Whereas, There has been a rash of shootings and violence in Colorado, Connecticut, Texas, Florida and other less well publicized school settings; and  
Whereas, Many schools throughout this country have hired school resource officers (SROs) who are paid employees; and  
Whereas, Some schools have chosen to arm these individuals without adequate training in child psychology, restorative justice, and conflict de-escalation and resolution, for example; therefore be it  
RESOLVED, That our American Medical Association encourage an evaluation of existing national standards (and legislation, if necessary) to have qualifications by virtue of training and certification that includes child psychology and development, restorative justice, conflict resolution, crime awareness, implicit/explicit biases, diversity inclusion, cultural humility, and individual and institutional safety and others deemed necessary for school resource officers (Directive to Take Action); and be it further  
RESOLVED, That our AMA encourage the development of policies that foster the best environment for learning through protecting the health and safety of those in school, including students, teachers, staff and visitors (New HOD Policy); and be it further  
RESOLVED, That our AMA encourage mandatory reporting of de-escalation procedures by school resource officers and tracking of student demographics of those reprimanded to identify areas of implicit bias. (Directive to Take Action)  

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY

Providing Medical Services through School-Based Health Programs H-60.991

(1) The AMA supports further objective research into the potential benefits and problems associated with school-based health services by credible organizations in the public and private sectors. (2) Where school-based services exist, the AMA recommends that they meet the following minimum standards: (a) Health services in schools must be supervised by a physician, preferably one who is experienced in the care of children and adolescents. Additionally, a physician should be accessible to administer care on a regular basis. (b) On-site services should be provided by a professionally prepared school nurse or similarly qualified health professional. Expertise in child and adolescent development, psychosocial and behavioral problems, and emergency care is desirable. Responsibilities of this professional would include coordinating the health care of students with the student, the parents, the school and the student’s personal physician and assisting with the development and presentation of health education programs in the classroom. (c) There should be a written policy to govern provision of health services in the school. Such a policy should be developed by a school health council consisting of school and community-based physicians, nurses, school faculty and administrators, parents, and (as appropriate) students, community leaders and others. Health services and curricula should be carefully designed to reflect community standards and values, while emphasizing positive health practices in the school environment. (d) Before patient services begin, policies on confidentiality should be established with the advice of expert legal advisors and the school health council. (e) Policies for ongoing monitoring, quality assurance and evaluation should be established with the advice of expert legal advisors and the school health council. (f) Health care services should be available during school hours. During other hours, an appropriate referral system should be instituted. (g) School-based health programs should draw on outside resources for care, such as private practitioners, public health and mental health clinics, and mental health and neighborhood health programs. (h) Services should be coordinated to ensure comprehensive care. Parents should be encouraged to be intimately involved in the health supervision and education of their children.
