Thinking now about health care reform, I am going to read you some of the proposed changes being considered by Congress to the current health care law, also known as ObamaCare. For each one, please tell me whether you support or oppose making this change to ObamaCare or if you do not have an opinion about it one way or another. (IF SUPPORT/Oppose, ASK:) And do you strongly (support/oppose) this change to ObamaCare or just somewhat (support/oppose) this change to ObamaCare? (RANDOMIZE)

Q13. Eliminate the money that the federal government pays to health insurance companies to provide lower deductibles and lower out-of-pocket health care costs for low-income people.

Q14. Eliminate the money that the federal government provides to low-income people which helps pay their monthly insurance premiums and instead offer annual tax credits ranging from two thousand to four thousand dollars a year to help people purchase health insurance.

Q15. Eliminate most of the new taxes that are part of ObamaCare such as removing the additional tax on people making more than two hundred thousand dollars a year and the additional taxes on health insurance companies and medical device manufacturers.

Q16. Provide federal funding for states to cover people with pre-existing conditions through separate high-risk insurance pools.

Q17. Keep in place the protections for people with pre-existing conditions as long as they maintain their health insurance coverage continuously. If they do not have coverage for more than sixty-three days, health insurance companies would be allowed to charge people with pre-existing conditions more for their insurance.

Q18. Eliminate the seven hundred fifty-five million dollars in extra federal funding West Virginia receives to cover more people on Medicaid, which also provides nearly half of the money the state uses to treat heroin and opioid prescription drug addiction.
Q19. Allow health insurance to be bought across state lines so there is more competition between health insurance companies to provide more options at a cheaper cost.  

Q20. Change Medicaid, the program that provides health insurance coverage for low-income adults and children, from an entitlement program to a federal grant program so federal spending would be cut, but states can decide how to best use federal dollars to cover their low-income population. 

Q21. Cut the federal funding ObamaCare provides to states so they could expand their Medicaid programs to provide health insurance coverage to more low-income adults who were uninsured. 

Q22. Provide low-income people who are dropped from the Medicaid program with money from the federal government to help pay their monthly premium so they can purchase a private health insurance plan. 

Q23. Eliminate the ObamaCare requirement that all health plans sold must provide a standard set of government-established benefits, including mental health services, addiction treatment, maternity care, and provide preventive health services with no out-of-pocket costs. 

Q24. Provide low-income people with money from the federal government to purchase inexpensive health insurance plans that protect them if they have a very expensive illness or injury, but all preventive health services, routine doctor visits, tests, and minor operations would have to be paid out-of-pocket.
Now, I have just a few more questions for statistical purposes only...

Q25. (IF Q11:2-6 (NOT ON MEDICAID), ASK) Do you have a health insurance plan, that is, are you covered by a PRIVATE health insurance plan, a health insurance plan through ObamaCare, or by a GOVERNMENT program such as Medicare, Tricare or the Veterans Health Administration?
