Subject: RUC Recommendations

Dear Administrator Verma:

The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2019*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the January 10-13, 2018 RUC meeting.

CPT 2019 New and Revised Codes – *January 2018 RUC Submission*

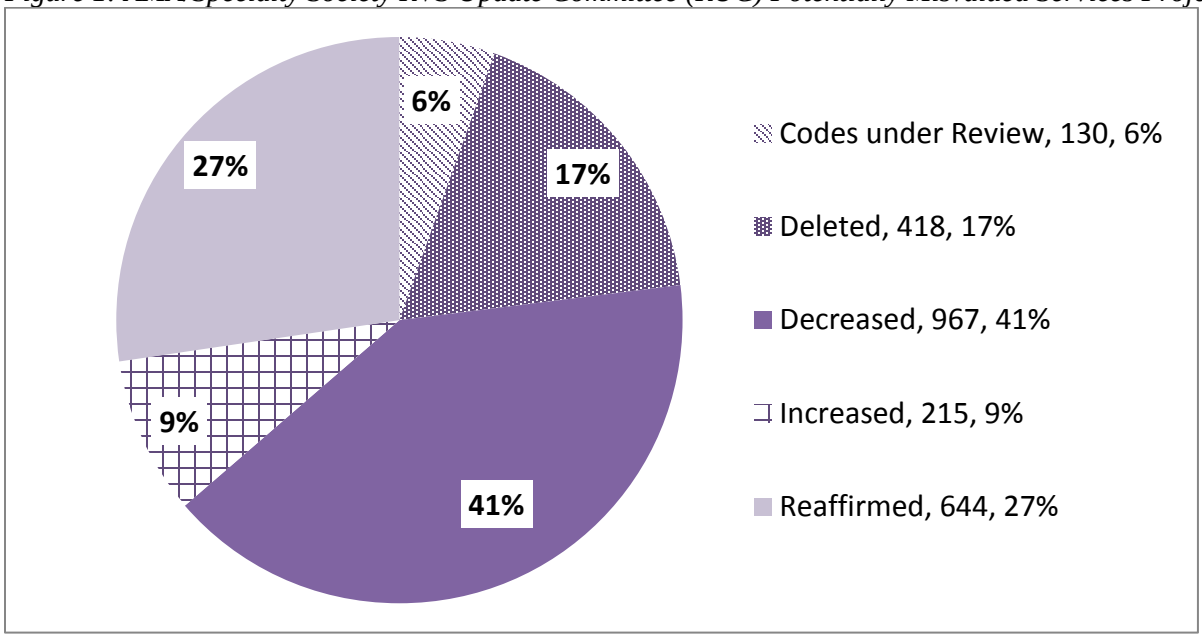
The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 49 new/revised/related family CPT codes at the January 2018 meeting. The RUC submits work value and/or practice expense inputs for 49 new/revised/related family CPT codes from the January meeting.

CPT 2019 New and Revised Codes – *Entire CPT 2019 Cycle*

The total number of coding changes for the entire *CPT 2019 cycle* is 195, including 94 additions, 46 revisions, and 55 deletions. In addition, 10 new codes were identified as part of the family for review in relationship to the new/revised codes. The 150 new/revised/related family CPT codes are summarized as follows:

- 25 services are not payable on the RBRVS or do not require physician work at this time (eg, laboratory services and vaccines), and accordingly, the RUC does not submit any information on these codes.
- The HCPAC submits recommendations for 9 new/revised CPT codes.

The RUC submits work value and/or practice expense inputs for 116 new/revised/related family CPT codes for the 2019 Medicare Physician Payment Schedule.



Existing Services Identified by RUC and CMS for Review

In addition to the new/revised CPT code submission, the RUC submits recommendations for 7 services identified by the RUC or CMS as potentially misvalued and reviewed at the January 2018 RUC meeting. The RUC recommends work relative values for 6 codes and direct practice expense inputs only for one code. These recommendations are in addition to the 56 recommendations for existing services submitted to CMS following the RUC's April and October 2017 meetings.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,374 potentially misvalued services through objective screening criteria and has completed review of 2,244 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter*.

Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project

RUC Identified Potentially Misvalued Services

Digital Breast Tomosynthesis

The RUC established a screen to examine services that were established by CMS/Other methodology. These services have not been reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. In October 2017, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 30,000 or more and identified G0279 *Diagnostic digital breast tomosynthesis, unilateral or bilateral (list separately in addition to G0204 or G0206).* When reviewing this service the RUC determined that G0279 should be deleted as CPT codes 77061 *Digital breast tomosynthesis; unilateral* and 77062 *Digital breast*

tomosynthesis; bilateral are available to report these services. **The RUC recommends that CMS delete G0279 and accept the RUC recommendation of 0.70 work RVUs for CPT code 77061 and 0.90 work RVUs for CPT code 77062 as recommended for CPT 2015.** *The April 2014 RUC recommendations are appended to this letter.*

Potentially Misreported Services

Muscle Testing

CPT code 95831 *Muscle testing, manual (separate procedure) with report; extremity (excluding hand) or trunk* was identified via the CMS/Other source with Medicare utilization over 30,000 screen. In January 2018, the Relativity Assessment Workgroup reviewed an action plan for this issue. The primary specialty providing this service is physical medicine and rehabilitation. However, the AAPM&R indicated that their physicians are not performing this service. The RUC noted that most of the Medicare claims for CPT code 95831 are being reported from one geographic location. **The RUC is notifying CMS of the possible inappropriate reporting of CPT code 95831.**

Practice Expense Subcommittee

New Clinical Activities

The attached materials include direct practice expense (PE) input (clinical staff time, supplies and equipment) recommendations for each code reviewed. Some CPT codes under review contain new clinical activities to be assigned a code number and added to the list of clinical activities that can be recommended for clinical staff time as part of the RUC's recommendations. Indicated in the list below are the new clinical activity code numbers and descriptions from the January 2018 RUC meeting. The CPT code that the RUC recommends the activity be allocated minutes for is included in parenthesis:

- CA045, Setup scope at global postop office visit (46500)
- CA046, Clean scope at global postop office visit (46500)

The RUC will add these clinical activities to the list of clinical activities labelled "clin activities" (second spreadsheet) following the PE spreadsheet in the PE workbook. The RUC requests that CMS add the clinical activity codes, CA045 and CA046, to your practice expense inputs database.

Minimum Multi-Specialty Visit Supply Pack Duplication Error

There are 165 CPT codes billed with an office evaluation and management or eye visit code more than 50% of the time in the nonfacility setting that have more minimum multi-specialty visit supply packs (SA048) then post-operative visits. This indicates that either they were not billed with an E/M when they were reviewed by the PE Subcommittee or the PE Subcommittee approved a minimum multi-specialty visit supply pack (SA048) without considering the resulting overlap of supplies between SA048 and the E/M supply pack (SA047). The RUC considers this a simple duplication error that should be corrected. **The RUC requests that CMS remove the appropriate number of supply item SA048 from 165 codes as identified by the RUC in the attached spreadsheet titled "Minimum Supply Pack Analysis".**

RUC Expected Specialty Recommendations for Low Volume Services CY2018 NPRM

There were some codes missing from the list of Expected Specialty Recommendations for Low Volume Services submitted to CMS with the RUC's recommendations for CY2018 NPRM. The original RUC analysis was based on the Medicare payment status for the global setting, whereas there are a few codes that only have their 26 modifier covered. As a result, there were an additional 28 codes that should be included on the list and recommendations are attached accordingly. **The RUC recommends that CMS add these codes to the list for rate-setting for the CY 2018 Medicare Physician Payment Schedule.**

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed USB drive are:

- RUC Recommendation Status Report for New and Revised Codes
- RUC Recommendation Status Report for 2,374 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.
- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.
- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the January 2018 RUC meeting.
- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.
- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.
- BETOS Assignment Table: The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change.
- Source Code Utilization Crosswalk Table: A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2019 conversion factor increase.

- New Technology List and Flow Chart: In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 570 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

We appreciate your consideration of these RUC recommendations. If you have any questions regarding the attached materials, please contact Sherry Smith at (312) 464-5604.

Sincerely,

Peter K. Smith, MD

The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,374 services through 18 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the "new technology" list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining over 2,300 potentially misvalued services accounting for $45 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,385 services, redistributing $5 billion. Here are the outcomes for the committee's review of 2,374 codes:

Potentially Misvalued Services Project

Source: American Medical Association

New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 570 services. In September 2010, the re-review cycle began and since then the RUC has recommended 41 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 172 services every September after three years of Medicare claims data is available for each service.

Methodology Improvements
The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

Site of Service Anomalies
The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 14 codes. The RUC completed review of services under this initial screen.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These services were referred to CPT and recommendations were submitted to CMS for the 2018 Medicare Physician Payment Schedule.

In 2016, the RUC identified one site of service anomaly CPT code and submitted the recommendation to CMS for the 2019 Medicare Physician Payment Schedule. In 2017, the RUC identified one site of service anomaly CPT code and has referred this code to the CPT Editorial Panel for revision.

High Volume Growth

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 15 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 44 recommendations to CMS for services for the 2012-2017 Medicare Physician Payment Schedules. In September 2011, the RUC began review of services after two years of utilization data were collected. The RUC will continue to review the remaining four services after additional utilization data is available.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 62 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC recommended review of two services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted ten codes and the RUC submitted recommendations for 47 services for the 2015-2019 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 30 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC will review eight services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted eight codes and the RUC submitted recommendations for 13 services for the 2017-2019 Medicare Physician Payment Schedules.

In October 2016, the RUC ran this screen again and the query resulted in the identification of 12 services, which was expanded to 14 services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The CPT Editorial Panel deleted one service. The RUC submitted recommendations for 9 services for the 2019 Medicare Physician Payment Schedule. The RUC will review two services after additional utilization data is available and provide recommendations for the remaining 2 services for the 2020 Medicare Physician Payment Schedule.

CMS Fastest Growing
In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 27 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 43codes. The RUC submitted 41 recommendations to CMS for the 2012-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

High IWPUT
The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWPUT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWPUT was considered appropriate. The RUC completed review of services under this screen.

Services Surveyed by One Specialty – Now Performed by a Different Specialty
In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

Harvard Valued
Utilization over 1 Million
CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 30,000
In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Medicare Allowed Charges >$10 million
In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > $10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately $1 million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS/Other
Utilization over 500,000
In April 2011, the RUC identified 410 codes with a source of "CMS/Other." CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. "CMS/Other" source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service for the 2020 Medicare Physician Payment Schedule.

Utilization over 250,000
In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC removed nine services and submitted 32 recommendations to CMS for the 2015-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
In October 2016, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 100,000 or more, which resulted in 27 services and was expanded to 41 services to include the family of services. The RUC referred two codes to CPT for deletion and submitted recommendations for 39 services for the 2019 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Bundled CPT® Services
Reported 95% or More Together
The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

Reported 75% or More Together
In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar "groups" to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 126 new and/or revised codes that described the bundles of services. The RUC will review two services after additional utilization data is available.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 167 total codes under review, the CPT® Editorial Panel deleted 52 services. The RUC has submitted 113 code recommendations for the 2014-2019 Medicare Physician Payment Schedules and will review two services after additional utilization data is available.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions. Of the 75 total codes under review, the CPT Editorial Panel deleted 26 services. The RUC submitted 47 code recommendations for the 2017-2019 Medicare Physician Payment Schedules and will review the two services after additional utilization data is available.

In October 2017 the Relativity Assessment Workgroup performed the fifth cycle analysis of code pairs reported together with 75% or greater frequency. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria four groups or 8 codes were identified. The Relativity Assessment Workgroup determined two groups totaling four codes require code bundling solutions. The RUC referred four codes to CPT for code bundling solutions.

Low Value/Billed in Multiple Units
CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Low Value/High Volume Codes
CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Multi-Specialty Points of Comparison List
CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100 of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS High Expenditure Procedural Codes
In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes. The RUC submitted 123 recommendations to CMS for the 2013-2019 Medicare Physician Payment Schedules will review utilization data for two services after additional data is available.

In the Final Rule for 2016, CMS requested that the RUC review a list of 103 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of $10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010.

The RUC expanded the list of services to 238 services to include additional codes as part of the family. The CPT Editorial Panel deleted 29 codes. The RUC submitted 207 recommendations to CMS for the 2017-2019 Medicare Physician Payment Schedules and will review the remaining two services after additional utilization data is available.

Services with Stand-Alone PE Procedure Time
In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of $100,000 or more, include direct equipment inputs that amount to $100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Pre-Time Analysis
In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments. The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Post-Operative Visits
010-Day Global Codes
In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

090-Day Global Codes
In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

High Level E/M in Global Period
In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to 11 services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The CPT Editorial Panel deleted one code. The RUC submitted recommendations for 10 services for the 2017-2018 Medicare Physician Payment Schedules. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward. The RUC has completed review of the services under this screen.

000-Day Global Services Reported with an E/M with Modifier 25
In the NPRM for 2017 CMS identified 83 services with a 000-day global period billed with an E/M 50 percent of the time or more, on the same day of service, same patient, by the same physician, that have not been reviewed in the last five years with Medicare utilization greater than 20,000.

The RUC commented that it appreciated CMS' identification of an objective screen and reasonable query. However, based on further analysis of the codes identified, it appears only 19 services met the criteria for this screen and have not been reviewed to specifically address an E/M performed on the same date. There were 38 codes that did not meet the screen criteria; they were either reviewed in the last 5 years and/or are not typically reported with an E/M. For 26 codes, the summary of recommendation (SOR), RUC rationale or practice expense inputs submitted specifically states that an E/M is typically reported with these services and the RUC accounted for this in its valuation.

The RUC requested that CMS remove 64 services that did not meet the screen criteria or which have already been valued as typically being reported with an E/M service. The RUC requested that CMS condense and finalize the list of services for this screen to the 19 remaining services.

In the Final Rule for 2017, CMS did finalize the list of 000-day global services reported with an E/M to the 19 services that truly met the criteria. The RUC recommended that two additional codes be removed from this screen as the specialty societies discovered that in fact an E/M as typical was considered in the survey process. Additional codes were added as part of the family of codes identified, totaling 22. The CPT Editorial Panel deleted one code and the RUC submitted 21 recommendations for the 2019 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

Negative IWPUT

In October 2017, the RUC identified 22 services with a negative IWPUT and Medicare utilization over 10,000 for all services or over 1,000 for Harvard valued and CMS/Other source codes. The RUC expanded the services identified in this screen to 27 services to include additional codes as part of the family. The RUC referred seven codes to the CPT Editorial Panel for revision. The RUC submitted 10 recommendations for the 2019 Medicare Physician Payment Schedule. The RUC will review the remaining 10 services in the 2020 cycle.

Public Comment Requests

In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

Final Rule for 2013

In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 46 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thorascopic procedures. The CPT Editorial Panel deleted two services. The RUC submitted recommendations for 32 services for the 2014-2019 Medicare Physician Payment Schedules. The RUC will review four services after additional utilization data is available.

Final Rule for 2014

CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 90 services. The CPT® Editorial Panel deleted 11 services. The RUC submitted recommendations to CMS for 79 services for the 2015-2018 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2015
In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 53 services to include additional codes as part of this family. The CPT Editorial Panel deleted 16 services. The RUC submitted 37 recommendations for the 2016-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2016
In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 53 services to include an additional code as part of the family. The CPT Editorial Panel deleted eight services. The RUC submitted 45 recommendations for the 2017-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2017
In the Final Rule for 2017 there were no public nominations for services in which the RUC was not already addressing.

Final Rule for 2018
In the Final Rule for 2018 the public and CMS nominated six services as potentially misvalued. The RUC submitted one recommendation for the 2019 Medicare Physician Payment Schedule and will review the remaining five services for the 2020 Medicare Physician Payment Schedule.

Other Issues
In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT® Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

CMS Requests and RUC Relativity Assessment Workgroup Code Status

Total Number of Codes Identified*	**2,374**
Codes Completed	**2,244**
Work and PE Maintained	644
Work Increased	215
Work Decreased	806
Direct Practice Expense Revised (beyond work changes)	161
Deleted from CPT®	418
Codes Under Review	**130**
Referred to CPT® Editorial Panel	37
RUC to Review for *CPT 2020*	64
RUC to review future review after additional data obtained	28

**The total number of codes identified will not equal the number of codes from each screen as some codes have been identified in more than one screen.*

The RUC's efforts for 2009-2017 have resulted in $5 billion for redistribution within the Medicare Physician Payment Schedule.

RUC Referrals to CPT Editoral Panel - Incomplete Issues

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
11981	**Insertion, non-biodegradable drug delivery implant**	High Volume Growth1 / Different Performing Specialty from Survey	January 2018	AAOS	May 2018

Background: In January 2018, the RUC recommended to refer to CPT to better define these services and differentiate between the use in musculoskeletal procedures and use in urological or gynecological procedures. May 2018 CPT or Oct 2018 CPT.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
20005	**Incision and drainage of soft tissue abscess, subfascial (ie, involves the soft tissue below the deep fascia)**	Site of Service Anomaly / Negative IWPUT	October 2017	ACS, AAO-HNS	February 2018

Background: A RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. The RUC recommended to survey this service for April 2018. After the October 2017 meeting the specialty societies indicated that they intend to delete this code.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
20926	**Tissue grafts, other (eg, paratenon, fat, dermis)**	CMS Fastest Growing / Site of Service Anomaly - 2017	October 2017	AAOS, ASPS, AANS, CNS	May 2018

Background: At the April 2009 RUC meeting the RUC recommended that this service be surveyed and reviewed in October 2009. At the October 2009 RUC meeting the specialty society indicated that 20926 is most frequently billed with 27447 Arthroplasty, knee… and 27130 Arthroplasty, acetabular…The specialty indicated that 20926 is not intended to be used with total knee and total hip arthroplasty codes unless an autologous tissue graft from a separate incisional site is necessary. Contrary to guidance published in CPT Assistant and AAOS coding articles, 20926 is being reported when utilizing an allographic substance for hemostasis. Therefore the specialty requested and the RUC agreed that code 20926 be referred to the CPT Editorial Panel for revision of the descriptor to assure that 20926 is reported correctly. At the October 2009 CPT meeting, the specialty requested that the Panel add a crossreference under 20926 to indicate that this Category III code (injection of platelet rich plasma) may be reported instead. **Specialties will have to present this issue to the Five-Year Review Identification Workgroup to ensure that this revision adequately addresses identified concerns**. In October 2017, AMA Staff reviewed services with anomalous sites of service when compared to Medicare utilization data. One service was identified, CPT code 20926, in which the Medicare data from 2013-2016e indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. The specialty societies submitted an action plan and indicated that they believe the site of service issue is due to miscoding. The CPT manual includes a parenthetical that was added in 2011 that states (For injection(s) of platelet rich plasma, use 0232T) which resulted in some decrease in utilization for a few years, but now the utilization is creeping up again. The specialty societies believe the typical patient related to this code would be treated in a facility setting and that the site of service anomaly, for both the outpatient and the office setting is the result of miscoding. The specialty societies propose to address this miscoding by developing a CPT assistant article and possible introductory language to emphasize correct coding. The Workgroup recommends that CPT code 20926 be referred to the CPT Editorial Panel for the May 2018 CPT Editorial meeting to add/revise the introductory language and referred to CPT Assistant for education on when to report this service.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
27X69		Harvard Valued - Utilization Over 30,000-Part2 / High Volume Growth3 / CMS High Expenditure Procedural Codes2	October 2017	ACR	February 2018

Background: In June 2017, the CPT Editorial deleted of injection of contrast for knee arthrography code 27370 with new code to report injection procedure for knee arthrography or enhanced CT/MRI knee arthrography. At the October 2017 RUC meeting, code 27X69 Injection procedure for contrast knee arthrography or contrast enhanced CT/MRI knee arthrography was discussed. In an effort to support accurate reporting for codes 20610, 20611, it was suggested that the parenthetical note currently placed under new code 27X69 also be placed after the deletion note for code 27370.
(For arthrocentesis of the knee or injection of any material other than contrast for subsequent arthrography, see 20610, 20611).

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
32405	**Biopsy, lung or mediastinum, percutaneous needle**	Codes Reported Together 75%or More-Part4	January 2018	ACR, SIR	September 2018

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
33015	**Tube pericardiostomy**	Negative IWPUT	October 2017	ACC	May 2018

Background: A RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017 the RUC recommended that this service be referred to CPT for deletion. If additional specialty soiceites do not agree to submit a coding change application for deletion then this service should be surveyed.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
330X1	**Aortic hemiarch graft including isolation and control of the arch vessels, beveled open distal aortic anastomosis extending under one or more of the arch vessels, and total circulatory arrest or isolated cerebral perfusion (List separately in addition to code for primary procedure)**	New and Revised Service (Not Part of RAW)	January 2018	AATS, STS	February 2018

Background: The specialty noted that the work of CPT code 33X01 hemi-aortic arch graft replacement may be incorrectly coded using CPT code 33870. The RUC observed that the current draft parenthetical following 33870 does not preclude 33870 from being coded with base codes 33860-33864 nor does it direct users to instead use 330X1 when hemi-aortic arch graft replacement is performed. For CPT code 33870, the RUC recommends the CPT Editorial Panel consider the following parenthetical additions:

(Do not report 33870 in conjunction with 33860, 33863, 33864 or 33X01)

(Use +330X1 for work on the transverse aortic arch when performed in conjunction with 33860, 33863 or 33864)

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
35701	**Exploration (not followed by surgical repair), with or without lysis of artery; carotid artery**	Negative IWPUT	January 2018	ACS, SVS	September 2018

Background: The RUC identified CPT code 35761 via the negative IWPUT screen for services with Medicare utilization over 10,000 and all services or over 1,000 for Harvard valued and CMS/Other source codes, for survey at the January 2018 RUC meeting. At the January 2018 RUC meeting, the RUC reviewed CPT code 35761 Exploration (not followed by surgical repair), with or without lysis of artery; other vessels and recommends referral to CPT. The RUC recommends referring CPT code 35761 and the family of codes (35701, 35721, 35741) to the CPT Editorial Panel to revise the “with or without lysis” language and to condense the code set, where applicable, due to low frequency. The appropriate global period for exploration (not followed by surgical repair) will also be considered after the CPT review. The RUC recommends referring code 35761 and the family to CPT.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
35721	**Exploration (not followed by surgical repair), with or without lysis of artery; femoral artery**	Negative IWPUT	January 2018	ACS, SVS	September 2018

Background: The RUC identified CPT code 35761 via the negative IWPUT screen for services with Medicare utilization over 10,000 and all services or over 1,000 for Harvard valued and CMS/Other source codes, for survey at the January 2018 RUC meeting. At the January 2018 RUC meeting, the RUC reviewed CPT code 35761 Exploration (not followed by surgical repair), with or without lysis of artery; other vessels and recommends referral to CPT. The RUC recommends referring CPT code 35761 and the family of codes (35701, 35721, 35741) to the CPT Editorial Panel to revise the "with or without lysis" language and to condense the code set, where applicable, due to low frequency. The appropriate global period for exploration (not followed by surgical repair) will also be considered after the CPT review. The RUC recommends referring code 35761 and the family to CPT.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
35741	**Exploration (not followed by surgical repair), with or without lysis of artery; popliteal artery**	Negative IWPUT	January 2018	ACS, SVS	September 2018

Background: The RUC identified CPT code 35761 via the negative IWPUT screen for services with Medicare utilization over 10,000 and all services or over 1,000 for Harvard valued and CMS/Other source codes, for survey at the January 2018 RUC meeting. At the January 2018 RUC meeting, the RUC reviewed CPT code 35761 Exploration (not followed by surgical repair), with or without lysis of artery; other vessels and recommends referral to CPT. The RUC recommends referring CPT code 35761 and the family of codes (35701, 35721, 35741) to the CPT Editorial Panel to revise the "with or without lysis" language and to condense the code set, where applicable, due to low frequency. The appropriate global period for exploration (not followed by surgical repair) will also be considered after the CPT review. The RUC recommends referring code 35761 and the family to CPT.

35761	**Exploration (not followed by surgical repair), with or without lysis of artery; other vessels**	Negative IWPUT	January 2018	ACS, SVS	September 2018

Background: The RUC identified CPT code 35761 via the negative IWPUT screen for services with Medicare utilization over 10,000 and all services or over 1,000 for Harvard valued and CMS/Other source codes, for survey at the January 2018 RUC meeting. At the January 2018 RUC meeting, the RUC reviewed CPT code 35761 Exploration (not followed by surgical repair), with or without lysis of artery; other vessels and recommends referral to CPT. The RUC recommends referring CPT code 35761 and the family of codes (35701, 35721, 35741) to the CPT Editorial Panel to revise the "with or without lysis" language and to condense the code set, where applicable, due to low frequency. The appropriate global period for exploration (not followed by surgical repair) will also be considered after the CPT review. The RUC recommends referring code 35761 and the family to CPT.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
62270	**Spinal puncture, lumbar, diagnostic**	Different Performing Specialty from Survey	January 2018	ACR, ASNR, SIR	May 2018

Background: In January 2018, the RUC recommends that this service be referred to CPT to bundle with 77003 and maintian the code without fluoroscopic guidance.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
64590	**Insertion or replacement of peripheral or gastric neurostimulator pulse generator or receiver, direct or inductive coupling**	Harvard-Valued Annual Allowed Charges Greater than $10 million / Different Performing Specialty from Survey	January 2018	ACOG, AUA	September 2018

Background: In October 2017, this service was identified as being performed by a different specialty than who originally surveyed this service. The RAW requests an action plan to review at the January 2018 meeting. In January 2018, the RUC recommeded to refer to CPT for revision to properly describe the service as performed by urology.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
66711	**Ciliary body destruction; cyclophotocoagulation, endoscopic**	Codes Reported Together 75%or More-Part4	January 2018	AAO	May 2018

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. CPT codes 66711/66984 were identified. In January 2018, the RUC recommended to refer to CPT to bundle 66711 with 66984 for CPT 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
66984	**Extracapsular cataract removal with insertion of intraocular lens prosthesis (1 stage procedure), manual or mechanical technique (eg, irrigation and aspiration or phacoemulsification)**	High IWPUT / MPC List / Codes Reported Together 75%or More-Part4	January 2018	AAO	September 2018

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. CPT codes 66711/66984 were identified. In January 2018, the RUC recommended to refer to CPT to bundle 66711 with 66984 for CPT 2020.

77012	**Computed tomography guidance for needle placement (eg, biopsy, aspiration, injection, localization device), radiological supervision and interpretation**	CMS-Other - Utilization over 100,000 / Codes Reported Together 75%or More-Part4	January 2018	ACR, SIR	September 2018

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
78492	**Myocardial imaging, positron emission tomography (PET), perfusion; multiple studies at rest and/or stress**	High Volume Growth4	January 2017	ACC, ACR, ACNM, SNMMI	February 2018

Background: This service was identified by the High Volume Growth screen, with total Medicare utilization of 10,000 or more that have increased by at least 100% from 2009 through 2014. The Relativity Assessment Workgroup requested action plans for these services for the January 2017 meeting. In January 2017, the RUC recommended to refer this code to CPT Editorial Panel to undergo substantive descriptor changes to reflect newer technology aspects such as wall motion, ejection fraction, flow reserve, and technology updates for hardware and software.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92225	**Ophthalmoscopy, extended, with retinal drawing (eg, for retinal detachment, melanoma), with interpretation and report; initial**	Negative IWPUT	October 2017	AAO	February 2018

Background: A RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017, the specialty society indicated that there needs to be modification of the descriptor of 92225 and 92226 to better specify what portion of the eye is being subjected to an examination well beyond the normal comprehensive eye exam. The typical uses are for evaluation of retinal disease and for examination of the optic nerve and the work between the two portions of the eye would be different. With glaucoma now being 10 percent of the volume for this service, there should be two codes to differentiate the two anatomic sites. Maintenance of the current terminology of initial and subsequent, however, does not seem suitable or necessary. Even now the current RUC valuations are minimally different and thus not really needed and the specialty society propose to delete CPT 92226. The RUC refers this issue to the CPT Editorial Panel.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92548	**Computerized dynamic posturography**	CMS-Other - Utilization over 250,000 / Negative IWPUT / Different Performing Specialty from Survey	October 2017	AAA, AAN, ASHA	September 2018 / February 2014

Background: In 2014 the RUC referred this code to the CPT Editorial Panel for development of coding change proposals to condense pairs into a single code and create new coding structures. Type A code - code pair is reported together greater than 95% in a bi-directional relationship. This change was editorial. In 2017, a RUC member requested that the Relativity Assessment Workgroup review services with low or negative intra-service work per unit of time (IWPUT) as a possible screen. AMA Staff gathered 2016 estimated Medicare utilization over 10,000 for RUC reviewed codes and over 1,000 for Harvard valued and CMS/Other source codes with a negative IWPUT, which resulted in 23 services identified. The RUC recommended that all these codes be placed on the level of interest for action plans to review at the October 2017 meeting. In October 2017, the specialties indicated that CPT code 92548 has not been reviewed since 1997. The code descriptor for this code is vague and current utilization may not be reflective of intended use. Practice expense includes specialized computerized equipment and audiologists are included in clinical work. Neurology and audiology agree that the code descriptor and practice expense must be updated. The specialties also believe that utilization may vary for this code with providers performing this service in different ways using different (or no) equipment. Neurology and audiology plan to review current utilization among their respective provider groups to better inform the code revision/development process. The RUC refers code 92548 to the CPT Editorial Panel for revision.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92585	**Auditory evoked potentials for evoked response audiometry and/or testing of the central nervous system; comprehensive**	CMS-Other - Utilization over 30,000	January 2018	AAA, AANEM, ACNS, ASHA	February 2019

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to refer to Feb 2019 CPT meeting to clarify the code descriptors to better define limited/comprehensive and develop a new related procedure, Vestibular Evoked Myogenic Potentials (VEMP), has recently been approved by the FDA. A VEMP specific code should be developed and will replace some use of CPT code 92585.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92626	**Evaluation of auditory rehabilitation status; first hour**	CMS Request - Audiology Services / High Volume Growth2	October 2017	AAA, ASHA	May 2018

Background: In October 2016, this service was identified through the High Volume Growth screen the RUC recommended that this service be reffered to CPT Assistant to address specifically how to be used for the typical Medicare recipient. The RAW reviewed again after 3 years of data were available. In October 2017, the RUC recommended that this service be referred to the CPT May 2018 meeting. The audiology specialty societies would like to further review utilization and revise the code descriptor/create additional codes to clarify the clinical work associated with the provision of this service.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
94200	**Maximum breathing capacity, maximal voluntary ventilation**	CMS-Other - Utilization over 30,000	January 2018	ATS, CHEST	

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to survey for April 2018, noting the specialty societies can determine if they want to revise at CPT and should identify other codes that are part of this family.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
95951	**Monitoring for localization of cerebral seizure focus by cable or radio, 16 or more channel telemetry, combined electroencephalographic (EEG) and video recording and interpretation (eg, for presurgical localization), each 24 hours**	High Volume Growth4	January 2017		February 2018

Background: This service was identifed by the High Volume Growth screen, with total Medicare utilization of 10,000 or more that have increased by at least 100% from 2009 through 2014. The Relativity Assessment Workgroup requested action plans for these services for the January 2017 meeting. In January 2017, the RUC recommended that this service be reffered to the CPT Editorial Panel June 2017/RUC Oct 2017 for needed changes, including code deletions, revision of code descriptors, and the addition of new codes to this family. Revisions to this family of codes are needed to recognize that video is now an element of most long term EEG monitoring tests and to better differentiate inpatient and ambulatory monitoring services. The CPT Editorial Panel postponed this issue until Sept 2017 and deferred again until Feb 2018 for additional clarification.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
96X11	**Psychological or neuropsychological test administration using single instrument, with interpretation and report by physician or other qualified health care professional and interactive feedback to the patient, family member(s), or caregivers(s), when performed**	CMS High Expenditure Procedural Codes2	January 2018	APA (psychology), AAP, ASHA, AAN	September 2018

Background: In June 2017, the CPT Editorial Panel revised 96116, added 13 codes to provide better definition and description to psychological and neuropsychological testing, and deleted of codes 96101-96103, 96111, 96118, 96119, 96120. At the October 2017 meeting the RUC determined that 96X11 Psychological or neuropsychological test administration using single instrument, with interpretation and report by physician or other qualified health care professional and interactive feedback to the patient, family member(s), or caregivers(s), when performed was not surveyed by physicians who will be providing this service (primary care and nurse practitioners). The RUC made an interim work RVU recommendation of 0.51 and recommended that this service be resurveyed by the correct providers for January 2018. The RUC also recommended that the specialty societies submit a revised vignette to the Research Subcommittee prior to survey. In January 2018, the RUC identified significant concerns that the code descriptor did not accurately reflect the service and thus the survey data was likely flawed. The RUC indicated that, as currently described, this code would be used without interactive feedback, would substantially overlap with same day E/M, and would not typically take 15 minutes of intra-service time. Based on these concerns, the specialty societies agreed that the code descriptor should be refined. Specifically, the code descriptor should require interactive feedback and should require a minimum of 15 minutes intra-service time. The RUC recommends that the CPT Editorial Panel rescind CPT code 96X11 for CPT 2019. The RUC recommends that CPT code 96X11be referred back to the CPT Editorial Panel (September 2018) for further refinement to revise the code descriptor and include a time requirement (15 minutes).

The family of psychological/neuropsychological testing CPT codes, except 96X11, was approved by the RUC in October 2017 and recommendations were submitted to CMS. Existing codes, 96103 and 96120, are scheduled to be deleted as of January 1, 2019. The RUC recommends that in the interim, a parenthetical should be added that directs providers who will report these services to do so using the practice expense only code 96X12; Psychological or neuropsychological test administration, with single automated instrument via electronic platform, with automated result only. CPT code 96X12 was passed by the RUC and submitted to CMS as part of the family of psychological and neuropsychological testing services following the October 2017 RUC Meeting. The RUC rescinds its October 2017 interim recommendation to CMS for CPT code 96X11 only. The RUC recommends that the remaining codes in the family of psychological and neuropsychological testing submitted to CMS following the October 2017 RUC meeting be considered for the 2019 Medicare Physician Payment Schedule.

G0365	**Vessel mapping of vessels for hemodialysis access (services for preoperative vessel mapping prior to creation of hemodialysis access using an autogenous hemodialysis conduit, including arterial inflow and venous outflow)**	CMS-Other - Utilization over 30,000	January 2018	ACR, SIR, SVS	September 2018

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to refer to CPT to convert to Category I code. CPT cycle 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
G0396	**Alcohol and/or substance (other than tobacco) abuse structured assessment (e.g., audit, dast), and brief intervention 15 to 30 minutes**	CMS-Other - Utilization over 30,000	January 2018	AAFP, ASA, ASAM	September 2018

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to maintain the physician work and refer to CPT to editorially remove "screening" from 99408 and 99409 to "assessment" to mirror G0396.

RUC Recommendations to Develop CPT Assistant Articles - Outstanding Issues

13120 **Repair, complex, scalp, arms, and/or legs; 1.1 cm to 2.5 cm**	**Screen:**	**RUC Meeting:**	**RUC Rec:**	**Specialty Society:**	**CPT Asst Status:**
	CMS Fastest Growing / CPT Assistant Analysis	October 2017	3.23 and CPT Assistant article published	AAD, AAO-HNS, ASPS	1st article: May 2011; 2nd article July 2016; 3rd article Mar 2018

Background: The Workgroup believed that 13120, 13121 and 13122 were regularly performed at the same time as excision of lesion services and may need to be referred to CPT to create bundled services. However, the SS provided analysis of utilization data showing that this family of codes is not typically reported by the same physician at the time of any excision codes. The WG recommends that this service be reviewed again in 2 years. The WG recommends that the SS develop a CPT Asst article to provide correct coding instructions. Prior to this identification screen, AAD submitted a CPT Assistant article on this issue in Aug 2006. The Workgroup reviewed the 2006 article and determined that it did not sufficiently address the current issue or have any impact on Medicare utilization. The Workgroup recommends that another CPT Assistant article be written to address this issue, specifically focusing on the complex repair of the scalp, arms and/or legs, codes 13120-13122. SS submitted article. However, at the Feb 2010 CPT Asst Board requested clarification/more information from specialty society. Sept 2011 RUC rec resurvey with entire family as requested by CMS in the Proposed Rule for the 4th Five-Year Review. In April 2015, the RAW reviewed services in which the RUC recommended that a CPT Assistant article be developed. The Workgroup requested that the specialty societies develop an action plan to address the increase in utilization and the effectiveness of the CPT Assistant article. At the October 2015 meeting, the RUC recommended that the specialty societies submit another CPT Assistant article to educate providers on the clinical requirements for reporting these services, addressing the performance requirements and typical uses of all the codes in the family, as well as for the intermediate repair codes (12031-12037). Articles should include detailed descriptions of procedures, including how to differentiate between complex and intermediate repairs. Re-review in 2017. In October 2017, the specialty societies indicated that the CPT Assistant article from the 2015 referral had not been published yet. The CPTA EB had several concerns with the original version submitted back in 2015. The Editorial Board at that time requested for the article to be sent back to the specialties, as they determined the article required further example clarifications and revisions by the specialties. As of September 9, 2017, some Editorial Board members felt that the latest version was an improved version, but further clarification was required. The specialty societies indicated they will submit a new article by Janaury 2018 for March 2018 publication. The RUC recommends review in October 2020 to see if the article was effective.

13121 **Repair, complex, scalp, arms, and/or legs; 2.6 cm to 7.5 cm**	**Screen:**	**RUC Meeting:**	**RUC Rec:**	**Specialty Society:**	**CPT Asst Status:**
	CMS Fastest Growing / CPT Assistant Analysis	October 2017	4.00 and CPT Assistant article published	AAD, AAO-HNS, ASPS	1st article: May 2011; 2nd article July 2016; 3rd article Mar 2018

Background: The Workgroup believed that 13120, 13121 and 13122 were regularly performed at the same time as excision of lesion services and may need to be referred to CPT to create bundled services. However, the SS provided analysis of utilization data showing that this family of codes is not typically reported by the same physician at the time of any excision codes. The WG recommends that this service be reviewed again in 2 years. The WG recommends that the SS develop a CPT Asst article to provide correct coding instructions. Prior to this identification screen, AAD submitted a CPT Assistant article on this issue in Aug 2006. The Workgroup reviewed the 2006 article and determined that it did not sufficiently address the current issue or have any impact on Medicare utilization. The Workgroup recommends that another CPT Assistant article be written to address this issue, specifically focusing on the complex repair of the scalp, arms and/or legs, codes 13120-13122. SS submitted article. However, at the Feb 2010 CPT Asst Board requested clarification/more information from specialty society. Sept 2011 RUC rec resurvey with entire family as requested by CMS in the Proposed Rule for the 4th Five-Year Review. In April 2015, the RAW reviewed services in which the RUC recommended that a CPT Assistant article be developed. The Workgroup requested that the specialty societies develop an action plan to address the increase in utilization and the effectiveness of the CPT Assistant article. At the October 2015 meeting, the RUC recommended that the specialty societies submit another CPT Assistant article to educate providers on the clinical requirements for reporting these services, addressing the performance requirements and typical uses of all the codes in the family, as well as for the intermediate repair codes (12031-12037). Articles should include detailed descriptions of procedures, including how to differentiate between complex and intermediate repairs. Re-review in 2017. In October 2017, the specialty societies indicated that the CPT Assistant article from the 2015 referral had not been published yet. The CPTA EB had several concerns with the original version submitted back in 2015. The Editorial Board at that time requested for the article to be sent back to the specialties, as they determined the article required further example clarifications and revisions by the specialties. As of September 9, 2017, some Editorial Board members felt that the latest version was an improved version, but further clarification was required. The specialty societies indicated they will submit a new article by Janaury 2018 for March 2018 publication. The RUC recommends review in October 2020 to see if the article was effective.

The Workgroup reviewed the 2006 article and determined that it did not sufficiently address the current issue or have any impact on Medicare utilization. The Workgroup recommends that another CPT Assistant article be written to address this issue, specifically focusing on the complex repair of the scalp, arms and/or legs, codes 13120-13122. SS submitted article. However, at the Feb 2010 CPT Asst Board requested clarification/more information from specialty society. Sept 2011 RUC rec resurvey with entire family as requested by CMS in the Proposed Rule for the 4th Five-Year Review. In April 2015, the RAW reviewed services in which the RUC recommended that a CPT Assistant article be developed. The Workgroup requested that the specialty societies develop an action plan to address the increase in utilization and the effectiveness of the CPT Assistant article. At the October 2015 meeting, the RUC recommended that the specialty societies submit another CPT Assistant article to educate providers on the clinical requirements for reporting these services, addressing the performance requirements and typical uses of all the codes in the family, as well as for the intermediate repair codes (12031-12037). Articles should include detailed descriptions of procedures, including how to differentiate between complex and intermediate repairs. Re-review in 2017. In October 2017, the specialty societies indicated that the CPT Assistant article from the 2015 referral had not been published yet. The CPTA EB had several concerns with the original version submitted back in 2015. The Editorial Board at that time requested for the article to be sent back to the specialties, as they determined the article required further example clarifications and revisions by the specialties. As of September 9, 2017, some Editorial Board members felt that the latest version was an improved version, but further clarification was required. The specialty societies indicated they will submit a new article by Janaury 2018 for March 2018 publication. The RUC recommends review in October 2020 to see if the article was effective.

20926	**Tissue grafts, other (eg, paratenon, fat, dermis)**	CMS Fastest Growing / Site of Service Anomaly	October 2017	Refer to CPT and CPT Assistant	AAOS, ASPS, AANS, CNS	

Background: At the October 2009 CPT meeting, the specialty requested that the Panel add a crossreference under 20926 to indicate that this Category III code (injection of platelet rich plasma) may be reported instead. Feb 2010, the Workgroup recommended to review claims data after 2 years at the October 2012 RUC meeting. In October 2012, the Workgroup recommended to remove this code from re-review, as the category III code was created to report injection of platelet rich plasma and volume is dropping. In October 2017, AMA Staff reviewed services with anomalous sites of service when compared to Medicare utilization data. One service was identified, CPT code 20926, in which the Medicare data from 2013-2016e indicated that it was performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within the global period. The specialty societies submitted an action plan and indicated that they believe the site of service issue is due to miscoding. The CPT manual includes a parenthetical that was added in 2011 that states (For injection(s) of platelet rich plasma, use 0232T) which resulted in some decrease in utilization for a few years, but now the utilization is creeping up again. The specialty societies believe the typical patient related to this code would be treated in a facility setting and that the site of service anomaly, for both the outpatient and the office setting is the result of miscoding. The specialty societies propose to address this miscoding by developing a CPT assistant article and possible introductory language to emphasize correct coding. The Workgroup recommends that CPT code 20926 be referred to the CPT Editorial Panel for the May 2018 CPT Editorial meeting to add/revise the introductory language and referred to CPT Assistant for education on when to report this service.

CMS Request - Final Rule for 2016	January 2017	2.00. Refer to CPT Assistant.	CAP, RPA	Expected May 2018

Background: In September 2016, the CPT Editorial Panel deleted 36515 and revised 36516 to included immunoabsorption. CPT codes 36511-36514 and 36522 were added as part of this family of services. In January 2017, the PE Subcommittee discussed the direct practice expense inputs proposed by the specialty societies and determined that there was duplication between the clinical staff tasks of the pre-service period and the pre-service portion of the service period. The Subcommittee reduced the pre-service time from 18 to 8 minutes. The Subcommittee discussed the significant time needed for the staff to Assist physician in performing procedure in the service period and agreed with the specialties that this service is one-on-one with the patient and the RN/LPN (L042A) is not able to multitask during this time. The Subcommittee discussed the significant time needed to prepare the room, equipment, and supplies. The specialties explained that the clinical staff time hadn't been accurately accounted for when it was last reviewed in 2004. The PE Subcommittee also discussed that much of the time requested in the post-service time was duplicative of the monitoring time and removed most of that time while maintaining the specialty recommended 10 minutes for monitoring in the service period. Additionally the PE Subcommittee reduced the time for Clean room/equipment by physician staff; remove disposables from machine from 7 in 36514 and 36516 and 5 in 36522 to the standard 3. The Subcommittee discussed the possibility that some of the supply items are separately reportable. The Subcommittee found that albumin saline (SH004) which is 5% albumin is separately reportable and new supply item calcium gluconate is separately reportable with J code J0610 per 10 ml for the drug along with CPT code 96365 to mix the bag. The Subcommittee deleted the two supply items and recommends that the specialty societies prepare a CPT assistant article regarding how to report separately for these supplies. The RUC reviewed and approved the direct practice expense inputs with modifications as approved by the Practice Expense Subcommittee. The specialty societies plan to submit an article by December 2017.

95249	**Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; patient-provided equipment, sensor placement, hook-up, calibration of monitor, patient training, and printout of recording**	High Volume Growth2	April 2017	PE Only. Referral to CPT Assistant	AACE, ES, ACP	

Background: In February 2017 the CPT Editorial Panel revised 95250 & 95251 and created a new code to diferentiate between physician owned and patient owned equipment. In April 2017, The RUC recommends referral to the CPT Editorial Panel to add introductory language indicating that when data are collected outside the provider office, as when the patient uses a phone app, code 9525X cannot be billed. The RUC recommends referral to the CPT Editorial Panel to add introductory language indicating that 9525X is to be billed only once during the entire period that the patient owns the data receiver. The code cannot be billed for any subsequent use of the CGM device by the patient or physician. Code 9525X cannot be billed when the patient receives a new sensor or transmitter. Additionally, the RUC recommends that the specialty work with the AMA to develop a CPT Assistant article to clarify appropriate use of the new CPT code 9525X, specifically that the code should only be reported when instructing the patient on use of a new data receiver and cannot be reported when data is collected outside of the provider office. In June 2017, the CPT Editorial Panel 1) Revised the parenthetical note following code 9525X to instruct that 9525X should not be reported more than once for the duration that the patient owns the data receiver; 2) Added guidelines that state when data are collected outside the provider office, as when the patient uses a phone app, code 9525X may not be reported; and 3) Indicated that instruction be provided immediately when the equipment is owned by the patient and that a list of codes be reported until the code is reported.

958X3		High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	0.95 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017, the RUC noted code 95X83 is defined as simple programming of cranial nerve neurostimulator (adjustment of 1-3 parameters) versus deleted code 95974 which was time based and defined as the first hour of programming and 95X84 is defined as complex programming of cranial nerve neurostimulator (adjustment of more than 3 parameters) versus deleted code 95975, which was a time-based add-on code defined as each additional 30 minutes of programming. The RUC recommends that the specialty societies develop a CPT Assistant article to direct providers on when to report simple versus complex cranial nerve neurostimulator services.

958X4

Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	1.25 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017 the RUC noted 95X85 is defined as the first 15 minutes of programming for brain neurostimulator versus deleted code 95978, which was defined as the first hour of programming and 95X86 is defined an add-on service for each additional 15 minutes of brain neurostimulator programming versus the deleted code 95979 which was defined as each additional 30 minutes. The specialty societies indicated that programming for brain neurostimulators is always complex therefore it is unnecessary for a simple versus complex coding structure. The RUC noted the CPT coding conventions when reporting timed codes and recommends that the specialty societies develop a CPT Assistant article to direct providers on how to correctly report the brain neurostimulator services.

958X6

Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
High Volume Growth2 / CMS Request - Final Rule for 2016	October 2017	1.00 and Refer to CPT Assistant	AAN, AANS/CNS, ACNS	

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and creaed four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017 the RUC noted 95X85 is defined as the first 15 minutes of programming for brain neurostimulator versus deleted code 95978, which was defined as the first hour of programming and 95X86 is defined an add-on service for each additional 15 minutes of brain neurostimulator programming versus the deleted code 95979 which was defined as each additional 30 minutes. The specialty societies indicated that programming for brain neurostimulators is always complex therefore it is unnecessary for a simple versus complex coding structure. The RUC noted the CPT coding conventions when reporting timed codes and recommends that the specialty societies develop a CPT Assistant article to direct providers on how to correctly report the brain neurostimulator services.

RUC Recommendations to Develop CPT Assistant Articles - Outstanding Issues

		Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
994X7	**Chronic care management services, provided personally by a physician or other qualified health care professional, at least 30 minutes of physician or other qualified health care professional time, per calendar month, with the following required elements: multiple (two or more) chronic conditions expected to last at least 12 months, or until the death of the patient, chronic conditions place the patient at significant risk of death, acute exacerbation/decompensation, or functional decline; comprehensive care plan established, implemented, revised, or monitored**	New and Revised Service (Not part of RAW)	April 2017	1.45. Refer to CPT Assistant	AAFP, AAN, ACP, AGS	

Background: In April 2017, when the RUC discussed the practice expenses associated with this service, CMS questioned why the clinical labor staff time is half that of the physician time. The specialty societies indicated that since this code would be reported instead of office visits, the clinical staff services would include patient maintenance activities such as answering questions, refilling prescriptions and calling home care agencies. CMS was concerned that the description of clinical labor staff work may overlap with the physician work. The specialty societies indicated that there will be some overlap, but the total cumulative time of the physician versus the clinical staff would be the distinction to determine whether to report this service or clinical staff service 99490. The PE Subcommittee was concerned that it would be difficult to track when the work of the physician becomes greater than the work of the clinical staff in order to determine which code to report and noted that correct reporting of this service will require both the physician and the clinical staff to carefully track their work time. The RUC recommends that the specialty work with the AMA to develop a CPT Assistant article to clarify the proper reporting of code 994X7 versus 99490.

78071	Parathyroid planar imaging (including subtraction, when performed); with tomographic (SPECT)	Apr 2012	Parathyroid Imaging	23	CPT 2013	October 2018	In April 2011, CPT Code 78007, Thyroid imaging, with uptake; multiple determinations was identified in the Harvard Valued-Utilization over 30,000 screen. As part of the review of the entire endocrine family, the specialty societies determined that revisions to the parathyroid imaging procedures were necessary to reflect current bundling policies, guideline changes and new technology. AMA Staff reviewed the work neutrality impacts for codes reviewed in the CPT 2013 cycle. It appeared that was only one issue where there was a large growth in utilization in the first year. For CPT 2013 the Parathyroid Imaging codes were not work neutral, and it was initially estimated as a savings overall. It appears that there was 40% increase from what was projected. The specialty societies submitted an action plan indicating that literature supporting	☐

							parathyroid scintigraphy as an effective diagnostic study for parathyroid disease has recently emerged and supports the clinical utility thus increasing utilization. Secondly, the availability of SPECT/CT cameras has increased and is greater than initially predicted, allowing for a higher utilization. The Workgroup agreed and also noted that these services are conducted on patients who are referred to the radiologists or nuclear medicine physicians. The physicians providing these services do not control the number of patients referred to them who receive these services. The Workgroup recommends that the specialty societies develop a CPT Assistant article to address potential current use of 78803 rather than the new codes 78071 and 78072. The Workgroup noted that these services are on the new technology list for review later this year and should be

78072	Parathyroid planar imaging (including subtraction, when performed); with tomographic (SPECT), and concurrently acquired computed tomography (CT) for anatomical localization	Apr 2012	Parathyroid Imaging	23	CPT 2013	October 2018	In April 2011, CPT Code 78007, Thyroid imaging, with uptake; multiple determinations was identified in the Harvard Valued-Utilization over 30,000 screen. As part of the review of the entire endocrine family, the specialty societies determined that revisions to the parathyroid imaging procedures were necessary to reflect current bundling policies, guideline changes and new technology. AMA Staff reviewed the work neutrality impacts for codes reviewed in the CPT 2013 cycle. It appeared that was only one issue where there was a large growth in utilization in the first year. For CPT 2013 the Parathyroid Imaging codes were not work neutral, and it was initially estimated as a savings overall. It appears that there was 40% increase from what was projected. The specialty societies submitted an action plan indicating that literature supporting	☐

							parathyroid scintigraphy as an effective diagnostic study for parathyroid disease has recently emerged and supports the clinical utility thus increasing utilization. Secondly, the availability of SPECT/CT cameras has increased and is greater than initially predicted, allowing for a higher utilization. The Workgroup agreed and also noted that these services are conducted on patients who are referred to the radiologists or nuclear medicine physicians. The physicians providing these services do not control the number of patients referred to them who receive these services. The Workgroup recommends that the specialty societies develop a CPT Assistant article to address potential current use of 78803 rather than the new codes 78071 and 78072. The Workgroup noted that these services are on the new technology list for review later this year and should be
