Subject: RUC Recommendations

Dear Administrator Verma:

The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2020*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the January 16-19, 2019 RUC meeting.

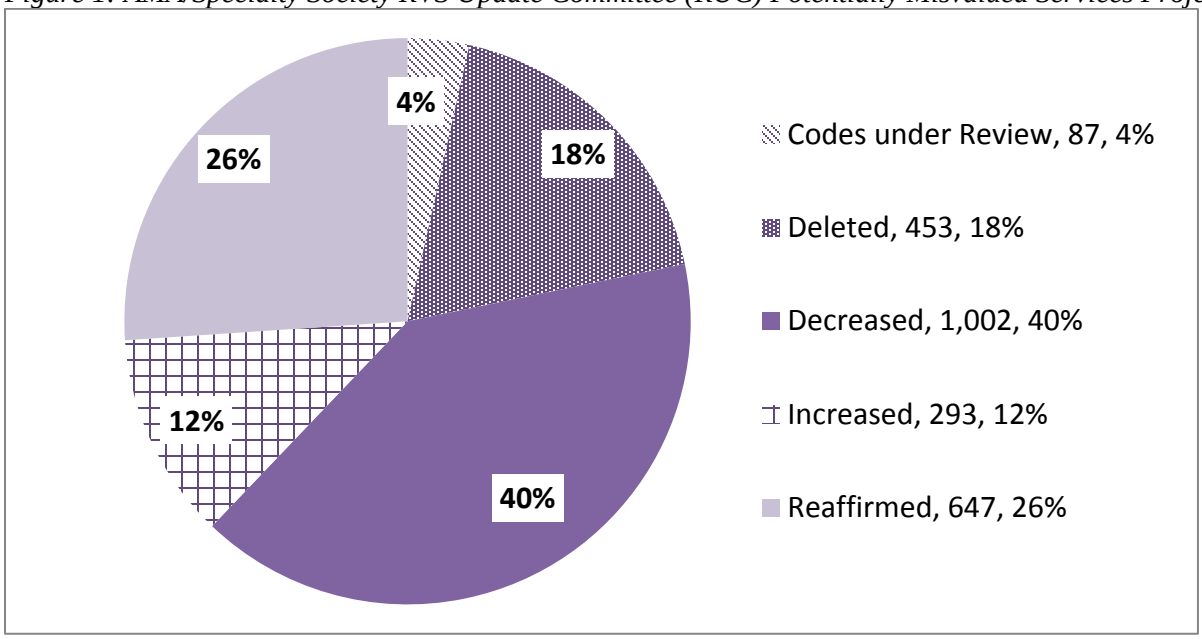
CPT 2020 New and Revised Codes – *January 2019 RUC Submission*

The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 69 new/revised/related family CPT codes at the January 2019 meeting. The RUC recommends that one service be contractor priced. The RUC submits work value and/or practice expense inputs for 68 new/revised/related family CPT codes from the January 2019 meeting.

CPT 2020 New and Revised Codes – *Entire CPT 2020 Cycle*

The total number of coding changes for the entire *CPT 2020* cycle is 259, including 85 additions, 85 revisions, and 45 deletions. In addition, 11 new codes were identified as part of the family for review in relationship to the new/revised codes. Of the 214 new/revised/related family CPT codes 33 services are not payable on the RBRVS or do not require physician work at this time (eg, laboratory services and vaccines), and accordingly, the RUC does not submit any information on these codes.

The RUC submits work value and/or practice expense inputs for 143 new/revised/related family CPT codes for the 2020 Medicare Physician Payment Schedule.



Existing Services Identified by RUC and CMS for Review

In addition to the new/revised CPT code submission, the RUC submits recommendations for 35 services identified by the RUC or CMS as potentially misvalued and reviewed at the January 2019 RUC meeting. The RUC recommends work relative values for 32 codes and referred 3 codes to the CPT Editorial Panel for revision or deletion. The RUC recommendations are in addition to the 80 recommendations for existing services submitted to CMS following the RUC's April and October 2018 meetings.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,482 potentially misvalued services through objective screening criteria and has completed review of 2,393 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter.*

Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project

RUC Identified Potentially Misvalued Services

In January 2019, the Relativity Assessment Workgroup identified code G0399 *Home sleep test (hst) with type iii portable monitor, unattended; minimum of 4 channels: 2 respiratory movement/airflow, 1 ecg/heart rate and 1 oxygen saturation* via the High Volume Growth screen for services with 2017 Medicare utilization of 10,000 or more that has increased by 100% from 2012-2017. The Workgroup reviewed the action plan from the specialty societies and the RUC recommends that CMS delete G0399 as this service is already described by CPT Category I codes, 95800 *Sleep study, unattended, simultaneous recording; heart rate, oxygen saturation, respiratory analysis (eg, by airflow or peripheral arterial tone), and sleep time*, 95801 *Sleep study, unattended, simultaneous recording; minimum of heart rate, oxygen saturation, and respiratory analysis (eg, by airflow or peripheral arterial tone)* and 95806 *Sleep study, unattended, simultaneous recording of, heart rate, oxygen saturation, respiratory airflow, and respiratory effort (eg, thoracoabdominal movement).*

Practice Expense Subcommittee

At the January 2019 RUC Meeting, in addition to reviewing the direct practice expense input (clinical staff time, supplies and equipment) recommendations for each code, the PE Subcommittee discussed the CMS Medical Supplies and Equipment Repricing as outlined in the CMS Final Rule for CY2019. In response to the CMS Final Rule, The AMA and other members of the Federation questioned the pricing of 62 supply and equipment items and submitted invoices and other supporting documentation for the pricing of these items. Based on the report from StrategyGen, CMS finalized updated pricing for 2,070 supply and equipment items currently used as direct practice expense (PE) inputs over a 4-year phase-in, with changes to the pricing for the 62 supply and equipment items flagged by Stakeholders. Although the AMA agrees with CMS that there is a need for comprehensive review of supply and equipment pricing, there remain concerns about StrategyGen's use of subscription-based benchmark databases that are likely not representative of the typical price paid by small physician practices. Also of concern is that the repricing will occur once and invoices will continue to be needed both to dispute the updated pricing if the specialties deem it inappropriate and to update and create new supply and equipment items through the RUC practice expense review process.

Although the repricing amounts were adjusted for 62 supply and equipment items flagged by Stakeholders, there are numerous other items that are being repriced that the specialties may find to be inaccurate. The Practice Expense (PE) Subcommittee has encouraged specialties to carefully review their supplies and equipment and if errors are found we have encouraged the specialties to send documentation to CMS as soon as possible. We encourage CMS to accept documentation including invoices, and carefully consider changes to the pricing for all supplies and equipment updated through the repricing effort for the entire 4-year phase in period.

Expected Specialty Overrides for Low Volume Services CY2019 NPRM

In the CY 2018 PFS Final Rule, CMS finalized the proposal to use a list of expected specialties, instead of a claims-based specialty mix, for low volume, which also includes no volume codes, and apply these overrides for both the practice expense and professional liability insurance (PLI) valuation process. It has come to our attention that, in the CY 2019 Final Rule, the PLI RVUs are not based on the overrides for low volume services and, thus, need correction.

Attached is a comparison of actual CY 2018 to CY 2019 PLI RVUs. The list includes codes that were on the low volume override list both years and which did not have a work RVU change. This list clearly shows the low volume overrides for CY 2019 are not being utilized as many of the PLI RVUs changed substantially year to year even though the override specialty did not change. There are twenty services that have a 2.0 or more reduction in PLI RVU. CMS must ensure that the list of expected specialties is applied for the low volume service-level overrides. **The RUC requests that the CMS issue an immediate technical correction for the twenty codes most greatly impacted by this error.**

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed USB drive are:

- RUC Recommendation Status Report for New and Revised Codes

- RUC Recommendation Status Report for 2,482 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.

- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.

- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the January 2019 RUC meeting.

- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.

- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.

- BETOS Assignment Table: The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change.

- Source Code Utilization Crosswalk Table: A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2020 conversion factor increase.

- New Technology List and Flow Chart: In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 640 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

We appreciate your consideration of these RUC recommendations. If you have any questions regarding the attached materials, please contact Sherry Smith at (312) 464-5604.

Sincerely,

Peter K. Smith, MD

The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,482 services through 20 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the "new technology" list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining nearly 2,500 potentially misvalued services accounting for $45 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,455 services, redistributing $5 billion. Here are the outcomes for the committee's review of 2,482 codes:

Potentially Misvalued Services Project

Source: American Medical Association

New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 640 services. In September 2010, the re-review cycle began and since then the RUC has recommended 47 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 203 services every October after three years of Medicare claims data is available for each service.

Methodology Improvements
The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

Site of Service Anomalies
The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 14 codes. The RUC completed review of services under this initial screen.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These services were referred to CPT and recommendations were submitted to CMS for the 2018 Medicare Physician Payment Schedule.

In 2016, the RUC identified one site of service anomaly CPT code and submitted the recommendation to CMS for the 2019 Medicare Physician Payment Schedule. In 2017, the RUC identified one site of service anomaly CPT code which was revised at the CPT Editorial Panel and the RUC submitted recommendations for the 2020 Medicare Physician Payment Schedule.

In 2018, the RUC also performed a site-of-service anomaly screen based on the review of three years of data (2015, 2016 and 2017e) for services with utilization over 10,000 in which a service is typically performed in the inpatient hospital setting, yet only a half discharge day management (99238) is included. One service was identified via this screen and another identified for the outpatient site of service anomaly screen.

High Volume Growth

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 15 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 44 recommendations to CMS for services for the 2012-2017 Medicare Physician Payment Schedules and four recommendations for the CPT 2020 Medicare Physician Payment Schedule. The RUC completed review of services under this first iteration of the high growth screen.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 62 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC recommended review of two services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted ten codes and the RUC submitted recommendations for 47 services for the 2015-2019 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 30 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC will review three services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted 12 codes and the RUC submitted recommendations for 14 services for the 2017-2020 Medicare Physician Payment Schedules.

In October 2016, the RUC ran this screen again and the query resulted in the identification of 12 services, which was expanded to 46 services. The RUC recommended removing two services from the screen as the volume growth did not impact the resources required to provide these services. The CPT Editorial Panel deleted three services. The RUC submitted recommendations for 38 services for the 2019-2020 Medicare Physician Payment Schedules. The RUC will review three services after additional utilization data is available.

In October 2018, the RUC ran this query again for services with 2017e Medicare utilization of 10,000 or more that has increased by at least 100% from 2012 through 2017. Eleven (11) codes were identified. The RUC recommended removing two services from the screen as the volume growth was appropriate. The RUC submitted recommendations for four services for the 2020 Medicare Physician Payment Schedule. The RUC will review the remaining five services for the 2021 Medicare Physician Payment Schedule.

CMS Fastest Growing

In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 27 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 43codes. The RUC submitted 41 recommendations to CMS for the 2012-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

High IWPUT

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWPUT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWPUT was considered appropriate. The RUC completed review of services under this screen.

Services Surveyed by One Specialty – Now Performed by a Different Specialty

In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

Harvard Valued

Utilization over 1 Million

CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 30,000
In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In October 2018, the RUC reran this screen on Harvard valued services with 2017e Medicare utilization over 30,000. One service was identified. The RUC referred this service to the CPT Editorial Panel for revision.

Medicare Allowed Charges >$10 million
In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > $10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately $1 million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS/Other
Utilization over 500,000
In April 2011, the RUC identified 410 codes with a source of "CMS/Other." CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. "CMS/Other" source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service once it is revised by the CPT Editorial Panel.

Utilization over 250,000
In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC removed nine services and submitted 32 recommendations to CMS for the 2015-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000
In October 2016, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 100,000 or more, which resulted in 27 services and was expanded to 41 services to include

the family of services. The RUC referred two codes to CPT for deletion and submitted recommendations for 39 services for the 2019 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Utilization over 30,000
In October 2017, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 30,000 or more, which resulted in 34 services and was expanded to 55 services to include the family of services. The CPT Editorial Panel deleted 10 codes. The submitted recommendations for 45 services for the 2019-2020 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In October 2018, the RUC reran this screen for CMS/Other Source codes with 2017e Medicare utilization over 30,000, which resulted in seven services and expanded to 13 services. The RUC submitted recommendations for four services for the 2020 Medicare Physician Payment Schedule and will review the remaining 7 services for the 2021 Medicare Physician Payment Schedule.

Bundled CPT® Services
Reported 95% or More Together
The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

Reported 75% or More Together
In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar "groups" to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 126 new and/or revised codes that described the bundles of services. The RUC will review two services after additional utilization data is available.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 167 total codes under review, the CPT® Editorial Panel deleted 52 services. The RUC has submitted 113 code recommendations for the 2014-2019 Medicare Physician Payment Schedules and will review two services after additional utilization data is available.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions.

Of the 75 total codes under review, the CPT Editorial Panel deleted 26 services. The RUC submitted 47 code recommendations for the 2017-2019 Medicare Physician Payment Schedules and will review the two services after additional utilization data is available.

In October 2017 the Relativity Assessment Workgroup performed the fifth cycle analysis of code pairs reported together with 75% or greater frequency. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria four groups or 8 codes were identified. The Relativity Assessment Workgroup determined two groups totaling four codes require code bundling solutions. The RUC referred four codes to CPT for code bundling solutions. The RUC submitted 5 code recommendations for the 2020 Medicare Physician Payment Schedule and will review the remaining services for the 2021 Medicare Physician Payment Schedule.

Low Value/Billed in Multiple Units
CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Low Value/High Volume Codes
CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Multi-Specialty Points of Comparison List
CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100 of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS High Expenditure Procedural Codes
In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes. The RUC submitted 125 recommendations to CMS for the 2013-2019 Medicare Physician Payment Schedules. The RUC completed review of services under the first iteration of this screen.

In the Final Rule for 2016, CMS requested that the RUC review a list of 103 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of $10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010.

The RUC expanded the list of services to 238 services to include additional codes as part of the family. The CPT Editorial Panel deleted 30 codes. The RUC submitted 207 recommendations to CMS for the 2017-2019 Medicare Physician Payment Schedules and will review the remaining service after additional utilization data is available.

Services with Stand-Alone PE Procedure Time

In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of $100,000 or more, include direct equipment inputs that amount to $100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Pre-Time Analysis

In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments. The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Post-Operative Visits

010-Day Global Codes

In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

090-Day Global Codes
In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

High Level E/M in Global Period
In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to 11 services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The CPT Editorial Panel deleted one code. The RUC submitted recommendations for 10 services for the 2017-2018 Medicare Physician Payment Schedules. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward. The RUC has completed review of the services under this screen.

000-Day Global Services Reported with an E/M with Modifier 25
In the NPRM for 2017 CMS identified 83 services with a 000-day global period billed with an E/M 50 percent of the time or more, on the same day of service, same patient, by the same physician, that have not been reviewed in the last five years with Medicare utilization greater than 20,000.

The RUC commented that it appreciated CMS' identification of an objective screen and reasonable query. However, based on further analysis of the codes identified, it appears only 19 services met the criteria for this screen and have not been reviewed to specifically address an E/M performed on the same date. There were 38 codes that did not meet the screen criteria; they were either reviewed in the last 5 years and/or are not typically reported with an E/M. For 26 codes, the summary of recommendation (SOR), RUC rationale or practice expense inputs submitted specifically states that an E/M is typically reported with these services and the RUC accounted for this in its valuation.

The RUC requested that CMS remove 64 services that did not meet the screen criteria or which have already been valued as typically being reported with an E/M service. The RUC requested that CMS condense and finalize the list of services for this screen to the 19 remaining services.

In the Final Rule for 2017, CMS did finalize the list of 000-day global services reported with an E/M to the 19 services that truly met the criteria. The RUC recommended that two additional codes be removed from this screen as the specialty societies discovered that in fact an E/M as typical was considered in the survey process. Additional codes were added as part of the family of codes identified, totaling 22. The CPT Editorial Panel deleted one code and the RUC submitted 21 recommendations for the 2019 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

Negative IWPUT
In October 2017, the RUC identified 22 services with a negative IWPUT and Medicare utilization over 10,000 for all services or over 1,000 for Harvard valued and CMS/Other source codes. The RUC expanded the services identified in this screen to 56 services to include additional codes as part of the family. The CPT Editorial Panel deleted 15 services. The RUC submitted 41 recommendations for the 2019-2020 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Contractor Priced with High Volume
In April 2018, the RUC identified five contractor-priced Category I CPT codes that have 2017 estimated Medicare utilization over 10,000. The RUC expanded the services identified in this screen to six to include additional codes as part of a family. The RUC referred two codes to the CPT Editorial Panel for deletion, will review three services for the 2020 Medicare Physician Payment Schedule and the remaining service after two years of additional data is available.

CPT Modifier -51 Exempt List
In April 2018, the RUC identified seven services on the CPT Modifier -51 *Multiple Procedures* exempt list with 2017 estimated Medicare utilization over 10,000. The RUC examined the data provided on the percentage reported alone, physician pre and intra time and determined that this is an appropriate screen. The RUC recommended that four services be removed from the Modifier – 51 exempt list and that three services remain on the list as they are separate and distinct services. The RUC notes that the CPT Editorial Panel will be reexamining this list in February 2019. The RUC has completed review of the services under this screen.

Public Comment Requests
In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

Final Rule for 2013
In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 39 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thorascopic procedures. The CPT Editorial Panel deleted two services. The RUC submitted recommendations for 29 services for the 2014-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2014
CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 90 services. The CPT® Editorial Panel deleted 11 services. The RUC submitted recommendations to CMS for 79 services for the 2015-2018 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2015
In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 53 services to include additional codes as part of this family. The CPT Editorial Panel deleted 16 services. The RUC submitted 37 recommendations for the 2016-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2016
In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 53 services to include an additional code as part of the family. The CPT Editorial Panel

deleted eight services. The RUC submitted 45 recommendations for the 2017-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2017
In the Final Rule for 2017 there were no public nominations for services in which the RUC was not already addressing.

Final Rule for 2018
In the Final Rule for 2018 the public and CMS nominated six services as potentially misvalued, which the RUC expanded to nine services. The RUC submitted nine recommendations for the 2019-2020 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2019
In the Final Rule for 2019 the public and CMS nominated nine services as potentially misvalued. The RUC will review these services for the 2021 Medicare Physician Payment Schedule.

Other Issues
In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT® Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

CMS Requests and RUC Relativity Assessment Workgroup Code Status	
Total Number of Codes Identified*	**2,482**
Codes Completed	**2,395**
Work and PE Maintained	647
Work Increased	293
Work Decreased	831
Direct Practice Expense Revised (beyond work changes)	171
Deleted from CPT®	453
Codes Under Review	**87**
Referred to CPT® Editorial Panel	37
RUC to Review for *CPT 2021*	27
RUC to review future review after additional data obtained	23

**The total number of codes identified will not equal the number of codes from each screen as some codes have been identified in more than one screen.*

The RUC's efforts for 2009-2018 have resulted in $5 billion for redistribution within the Medicare Physician Payment Schedule.

RUC Referrals to CPT Editoral Panel - Outstanding Issues

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
29822	**Arthroscopy, shoulder, surgical; debridement, limited**	CMS Fastest Growing	January 2019	AAOS	Setpember 2019

Background: In October 2018, AMA staff identified the Harvard Valued services with 2017e Medicare utilization over 30,000. CPT code 29823 was identifed and an action plan was requested for January 2019. In January 2019, the RUC recommended to refer CPT code 29823 for revision. The code descriptors for 29822 and 29823 are not clear (eg, limited versus extensive) and there are no guidelines to assist providers and coders with selecting the correct code.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
29823	**Arthroscopy, shoulder, surgical; debridement, extensive**	Harvard-Valued Annual Allowed Charges Greater than $10 million / Harvard Valued - Utilization over 30,000-Part3	January 2019	AAOS	Setpember 2019

Background: In October 2018, AMA staff identified the Harvard Valued services with 2017e Medicare utilization over 30,000. CPT code 29823 was identifed and an action plan was requested for January 2019. In January 2019, the RUC recommended to refer CPT code 29823 for revision. The code descriptors for 29822 and 29823 are not clear (eg, limited versus extensive) and there are no guidelines to assist providers and coders with selecting the correct code.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
32405	**Biopsy, lung or mediastinum, percutaneous needle**	Codes Reported Together 75%or More-Part4	January 2018	ACR, SIR	February 2019

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
37220	**Revascularization, endovascular, open or percutaneous, iliac artery, unilateral, initial vessel; with transluminal angioplasty**	High Volume Growth1	January 2019	SVS, ACS, SIR, ACR, ACC	September 2019

Background: In October 2018, 37225, 37227 and 37229 services were identified by the PE High Cost Supplies screen for services with non-facility Medicare utilization over 10,000, not reviewed in the last five years and include a supply item greater than $500. The RUC requests an action plan for the January 2019 on how to address these services. The Workgroup reviewed the action plan for these services, noting that CMS repriced these supply items for 2019. The specialty societies indicated that they agreed these supply items were essential to perform CPT codes 37225, 37227 and 37229 and that the current repricing was appropriate. The Workgroup noted that CPT code 37229 was identified on the High Volume Growth screen at this meeting and the Workgroup agreed with the specialty societies to refer this entire family of services to CPT for revision to accommodate new technologies.

37221 **Revascularization, endovascular, open or percutaneous, iliac artery, unilateral, initial vessel; with transluminal stent placement(s), includes angioplasty within the same vessel, when performed**

Screen	RUC Meeting	Specialty Society:	CPT Meeting
High Volume Growth1	January 2019	SVS, ACS, SIR, ACR, ACC	September 2019

64446	**Injection, anesthetic agent; sciatic nerve, continuous infusion by catheter (including catheter placement)**	Site of Service Anomaly / High Volume Growth1	October 2018	ASA	May 2019

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

74301	**Cholangiography and/or pancreatography; additional set intraoperative, radiological supervision and interpretation (List separately in addition to code for primary procedure)**	CMS-Other - Utilization over 30,000	January 2019		May 2019

Background: This service was identified with 74300. In January 2019, the RUC recommended to refer this code to CPT for deletion.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
74425	**Urography, antegrade (pyelostogram, nephrostogram, loopogram), radiological supervision and interpretation**	Codes Reported Together 75% or More-Part2	October 2018	ACR, AUA, SIR	May 2019

Background: CPT code 74425 was bundled with 50398 at the October 2014 CPT/January 2015 meetings for CPT 2016. . While this code is not being deleted, it was unclear what the typical vignette will be for this procedure once the majority of its utilization has migrated to the new codes. The RUC agreed with the specialty societies that two years of Medicare claims data should be reviewed prior to re-survey. The RUC recommends a delay to the survey of CPT code 74425 until at least two years of Medicare claims data is available (October 2018). In October 2018, the RUC referred CPT code 74425 to CPT for editorial changes to the descriptor and vignette to clarify between pyelostogram, nephrostogram, and loopogram.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
74X01		CMS-Other - Utilization over 30,000	January 2019		February 2019-EC

Background: In January 2019, the RUC determined that CPT code 74X01 should be referred to the CPT Editorial Panel to correct the add-on code descriptor to clearly delineate the small bowel follow-through as an procedure reported in addition to the preceding upper GI code. Some RUC members expressed concern that there may be confusion in reporting this code that might be mistaken as inclusive of the preceding upper GI code. The RUC recommends CPT code 74X01 be referred to the CPT Editorial Panel for editorial revision.

76942	**Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation**	CMS-Other - Utilization over 500,000 / CMS Request - Final Rule for 2014 / High Volume Growth3	April 2014	AACE, AAOS, AAPMR, ACR, ACRh, APMA, ASA, ASBS, ASIPP, AUA, SIR, TES	May 2019

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
77012	**Computed tomography guidance for needle placement (eg, biopsy, aspiration, injection, localization device), radiological supervision and interpretation**	CMS-Other - Utilization over 100,000 / Codes Reported Together 75%or More-Part4	January 2018	ACR, SIR	February 2019

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of $5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
77014	**Computed tomography guidance for placement of radiation therapy fields**	CMS Request - Practice Expense Review / CMS-Other - Utilization over 500,000 / CMS High Expenditure Procedural Codes1 / High Volume Growth3	January 2016	ASTRO, ACR	

Background: Revise based on CMS input regarding the radiation oncology services. CMS maintains G codes at this time. Specialty society will revise once CMS makes final determinations on the radiation oncology CPT codes. TBD.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
77401	**Radiation treatment delivery, superficial and/or ortho voltage, per day**	High Volume Growth5	January 2019		May 2019

Background: In October 2018, this service wa identified by the High Volume Growth screen, for services with 2017e Medicare utilization of 10,000 or more that has increased by at least 100% from 2012 through 2017. The Workgroup requested an action plan for January 2019. In January 2019, the RUC recommended to Refer to CPT May 2019/RUC Oct 2019 to better define the set of services associated with delivery of superficial radiation therapy (SRT).

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
908XX	**Biofeedback training, perineal muscles, anorectal or urethral sphincter, including EMG and/or manometry when performed; initial 15 minutes of one-on-one patient contact**	Negative IWPUT	January 2019		February 2019-EC

Background: In January 2019, the RUC recommends referral to the CPT Editorial Panel that CPT codes 908XX and 909XX be revised to clarify that the physician is performing the service the entire time. The RUC recommends an editorial revision that specifies “15 minutes of one-on-one physician or qualified health care professional contact with the patient” so reporting of this service is clear and represents what was surveyed and valued at the RUC.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
909XX	**Biofeedback training, perineal muscles, anorectal or urethral sphincter, including EMG and/or manometry when performed; each additional 15 minutes of one-on-one patient contact (List separately in addition to code for primary procedure)**	Negative IWPUT	January 2019		February 2019-EC

Background: In January 2019, the RUC recommends referral to the CPT Editorial Panel that CPT codes 908XX and 909XX be revised to clarify that the physician is performing the service the entire time. The RUC recommends an editorial revision that specifies “15 minutes of one-on-one physician or qualified health care professional contact with the patient” so reporting of this service is clear and represents what was surveyed and valued at the RUC.

92585	**Auditory evoked potentials for evoked response audiometry and/or testing of the central nervous system; comprehensive**	CMS-Other - Utilization over 30,000	January 2018	AAA, AANEM, ACNS, ASHA	February 2019

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to refer to Feb 2019 CPT meeting to clarify the code descriptors to better define limited/comprehensive and develop a new related procedure, Vestibular Evoked Myogenic Potentials (VEMP), has recently been approved by the FDA. A VEMP specific code should be developed and will replace some use of CPT code 92585.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92992	**Atrial septectomy or septostomy; transvenous method, balloon (eg, Rashkind type) (includes cardiac catheterization)**	CMS Request - NPRM for 2019	January 2019		September 2019

Background: In January 2019, the RUC identified the possibility that related imaging guidance may not be correctly bundled into CPT code 92992. Therefore, the RUC recommends that CPT code 92992 be referred to the CPT Editorial Panel for revision to bundle in all forms of imaging guidance typically used during the procedure. Additionally, the specialty societies indicated that CPT code 92993 is antiquated and rarely performed. The RUC recommends that CPT code 92993 be referred to the CPT Editorial Panel for revision or possible deletion. Once these services return to the RUC for survey they should survey as a 000-day global period because these procedures do not provide definitive therapy, the patients requiring these procedures often remain critically ill after the life-saving/temporizing procedures.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
92993	**Atrial septectomy or septostomy; blade method (Park septostomy) (includes cardiac catheterization)**	CMS Request - NPRM for 2019	January 2019		September 2019

Background: In January 2019, the RUC identified the possibility that related imaging guidance may not be correctly bundled into CPT code 92992. Therefore, the RUC recommends that CPT code 92992 be referred to the CPT Editorial Panel for revision to bundle in all forms of imaging guidance typically used during the procedure. Additionally, the specialty societies indicated that CPT code 92993 is antiquated and rarely performed. The RUC recommends that CPT code 92993 be referred to the CPT Editorial Panel for revision or possible deletion. Once these services return to the RUC for survey they should survey as a 000-day global period because these procedures do not provide definitive therapy, the patients requiring these procedures often remain critically ill after the life-saving/temporizing procedures.

93299	**Interrogation device evaluation(s), (remote) up to 30 days; implantable cardiovascular physiologic monitor system or subcutaneous cardiac rhythm monitor system, remote data acquisition(s), receipt of transmissions and technician review, technical support and distribution of results**	CMS High Expenditure Procedural Codes2 / Contractor Priced High Volume	October 2018	ACC, HRS	May 2019

Background: In October 2018, the RUC recommeded new practice expense inputs for practice expense only code. The specialty society indicated that they intend to submit a coding proposal to the CPT Editorial Panel to delete CPT code 93299, as it will no longer be necessary to have a separate code for practice expense once CPT codes 93297 and 93298 are allocated direct practice expense inputs in 2020. The RUC recommends that CPT code 93299 be referred to CPT for deletion.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
94400	**Breathing response to CO2 (CO2 response curve)**	Codes Reported Together 75% or More-Part2 / CPT Assistant Analysis 2018	January 2019	AAFP, ACCP, ATS, ACP, APTA, AOTA	May 2019

Background: In January 2019, the RUC recommended to survey for April 2019. The Workgroup noted that 94400 may be recommended for deletion and 94640 and 94668 should be surveyed by Family Practice as they are the primary providers of these services.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
95943	**Simultaneous, independent, quantitative measures of both parasympathetic function and sympathetic function, based on time-frequency analysis of heart rate variability concurrent with time-frequency analysis of continuous respiratory activity, with mean heart rate and blood pressure measures, during rest, paced (deep) breathing, Valsalva maneuvers, and head-up postural change**	Codes Reported Together 75% or More-Part1 / Contractor Priced High Volume	January 2019	AAN, AANEM	May 2019

Background: CPT Feb 2012 established 2 new codes with instructional guidelines to report autonomic function testing. In January 2019, a RUC member provided background that when this Category I code was created at the CPT Editorial Panel it was created to differentiate the service from tilt table testing. The device manufacturer brought the code forward for a series of maneuvers that are different than those performed using a tilt table. The RUC member suggested that in the years since the code was created it has proven that it does not meet the criteria for a Category I code. The RUC member explained the service is not widely performed and that 100 internists performing the service is not “frequency consistent with the intended clinical use”. The code describes common measures and if the service was consistent with current medical practice the volume would be much higher. The RUC recommends CPT code 95943 be referred to the CPT Editorial Panel for deletion.

RUC Referrals to CPT Editoral Panel - Outstanding Issues

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
G0297	**Low dose ct scan (ldct) for lung cancer screening**	CMS-Other - Utilization over 30,000	January 2019		May 2019

Background: In October 2018, AMA staff identified the CMS/Other Source codes with 2017 estimated Medicare utilization over 30,000. G0297 was identified. The Workgroup requested action plans January 2019. In January 2019, the RUC recommended to refer to CPT Editorial Panel to establish a permanent code fo rthis procedure.

		Screen	RUC Meeting	Specialty Society:	CPT Meeting
G0396	**Alcohol and/or substance (other than tobacco) abuse structured assessment (e.g., audit, dast), and brief intervention 15 to 30 minutes**	CMS-Other - Utilization over 30,000	January 2018	AAFP, ASA, ASAM	

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to maintain the physician work and refer to CPT to editorially remove "screening" from 99408 and 99409 to "assessment" to mirror G0396. At the February 2018 CPT meeting, the Panel postponed until time uncertain this request to revise codes 99408-99409 to identify assessment of alcohol and/or substance abuse. As a rationale for postponement, the Panel said that the service described in this application did not meet the General Criteria for Category I because the proposed service is not unique or well defined, and does not describe a service that is clearly identified and distinguished from existing services already described in CPT by other codes. The Panel's additional rationale for postponement of this item was to allow the relevant specialty societies an opportunity to submit a new code change application to address the differences between assessment and screening services.

RUC Recommendations to Develop CPT Assistant Articles - Outstanding Issues

		Screen:	RUC Meeting:	RUC Rec:	Specialty Society:	CPT Asst Status:
75898	**Angiography through existing catheter for follow-up study for transcatheter therapy, embolization or infusion, other than for thrombolysis**	Codes Reported Together 75% or More-Part1	January 2019	Refer to CPT Assistant	AANS/CNS, ACR, ASNR, SCAI, SIR	

Background: The Workgroup accepts the specialties' recommendation to submit a code change proposal that would address any duplication when these services are reported together on the same date by the same physician. Timeline: No later than the February 2011 CPT Editorial Panel meeting. The Workgroup accepts the specialties' recommendation to submit a code change proposal that would address any duplication when these services are reported together on the same date by the same physician. At the October 2012 RUC meeting, the specialties reiterated to the RUC that under the current coding structure, CPT codes 75896 and 75898 are reported during thrombolytic therapy. However, with the CPT revisions for 2013, these two codes will no longer be reported during thrombolytic therapy. Given this, it is unknown exactly how these two orphan codes will be reported in 2013. The remaining non-thrombolysis use of these codes will be influenced by future CPT Editorial Panel changes. CPT code 75896 will be included in a multi-specialty coding revision effort led by neurossurgery. This coding proposal will describe intracranial infusion other than for thrombolysis (e.g. vasodilators in the setting of cerebral vasospasm). This coding change is expected to be reviewed by the CPT Editorial Panel in February 2013. CPT code 75898 will be addressed in the multi-specialty embolization coding revision due for CPT Editorial Panel review in Feburary 2013 and RUC review in April 2013 as well. However, until recommendations are reviewed and submitted for 2014, the RUC continues to recommend carrier pricing for CPT codes 75896 and 75898. These services will be assessed once the coding changes for the related services all take effect and utilization data is available, which will be no earlier than the October 2016 RUC meeting. In April 2015, the specialty societies requested to refer these services to the CPT Editorial Panel as a coding change proposal has already been submitted for review at the May 2015 CPT meeting to delete code 75896 and a multispecialty coding change proposal is scheduled to be addressed in a future CPT cycle. The new codes approved for intracranial thrombolysis and intracranial mechanical thrombectomy are expected to be utilized instead of 75898. The work remaining in 75798 will be appropriately surveyed by physicians who perform such work. The RUC is scheduled to review the utilization of 75898 at the October 2016 Relativity Assessment Workgroup meeting. In October 2016, the specialty societies indicated that the utilization for this service will go down after the other coding changes take effect. The Workgroup recommends reviewing this service in 2 years after more utilization data is available (October 2018). In October 2018, the Workgroup noted that utilization decreased appropriately after code bundling solutions. However, this service is currently CMS/Other source and has never been RUC surveyed. The Workgroup requests an action plan for January 2019 to determine whether to survey what remains in this service currently or delete this service. In January 2019, the RUC recommeded to refer to CPT Assistant to provide education on how to correctly report this service.

New Technology/New Services List

CPT Code	Long Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete

33258	Operative tissue ablation and reconstruction of atria, performed at the time of other cardiac procedure(s), extensive (eg, maze procedure), without cardiopulmonary bypass (List separately in addition to code for primary procedure)	Apr 2007	Add-on Maze Procedures	23	CPT 2008	September 2011	Remove, code does not need to be re-evaluated	☑
33259	Operative tissue ablation and reconstruction of atria, performed at the time of other cardiac procedure(s), extensive (eg, maze procedure), with cardiopulmonary bypass (List separately in addition to code for primary procedure)	Apr 2007	Add-on Maze Procedures	23	CPT 2008	September 2011	Remove, code does not need to be re-evaluated	☑
33265	Endoscopy, surgical; operative tissue ablation and reconstruction of atria, limited (eg, modified maze procedure), without cardiopulmonary bypass	Apr 2006	Atrial Tissue Ablation and Reconstruction	17	CPT 2007	September 2011	Remove, code does not need to be re-evaluated	☑
33266	Endoscopy, surgical; operative tissue ablation and reconstruction of atria, extensive (eg, maze procedure), without cardiopulmonary bypass	Apr 2006	Atrial Tissue Ablation and Reconstruction	17	CPT 2007	September 2011	Remove, code does not need to be re-evaluated	☑
33270	Insertion or replacement of permanent subcutaneous implantable defibrillator system, with subcutaneous electrode, including defibrillation threshold evaluation, induction of arrhythmia, evaluation of sensing for arrhythmia termination, and programming or reprogramming of sensing or therapeutic parameters, when performed	Apr 2014	Subcutaneous Implantable Defibrillator Procedures	09	CPT 2015	October 2021	In October 2018, RUC recommended to review again after 3 more years of data (2021).	☐
33271	Insertion of subcutaneous implantable defibrillator electrode	Apr 2014	Subcutaneous Implantable Defibrillator Procedures	09	CPT 2015	October 2021	In October 2018, RUC recommended to review again after 3 more years of data (2021).	☐
33272	Removal of subcutaneous implantable defibrillator electrode	Apr 2014	Subcutaneous Implantable Defibrillator Procedures	09	CPT 2015	October 2021	In October 2018, RUC recommended to review again after 3 more years of data (2021).	☐

CPT Code	Long Descriptor	RUC Meeting	Issue	Tab	CPT Year	Date to Re-Review	RUC Rec	Complete
33273	Repositioning of previously implanted subcutaneous implantable defibrillator electrode	Apr 2014	Subcutaneous Implantable Defibrillator Procedures	09	CPT 2015	October 2021	In October 2018, RUC recommended to review again after 3 more years of data (2021).	☐
33274	Transcatheter insertion or replacement of permanent leadless pacemaker, right ventricular, including imaging guidance (eg, fluoroscopy, venous ultrasound, ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed	Jan 2018	Leadless Pacemaker Procedures	07	CPT 2019	October 2022		☐
33275	Transcatheter removal of permanent leadless pacemaker, right ventricular	Jan 2018	Leadless Pacemaker Procedures	07	CPT 2019	October 2022		☐
33285	Insertion, subcutaneous cardiac rhythm monitor, including programming	Apr 2017	Cardiac Event Recorder Procedures	07	CPT 2019	October 2022		☐
33286	Removal, subcutaneous cardiac rhythm monitor	Apr 2017	Cardiac Event Recorder Procedures	07	CPT 2019	October 2022		☐
33289	Transcatheter implantation of wireless pulmonary artery pressure sensor for long-term hemodynamic monitoring, including deployment and calibration of the sensor, right heart catheterization, selective pulmonary catheterization, radiological supervision and interpretation, and pulmonary artery angiography, when performed	Jan 2018	Pulmonary Wireless Pressure Sensor Services	08	CPT 2019	October 2022		☐
33340	Percutaneous transcatheter closure of the left atrial appendage with endocardial implant, including fluoroscopy, transseptal puncture, catheter placement(s), left atrial angiography, left atrial appendage angiography, when performed, and radiological supervision and interpretation	Jan 2016	Closure Left Atrial Appendage with Endocardial Implant	10	CPT 2017	October 2020		☐
