provider not originating from a related E/M service provided within the previous 7 days, using the Internet or similar electronic communications network (Do not report 99444 when using 99339-99340, 99374-99380 for the same communication(s)) (Do not report 99444 for anticoagulation management when reporting 99363 to 99364)	XXX	Carrier-Priced
~~**Telephone Calls**~~				
D 99371		~~Telephone call by a physician to patient or for consultation or medical management or for coordinating medical management with other health care professionals (eg, nurses, therapists, social workers, nutritionists, physicians, pharmacists); simple or brief (eg, to report on tests and/or laboratory results, to clarify or alter previous instructions, to integrate new information from other health professionals into the medical treatment plan, or to adjust therapy)~~	XXX	N/A
D 99372		~~intermediate (eg, to provide advice to an established patient on a new problem, to initiate therapy that can be handled by telephone, to discuss test results in detail, to coordinate medical management of a new problem in an established patient, to discuss and evaluate new information and details, or to initiate new plan of care)~~	XXX	N/A
D 99373		~~complex or lengthy (eg, lengthy counseling session with anxious or distraught patient, detailed or prolonged discussion with family members regarding seriously ill patient, lengthy communication necessary to coordinate complex services of several different health professionals working on different aspects of the total patient care~~	XXX	N/A

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
		~~plan)~~ ~~(99371-99373 have been deleted. To report telephone evaluation and management services, see 99441-99443)~~		
Category III **Online Medical Evaluation** ~~An online medical evaluation is a type of Evaluation and Management (E/M) service provided by a physician or qualified health care professional to a patient using internet resources in response to the patient's online inquiry. Reportable services involve the physician's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service should not be reported for patient contacts (eg, telephone calls) considered to be pre-service or post-service work for other E/M or non E/M services. A reportable service would encompass the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the online patient encounter or problem(s)~~.				
D 0074T		~~Online evaluation and management service, per encounter, provided by a physician, using the Internet or similar electronic communications network, in response to a patient's request, established patient~~ (0074T has been deleted. To report, use 99444)		N/A

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:99441 Tracking Number O1 Specialty Society Recommended RVU: **0.35**
Global Period: XXX RUC Recommended RVU: **0.25**

CPT Descriptor: Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A patient known to the physician calls with a new complaint. The physician obtains a brief history and the patient's present medication use and makes treatment recommendations, all of which are recorded in the patient's medical record. The patient is instructed and advised to call if the symptoms fail to improve with the recommended treatment. The call lasts 8 minutes. No office visit is required.

Percentage of Survey Respondents who found Vignette to be Typical: 90%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The physician reviews records and communicates with other professionals regarding the patient as appropriate.

Description of Intra-Service Work: The physician obtains a brief history via phone, assesses the patients condition, makes a medical decision, and communictates that decision via phone to the patient.

Description of Post-Service Work: The physician documents the telephone call and oversees care plan. The physician also has discussion with family members or other health professionals associated with the delivery of care to this patient until the next E/M service is provided.

Pre-Service intensity/complexity	2.10	2.00
Intra-Service intensity/complexity	2.07	2.03
Post-Service intensity/complexity	2.09	2.04

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

The RUC advisors for the participating specialty societies met by conference call to review and discuss the survey results. All of the surveying organizations except the American College of Physicians (ACP) used a panel sample; ACP used a random sample.

For 993XX1, the advisors noted that respondents rated the intensity and complexity of 993XX1 very similar to the key reference code, 99212, with the ratings for 993XX1 being slightly higher in each time segment and for all areas except physical effort. The advisors also noted the nearly identical total time of 993XX1 and 99212. The advisors agreed that 99212 was an appropriate key reference service, since a self-limited or minor presenting problem (as described in 99212) is consistent with a telephone evaluation and management service of 5 to 10 minutes duration (as described in 993XX1). Accordingly, consistent with the survey data, the specialty societies agreed to recommend the survey median of 0.45 work RVUs for 993XX1, which is also the current work RVUs assigned to the key reference code, 99212.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario. (not applicable)

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) This service was not previously reported.

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty (See attached table.) How often?

Specialty How often?

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 28500200
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty.

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:99442 Tracking Number O2 Specialty Society Recommended RVU: **0.60**
Global Period: XXX RUC Recommended RVU: **0.50**

CPT Descriptor: Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A patient calls the office of a physician to discuss new acute illness symptoms. The physician obtains a brief history and makes treatment recommendations, all of which are recorded in the patient's medical record. The patient is instructed and advised to call if symptoms are increasing. The call lasts 15 minutes. No office visit is required.

Percentage of Survey Respondents who found Vignette to be Typical: 84%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The physician reviews records and communicates with other professionals regarding the patient as appropriate.

Description of Intra-Service Work: The physician obtains history via phone, assesses the patients condition, makes a medical decision, and communictates that decision via phone to the patient.

Description of Post-Service Work: The physician documents the telephone call and oversees care plan. The physician also has discussion with family members or other health professionals associated with the delivery of care to this patient until the next E/M service is provided.

Modifier -51 Exempt Status

Is the recommended value for the new/revised procedure based on its modifier -51 exempt status? No

New Technology/Service:

Is this new/revised procedure considered to be a new technology or service? Yes

KEY REFERENCE SERVICE:

Key CPT Code	Global	Work RVU	Time Source
99213	XXX	0.92	**CMS Time File**

CPT Descriptor Office or other outpatient visit for the evaluation and management of an established patient, which requires at least two of these three key components: an expanded problem focused history; an expanded problem focused examination; medical decision making of low complexity. Counseling and coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low to moderate severity. Physicians typically spend 15 minutes face-to-face with the patient and/or family.

KEY MPC COMPARISON CODES:

Compare the surveyed code to codes on the RUC's MPC List. Reference codes from the MPC list should be chosen, if appropriate that have relative values higher and lower than the requested relative values for the code under review.

MPC CPT Code 1	Global	Most Recent Medicare Utilization	Work RVU	Time Source

Time Segments (Mean)

Pre-Service intensity/complexity	2.09	2.11
Intra-Service intensity/complexity	3.04	3.10
Post-Service intensity/complexity	2.44	2.39

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

The RUC advisors for the participating specialty societies met by conference call to review and discuss the survey results. All of the surveying organizations except the American College of Physicians (ACP) used a panel sample; ACP used a random sample. For 993XX2, the advisors noted that respondents rated the intensity and complexity of 993XX2 very similar to the key reference code, 99213, for each time segment. They also noted that respondents consistently rated the intensity and complexity of 993XX2 higher than 99213 in all areas of mental effort and judgment, technical skill/physical effort, and psychological stress. The advisors also noted the identical time elements (pre-, intra-, and post-service) of 993XX2 and 99213. The advisors agreed that 99213 was an appropriate key reference service, since a presenting problem of low or moderate severity (as described in 99213) is consistent with a telephone evaluation and management service of 11 to 20 minutes duration (as described in 993XX2). Accordingly, consistent with the survey data, the specialty societies agreed to recommend the survey median of 0.90 work RVUs for 993XX2, which is almost the same as the work RVUs assigned to the key reference service, 99213, in 2007.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

- ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
- ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
- ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
- ☐ Multiple codes are used to maintain consistency with similar codes.
- ☐ Historical precedents.

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:99443 Tracking Number O3 Specialty Society Recommended RVU: **0.92**
Global Period: XXX RUC Recommended RVU: **0.75**

CPT Descriptor: Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: An established patient with special needs calls to discuss onset of new and disturbing symptoms. During a 25 minute phone call, the physician reviews the history and review of systems, the description of symptoms, and current medications. She makes a recommendation to change the present medication regimen, provides reassurance, both of which are recorded in the patient's medical record, and requests follow-up in the office in one week or sooner if needed.

Percentage of Survey Respondents who found Vignette to be Typical: 75%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The physician reviews records and communicates with other professionals regarding the patient as appropriate.

Description of Intra-Service Work: The physician obtains a history and review of systems via phone, assesses the patients condition, makes a medical decision, and communictates that decision via phone to the patient.

Description of Post-Service Work: The physician documents the telephone call and oversees care plan. The physician also has discussion with family members or other health professionals associated with the delivery of care to this patient until the next E/M service is provided.

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

The RUC advisors for the participating specialty societies met by conference call to review and discuss the survey results. All of the surveying organizations except the American College of Physicians (ACP) used a panel sample; ACP used a random sample. For 993XX3, the advisors noted that respondents rated the intensity and complexity of 993XX3 similar to and slightly less than that of the key reference code, 99214, for all areas and in each time segment. The advisors also noted the identical pre- and post-service time of 993XX3 and 99214, while intra-service and, therefore, total time, for 993XX3 was just 5 minutes less than 99214. The advisors agreed that 99214 was an appropriate key reference service, since a presenting problem of moderate to high severity (as described in 99214) is consistent with a telephone evaluation and management service of 21 to 30 minutes duration (as described in 993XX3). Accordingly, consistent with the survey data, the specialty societies agreed to recommend the survey median of 1.35 work RVUs for 993XX3, which is less than the current work RVUs assigned to the key reference code, 99214, reflecting the lower intensity and shorter time of the 993XX3.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario. (not applicable)

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) This service was not previously reported.

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty (See attached table.) How often?

Specialty How often?

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 5215455
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty.

Specialty (See attached table.) Frequency 0 Percentage 0.00 %

Specialty Frequency 0 Percentage 0.00 %

Specialty Frequency Percentage %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 833,881 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty.

Specialty (See attached table.) Frequency 0 Percentage 0.00 %

Specialty Frequency 0 Percentage 0.00 %

Specialty Frequency Percentage %

Do many physicians perform this service across the United States? Yes

---

Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? Yes

If no, please select another crosswalk and provide a brief rationale.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical

---

Attestation Statement

As a RUC Advisor, I attest that the integrity of the RUC survey and summary of recommendation forms are based on accurate and complete data to the best of my knowledge. As a RUC Advisor, I acknowledge

that violations would be addressed by the executive committee (i.e., RUC Chair, AMA Representative and Alternate AMA Representative).

Health Care Professionals Advisory Committee
Summary of Recommendations

April 2007

Non Face-to-Face Qualified Healthcare Professional Services

The CPT Editorial Panel created four new codes describing Evaluation and Management services performed by a qualified healthcare professional via telephone or on-line. Typically, these calls involve the health care professional obtaining a history of the patient, assessing the patient's condition, making a medical decision and communicating that decision via the phone/e-mail to the patient. Over the last two decades, medicine has seen the rapid increase of medical information and communications technology. Combined with changing consumer and health plan expectations for enhanced access to care, a new focus on chronic disease management and continued pressure to reduce the codes of medical services, qualified healthcare professionals are providing more care to patients in a "non-face-to-face" manner. Additionally, these services describe work that is currently not captured in any other CPT codes.

The American Dietetic Association (ADA) and the American Physical Therapy Association (APTA), presented work relative value recommendations for the Non Face-to-Face Qualified Health Care Professional Services. The HCPAC reviewed the survey results and compared them to the Non Face-to Face Physician Services. After a detailed discussion, the HCPAC determined that the non-physician work was equivalent to the physician work for codes 98966-98968.

98966
First the HCPAC reviewed code 98966 *Telephone assessment and management service provided by a qualified non-physician health care professional to an established patient; 5-10 minutes of medical discussion.* The HCPAC determined that the survey median of 0.37 was too high compared to the physician code 99441 *Telephone assessment and management service provided by a physician to an established patient; 5-10 minutes of medical discussion* (work RVU recommendation = 0.25). The HCPAC chose to recommend the same time and work values at the code described to define physician work. The HCPAC agreed that 1 minute pre-service, 8 minutes intra-service and 4 minutes post-service time was appropriate for code 98966. **The HCPAC recommends a work RVU of 0.25 for 98966.**

98967
The HCPAC reviewed code 98967 *Telephone assessment and management service provided by a qualified non-physician health care professional to an established patient; 11-20 minutes of medical discussion.* The HCPAC determined that the survey median of 0.45 was similar compared to the physician code 99442 *Telephone assessment and management service provided by a physician to an established patient; 11-20 minutes of medical discussion* (work RVU recommendation = 0.50). The HCPAC chose to recommend the same time and work values at the code described

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

to define physician work. The HCPAC agreed that 1 minute pre-service, 15 minutes intra-service and 5 minutes post-service time was appropriate for code 98967. **The HCPAC recommends a work RVU of 0.50 for 98967.**

98968

The HCPAC reviewed code *98968 Telephone assessment and management service provided by a qualified non-physician health care professional to an established patient; 21-30 minutes of medical discussion.* The HCPAC determined that the survey median of 0.50 was too low compared to the physician code 99443 *Telephone assessment and management service provided by a physician to an established patient; 21-30 minutes of medical discussion* (work RVU recommendation = 0.75). The HCPAC chose to recommend the same time and work values at the code described to define physician work. The HCPAC agreed that 1 minute pre-service, 25 minutes intra-service and 10 minutes post-service time was appropriate for code 98968. **The HCPAC recommends a work RVU of 0.75 for 98968.**

98969

Lastly, the HCPAC reviewed code 98969 *Online evaluation and management service provided by a qualified non-physician health care professional to an established patient.* The HCPAC concluded, that as the physician code 99444 *Online evaluation and management service provided by a physician to an established patient* (RUC recommendation = carrier-priced), the definition of work and health care professional time and complexity involved in this service was unclear, therefore making it difficult to recommend a specific work relative vale. **The HCPAC recommends that code 98969 be carrier-priced for CY 2008.**

Practice Expense

The PERC and HCPAC reviewed the direct practice expenses for 98966-98968 in February 2007 when these services were initially presented. The practice expense input recommendations are the same as those recommended for the physician non face-to-face services. **The HCPAC recommends 3 minutes post-service phone call by and RN/LPN/MTA for 98966-98968.**

New Technology and New Work

The HCPAC recommends that 98966-98968 be added to the new technology list to review changes in the valuation after experience in reporting these service has occurred (as the physician non face-to-face codes are also recommended to be added to the new technology list). Additionally, the HCPAC recommends that these services involve new work not currently compensated within the physician payment system.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
Telephone services are non-face-to-face E/M services provided by a physician to a patient using the telephone. These codes are used to report episodes of care				

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
by the physician initiated by an established patient or guardian of an established patient. If the telephone service ends with a decision to see the patient within 24 hours or next available urgent visit appointment, the code is not reported; rather the encounter is considered part of the preservice work of the subsequent E/M service, procedure and visit. Likewise if the telephone call refers to an E/M service performed and reported by the physician within the previous seven days (either physician requested or unsolicited patient follow-up) or within the period of the previously completed procedure, then the service(s) are considered part of that previous E/M service or procedure. (Do not report 99441-99443 if reporting 99441-99444 performed in the previous seven days.)				
●99441	O1	Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion	XXX	0.25 (RUC Recommendation)
●99442	O2	11-20 minutes of medical discussion	XXX	0.50 (RUC Recommendation)
●99443	O3	21-30 minutes of medical discussion (Do not report 99441-99443 when using 99339-99340, 99374-99380 for the same call(s)) (Do not report 99441-99443 for anticoagulation management when reporting 99363-99364)	XXX	0.75 (RUC Recommendation)
Online Medical Evaluation An online electronic medical evaluation is a non-face-to-face E/M service by a physician to a patient using Internet resources in response to a patient's online inquiry. Reportable services involve the physician's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service is reported only once for the same episode of care during a secen day period, although multiple physicians could report their exchange with the same patient. If the online medical evaluation refers to an E/M service previously performed and reported by the physician within the previous seven days (either physician requested or unsolicited patient follow-up) or within the postoperative period of the previously completed procedure, then the service(s) are considered covered by the previous E/M service or procedure. A reportable service encompasses the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the online patient encounter.				
●99444	O4	Online evaluation and management service provided by a physician to an established patient, guardian or health care provider not originating from a	XXX	Carrier Priced

		management service provided within the previous 7 days, using the Internet or similar electronic communications network (Do not report 98969 when using 99339-99340, 99374-99380 for the same communication(s)) (Do not report 98969 for anticoagulation management when reporting 99363 to 99364)		
Category III **Online Medical Evaluation** ~~An online medical evaluation is a type of Evaluation and Management (E/M) service provided by a physician or qualified health care professional to a patient using internet resources in response to the patient's online inquiry. Reportable services involve the physician's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service should not be reported for patient contacts (eg, telephone calls) considered to be pre-service or post-service work for other E/M or non E/M services. A reportable service would encompass the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the online patient encounter or problem(s)~~.				
D 0074T		~~Online evaluation and management service, per encounter, provided by a physician, using the Internet or similar electronic communications network, in response to a patient's request, established patient~~ (0074T has been deleted. To report, use 99444)		N/A
Evaluation and Management **Care Plan Oversight** *Care Plan Oversight Services are reported separately from codes for office/outpatient, hospital, home, nursing facility, or domiciliary*, or non-face-to-face *services. The complexity* … The work involved in providing very low intensity or infrequent supervision services is included in the pre- and post-encounter work for home, office/outpatient and nursing facility or domiciliary visit codes. (For care plan oversight services of patients in the home, domiciliary, or rest home (eg, assisted living facility) under the individual supervision of a physician, see 99339,99340)				

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
(Do not report 99374-99380 for time reported with 993X1- 993X4, 98966-98969) **Case Management Services** **Anticoagulant Management** *Anticoagulant services are intended ….* When reporting these services, the work of anticoagulant management may not be used as a basis for reporting an Evaluation and Management service or Care Plan Oversight time during the reporting period. Do not report these services with ~~*99371- 99373, 0074T*~~ 99444, 989XX1 – 989XX4 when telephone or on-line address anticoagulation with warfarin management. If a significant, separately identifiable E/M service is performed, report the appropriate E/M service code using modifier 25.				

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:98966 Tracking Number O5 Specialty Society Recommended RVU: **0.37**
Global Period: XXX RUC Recommended RVU: **0.25**

CPT Descriptor: Telephone evaluation and management service provided by a qualified non-physician health care professional to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A 67 year old female with diabetes requested assistance in how to incorporate a new food product into her meal plan established 3 weeks ago with the Registered Dietitian (RD).

OR

A 40 year old male with a history of anterior cruciate ligament reconstruction of the left knee calls his physical therapist with a complaint of increased discomfort and edema around the knee after performing the home exercise program twice each day. The therapist asked the patient to summarize the home exercise program and a discrepancy was noted in the number of repetitions that the patient was performing and what had been recommended. The therapist reinforced the parameters of the recommended home exercise program, recommended the use of ice following the exercises and instructed the patient to keep their next scheduled therapy appointment. The telephone encounter lasted 10 minutes.

Percentage of Survey Respondents who found Vignette to be Typical: 98%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The qualified healthcare professional reviews the patient's phone inquiry, reviews the medical record and the previously prepared exercise program or nutrition plan and goals, and accesses resources to share and discuss with patient.

Description of Intra-Service Work: During the phone conversation, the RD reviews the product's serving size, carbohydrate content and the current meal plan with the patient. The RD counsels the patient on appropriate new product serving size, reinforced adherence to the meal plan, encouraged ongoing completion of food and blood glucose records and reminded patient of her next scheduled appointment.

OR
First, the therapist listened to the patient's complaints. The therapist then asked appropriate questions concerning the home exercise program and use of ice, use of medications, level of activity level during the day, use of a brace and use of an assistive device for gait. The therapist determined that the patient had not properly followed the home exercise instructions and was not applying ice following the home program. The therapist reviewed the home program, made the appropriate recommendations and instructed the patient to keep their next scheduled appointment.

Description of Post-Service Work: The qualified healthcare professional documents the patient interaction in the medical record, notifies the referring physician of the phone call with the patient, and directs staff to mail the summary of instructions provided and educational materials to patient.

INTENSITY/COMPLEXITY MEASURES (Mean)

Mental Effort and Judgment (Mean)		
The number of possible diagnosis and/or the number of management options that must be considered	3.57	3.21
The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be reviewed and analyzed	2.88	3.08
Urgency of medical decision making	3.45	2.96
Technical Skill/Physical Effort (Mean)		
Technical skill required	3.40	3.63
Physical effort required	1.57	3.46
Psychological Stress (Mean)		
The risk of significant complications, morbidity and/or mortality	3.18	2.83
Outcome depends on the skill and judgment of physician	3.82	3.63
Estimated risk of malpractice suit with poor outcome	3.38	3.08

INTENSITY/COMPLEXITY MEASURES	CPT Code	Reference Service 1
Time Segments (Mean)		
Pre-Service intensity/complexity	1.74	2.50
Intra-Service intensity/complexity	3.43	3.71
Post-Service intensity/complexity	2.20	2.71

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

ADA and APTA recommend the above RVU and Pre-, Intra-, and Post-service times even though both data sets had variability in the reported reference service codes. Based on the distinct services provided by both professionals, as described in the vignettes, and the professionals' experience completing the work survey, we anticipated differences in the reported reference service code.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) Not previously reported

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty ADA How often? Commonly

Specialty APTA How often? Commonly

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 875000
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty. Please explain the rationale for this estimate. Compiled frequency estimates from MDs, APTA and ADA.

Specialty ADA Frequency 775000 Percentage 88.57 %

Specialty APTA Frequency 100000 Percentage 11.42 %

Specialty Frequency 0 Percentage 0.00 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 462,000 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty. Please explain the rationale for this estimate.

Specialty ADA Frequency 362000 Percentage 78.35 %

Specialty APTA Frequency 100000 Percentage 21.64 %

Specialty Frequency 0 Percentage 0.00 %

Do many physicians perform this service across the United States? Yes

---

Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? Yes

If no, please select another crosswalk and provide a brief rationale.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:98967 Tracking Number 06 Specialty Society Recommended RVU: **0.45**
Global Period: XXX RUC Recommended RVU: **0.50**

CPT Descriptor: Telephone evaluation and management service provided by a qualified non-physician health care professional to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A 68 year old male with insulin dependent diabetes, called the Registered Dietitian (RD) with a complaint of several mid-morning low blood sugar readings following the implementation of his 30-minute, new exercise regimen.

OR
A 54 year old woman with a history of rheumatoid arthritis and metacarpalphalangeal arthroplasties of her dominant hand called her occupational therapist because of post-operative pain and difficulty with use of the dynamic outrigger orthotic during the day and positioning at night. The therapist reviewed the patient's understanding of the instructions that had been provided at the last office visit and made specific recommendations regarding number of repetitions of the exercises, elevation of the extremity to help reduce edema, recommendations for positioning during the night, and use of cold applications for temporary pain relief . The telephone encounted lasted 15 minutes.

Percentage of Survey Respondents who found Vignette to be Typical: 88%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The qualified healthcare professional reviews the patient's phone inquiry, reviews the medical record and the previously prepared exercise program or nutrition plan and goals, and accesses resources to share and discuss with patient.

Description of Intra-Service Work: The RD verifies the patient's understanding of his hypoglycemia management and reviewed the patient's self-reported glucose monitoring records. After discussion of the prescribed meal plan provided at the last office visit, the RD reviews the patient's understanding of his meal plan and pre-workout meal regimen, and reinforces concepts to avoid hypoglycemia with future exercise.
OR
The therapist listened to the patient's complaints. The therapist then asked appropriate questions concerning tolerance to the orthotic (e.g.wearing time, exercise in the outrigger, pressure points), elevation of the extremity during the day and night, medication use, home exercise program, and management of ADLs. Recommendations were made regarding the specific exercises that should be performed including number of repetitions and frequency, positioning of the limb during the day and at night, precautions regarding skin integrity and protection of the sutures, and use of ice to help control pain.

Description of Post-Service Work: The qualified healthcare professional documents the patient interaction in the medical record, notifies the referring physician of the phone call with the patient, and directs staff to mail the summary of instructions provided and educational materials to patient.

If no, please select another crosswalk and provide a brief rationale.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:98968 Tracking Number 07 Specialty Society Recommended RVU: **0.50**
Global Period: XXX RUC Recommended RVU: **0.75**

CPT Descriptor: Telephone evaluation and management service provided by a qualified non-physician health care professional to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A 65 year old female with congestive heart failure calls the Registered Dietitian (RD) based on concerns about lower extremity edema following consumption of foods served at a family reunion.

OR
The parent of an 15 year old male with a history of recent T10 spinal cord injury called the physical therapist regarding the recommended home exercise program, proper positioning and seating in the wheelchair, and a newly discovered area of skin irritation on the right buttock. The therapist inquired as to the current exercise program that was being followed including the frequency and intensity of the exercises, the length of time the patient was spending in the wheelchair, the extent of the patient's management of his transfers and mobility in the wheelchair as well as specific inquiries concerning the area of possible skin breakdown on the buttocks. The therapist reviewed and modified the home program, and made recommendations regarding the length of time continuously spent in the wheelchair and precautions to maintain skin integrity It was recommended that the patient return for follow-up within one week unless the skin irritation did not improve or worsened.

Percentage of Survey Respondents who found Vignette to be Typical: 72%

Is conscious sedation inherent to this procedure? No Percent of survey respondents who stated it is typical? 0%

Is conscious sedation inherent in your reference code? No

Description of Pre-Service Work: The qualified healthcare professional reviews the patient's phone inquiry, reviews the medical record and the previously prepared exercise program or nutrition plan and goals, and accesses resources to share and discuss with patient.

Description of Intra-Service Work: The RD reviews the patient's recent food intake and compared it to the prescribed meal pattern- paying particular attention to sodium and fluid consumption. The RD identifies high sodium foods that contributed to the patient's current symptoms, and counsels the patient on lower sodium alternatives. The RD counsels the patient on her daily fluid recommendations and encouraged the patient to measure her fluid consumption and body weight daily. The RD instructs the patient to call and report any weight fluctuation greater than 2-3 lbs/day. The RD recommends that the patient return for follow-up in 1-2 weeks unless rapid weight gain, increased shortness of breath, or other symptoms of worsening heart failure occurred in which case the patient is told to call her physician.

or
The therapist listened to the patient's complaints and parental concerns. The therapist then asked appropriate questions of the patient and parent concerning the time spent in the wheelchair in and out of the home environment, level of activity during the day while in the chair, description of the skin irritation on the buttocks, participation in the home exercise program and management of mobility, transfers in and out of the wheelchair and ADLs. The therapist made recommendations concerning transfer techniques in and out of the chair to reduce friction force on the buttocks, duration of sitting time in the wheelchair including recommendations to spend additional time each day lying prone so that the skin irritation could heal. Recommendations were also made concerning pressure relief strategies while in the chair and

revisions to the home exercise program were suggested. The therapist recommended a follow-up visit within one week unless the skin irritation did not improve or worsened.

Description of Post-Service Work: The qualified healthcare professional documents the patient interaction in the medical record, notifies the referring physician of the phone call with the patient, and directs staff to mail the summary of instructions provided and educational materials to patient.

CPT Descriptor 2

Other Reference CPT Code	Global	Work RVU	Time Source

CPT Descriptor

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):
Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

Number of respondents who choose Key Reference Code: 22 **% of respondents:** 28.2 **%**

TIME ESTIMATES (Median)	**CPT Code: 98968**	**Key Reference CPT Code:** 97002	**Source of Time**
Median Pre-Service Time	1.00	2.00	
Median Intra-Service Time	25.00	18.00	
Median Immediate Post-service Time	10.00	5.00	
Median Critical Care Time	0.0	0.00	
Median Other Hospital Visit Time	0.0	0.00	
Median Discharge Day Management Time	0.0	0.00	
Median Office Visit Time	0.0	0.00	
Prolonged Services Time	0.0	0.00	
Median Total Time	**36.00**	**25.00**	
Other time if appropriate			

INTENSITY/COMPLEXITY MEASURES (Mean)

Mental Effort and Judgment (Mean)		
The number of possible diagnosis and/or the number of management options that must be considered	3.91	3.64
The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be reviewed and analyzed	3.53	3.55
Urgency of medical decision making	4.09	3.32
Technical Skill/Physical Effort (Mean)		
Technical skill required	3.96	3.95
Physical effort required	1.87	3.27
Psychological Stress (Mean)		
The risk of significant complications, morbidity and/or mortality	4.21	3.23
Outcome depends on the skill and judgment of physician	4.19	4.05
Estimated risk of malpractice suit with poor outcome	3.98	3.36

INTENSITY/COMPLEXITY MEASURES	CPT Code	Reference Service 1
Time Segments (Mean)		
Pre-Service intensity/complexity	2.11	2.32
Intra-Service intensity/complexity	4.09	4.18
Post-Service intensity/complexity	2.91	2.77

Additional Rationale

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

ADA and APTA recommend the above RVU and Pre-, Intra-, and Post-service times even though both data sets had variability in the reported reference service codes. Based on the distinct services provided by both professionals, as described in the vignettes, and the professionals' experience completing the work survey, we anticipated differences in the reported reference service code.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) Not previously reported

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty ADA How often? Commonly

Specialty How often?

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 383907
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty. Please explain the rationale for this estimate.

Specialty ADA Frequency 283907 Percentage 73.95 %

Specialty APTA Frequency 100000 Percentage 26.04 %

Specialty Frequency 0 Percentage 0.00 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 232,667 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty. Please explain the rationale for this estimate.

Specialty ADA Frequency 132667 Percentage 57.02 %

Specialty APTA Frequency 100000 Percentage 42.97 %

Specialty Frequency Percentage %

Do many physicians perform this service across the United States?

Professional Liability Insurance Information (PLI)

Does the reference CPT code selected for physician work serve as a reasonable reference for PLI crosswalk? Yes

If no, please select another crosswalk and provide a brief rationale.

Indicate what risk factor the new/revised code should be assigned to determine PLI relative value. Non-Surgical

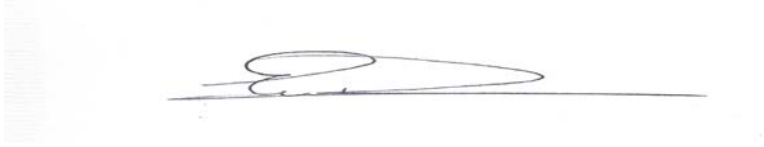
Attestation Statement



This form needs to be completed by any RUC Advisor whose specialty society is developing a recommendation to be reviewed by the RUC.

As a RUC Advisor, I attest that the integrity of the RUC survey and summary of recommendation forms are based on accurate and complete data to the best of my knowledge. As a RUC advisor, I acknowledge that violations would be addressed by the executive committee (i.e., RUC Chair , AMA Representative and Alternate AMA Representative.)

Specialty Society Update Process
PERC Summary of Recommendation
XXX Global Period
Non Facility Direct Inputs

CPT Long Descriptor: Telephone evaluation and management service provided by a qualified non-physician health care professional to an established patient, parent, or guardian not originating from a related E/M service provided within the previous seven days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion.

Please provide a brief description of the process used to develop your recommendation and the composition of your Specialty Society Practice Expense Committee:
The American Dietetic Association utilized an expert panel to discuss and prepare practice expense recommendations for the non-face-to-face codes, 98966-X4. The expert panel consisted of six registered dietitian practitioners from a variety of practice settings and geographical locations. The American Physical Therapy Association convened a group of five physical therapists familiar with the services described by the codes was consulted. Their consensus opinion was then coordinated with other societies who surveyed similar codes (993X1 - X4).

Both expert panels' data and description of the clinical staff's pre- and post-service activities were identical, so both group's data was merged.

Please describe the clinical activities of your staff:

Pre-Service Clinical Labor Activities:

The clinical staff receives the call from the patient. Clinical staff requests the patient's medical record and collects the health care professional's documentation note from the patient's last appointment. Clinical staff discusses patient's phone inquiry with the health care professional. The decision is made to have the health care professional call the patient to discuss the problem.

Intra-Service Clinical Labor Activities:
NA

Post-Service Clinical Labor Activities:
The clinical staff collects materials discussed over the call from the health care professional and mails educational print materials and summary of exercise or nutrition plan to the patient and physician. The patient's chart is filed in the health care professional's office.

AMA/SPECIALTY SOCIETY RVS UPDATE COMMITTEE
SUMMARY OF RECOMMENDATIONS

April 2001

Analysis of Computer Transmitted Data

The CPT Editorial Panel created a new code 99091 *Collection and interpretation of physiologic data (eg, ECG, blood pressure, glucose monitoring) digitally stored and/or transmitted by the patient and/or caregiver to the physician or other qualified health care professional, requiring a minimum of 30 minutes of time* to specifically describe the review of data sent to the physician electronically from a patient and/or caregiver for their analysis and interpretation. This service may be reported only once per month and may not be reported in conjunction with an Evaluation and Management service on the same day. This service may also not be reported in conjunction with a care plan oversight code (99374-99380).

The RUC carefully reviewed the survey results from 58 internists and endocrinologists. The survey median reflected a work relative value of 1.20, however, the specialty recommended that the code be valued similar to the care plan oversight services at 1.73. The RUC reviewed the time involved and did not agree that this was an appropriate comparison. The RUC reviewed the time data of 5 minutes pre-time, 20 minutes intra-time, and 5 minutes post-time and compared this to the physician time and intensity involved in CPT code 99214 *Level 4 Established Office Visit* (work RVU = 1.10) with intra-time of 25 minutes, and a total time of 38 minutes, and determined that 99091 should be valued at this level. The RUC also agreed that the intra-service time for this code should be modified to be 30 minutes as the CPT descriptor clearly states that the physician must spend a minimum of 30 minutes to report this service. **The RUC recommends a work relative value of 1.10 for code 99091.**

Practice Expense:

There are no direct practice expense inputs related to this service.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Source of Current Work RVU*	Work RVU Recommendation
99090		Analysis of ~~information~~ clinical data stored in computers (eg, ECGs, blood pressures, hematologic data) (For physician/health care professional collection and interpretation of physiologic data stored/transmitted by patient/caregiver, see 99091)	XXX	N/A HCFA considers this a bundled service and provides no separate payment	N/A

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Source of Current Work RVU*	Work RVU Recommendation
		(Do not report 99090 if other more specific CPT codes exist, e.g., 93014, 93227, 93233, 93272 for cardiographic services; 95250 for continuous glucose monitoring, 97750 for musculoskeletal function testing)			
Medicine **Special Services, Procedures and Reports** Code 99091 should be reported no more than once in a 30 day period to include the physician or health care provider time involved with data accession and review, data interpretation, modification of care plan as necessary (including communication to patient and/or caregiver) and associated documentation. If the services described by code 99091 are provided on the same day the patient presents for an E/M service, these services should be considered part of the E/M service and not separately reported. Do not report 99091 if it occurs within 30 days of care plan oversight services 99374-99380. Do not report 99091 if other more specific CPT codes exist, (eg, 93014, 93227, 93233, 93272 for cardiographic services; 95250 for continuous glucose monitoring). Do not report 99091 for transfer and interpretation of data from hospital or clinical laboratory computers.

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code: 990XX Tracking Number: AA1 Global Period: XXX Recommended RVW~~: 1.73~~
RUC Rec: 1.10

CPT Descriptor: Collection and interpretation of physiologic data (e.g. ECG, blood pressure, glucose monitoring) digitally stored and/or transmitted by the patient and/or caregiver to the physician or other qualified health care professional, requiring a minimum of 30 minutes of time.

CPT Instructions:

Code 990XX should be reported no more than once in a 30 day period to include the physician or health care provider time involved with data accession and review, data interpretation, modification of care plan as necessary (including communication to patient and/or caregiver) and associated documentation.

If the services described by code 990XX are provided on the same day the patient presents for an E/M service, these services should be considered part of the E/M service and not separately reported.

Do not report 990XX if it occurs within 30 days of care plan oversight services 99374-99380. Do not report 990XX if other more specific CPT codes exist, (eg, 93014, 93227, 93233, 93272 for cardiographic services; 926X1 for continuous glucose monitoring). Do not report 990XX for transfer and interpretation of data from hospital or clinical laboratory computers.

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey:

A 67-year old male with labile diabetes is utilizing a home glucose-monitoring device to capture multiple glucose readings during the course of a month in association with diary data of symptoms, medication, exercise, and diet. The data is transmitted from home computer to physician's office by email, downloaded by physician and data reviewed. Pre-service work includes chart review concerning prior glucose control methods. Intra-service work involves the physician spending 35 minutes during a 30-day period for the review, interpretation and report based on the physiologic data and diary. Separate time spent typically involves at least one contact with patient (e.g. telephone call or e-mail exchange) with further advice about medical management and monitoring recommendations. Post-service work includes associated chart documentation.

Description of Pre-Service Work: The pre-service period includes chart review regarding patient condition and prior treatment.

Description of Intra-Service Work: The intra-service period includes your review, interpretation, and report of the data digitally stored and/or transmitted by the patient. The intra-service period involves at least one communication (e.g. phone call or e-mail exchange) with the patient to provide medical management and monitoring recommendations.

Description of Post-Service Work: The post-service period includes documenting the service in the patient's medical record and arranging for further services.

CPT Code: 990XX Tracking Number: AA1

SURVEY DATA:

Presenter(s):ACP-ASIM and AACE

Specialty(s): Internal Medicine, Endocrinology, (This service will be provided by most physician specialties).

Sample Size: 58/170 Response Rate: (%): 34.1% Median RVW: 1.2

Type of Sample (Bold One): random, panel, **convenience**.

Explanation of sample size: Survey mailed to 170 AACE and ACP-ASIM members who indicated they were interested in participating in such surveys.

25th Percentile RVW: 0.9 75th Percentile RVW: 1.6 Low: 0.38 High: 3.60

Median Pre-Service Time: 5 minutes Median Intra-Service Time: 30 minutes

25th Percentile Intra-Svc Time: 15 minutes 75th Percentile Intra-Svc Time: 35 minutes

Intra-Svc Time Low: 6 minutes High: 46 minutes

Median Post-Service Time: 5 minutes

KEY REFERENCE SERVICE:

CPT Code	CPT Descriptor	RVW
99375	Care Plan Oversight, 30 minutes or more, home health patient	1.73
99378	Care Plan Oversight, 30 minutes or more, hospice patient	1.73

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):
Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

TIME ESTIMATES (Median)	**New/Revis. CPT Code:**	**Key Reference* CPT Code:**
Median Pre-Time	5	10
Median Intra-Time	30	38
Median Immediate Post-service Time	5	10
Median of Aggregate Critical Care Times		
Median of Aggregate Other Hospital Visit Times		
Median Discharge Day Management Time		
Median of Aggregate Office Visit Times		

INTENSITY/COMPLEXITY MEASURES (Mean)

Mental Effort and Judgement (Mean)

The number of possible diagnosis and/or the number of management options that must be considered	3.13	3.17
The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be reviewed and analyzed	3.47	3.33
Urgency of medical decision making	3.20	3.17

Technical Skill/Physical Effort (Mean)

Technical skill required	3.09	3.17
Physical effort required	2.27	2.33

Psychological Stress (Mean)

The risk of significant complications, morbidity and/or mortality	3.36	3.33
Outcome depends on the skill and judgement of physician	3.75	3.22

Estimated risk of malpractice suit with poor outcome	3.25	2.78

INTENSITY/COMPLEXITY MEASURES	**CPT Code**	**Reference Service 1**
Time Segments (Mean)		
Pre-Service intensity/complexity	2.69	2.89
Intra-Service intensity/complexity	3.5	2.56
Post-Service intensity/complexity	2.74	2.78

ADDITIONAL RATIONALE

Describe the process by which your specialty society reached your final recommendation.

ACP-ASIM and AACE recommend that the RUC approve a RVW of 1.73, which is the same RVW as care plan oversight (99375 and 99378). Please note that intensity and complexity measures of the surveyed code (990XX) and the care plan oversight reference codes are almost identical, with a few exceptions demonstrating greater complexity for the surveyed code (990XX). Most notable is that the intra-service intensity/complexity is significantly higher for the surveyed code (990XX), 3.5 versus 2.56. Both the surveyed code (990XX) and the reference codes are by definition a minimum of 30 minutes a month. Therefore following the CPT definition and the complexity/intensity measures, the surveyed code (990XX) should have the same RVW as care plan oversight or higher.

In addition, the ACP-ASIM and AACE Committees reviewing the survey data believe that the physicians who completed the survey understated the amount of time involved with providing service 990XX because the survey vignette mentions “at least one contact with patient (e.g. telephone call or e-mail exchange) with further advice about medical management and monitoring recommendations.” ACP-ASIM and AACE believe this statement encouraged survey respondents to describe the minimum amount of time involved with this service (one physician-patient electronic encounter), rather than the typical time, which may include multiple physician-patient electronic encounters.

FREQUENCY INFORMATION

How was this service previously reported? As care plan oversight in limited settings or as pre- and post- service work in conjunction with an office visit. However, this code was created for circumstances in which physician review of data pertaining to a previous visit exceeds the review involved with typical pre- and post- service E/M service work and /or for on-going monitoring of patient data not in conjunction with an office visit.

How often do physicians in your specialty perform this service? If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty Internal Medicine ___X__Commonly _____Sometimes _____Rarely

Specialty Endocrinology ___X__Commonly _____Sometimes _____Rarely

For your specialty, estimate the number of times this service might be provided nationally in a one-year period? If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty: Internal Medicine (including endocrinology) Frequency: 570,000

For your specialty, estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? If this is a recommendation from multiple specialties please estimate frequency for each specialty.

Specialty: Internal Medicine (including endocrinology) Frequency: 350,000

Do many physicians perform this service across the United States? __X___Yes _____No

---

AMA/Specialty Society RVS Update Committee Summary of Recommendations

October 2012

Interprofessional Telephone Consultative Services

In June 2010, the CPT Editorial Panel created the Telephone Consultative Services Workgroup to address a proposal to create codes describing telephone/internet consultative services. The workgroup was charged with the following: Clarify use by non-physicians; Review the appropriateness of time increments for physician to patient calls; Clarify the typical patient/service descriptions based upon literature supplied; Consider appropriate use of term "consultation"; and Consider time interval for non-reporting as being distinct from a patient call (ie, if a face to face service occurs the next week or if co-management is in progress and the patient is seen every month, but more than 7 days previously, is the service reported). In May 2012, the CPT Editorial Panel approved a new Evaluation and Management subsection, guidelines and four codes to describe and report telephone/internet consultative services.

An interprofessional telephone/internet consultation is an assessment and management service in which a patient's treating (eg, attending or primary) physician or other qualified health care professional requests the opinion and/or treatment advice of a physician with specific specialty expertise (the consultant) to assist the treating physician/qualified health care professional in the diagnosis and/or management of the patient's problem without the need for the patient's face to face contact with the consulting physician.

These services are typically provided in complex and/or urgent situations where a timely face to face service with the consultant may not be feasible (eg, geographic distance). These codes should not be reported by a consultant who has agreed to accept transfer of care before the telephone/internet assessment, but are appropriate to report if the decision to accept transfer of care cannot be made until after the initial interprofessional telephone/Internet consultation.

The patient for whom the interprofessional telephone/internet consultation is requested may be either a new patient to the consulting physician or an established patient with a new problem or an exacerbation of an existing problem. However, the consultant should not have seen the patient in a face to face encounter within the last 14 days. When the telephone/internet consultation leads to an immediate transfer of care or other face-to-face service (eg, a surgery, hospital visit or a scheduled office evaluation of the patient) within the next 14 days or next available appointment date by the consultative physician, these codes are not reported.

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

99446 Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 5-10 minutes of medical consultative discussion and review

The RUC reviewed the survey results from 48 multi-specialty physicians and determined that the survey respondents overestimated physician work. The specialty societies proposed and the RUC accepted modifications to the survey times to more accurately reflect the CPT descriptor: 3 minutes for pre-service; 8 minutes for intra service; and 5 minutes for post service. The RUC reviewed key reference service, CPT code 99441 *Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion* (work RVU=0.25) and agreed that 99446 is a more intense procedure. Typically, the patient is unknown to the consulting physician, the service is provided in a complex/urgent situation and the medical decision-making required is more intense than the key reference service. In order to maintain the proper rank order in relation to 99447 (described below), the RUC used magnitude estimation and determined that a work RVU between the survey 25th percentile (0.50) and the work RVU of 99441 (0.25) is appropriate. The RUC also compared 99446 to 99281 *Emergency department visit for the evaluation and management of a patient, which requires these 3 key components: A problem focused history; A problem focused examination; and Straightforward medical decision making. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self limited or minor* (work RVU = 0.45) and determined that 99281 is a more intense service and should be valued higher. **The RUC recommends a work RVU of 0.35 for CPT code 99446.**

99447 Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 11-20 minutes of medical consultative discussion and review

The RUC reviewed the survey results from 31 multi-specialty physicians and determined that the survey respondents overestimated physician work. The specialty societies proposed and the RUC accepted modifications to the survey times to more accurately reflect the CPT descriptor: 3 minutes of pre-service; 15 minutes of intra service; and 5 minutes of post service. The RUC reviewed key reference service, 99442 *Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion* (work RVU=0.50) and agreed that 99447 is a more intense procedure. Typically, the patient in unknown to the consulting physician, the service is provided in a complex/urgent situation and the medical decision-making required is more intense than the key reference service. In order to maintain the proper rank order within the family of services, the specialty society indicated and the RUC agreed that a work of 0.70, lower than the survey 25th percentile is appropriate. The 0.35 increment increase in work RVU is similar to that within the telephone evaluation and management services, 99441-99443. The RUC also reviewed CPT code 99241 *Office consultation for a new or established patient, which requires these 3 key components: A problem focused history; A problem focused examination; and*

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

Straightforward medical decision making. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self limited or minor. Physicians typically spend 15 minutes face-to-face with the patient and/or family (work RVU = 0.64 and 15 minutes of intra-service time) and agreed that 99447 should be valued higher since it is typically provided in a complex/urgent situation. **The RUC recommends a work RVU of 0.70 for CPT code 99447.**

99448 Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 21-30 minutes of medical consultative discussion and review

The RUC reviewed the survey results from 31 multi-specialty physicians and determined that the survey respondents overestimated physician work. The specialty societies proposed and the RUC accepted modifications to the survey times to more accurately reflect the CPT descriptor: 5 minutes for pre-service; 25 minutes for intra service; and 5 minutes of post service. The RUC reviewed CPT code 99443 *Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion* (work RVU=0.75) and agreed that 99448 is a more intense procedure. Typically, the patient in unknown to the consulting physician, the service is provided in a complex/urgent situation and the medical decision-making required is more intense than the key reference service. In order to maintain the proper rank order within this family of services, the RUC used magnitude estimation and determined that a work RVU of 1.05 is appropriate (99447 work RVU of 0.70 + 0.35 = 1.05). The RUC compared 99448 to 99374 *Physician supervision of a patient under care of home health agency (patient not present) in home, domiciliary or equivalent environment (eg, Alzheimer's facility) requiring complex and multidisciplinary care modalities involving regular physician development and/or revision of care plans, review of subsequent reports of patient status, review of related laboratory and other studies, communication (including telephone calls) for purposes of assessment or care decisions with health care professional(s), family member(s), surrogate decision maker* (work RVU = 1.10) and determined that 99374 is a more intense service and should be valued higher. **The RUC recommends a work RVU of 1.05 for CPT code 99448.**

99449 Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 31 minutes or more of medical consultative discussion and review

The RUC reviewed the survey results from 26 multi-specialty physicians and determined that the survey respondents overestimated physician work. The RUC noted that 99449 will typically be utilized by behavioral/mental health professionals as there is a perceived need with access to care. The specialty societies proposed and the RUC accepted modifications to the survey times to more accurately reflect the CPT descriptor: 9 minutes for pre-service; 31 minutes for intra service; and 10 minutes for post service. The RUC reviewed CPT codes 92014 *Ophthalmological services: medical examination and evaluation, with initiation or continuation of diagnostic and treatment program; comprehensive, established*

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

patient, 1 or more visits (work RVU=1.42) and 99304 *Initial nursing facility care, per day, for the evaluation and management of a patient, which requires these 3 key components: A detailed or comprehensive history; A detailed or comprehensive examination; and Medical decision making that is straightforward or of low complexity. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the problem(s) requiring admission are of low severity. Physicians typically spend 25 minutes at the bedside and on the patient's facility floor or unit.* (work RVU=1.64) and agreed that both services require less intra-service time and are more intense than 99449. **The RUC recommends a work RVU of 1.40 for CPT code 99449.**

New Technology
This service will be placed on the New Technology list and be re-reviewed by the RUC in three years to ensure correct valuation and utilization assumptions.

CPT Code (•New)	Tracking Number	CPT Descriptor	Global Period	Work RVU Recommendation
An on-line electronic medical evaluation is a non-face-to-face evaluation and management (E/M) service by a physician to a patient using Internet resources in response to a patient's on-line inquiry. Reportable services involve the physician's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service is reported only once for the same episode of care during a seven-day period, although multiple physicians could report their exchange with the same patient. If the on-line medical evaluation refers to an E/M service previously performed and reported by the physician within the previous seven days (either physician requested or unsolicited patient follow-up) or within the postoperative period of the previously completed procedure, then the service(s) are considered covered by the previous E/M service or procedure. A reportable service encompasses the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the on-line patient encounter. (For an on-line medical evaluation provided by a qualified nonphysician health care professional, use 98969)				

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

99444	Online evaluation and management service provided by a physician to an established patient~~,~~ or guardian not originating from a related E/M service provided within the previous 7 days, using the Internet or similar electronic communications network (Do not report 99444 when using 99339-99340, 99374-99380 for the same communication[s]) (Do not report 99444 for anticoagulation management when reporting 99363, 99364) (Do not report 99444 with 99446-99449)

Interprofessional Telephone/Internet Consultations

The consultant should use the following codes to report interprofessional telephone/internet consultations. An interprofessional telephone/internet consultation is an assessment and management service in which a patient's treating (eg, attending or primary) physician or other qualified health care professional requests the opinion and/or treatment advice of a physician with specific specialty expertise (the consultant) to assist the treating physician/qualified health care professional in the diagnosis and/or management of the patient's problem without the need for the patient's face to face contact with the consulting physician.

These services are typically provided in complex and/or urgent situations where a timely face to face service with the consultant may not be feasible (eg, geographic distance). These codes should not be reported by a consultant who has agreed to accept transfer of care before the telephone/internet assessment, but are appropriate to report if the decision to accept transfer of care cannot be made until after the initial interprofessional telephone/internet consultation.

The patient for whom the interprofessional telephone/internet consultation is requested may be either a new patient to the consulting physician or an established patient with a new problem or an exacerbation of an existing problem. However the consultant should not have seen the patient in a face to face encounter within the last 14 days. When the telephone/internet consultation leads to an immediate transfer of care or other face-to-face service (eg, a surgery, hospital visit or a scheduled office evaluation of the patient) within the next 14 days or next available appointment date by the consultative physician, these codes are not reported.

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

Review of pertinent medical records, laboratory studies, imaging studies, medication profile, pathology specimens, etc may be required and transmitted electronically, by fax or by mail immediately before the telephone/internet consultation or following the consultation.

The review of this data is included in the telephone/internet consultation service and should not be reported separately. The majority of the service time reported (greater than 50%) must be devoted to the medical consultative verbal/I**nternet** discussion. This service should not be reported more than once within a seven day interval.

If more than one telephone/internet contact(s) is required to complete the consultation request (eg, discussion of test results), the entirety of the service and the cumulative discussion and information review time should be reported with a single code.

The written or verbal request for telephone/internet advice by the treating/requesting physician/qualified healthcare professional should be documented in the patient's medical record, including the reason for the request, and concludes with a verbal opinion report and written report from the consulting physician to the treating/requesting physician/qualified healthcare professional.

Telephone/internet consultations of less than 5 minutes should not be reported. Consultant communications with the patient and/or family may be reported using 99441-99444, 98966-98969) and the time related to these services is not used in reporting 99446-99449.

When the sole purpose of the telephone/internet communication is to arrange a transfer of care or other face-to-face service these codes are not reported.

The treating/requesting physician/qualified healthcare professional may report the prolonged service codes 99354-99357 for the time spent on the inter-professional telephone/internet discussion with the consulting (eg, specialist) physician if the time **exceeds 30 minute**s beyond the typical time of the appropriate E/M service performed and the patient is present (onsite) and accessible to the treating/requesting physician/qualified healthcare professional. If the interprofessional telephone/internet assessment and management service occurs when the patient is not present or on-site, and the discussion time exceeds 30 minutes beyond the typical time of the appropriate E/M service performed, then the non face-to-face prolonged service codes 99358-99359 may be reported by the treating/requesting physician/qualified healthcare professional.

(For telephone services provided by a physician to a patient, see 99441-99443)

(For telephone services provided by a qualified healthcare professional to a patient, see 98966-98968)

(For an on-line medical evaluation provided by a physician to a patient, use 99444)

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

(For an on-line assessment and management service provided by a qualified healthcare professional to a patient, use 98969)

Medicine
Non-Face-To-Face Services
On-line Medical Evaluation

An on-line electronic medical evaluation is a non-face-to-face assessment and management service by a qualified health care professional to a patient using Internet resources in response to a patient's on-line inquiry. Reportable services involve the qualified health care professional's personal timely response to the patient's inquiry and must involve permanent storage (electronic or hard copy) of the encounter. This service is reported only once for the same episode of care during a seven-day period, although multiple qualified healthcare professionals could report their exchange with the same patient. If the on-line medical evaluation refers to an assessment and management service previously performed and reported by the qualified health care professional within the previous seven days (either qualified health care professional requested or unsolicited patient follow-up) or within the postoperative period of the previously completed procedure, then the service(s) are considered covered by the previous assessment and management office service or procedure. A reportable service encompasses the sum of communication (eg, related telephone calls, prescription provision, laboratory orders) pertaining to the on-line patient encounter.

(For an on-line medical evaluation provided by a physician, use 99444)

CPT five-digit codes, two-digit modifiers, and descriptions only are copyright by the American Medical Association.

98969	Online evaluation and management service provided by a qualified nonphysician health care professional to an established patient or guardian not originating from a related E/M service provided within the previous 7 days, using the Internet or similar electronic communications network (2/12 Panel Action) (Do not report 98969 when using 99339-99340, 99374-99380 for the same communication[s]) (Do not report 98969 for anticoagulation management when reporting 99363, 99364)

SUMMARY OF RECOMMENDATION

CPT Code:99446 Tracking Number E1 Original Specialty Recommended RVU: **0.50**
Presented Recommended RVU: **0.35**
Global Period: XXX RUC Recommended RVU: **0.35**

CPT Descriptor: Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 5-10 minutes of medical consultative discussion and review

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A two day old hospitalized newborn develops poor feeding and tachypnea and is diagnosed with group B streptococcal bacteremia. The patient's primary care physician telephones an infectious disease specialist located several hours away for treatment advice.

Percentage of Survey Respondents who found Vignette to be Typical: 65%

Site of Service (Complete for 010 and 090 Globals Only)

Percent of survey respondents who stated they perform the procedure; In the hospital 0% , In the ASC 0%, In the office 0%

Percent of survey respondents who stated they typically perform this procedure in the hospital, stated the patient is; Discharged the same day 0% , Overnight stay-less than 24 hours 0% , Overnight stay-more than 24 hours 0%

Percent of survey respondents who stated that if the patient is typically kept overnight also stated that they perform an E&M service later on the same day 0%

Moderate Sedation

Is moderate sedation inherent to this procedure in the Hospital/ASC setting? No
Percent of survey respondents who stated moderate sedation is typical in the Hospital/ASC setting? 0%

Is moderate sedation inherent to this procedure in the office setting? No
Percent of survey respondents who stated moderate sedation is typical in the office setting? 0%

Description of Pre-Service Work: Confirms that patient, parent, or legal guardian has been informed in advance of the telephone consultation and has agreed. Decide on appropriate timing to fit call into existing daily schedule. Review any data or relevant information sent to consultant in advance of call.

Description of Intra-Service Work: Clarify from the requesting physician the nature of the patient's problem to be discussed. Obtain from the requesting physician all relevant history, physical examination, lab data, imaging. Present to requesting physician an analysis of the patient's problem, including likely diagnosis and suggested management. Provide to requesting physician alternative diagnoses and management approaches, including plusses and minuses of each. Respond to questions from the requesting physician to clarify diagnostic and treatment approach. Relay to requesting physician all relevant scientific background on the disease at issue needed to understand the consultant's recommendations or to respond to requesting physician's questions. Outline suggestions for long-term handling of the patient's problem.

Description of Post-Service Work: Review all relevant lab tests and other data not previously made available to consultant. Complete any literature review in response to issues raised during the phone call. Prepare a written response to the requesting physician.

Modifier -51 Exempt Status
Is the recommended value for the new/revised procedure based on its modifier -51 exempt status? No

New Technology/Service:
Is this new/revised procedure considered to be a new technology or service? Yes

KEY REFERENCE SERVICE:

Key CPT Code	Global	Work RVU	Time Source
99441	XXX	0.25	**RUC Time**

CPT Descriptor Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion

KEY MPC COMPARISON CODES:
Compare the surveyed code to codes on the RUC's MPC List. Reference codes from the MPC list should be chosen, if appropriate that have relative values higher and lower than the requested relative values for the code under review.

MPC CPT Code 1	Global	Work RVU	Time Source	Most Recent Medicare Utilization
99212	XXX	0.48	**RUC Time**	18,400,000

CPT Descriptor 1 Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A problem focused history; A problem focused examination; Straightforward medical decision making. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are self limited or minor. Physicians typically spend 10 minutes face-to-face with the patient and/or family.

MPC CPT Code 2	Global	Work RVU	Time Source	Most Recent Medicare Utilization
65205	000	0.71	**RUC Time**	28,100

CPT Descriptor 2 Removal of foreign body, external eye; conjunctival superficial

Other Reference CPT Code	Global	Work RVU	Time Source
99442	XXX	0.50	**RUC Time**

CPT Descriptor Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):
Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

Number of respondents who choose Key Reference Code: 15 **% of respondents:** 31.2 **%**

TIME ESTIMATES (Median)	**CPT Code: 99446**	**Key Reference CPT Code:** 99441	**Source of Time RUC Time**
Median Pre-Service Time	3.00	1.00	

Median Intra-Service Time	8.00	8.00
Median Immediate Post-service Time	5.00	4.00
Median Critical Care Time	0.0	0.00
Median Other Hospital Visit Time	0.0	0.00
Median Discharge Day Management Time	0.0	0.00
Median Office Visit Time	0.0	0.00
Prolonged Services Time	0.0	0.00
Median Subsequent Observation Care Time	0.0	0.00
Median Total Time	**16.00**	**13.00**
Other time if appropriate		

INTENSITY/COMPLEXITY MEASURES (Mean)	**(of those that selected Key Reference code)**	
Mental Effort and Judgment (Mean)		
The number of possible diagnosis and/or the number of management options that must be considered	3.87	3.53
The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be reviewed and analyzed	3.73	3.60
Urgency of medical decision making	4.13	3.60
Technical Skill/Physical Effort (Mean)		
Technical skill required	3.13	3.00
Physical effort required	2.13	2.33
Psychological Stress (Mean)		
The risk of significant complications, morbidity and/or mortality	3.87	3.53
Outcome depends on the skill and judgment of physician	4.07	3.67
Estimated risk of malpractice suit with poor outcome	3.33	3.33

INTENSITY/COMPLEXITY MEASURES	**CPT Code**	**Reference Service 1**
Time Segments (Mean)		
Pre-Service intensity/complexity	2.33	2.27
Intra-Service intensity/complexity	3.47	3.40
Post-Service intensity/complexity	2.67	2.60

Additional Rationale and Comments

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

An expert panel was constituted from RUC advisors representing the surveying specialty societies. This expert panel reviewed the survey results in detail and conferred by telephone conference call on several occasions, together with specialty society staff members. As the four codes are linked and ordered by increasing time intervals for the duration of the telephone consultation, initial discussion focused on establishing 99446 as the anchor for the family. Based on survey results and comparison with other codes, the panel recommends the 25th percentile of the survey results (0.50 work RVUs) for 99446. Based on similar considerations, the panel recommends the 25th percentile of the survey results (0.75 work RVUs) for 99447.

The physician work survey results for 99448 were virtually identical to those of 99447, thus leading to a rank order anomaly if the 25th percentile were used. The panel recommends that the median physician work from the survey (1.00) should be used to avoid this rank order anomaly. In addition, this recommendation also maintains the same increment between 99446 and 99447 as between 99447 and 99448.

For 99449, the panel recommends a physician work value of 1.25, just slightly over the survey 25th percentile. This recommendation maintains the same interval between 99449 and 99448 as between 99448 and 99447 or between 99447 and 99446.

After comparison of the survey times with the times from various comparator codes, the panel recommends the median survey times for all four codes as there didn't appear to be substantial reason for modifying the survey results.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) This service was not previously reported.

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty Pediatrics How often? Commonly

Specialty Neurology/Endocrinology/Rheumatology How often? Commonly

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 112497
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 83081 Percentage 73.85 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 29416 Percentage 26.14 %

Specialty Frequency 0 Percentage 0.00 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 24,691 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 0 Percentage 0.00 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 24691 Percentage 100.00 %

Specialty Frequency 0 Percentage 0.00 %

Do many physicians perform this service across the United States? Yes

---

Professional Liability Insurance Information (PLI)

If the surveyed code is an existing code and the specialty believes the specialty utilization mix will not change, enter the surveyed existing CPT code number

If this code is a new/revised code or an existing code in which the specialty utilization mix will change, please select another crosswalk based on a similar specialty mix. 99462

CPT Descriptor: Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 11-20 minutes of medical consultative discussion and review

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A 66 year old male on levothyroxine and cortisone is admitted to an ICU for chest pain. The hospitalist contacts the patient's endocrinologist to obtain additional information regarding the illness(es) being treated, the dosage of the prescribed medications, any recent laboratory data and additional treatment and management options that should be considered during the hospitalization.

Percentage of Survey Respondents who found Vignette to be Typical: 74%

Site of Service (Complete for 010 and 090 Globals Only)

Percent of survey respondents who stated they perform the procedure; In the hospital 0% , In the ASC 0%, In the office 0%

Percent of survey respondents who stated they typically perform this procedure in the hospital, stated the patient is; Discharged the same day 0% , Overnight stay-less than 24 hours 0% , Overnight stay-more than 24 hours 0%

Percent of survey respondents who stated that if the patient is typically kept overnight also stated that they perform an E&M service later on the same day 0%

Moderate Sedation

Is moderate sedation inherent to this procedure in the Hospital/ASC setting? No
Percent of survey respondents who stated moderate sedation is typical in the Hospital/ASC setting? 0%

Is moderate sedation inherent to this procedure in the office setting? No
Percent of survey respondents who stated moderate sedation is typical in the office setting? 0%

Description of Pre-Service Work: Confirms that patient, parent, or legal guardian has been informed in advance of the telephone consultation and has agreed. Decide on appropriate timing to fit call into existing daily schedule. Review any data or relevant information sent to consultant in advance of call.

Description of Intra-Service Work: Clarify from the requesting physician the nature of the patient's problem to be discussed. Obtain from the requesting physician all relevant history, physical examination, lab data, imaging. Present to requesting physician an analysis of the patient's problem, including likely diagnosis and suggested management. Provide to requesting physician alternative diagnoses and management approaches, including plusses and minuses of each. Respond to questions from the requesting physician to clarify diagnostic and treatment approach. Relay to requesting physician all relevant scientific background on the disease at issue needed to understand the consultant's recommendations or to respond to requesting physician's questions. Outline suggestions for long-term handling of the patient's problem.

Description of Post-Service Work: Review all relevant lab tests and other data not previously made available to consultant. Complete any literature review in response to issues raised during the phone call. Prepare a written response to the requesting physician.

Additional Rationale and Comments

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

An expert panel was constituted from RUC advisors representing the surveying specialty societies. This expert panel reviewed the survey results in detail and conferred by telephone conference call on several occasions, together with specialty society staff members. As the four codes are linked and ordered by increasing time intervals for the duration of the telephone consultation, initial discussion focused on establishing 99446 as the anchor for the family. Based on survey results and comparison with other codes, the panel recommends the 25th percentile of the survey results (0.50 work RVUs) for 99446. Based on similar considerations, the panel recommends the 25th percentile of the survey results (0.75 work RVUs) for 99447.

The physician work survey results for 99448 were virtually identical to those of 99447, thus leading to a rank order anomaly if the 25th percentile were used. The panel recommends that the median physician work from the survey (1.00) should be used to avoid this rank order anomaly. In addition, this recommendation also maintains the same increment between 99446 and 99447 as between 99447 and 99448.

For 99449, the panel recommends a physician work value of 1.25, just slightly over the survey 25th percentile. This recommendation maintains the same interval between 99449 and 99448 as between 99448 and 99447 or between 99447 and 99446.

After comparison of the survey times with the times from various comparator codes, the panel recommends the median survey times for all four codes as there didn't appear to be substantial reason for modifying the survey results.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

Modifier -51 Exempt Status
Is the recommended value for the new/revised procedure based on its modifier -51 exempt status? No

New Technology/Service:
Is this new/revised procedure considered to be a new technology or service? Yes

KEY REFERENCE SERVICE:

Key CPT Code	Global	Work RVU	Time Source
99443	XXX	0.75	**RUC Time**

CPT Descriptor Telephone evaluation and management service provided by a physician to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion

KEY MPC COMPARISON CODES:
Compare the surveyed code to codes on the RUC's MPC List. Reference codes from the MPC list should be chosen, if appropriate that have relative values higher and lower than the requested relative values for the code under review.

MPC CPT Code 1	Global	Work RVU	Time Source	Most Recent Medicare Utilization
99213	XXX	0.97	**RUC Time**	99,960,000

CPT Descriptor 1 Office or other outpatient visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: An expanded problem focused history; An expanded problem focused examination; Medical decision making of low complexity. Counseling and coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low to moderate severity. Physicians typically spend 15 minutes face-to-face with the patient and/or family.

MPC CPT Code 2	Global	Work RVU	Time Source	Most Recent Medicare Utilization

CPT Descriptor 2

Other Reference CPT Code	Global	Work RVU	Time Source
99242	XXX	1.34	**RUC Time**

CPT Descriptor Office consultation for a new or established patient, which requires these 3 key components: An expanded problem focused history; An expanded problem focused examination; and Straightforward medical decision making. Counseling and/or coordination of care with other providers or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of low severity. Physicians typically spend 30 minutes face-to-face with the patient and/or family.

RELATIONSHIP OF CODE BEING REVIEWED TO KEY REFERENCE SERVICE(S):
Compare the pre-, intra-, and post-service time (by the median) and the intensity factors (by the mean) of the service you are rating to the key reference services listed above. **Make certain that you are including existing time data (RUC if available, Harvard if no RUC time available) for the reference code listed below.**

Number of respondents who choose Key Reference Code: 11 **% of respondents:** 35.4 **%**

TIME ESTIMATES (Median)	**CPT Code: 99448**	**Key Reference CPT Code:** 99443	**Source of Time RUC Time**
Median Pre-Service Time	5.00	1.00	
Median Intra-Service Time	25.00	20.00	
Median Immediate Post-service Time	5.00	10.00	
Median Critical Care Time	0.0	0.00

Prolonged Services Time	0.0	0.00	
Median Subsequent Observation Care Time	0.0	0.00	
Median Total Time	**35.00**	**31.00**	
Other time if appropriate			

INTENSITY/COMPLEXITY MEASURES (Mean)	**(of those that selected Key Reference code)**	
Mental Effort and Judgment (Mean)		
The number of possible diagnosis and/or the number of management options that must be considered	4.09	4.00
The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be reviewed and analyzed	4.18	3.91
Urgency of medical decision making	4.18	3.91
Technical Skill/Physical Effort (Mean)		
Technical skill required	3.27	3.18
Physical effort required	2.73	2.64
Psychological Stress (Mean)		
The risk of significant complications, morbidity and/or mortality	4.09	3.82
Outcome depends on the skill and judgment of physician	4.27	4.18
Estimated risk of malpractice suit with poor outcome	3.82	3.91

INTENSITY/COMPLEXITY MEASURES	**CPT Code**	**Reference Service 1**
Time Segments (Mean)		
Pre-Service intensity/complexity	2.73	2.64

Intra-Service intensity/complexity	4.18	3.82
Post-Service intensity/complexity	2.82	2.64

Additional Rationale and Comments

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

An expert panel was constituted from RUC advisors representing the surveying specialty societies. This expert panel reviewed the survey results in detail and conferred by telephone conference call on several occasions, together with specialty society staff members. As the four codes are linked and ordered by increasing time intervals for the duration of the telephone consultation, initial discussion focused on establishing 99446 as the anchor for the family. Based on survey results and comparison with other codes, the panel recommends the 25th percentile of the survey results (0.50 work RVUs) for 99446. Based on similar considerations, the panel recommends the 25th percentile of the survey results (0.75 work RVUs) for 99447.

The physician work survey results for 99448 were virtually identical to those of 99447, thus leading to a rank order anomaly if the 25th percentile were used. The panel recommends that the median physician work from the survey (1.00) should be used to avoid this rank order anomaly. In addition, this recommendation also maintains the same increment between 99446 and 99447 as between 99447 and 99448.

For 99449, the panel recommends a physician work value of 1.25, just slightly over the survey 25th percentile. This recommendation maintains the same interval between 99449 and 99448 as between 99448 and 99447 or between 99447 and 99446.

After comparison of the survey times with the times from various comparator codes, the panel recommends the median survey times for all four codes as there didn't appear to be substantial reason for modifying the survey results.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) This service was not previously reported.

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty Pediatrics How often? Commonly

Specialty Neurology/Endocrinology/Rheumatology How often? Commonly

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 94626
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 72212 Percentage 76.31 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 22414 Percentage 23.68 %

Specialty Frequency 0 Percentage 0.00 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 21,464 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 0 Percentage 0.00 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 21464 Percentage 100.00 %

Specialty Frequency 0 Percentage 0.00 %

Do many physicians perform this service across the United States? Yes

Professional Liability Insurance Information (PLI)

If the surveyed code is an existing code and the specialty believes the specialty utilization mix will not change, enter the surveyed existing CPT code number

If this code is a new/revised code or an existing code in which the specialty utilization mix will change, please select another crosswalk based on a similar specialty mix. 99462

AMA/SPECIALTY SOCIETY RVS UPDATE PROCESS
SUMMARY OF RECOMMENDATION

CPT Code:99449 Tracking Number E4 Original Specialty Recommended RVU: **1.25**
Presented Recommended RVU: **1.40**
Global Period: XXX RUC Recommended RVU: **1.40**

CPT Descriptor: Interprofessional telephone/internet assessment and management service provided by a consultative physician including a verbal and written report to the patient's treating/requesting physician/qualified healthcare professional; 31 minutes or more of medical consultative discussion and review

CLINICAL DESCRIPTION OF SERVICE:

Vignette Used in Survey: A 10 year old boy with attention deficit disorder has become increasingly aggressive at home and school. The child's pediatrician arranges a telephone consultation with a child and adolescent psychiatrist and forwards historical records on the child prior to the telephone consultation.

Percentage of Survey Respondents who found Vignette to be Typical: 62%

Site of Service (Complete for 010 and 090 Globals Only)

Percent of survey respondents who stated they perform the procedure; In the hospital 0% , In the ASC 0%, In the office 0%

Percent of survey respondents who stated they typically perform this procedure in the hospital, stated the patient is; Discharged the same day 0% , Overnight stay-less than 24 hours 0% , Overnight stay-more than 24 hours 0%

Percent of survey respondents who stated that if the patient is typically kept overnight also stated that they perform an E&M service later on the same day 0%

Moderate Sedation

Is moderate sedation inherent to this procedure in the Hospital/ASC setting? No
Percent of survey respondents who stated moderate sedation is typical in the Hospital/ASC setting? 0%

Is moderate sedation inherent to this procedure in the office setting? No
Percent of survey respondents who stated moderate sedation is typical in the office setting? 0%

Description of Pre-Service Work: Confirms that patient, parent, or legal guardian has been informed in advance of the telephone consultation and has agreed. Decide on appropriate timing to fit call into existing daily schedule. Review any data or relevant information sent to consultant in advance of call.

Description of Intra-Service Work: Clarify from the requesting physician the nature of the patient's problem to be discussed. Obtain from the requesting physician all relevant history, physical examination, lab data, imaging. Present to requesting physician an analysis of the patient's problem, including likely diagnosis and suggested management. Provide to requesting physician alternative diagnoses and management approaches, including plusses and minuses of each. Respond to questions from the requesting physician to clarify diagnostic and treatment approach. Relay to requesting physician all relevant scientific background on the disease at issue needed to understand the consultant's recommendations or to respond to requesting physician's questions. Outline suggestions for long-term handling of the patient's problem.

Description of Post-Service Work: Review all relevant lab tests and other data not previously made available to consultant. Complete any literature review in response to issues raised during the phone call. Prepare a written response to the requesting physician.

Additional Rationale and Comments

Describe the process by which your specialty society reached your final recommendation. *If your society has used an IWPUT analysis, please refer to the Instructions for Specialty Societies Developing Work Relative Value Recommendations for the appropriate formula and format.*

An expert panel was constituted from RUC advisors representing the surveying specialty societies. This expert panel reviewed the survey results in detail and conferred by telephone conference call on several occasions, together with specialty society staff members. As the four codes are linked and ordered by increasing time intervals for the duration of the telephone consultation, initial discussion focused on establishing 99446 as the anchor for the family. Based on survey results and comparison with other codes, the panel recommends the 25th percentile of the survey results (0.50 work RVUs) for 99446. Based on similar considerations, the panel recommends the 25th percentile of the survey results (0.75 work RVUs) for 99447.

The physician work survey results for 99448 were virtually identical to those of 99447, thus leading to a rank order anomaly if the 25th percentile were used. The panel recommends that the median physician work from the survey (1.00) should be used to avoid this rank order anomaly. In addition, this recommendation also maintains the same increment between 99446 and 99447 as between 99447 and 99448.

For 99449, the panel recommends a physician work value of 1.25, just slightly over the survey 25th percentile. This recommendation maintains the same interval between 99449 and 99448 as between 99448 and 99447 or between 99447 and 99446.

After comparison of the survey times with the times from various comparator codes, the panel recommends the median survey times for all four codes as there didn't appear to be substantial reason for modifying the survey results.

SERVICES REPORTED WITH MULTIPLE CPT CODES

1. Is this code typically reported on the same date with other CPT codes? If yes, please respond to the following questions: No

   Why is the procedure reported using multiple codes instead of just one code? (Check all that apply.)

   - ☐ The surveyed code is an add-on code or a base code expected to be reported with an add-on code.
   - ☐ Different specialties work together to accomplish the procedure; each specialty codes its part of the physician work using different codes.
   - ☐ Multiple codes allow flexibility to describe exactly what components the procedure included.
   - ☐ Multiple codes are used to maintain consistency with similar codes.
   - ☐ Historical precedents.
   - ☐ Other reason (please explain)

2. Please provide a table listing the typical scenario where this code is reported with multiple codes. Include the CPT codes, global period, work RVUs, pre, intra, and post-time for each, summing all of these data and accounting for relevant multiple procedure reduction policies. If more than one physician is involved in the provision of the total service, please indicate which physician is performing and reporting each CPT code in your scenario.

FREQUENCY INFORMATION

How was this service previously reported? (if unlisted code, please ensure that the Medicare frequency for this unlisted code is reviewed) This service was not previously reported.

How often do physicians in your specialty perform this service? (ie. commonly, sometimes, rarely)
If the recommendation is from multiple specialties, please provide information for each specialty.

Specialty Pediatrics How often? Commonly

Specialty Neurology/Endocrinology/Rheumatology How often? Commonly

Specialty How often?

Estimate the number of times this service might be provided nationally in a one-year period? 79666
If the recommendation is from multiple specialties, please provide the frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 60214 Percentage 75.58 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 17452 Percentage 21.90 %

Specialty Frequency 0 Percentage 0.00 %

Estimate the number of times this service might be **provided to Medicare patients** nationally in a one-year period? 18,694 If this is a recommendation from multiple specialties please estimate frequency and percentage for each specialty. Please explain the rationale for this estimate. Expert panel estimation

Specialty Pediatrics Frequency 0 Percentage 0.00 %

Specialty Neurology/Endocrinology/Rheumatology Frequency 18694 Percentage 100.00 %

Specialty Frequency 0 Percentage 0.00 %

Do many physicians perform this service across the United States? Yes

---

Professional Liability Insurance Information (PLI)

If the surveyed code is an existing code and the specialty believes the specialty utilization mix will not change, enter the surveyed existing CPT code number

If this code is a new/revised code or an existing code in which the specialty utilization mix will change, please select another crosswalk based on a similar specialty mix. 99462

Re: Direct Practice Expense Inputs for Interprofessional Telephone/Internet Consultative Services (994XX1-994XX4; Tracking Codes E1-E4; Tab 14)

Dear Dr Levy:

Codes 994XX1-994XX4 (*Interprofessional telephone/internet assessment and management service provided by a consultative physician*) are among the codes being considered during the October 2012 RUC meeting.

The American Academy of Pediatrics (AAP), the American Academy of Neurology (AAN), the American College of Rheumatology (ACRh), The Endocrine Society (TES), and the American Association of Clinical Endocrinologists (AACE) have conducted physician work surveys for codes 994XX1-994XX4 and developed work RVU recommendations based on the survey results.

However, we recommend no direct practice expense inputs for codes 994XX1-994XX4.

If you have any questions, please contact Linda Walsh, AAP staff, at 800/433-9016 ext 7931 or lwalsh@aap.org. Thank you.

Sincerely,

Alfonso Bello, MD
ACRh RUC Advisor

The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,235 services through 16 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the "new technology" list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining over 2,200 potentially misvalued services accounting for $43 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,225 services, redistributing over $4 billion. Here are the outcomes for the committee's review of 2,235 codes:

Potentially Misvalued Services Project

Source: American Medical Association

New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 528 services. In September 2010, the re-review cycle began and since then the RUC has recommended 35 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 216 services every September after three years of Medicare claims data is available for each service.

Methodology Improvements
The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

Site of Service Anomalies
The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 14 codes. The RUC completed review of services under this initial screen.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These services were referred to CPT and will be reviewed by the RUC for the 2018 Medicare Physician Payment Schedule.

In 2016, the RUC identified one site of service anomaly CPT code which will be reviewed by the RUC for the 2019 Medicare Physician Payment Schedule.

High Volume Growth

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 15 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 44 recommendations to CMS for services for the 2012-2017 Medicare Physician Payment Schedules. In September 2011, the RUC began review of services after two years of utilization data were collected. The RUC will continue to review the remaining four services after additional utilization data is available.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 57 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC recommended review of five services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted eight codes and the RUC submitted recommendations for 41 services for the 2015-2018 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 26 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC referred two services to the CPT Editorial Panel for revisions and recommended the review of seven services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted three codes and the RUC submitted recommendations for six services for the 2017 and 2018 Medicare Physician Payment Schedules. The RUC will review the remaining seven services for the 2019 Medicare Physician Payment Schedule.

In October 2016, the RUC ran this screen again and the query resulted in the identification of 12 services, which the RUC will assess and provide recommendations for the in the 2019 Medicare Physician Payment Schedule.

CMS Fastest Growing

In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 39 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 33 recommendations to CMS for the 2012-2016 Medicare Physician Payment Schedules. The RUC will review the remaining five services after additional utilization data is available.

High IWPUT

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWPUT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWPUT was considered appropriate. The RUC completed review of services under this screen.

Services Surveyed by One Specialty – Now Performed by a Different Specialty

In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

Harvard Valued

Utilization over 1 Million

CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000

The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 30,000

In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Medicare Allowed Charges >$10 million
In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > $10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately $1 million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS/Other
Utilization over 500,000
In April 2011, the RUC identified 410 codes with a source of "CMS/Other." CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. "CMS/Other" source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service after additional utilization data is available.

Utilization over 250,000
In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC referred one service to the CPT® Editorial Panel, removed nine services and submitted 31 recommendations to CMS for the 2015-2018 Medicare Physician Payment Schedules. The RUC will review one service for the 2019 Medicare Physician Payment Schedule.

Utilization over 100,000
In October 2016, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 100,000 or more, which resulted in 27 services and was expanded to 39 services to include the family of services. The RUC will review these services for the 2019 Medicare Physician Payment Schedule.

Bundled CPT® Services
Reported 95% or More Together
The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

Reported 75% or More Together
In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar "groups" to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code

groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 125 new and/or revised codes that described the bundles of services. The CPT® Editorial Panel and the RUC are currently working on four services and expect review two services after additional utilization data is available.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 149 total codes under review, the CPT® Editorial Panel deleted 49 services and is scheduled to review one code in the 2019 cycle. The RUC has submitted 100 code recommendations for the 2014-2018 Medicare Physician Payment Schedules.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions. Of the 74 total codes under review, the CPT Editorial Panel deleted 26 services. The RUC will submit 48 code recommendations for the 2017-2018 Medicare Physician Payment Schedules.

Low Value/Billed in Multiple Units
CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Low Value/High Volume Codes
CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Multi-Specialty Points of Comparison List
CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100

of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS High Expenditure Procedural Codes
In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes. The RUC submitted 123 recommendations to CMS for the 2013-2018 Medicare Physician Payment Schedules will review utilization data for two services after additional data is available.

In the Final Rule for 2016, CMS requested that the RUC review a list of 103 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of $10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010.

The RUC expanded the list of services to 208 services to include additional codes as part of the family. The CPT Editorial Panel deleted 23 codes and will review 18 codes for the 2019 cycle. The RUC submitted 118 recommendations to CMS for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining services for 2018-2019 cycles.

Services with Stand-Alone PE Procedure Time
In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of $100,000 or more, include direct equipment inputs that amount to $100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Pre-Time Analysis
In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments. The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule.

Post-Operative Visits

010-Day Global Codes

In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

090-Day Global Codes

In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

High Level E/M in Global Period

In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to 11 services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The CPT Editorial Panel deleted one code. The RUC submitted recommendations for nine services for the 2017-2018 Medicare Physician Payment Schedules. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward.

Public Comment Requests

In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

Final Rule for 2013

In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 38 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thorascopic procedures. The RUC submitted recommendations for 28 services for the 2014-2017 Medicare Physician Payment Schedules. The RUC will review two services after additional utilization data is available.

Final Rule for 2014

CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a

dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 91 services. The CPT® Editorial Panel deleted 10 services. The RUC submitted recommendations to CMS for 80 services for the 2015-2018 Medicare Physician Payment Schedules and will review one service after additional data is available.

Final Rule for 2015
In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 46 services to include additional codes as part of this family. The CPT Editorial Panel deleted 14 services. The RUC will submit 32 recommendations for the 2016-2018 Medicare Physician Payment Schedules.

Final Rule for 2016
In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 39 services to include an additional code as part of the family. The CPT Editorial Panel deleted 3 services. The RUC submitted 29 recommendations for the 2017-2018 Medicare Physician Payment Schedules and will review the remaining seven services for the 2019 Medicare Physician Payment Schedule.

Other Issues
In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT® Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

CMS Requests and RUC Relativity Assessment Workgroup Code Status

Total Number of Codes Identified*	**2,235**
Codes Completed	**1,970**
Work and PE Maintained	565
Work Increased	180
Work Decreased	706
Direct Practice Expense Revised (beyond work changes)	152
Deleted from CPT®	367
Codes Under Review	**265**
Referred to CPT® Editorial Panel	36
RUC to Review January 2017 or April 2017	181
RUC future review after additional data obtained	48

**The total number of codes identified will not equal the number of codes from each screen as some codes have been identified in more than one screen.*

The RUC's efforts for 2009-2016 have resulted in over $4 billion for redistribution within the Medicare Physician Payment Schedule.
