Federal mandates require improvements to directory accuracy

A recent study reported that almost 50 percent of physician directory information is inaccurate*, prompting federal and state agencies to impose stricter data collection requirements on payers. As a result, your practice may be experiencing a marked increase in outreach from the health plans you work with to provide repetitious data verification updates.

Incorrect physician data impedes timely, affordable patient care

Patients rely on physician directories to make informed health plan choices, verify their physicians are in network and budget accordingly for health care expenses. When those directories are incorrect, patients may be at risk of unexpected medical costs and delays in care. It also puts your practice at risk of having dissatisfied patients, losing loyal patients and increasing uncollectible fees.

An advanced and proven technology

VerifyHCP is the only solution to leverage the power of the LexisNexis® HPCC Systems® computing platform and comprehensive repository of information about clinicians and to streamline the opportunity to help physicians better manage their directory profiles.

About the AMA

The American Medical Association is the premier national organization providing timely, essential resources that empower physicians, residents and medical students to succeed at every phase of their medical lives. The AMA has advanced the art and science of medicine and the betterment of public health for more than 170 years. For more information, visit ama-assn.org.

About LexisNexis Risk Solutions

LexisNexis Risk Solutions (lexisnexis.com/risk) is a leader in providing essential information that helps customers across all industries and government assess, predict and manage risk. Combining cutting-edge technology, unique data and advanced scoring analytics, LexisNexis provides products and services that address evolving client needs in the risk sector while upholding the highest standards of security and privacy. LexisNexis Risk Solutions is part of RELX Group plc, a world-leading provider of information and analytics for professional and business customers across industries.

Physician data updates have never been easier

AMA Business Solutions, a subsidiary of the American Medical Association, in collaboration with industry leader LexisNexis® Risk Solutions, has created VerifyHCP, a pre-populated physician data solution that streamlines verification and updates across participating health plans.

VerifyHCP helps transmit correct information to all payers from one place.

VerifyHCP benefits physicians and patients

VerifyHCP allows physicians to focus their resources on patient care and allows patients access to the credible information they need to make important health care decisions.

• Utilizes a single interface to update all participating directories at one time
• Features a highly accurate pre-populated physician profile prior to verification
• Leverages the AMA Physician Masterfile data and more than 2,000 other data sources
• Helps patients access more accurate directories when selecting physicians
• Reduces administrative burden on physicians and their staff

“T’m seeing the impacts already. I, myself, am receiving up to 25 calls per day from plans and I manage a team of 10 that are each seeing a similar volume.” — Credentialing Supervisor

Participation is easy and free

If your payer is already subscribed to VerifyHCP, you will receive an email invitation to update your practice profile. After a quick one-time registration, you or your staff can sign in and verify or update your data. Your information will then be available to multiple payers. It’s that simple.

For more information, visit ama-assn.org/verifyhcp.
