Subject: RUC Recommendations

Dear Administrator Verma:

The American Medical Association (AMA)/Specialty Society RVS Update Committee (RUC) submits the enclosed recommendations for work relative values and direct practice expense inputs to the Centers for Medicare and Medicaid Services (CMS). These recommendations relate to new and revised codes for *CPT 2020*, as well as to existing services identified by the RUC's Relativity Assessment Workgroup and CMS.

Enclosed are the RUC recommendations for all the CPT codes reviewed at the October 3-6, 2018, RUC meeting.

CPT 2020 New and Revised Codes – October 2018 RUC Submission

The enclosed binder contains RUC recommendations, including those for new and revised CPT codes. The RUC considered 85 new/revised/related family CPT codes at the October 2018 meeting. The RUC submits work value and/or practice expense inputs for 72 new/revised/related family CPT codes from the October meeting.

Existing Services Identified by RUC and CMS for Review

In addition to the new/revised CPT code submission, the RUC submits recommendations for 24 services identified by the RUC or CMS as potentially misvalued and reviewed at the October 2018 RUC meeting. The RUC recommends work relative values for 21 codes and direct practice expense inputs only for 3 codes. The HCPAC submits recommendations for 2 CPT codes identified by the *CMS Request - Audiology Services / High Volume Growth* screens.

RUC Progress in Identifying and Reviewing Potentially Misvalued Codes

Since 2006, the RUC has identified 2,475 potentially misvalued services through objective screening criteria and has completed review of 2,354 of these services. The RUC has recommended that over half of the services identified be decreased or deleted (Figure 1). The RUC has worked vigorously over the past several years to identify and address misvaluations in the RBRVS through provision of revised physician time data and resource recommendations to CMS. The RUC looks forward to working with CMS on a concerted effort to address potentially misvalued services. *A detailed report of the RUC's progress is appended to this letter.*

Figure 1: AMA/Specialty Society RVS Update Committee (RUC) Potentially Misvalued Services Project

Enclosed Recommendations and Supporting Materials:

Included in these binders and on the enclosed USB drive are:

- RUC Recommendation Status Report for New and Revised Codes
- RUC Recommendation Status Report for 2,475 services identified to date by the Relativity Assessment Workgroup and CMS as potentially misvalued. In addition, a spreadsheet containing the codes specific to this submission is included.
- RUC Referrals to the CPT Editorial Panel – both for CPT nomenclature revisions and *CPT Assistant* articles.
- Physician Time File: A list of the physician time data for each of the CPT codes reviewed at the October 2018 RUC meeting.
- Pre-Service and Post-Service Time Packages Definitions: The RUC developed physician pre-service and post-service time packages which have been incorporated into these recommendations. The intent of these packages is to streamline the RUC review process as well as create standard pre-service and post-service time data for all codes reviewed by the RUC.
- PLI Crosswalk Table: The RUC has committed to selecting appropriate professional liability insurance crosswalks for new and revised codes and existing codes under review. We have provided a PLI Crosswalk Table listing the reviewed code and its crosswalk code for easy reference. We hope that the provision of this table will assist CMS in reviewing and implementing the RUC recommendations.

- **BETOS Assignment Table:** The RUC, for each meeting, provides CMS with suggested BETOS classification assignments for new/revised codes. Furthermore, if an existing service is reviewed and the specialty believes the current assignment is incorrect, this table will reflect the desired change.
- **Source Code Utilization Crosswalk Table:** A table estimating the flow of claims data from existing codes to the new/revised codes. This information is used to project the work relative value savings to be included in the 2020 conversion factor increase.
- **New Technology List and Flow Chart:** In April 2006, the RUC adopted a process to identify and review codes that represent new technology or services that have the potential to change in value. To date, the RUC has identified 609 of these procedures through the review of new CPT codes. A table of these codes identified as new technology services and the date of review is enclosed, as well as a flow chart providing a detailed description of the process to be utilized to review these services.

We appreciate your consideration of these RUC recommendations. If you have any questions regarding the attached materials, please contact Sherry Smith at (312) 464-5604.

Sincerely,

Peter K. Smith, MD

The RUC Relativity Assessment Workgroup Progress Report

In 2006, the AMA/Specialty Society RVS Update Committee (RUC) established the Five-Year Identification Workgroup (now referred to as the Relativity Assessment Workgroup) to identify potentially misvalued services using objective mechanisms for reevaluation prior to the next Five-Year Review. Since the inception of the Relativity Assessment Workgroup, the Workgroup and the Centers for Medicare and Medicaid Services (CMS) have identified 2,475 services through 20 different screening criteria for further review by the RUC. Additionally, the RUC charged the Workgroup with maintaining the “new technology” list of services that will be re-reviewed by the RUC as reporting and cost data become available.

To provide Medicare with reliable data on how physician work has changed over time, the RUC, with more than 300 experts in medicine and research, are examining over 2,400 potentially misvalued services accounting for \$45 billion in Medicare spending. The update committee has recommended reductions and deletions to 1,445 services, redistributing \$5 billion. Here are the outcomes for the committee’s review of 2,475 codes:

Potentially Misvalued Services Project

Source: American Medical Association

New Technology

As the RUC identifies new technology services that should be re-reviewed, a list of these services is maintained and forwarded to CMS. Currently, codes are identified as new technology based on recommendations from the appropriate specialty society and consensus among RUC members at the time of the RUC review for these services. RUC members consider several factors to evaluate potential new technology services, including: recent FDA-approval, newness or novelty of the service, use of an existing service in a new or novel way, and migration of the service from a Category III to Category I CPT® code. The Relativity Assessment Workgroup maintains and develops all standards and procedures associated with the list, which currently contains 609 services. In September 2010, the re-review cycle began and since then the RUC has recommended 47 services to be re-examined. The remaining services

are rarely performed (i.e., less than 500 times per year in the Medicare population) and will not be further examined. The Workgroup will continue to review the remaining 176 services every October after three years of Medicare claims data is available for each service.

Methodology Improvements

The RUC implemented process improvements to methodology following its October 2013 meeting. The process improvements are designed to strengthen the RUC's primary mission of providing the final RVS update recommendations to the Centers for Medicare and Medicaid Services.

In the area of methodology, the RUC is continuously improving its processes to ensure that it is best utilizing reliable, extant data. At its most recent meeting, the RUC increased the minimum number of respondents required for each survey of commonly performed codes:

- For services performed 1 million or more times per year in the Medicare population, at least 75 physicians must complete the survey.
- For services performed from 100,000 to 999,999 times annually, at least 50 physicians will be required.

Further strengthening its methodology, the RUC also announced that specialty societies will move to a centralized online survey process, which will be coordinated by the AMA and will utilize external expertise to ensure survey and reporting improvements.

Site of Service Anomalies

The Workgroup initiated its effort by reviewing services with anomalous sites of service when compared to Medicare utilization data. Specifically, these services are performed less than 50% of the time in the inpatient setting, yet include inpatient hospital Evaluation and Management services within their global period.

The RUC identified 194 services through the site of service anomaly screen. The RUC required the specialties to resurvey 129 services to capture the appropriate physician work involved. These services were reviewed by the RUC between April 2008 and February 2011. CMS implemented 124 of these recommendations in the 2009, 2010 and 2011 Medicare Physician Payment Schedules. The RUC submitted another five recommendations as well as re-reviewed and submitted 44 recommendations to previously reviewed site of service identified codes to CMS for the 2012 Medicare Physician Payment Schedule.

Of the remaining 65 services that were not re-surveyed, the RUC modified the discharge day management for 46 services, maintained three codes and removed two codes from the screen as the typical patient was not a Medicare beneficiary and would be an inpatient. The CPT® Editorial Panel deleted 14 codes. The RUC completed review of services under this initial screen.

During this review, the RUC uncovered several services that are reported in the outpatient setting, yet, according to several expert panels and survey data from physicians who perform the procedure, the service, typically requires a hospital stay of greater than 23 hours. The RUC maintains that physician work that is typically performed, such as visits on the date of service and discharge work the following day, should be included within the overall valuation. Subsequent observation day visits and discharge day management service are appropriate proxies for this work.

The RUC will reassess the data each year going forward to determine if any new site of service anomalies arise. In 2015, the RUC identified three services in which the Medicare data from 2011-2013 indicated it was performed less than 50% of the time in the inpatient setting, yet included inpatient hospital Evaluation and Management services within the global period. These services were referred to CPT and recommendations were submitted to CMS for the 2018 Medicare Physician Payment Schedule.

In 2016, the RUC identified one site of service anomaly CPT code and submitted the recommendation to CMS for the 2019 Medicare Physician Payment Schedule. In 2017, the RUC identified one site of service anomaly CPT code which was revised at the CPT Editorial Panel and the RUC submitted recommendations for the 2020 Medicare Physician Payment Schedule.

In 2018, the RUC also performed a site-of-service anomaly screen based on the review of three years of data (2015, 2016 and 2017e) for services with utilization over 10,000 in which a service is typically performed in the inpatient hospital setting, yet only a half discharge day management (99238) is included. One service was identified via this screen and another identified for the outpatient site of service anomaly screen.

High Volume Growth

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have increased by at least 100% from 2004 through 2006. The query initially resulted in the identification of 81 services, but was expanded by 16 services to include the family of services, totaling 97 services. Specialty societies submitted comments to the Workgroup in April 2008 to provide rationales for the growth in reporting. Following this review, the RUC required the specialties to survey 35 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC between February 2009 and April 2010.

The RUC recommended removing 15 services from the screen as the volume growth did not impact the resources required to provide these services. The CPT® Editorial Panel deleted 34 codes. The RUC submitted 44 recommendations to CMS for services for the 2012-2017 Medicare Physician Payment Schedules. In September 2011, the RUC began review of services after two years of utilization data were collected. The RUC will continue to review the remaining four services after additional utilization data is available.

In April 2013, the RUC assembled a list of all services with a total Medicare utilization of 10,000 or more that have increased by at least 100% from 2006 through 2011. The query resulted in the identification of 40 services and expanded to 62 services to include the appropriate family of services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The RUC recommended review of two services after an additional two years of utilization data is collected. The CPT® Editorial Panel deleted ten codes and the RUC submitted recommendations for 47 services for the 2015-2019 Medicare Physician Payment Schedule.

In October 2015, the RUC ran this screen again for services based on Medicare utilization of 10,000 or more that have increased by at least 100% from 2008 through 2013. The query resulted in the identification of 19 services and expanded to 30 services to include the appropriate family of services. The RUC recommended removing one service from the screen as the volume growth did not impact the resources required to provide these services. The RUC will review three services after an additional two years of utilization data is collected. The CPT Editorial Panel deleted 12 codes and the RUC submitted recommendations for 14 services for the 2017-2020 Medicare Physician Payment Schedules.

In October 2016, the RUC ran this screen again and the query resulted in the identification of 12 services, which was expanded to 47 services. The RUC recommended removing three services from the screen as the volume growth did not impact the resources required to provide these services. The CPT Editorial Panel deleted three services. The RUC submitted recommendations for 29 services for the 2019-2020 Medicare Physician Payment Schedules. The RUC will review two services after additional utilization data is available and provide recommendations for the remaining 11 services for the 2020 Medicare Physician Payment Schedule.

In October 2018, the RUC ran this query again for services with 2017e Medicare utilization of 10,000 or more that has increased by at least 100% from 2012 through 2017. Twelve (12) codes were identified. The RUC will review action plans for the January 2019 meeting with specialty societies indicating whether these services should be reviewed for physician work/practice expense.

CMS Fastest Growing

In 2008, CMS developed the Fastest Growing Screen to identify all services with growth of at least 10% per year over the course of three years from 2005-2007. Through this screen, CMS identified 114 fastest growing services and the RUC added 69 services to include the family of services, totaling 183. The RUC required the specialties to survey 72 services to capture the appropriate work effort and/or direct practice expense inputs. These services were reviewed by the RUC from February 2008 through April 2010 and submitted to CMS for the Medicare Physician Payment Schedule.

The RUC recommended removing 27 services from the screen as the volume growth did not impact the resources required to provide the service. The CPT® Editorial Panel deleted 43 codes. The RUC submitted 41 recommendations to CMS for the 2012-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

High IWP/UT

The Workgroup assembled a list of all services with a total Medicare utilization of 1,000 or more that have an intra-service work per unit of time (IWP/UT) calculation greater than 0.14, indicating an outlier intensity. The query resulted in identification of 32 services. Specialty societies submitted comments to the Workgroup in April 2008 for these services. As a result of this screen, the RUC has reviewed and submitted recommendations to CMS for 28 codes, removing four services from the screen as the IWP/UT was considered appropriate. The RUC completed review of services under this screen.

Services Surveyed by One Specialty – Now Performed by a Different Specialty

In October 2009, services that were originally surveyed by one specialty, but now performed predominantly by other specialties were identified and reviewed. The RUC identified 21 services by this screen, adding 19 services to address various families of codes. The majority of these services required clarification within CPT®. The CPT® Editorial Panel deleted 18 codes. The RUC submitted 22 recommendations for physician work and practice expense to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

In April 2013, the RUC queried the top two dominant specialties performing services based on Medicare utilization more than 1,000 and compared it to who originally surveyed the service. Two services were identified and the RUC recommended that one be removed from the screen since the specialty societies currently performing this service indicated that the service is appropriate and recommended that the other code be referred to CPT® to be revised. The RUC completed review of services under this screen.

Harvard Valued

Utilization over 1 Million

CMS requested that the RUC pay specific attention to Harvard valued codes that have a high utilization. The RUC identified nine Harvard valued services with high utilization (performed over 1 million times per year). The RUC also incorporated an additional 12 Harvard valued codes within the initial family of services identified. The CPT® Editorial Panel deleted one code. The RUC submitted 20 relative value work recommendations to CMS for the 2011 and 2012 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000

The RUC continued to review Harvard valued codes with significant utilization. The Relativity Assessment Workgroup expanded the review of Harvard codes to those with utilization over 100,000 which totaled 38 services. The RUC expanded this screen by 101 codes to include the family of services, totaling 139 services. The CPT® Editorial Panel deleted 27 codes. The RUC submitted 112 recommendations to CMS for the 2011-2014 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 30,000

In April 2011, the RUC continued to identify Harvard valued codes with utilization over 30,000, based on 2009 Medicare claims data. The RUC determined that the specialty societies should survey the remaining 36 Harvard codes with utilization over 30,000 for September 2011. The RUC expanded the screen to include the family of services, totaling 65 services. The CPT® Editorial Panel deleted 12 codes. The RUC submitted recommendations for 53 services for the 2013-2014 Medicare Physician Payment Schedules.

In October 2018, the RUC reran this screen on Harvard valued services with 2017e Medicare utilization over 30,000. One service was identified. The RUC will review action plans for the January 2019 meeting with specialty societies indicating whether these services should be reviewed for physician work/practice expense.

Medicare Allowed Charges >\$10 million

In June 2012, CMS identified 16 services that were Harvard valued with annual allowed charges (2011 data) > \$10 million. The RUC expanded this screen to 33 services to include the proper family of services. The RUC removed two services from review as the allowed charges are approximately \$1 million and did not meet the screen criteria. The CPT® Editorial Panel deleted one service. The RUC submitted recommendations for 30 services for the 2013-2017 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS/Other

Utilization over 500,000

In April 2011, the RUC identified 410 codes with a source of “CMS/Other.” CMS/Other codes are services which were not reviewed by the Harvard studies or the RUC and were either gap filled, most often via crosswalk by CMS or were part of a radiology fee schedule. “CMS/Other” source codes would not have been flagged in the Harvard only screens, therefore the RUC recommended that a list of all CMS/Other codes be developed and reviewed. The RUC established the threshold for CMS/Other source codes with Medicare utilization of 500,000 or more, which resulted in 19 codes. The RUC expanded this screen to 21 services to include the proper family of services. The CPT® Editorial Panel deleted three services. The RUC submitted recommendations for 16 services for the 2013-2015 Medicare Physician Payment Schedules. The RUC removed one service from the screen and will review one service for the 2020 Medicare Physician Payment Schedule.

Utilization over 250,000

In April 2013, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 250,000 or more, which resulted in 26 services and was expanded to 52 services to include the family of services. The CPT Editorial Panel deleted 11 codes identified under this screen. The RUC removed nine services and submitted 32 recommendations to CMS for the 2015-2019 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Utilization over 100,000

In October 2016, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 100,000 or more, which resulted in 27 services and was expanded to 41 services to include

the family of services. The RUC referred two codes to CPT for deletion and submitted recommendations for 39 services for the 2019 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Utilization over 30,000

In October 2017, the RUC lowered the threshold to the CMS/Other source codes with Medicare utilization of 30,000 or more, which resulted in 34 services and was expanded to 55 services to include the family of services. The RUC referred 16 services to the CPT Editorial Panel for revision. The RUC submitted recommendations for 32 services for the 2019-2020 Medicare Physician Payment Schedules and will review the remaining services in the 2020 cycle.

In October 2018, the RUC reran this screen for CMS/Other Source codes with 2017e Medicare utilization over 30,000. Seven (7) services were identified. The RUC will review action plans for the January 2019 meeting with specialty societies indicating whether these services should be reviewed for physician work/practice expense.

Bundled CPT® Services

Reported 95% or More Together

The Relativity Assessment Workgroup solicited data from CMS regarding services inherently performed by the same physician on the same date of service (95% of the time) in an attempt to identify pairings of services that should be bundled together. The CPT® Editorial Panel deleted 31 individual component codes and replaced them with 53 new codes that describe bundles of services. The RUC then surveyed and reviewed work and practice costs associated with these services to account for any efficiencies achieved through the bundling. The RUC completed review of all services under this screen.

Reported 75% or More Together

In February 2010, the Workgroup continued review of services provided on the same day by the same provider, this time lowering the threshold to 75% or more together. The Relativity Assessment Workgroup again analyzed the Medicare claims data and found 151 code pairs which met the threshold. The Workgroup then collected these code pairs into similar “groups” to ensure that the entire family of services would be coordinated under one code bundling proposal. The grouping effort resulted in 20 code groups, totaling 80 codes, and were sent to specialty societies to solicit action plans for consideration at the April 2010 RUC meeting. Resulting from the Relativity Assessment Workgroup review, 81 additional codes were added for review as part of the family of services to ensure duplication of work and practice expense was mitigated throughout the entire set of services. Of the 161 total codes under review, the CPT® Editorial Panel deleted 35 individual component codes and replaced the component coding with 126 new and/or revised codes that described the bundles of services. The RUC will review two services after additional utilization data is available.

In August 2011, the Joint CPT®/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its third cycle of analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 30 code pair groups and recommended code bundling for 64 individual codes. In October 2012, the CPT® Editorial Panel started the review of code bundling solutions. Of the 167 total codes under review, the CPT® Editorial Panel deleted 52 services. The RUC has submitted 113 code recommendations for the 2014-2019 Medicare Physician Payment Schedules and will review two services after additional utilization data is available.

In January and April 2015, the Joint CPT/RUC Workgroup on Codes Reported Together Frequently reconvened to perform its fourth cycle analysis of code pairs reported together with 75% or greater frequency. The Workgroup reviewed 8 code pair groups and recommended code bundling for 18 individual codes. In October 2015, the CPT Editorial Panel started review of the code bundling solutions.

Of the 75 total codes under review, the CPT Editorial Panel deleted 26 services. The RUC submitted 47 code recommendations for the 2017-2019 Medicare Physician Payment Schedules and will review the two services after additional utilization data is available.

In October 2017 the Relativity Assessment Workgroup performed the fifth cycle analysis of code pairs reported together with 75% or greater frequency. Only groups that totaled allowed charges of \$5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria four groups or 8 codes were identified. The Relativity Assessment Workgroup determined two groups totaling four codes require code bundling solutions. The RUC referred four codes to CPT for code bundling solutions. The RUC submitted 2 code recommendations for the 2019 Medicare Physician Payment Schedule and will review the remaining codes for the 2020-2021 Medicare Physician Payment Schedule.

Low Value/Billed in Multiple Units

CMS has requested that services with low work RVUs that are commonly billed with multiple units in a single encounter be reviewed. CMS identified services that are reported in multiples of five or more per day, with work RVUs of less than or equal to 0.50 RVUs.

In October 2010, the Workgroup reviewed 12 CMS identified services and determined that six of the codes were improperly identified as the services were either not reported in multiple units or were reported in a few units and that was considered in the original valuation. The RUC submitted recommendations for the remaining six services for the 2012 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Low Value/High Volume Codes

CMS has requested that services with low work RVUs and high utilization be reviewed. CMS has requested that the RUC review 24 services that have low work RVUs (less than or equal to 0.25) and high utilization. The RUC questioned the criteria CMS used to identify these services as it appeared some codes were missing from the screen criteria indicated. The RUC identified codes with a work RVU ranging from 0.01 - 0.50 and Medicare utilization greater than one million. In February 2011, the RUC reviewed the codes identified by this criteria and added 5 codes, totaling 29. The RUC submitted 24 recommendations to CMS for the 2012 Medicare Physician Payment Schedule and five recommendations to CMS for the 2013 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Multi-Specialty Points of Comparison List

CMS requested that services on the Multi-Specialty Points of Comparison (MPC) list should be reviewed. CMS prioritized the review of the MPC list to 33 codes, ranking the codes by allowed service units and charges based on CY 2009 claims data as well as those services reviewed by the RUC more than six years ago. The RUC expanded the list to 182 services to include additional codes as part of a family (over 100 of these codes are part of the review of GI endoscopy codes). The CPT® Editorial Panel deleted 25 codes. The RUC submitted recommendations for 157 codes for the 2012-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

CMS High Expenditure Procedural Codes

In the Proposed Rule for 2012, CMS requested that the RUC review a list of 70 high Medicare Physician Payment Schedule expenditure procedural codes representing services furnished by an array of specialties. CMS selected these codes since they have not been reviewed for at least 6 years, and in many cases the last review occurred more than 10 years ago.

The RUC reviewed the 70 services identified and expanded the list to 145 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 20 codes. The RUC submitted 125 recommendations to CMS for the 2013-2019 Medicare Physician Payment Schedules. The RUC completed review of services under the first iteration of this screen.

In the Final Rule for 2016, CMS requested that the RUC review a list of 103 high Medicare Physician Payment Schedule high expenditure services across specialties with Medicare allowed charges of \$10 million or more. CMS identified the top 20 codes by specialty in terms of allowed charges, excluding 010 and 090-day global services, anesthesia and Evaluation and Management services and services reviewed since CY 2010.

The RUC expanded the list of services to 238 services to include additional codes as part of the family. The CPT Editorial Panel deleted 30 codes. The RUC submitted 207 recommendations to CMS for the 2017-2019 Medicare Physician Payment Schedules and will review the remaining service after additional utilization data is available.

Services with Stand-Alone PE Procedure Time

In June 2012, CMS proposed adjustments to services with stand-alone procedure time assumptions used in developing non-facility PE RVUs. These assumptions are not based on physician time assumptions. CMS prioritized CPT® codes that have annual Medicare allowed charges of \$100,000 or more, include direct equipment inputs that amount to \$100 or more, and have PE procedure times greater than five minutes for review. The RUC reviewed 27 services identified through this screen and expanded to 29 services to include additional codes as part of the family. The CPT® Editorial Panel deleted 11 codes. The RUC submitted 18 recommendations for the 2014-2015 Medicare Physician Payment Schedules. The RUC completed review of services under this screen.

Pre-Time Analysis

In January 2014, the RUC reviewed codes that were RUC reviewed prior to April 2008, with pre-time greater than pre-time package 4 *Facility - Difficult Patient/Difficult Procedure* (63 minutes) for services with 2012 Medicare Utilization over 10,000. The screen identified 19 services with more pre-service time than the longest standardized pre-service package and was expanded to 24 to include additional codes as part of the family. The RUC reviewed these services and referred three services to the CPT® Editorial Panel for revision. The CPT Editorial Panel deleted one service and will review three services for CPT 2018. The RUC reviewed 18 services and noted that they were all originally valued by magnitude estimation and therefore readjustments in pre-service time categories did not alter the work values. Additionally, crosswalk references for each service were presented validating the pre-time adjustments. The RUC noted that this screen was useful, however did not reveal any large outliers and therefore the utilization threshold does not need to be lowered to identify more services. The RUC submitted 20 recommendations for the 2016 Medicare Physician Payment Schedule. The RUC completed review of services under this screen.

Post-Operative Visits

010-Day Global Codes

In January 2014, the RUC reviewed all 477, 010-day global codes to determine any outliers. Many 010-day global period services only include one post-operative office visit. The Relativity Assessment Workgroup pared down the list to 19 services with >1.5 office visits and 2012 Medicare utilization > 1,000. The RUC reviewed the 19 services, which was expanded to 21 services for additional codes in the family of services, identified via this screen. The RUC referred two codes to the CPT Editorial Panel for revision. The RUC submitted recommendations for 21 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

090-Day Global Codes

In January 2014, the RUC reviewed all 3,788, 090-day global codes to determine any outliers. Based on 2012 Medicare utilization data, 10 services were identified, that were reported at least 1,000 times per year and included more than six office visits. The RUC expanded the services identified in this screen to 38 to include additional codes as part of the family. The CPT® Editorial Panel deleted 8 services. The RUC submitted recommendations for 30 services for the 2015-2017 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

High Level E/M in Global Period

In October 2015, the RUC reviewed all services with Medicare utilization greater than 10,000 that have a level 4 (99214) or level 5 (99215) office visit included in the global period. There were no codes with volume greater than 10,000 that had a level 5 office visits included. Seven services were identified that have a level 4 office visit included. The RUC expanded the list of services to 11 services to include additional codes as part of the family. The RUC confirmed that the level 4 post-operative visits were appropriate and well-defined for four services. The CPT Editorial Panel deleted one code. The RUC submitted recommendations for 10 services for the 2017-2018 Medicare Physician Payment Schedules. The RUC noted that this screen will be complete after these services are reviewed because the RUC has more rigorously questioned level 4 office visits in the global period in recent years and will continue this process going forward. The RUC has completed review of the services under this screen.

000-Day Global Services Reported with an E/M with Modifier 25

In the NPRM for 2017 CMS identified 83 services with a 000-day global period billed with an E/M 50 percent of the time or more, on the same day of service, same patient, by the same physician, that have not been reviewed in the last five years with Medicare utilization greater than 20,000.

The RUC commented that it appreciated CMS' identification of an objective screen and reasonable query. However, based on further analysis of the codes identified, it appears only 19 services met the criteria for this screen and have not been reviewed to specifically address an E/M performed on the same date. There were 38 codes that did not meet the screen criteria; they were either reviewed in the last 5 years and/or are not typically reported with an E/M. For 26 codes, the summary of recommendation (SOR), RUC rationale or practice expense inputs submitted specifically states that an E/M is typically reported with these services and the RUC accounted for this in its valuation.

The RUC requested that CMS remove 64 services that did not meet the screen criteria or which have already been valued as typically being reported with an E/M service. The RUC requested that CMS condense and finalize the list of services for this screen to the 19 remaining services.

In the Final Rule for 2017, CMS did finalize the list of 000-day global services reported with an E/M to the 19 services that truly met the criteria. The RUC recommended that two additional codes be removed from this screen as the specialty societies discovered that in fact an E/M as typical was considered in the survey process. Additional codes were added as part of the family of codes identified, totaling 22. The CPT Editorial Panel deleted one code and the RUC submitted 21 recommendations for the 2019 Medicare Physician Payment Schedule. The RUC has completed review of the services under this screen.

Negative IWPOT

In October 2017, the RUC identified 22 services with a negative IWPOT and Medicare utilization over 10,000 for all services or over 1,000 for Harvard valued and CMS/Other source codes. The RUC expanded the services identified in this screen to 56 services to include additional codes as part of the family. The CPT Editorial Panel deleted 15 services. The RUC submitted 41 recommendations for the 2019-2020 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Contractor Priced with High Volume

In April 2018, the RUC identified five contractor-priced Category I CPT codes that have 2017 estimated Medicare utilization over 10,000. The RUC expanded the services identified in this screen to seven to include additional codes as part of a family. The RUC will review 4 services for the 2019 and 2020 Medicare Physician Payment Schedule and the remaining three services after two years of additional data is available.

CPT Modifier -51 Exempt List

In April 2018, the RUC identified seven services on the CPT Modifier -51 *Multiple Procedures* exempt list with 2017 estimated Medicare utilization over 10,000. The RUC examined the data provided on the percentage reported alone, physician pre and intra time and determined that this is an appropriate screen. The RUC recommended that four services be removed from the Modifier – 51 exempt list and that three services remain on the list as they are separate and distinct services. The RUC notes that the CPT Editorial Panel will be reexamining this list in February 2019. The RUC has completed review of the services under this screen.

Public Comment Requests

In 2011, CMS announced that due to the ongoing identification of potentially misvalued services by CMS and the RUC, the Agency will no longer conduct a separate Five-Year Review. CMS will now call for public comments on an annual basis as part of the comment process on the Final Rule each year.

Final Rule for 2013

In the Final Rule for the 2013 Medicare Physician Payment Schedule, the public and CMS identified 35 potentially misvalued services, which was expanded to 39 services to include the entire code family. The RUC reviewed these services and recommended that eight services be removed from review as two G-codes lacked specialty society interest and six services are not potentially misvalued since there is no reliable way to determine an incremental difference from open thoracotomy to thoroscopic procedures. The CPT Editorial Panel deleted two services. The RUC submitted recommendations for 29 services for the 2014-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2014

CMS did not receive any publicly nominated potentially misvalued codes for inclusion in the Proposed Rule for 2014. To broaden participation in the process of identifying potentially misvalued codes, CMS sought the input of Medicare contractor medical directors (CMDs). The CMDs have identified over a dozen services which CMS is proposing as potentially misvalued. The RUC reviewed these services and appropriate families, totaling 90 services. The CPT® Editorial Panel deleted 11 services. The RUC submitted recommendations to CMS for 79 services for the 2015-2018 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2015

In the Final Rule for 2015 the public and CMS nominated 26 services as potentially misvalued, which the RUC expanded to 53 services to include additional codes as part of this family. The CPT Editorial Panel deleted 16 services. The RUC submitted 37 recommendations for the 2016-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2016

In the Final Rule for 2016 the public and CMS nominated 25 services as potentially misvalued, which the RUC expanded to 53 services to include an additional code as part of the family. The CPT Editorial Panel deleted eight services. The RUC submitted 45 recommendations for the 2017-2019 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

Final Rule for 2017

In the Final Rule for 2017 there were no public nominations for services in which the RUC was not already addressing.

Final Rule for 2018

In the Final Rule for 2018 the public and CMS nominated six services as potentially misvalued, which the RUC expanded to nine services. The RUC submitted nine recommendations for the 2019-2020 Medicare Physician Payment Schedules. The RUC has completed review of the services under this screen.

NPRM for 2019

In the Proposed Rule for 2019 the public and CMS nominated two services as potentially misvalued. The RUC will review these services for the 2020 Medicare Physician Payment Schedule.

Other Issues

In addition to the above screening criteria, the Relativity Assessment Workgroup performed an exhaustive search of the RUC database for services indicated by the RUC to be re-reviewed at a later date. Three codes were found that had not yet been re-reviewed. The RUC recommended a work RVU decrease for two codes and to maintain the work RVU for another code.

CMS also identified 72 services that required further practice expense review. The RUC submitted practice expense recommendations on 67 services and the CPT® Editorial Panel deleted 5 services. The RUC also reviewed special requests for 19 audiology and speech-language pathology services. The RUC submitted recommendations for 10 services for the 2010 Medicare Physician Payment Schedule and the remaining nine services for the 2011 Medicare Physician Payment Schedule.

CMS Requests and RUC Relativity Assessment Workgroup Code Status

Total Number of Codes Identified*	2,475
<i>Codes Completed</i>	2,354
Work and PE Maintained	664
Work Increased	245
Work Decreased	838
Direct Practice Expense Revised (beyond work changes)	172

97165 Occupational therapy evaluation, low complexity, requiring these components: An occupational profile and medical and therapy history, which includes a brief history including review of medical and/or therapy records relating to the presenting problem; An assessment(s) that identifies 1-3 performance deficits (ie, relating to physical, cognitive, or psychosocial skills) that result in activity limitations and/or participation restrictions; and Clinical decision making of low complexity, which includes an analysis of the occupational profile, analysis of data from problem-focused assessment(s), and consideration of a limited number of treatment options. Patient presents with no comorbidities that affect occupational performance. Modification of tasks or assistance (eg, physical or verbal) with assessment(s) is not necessary to enable completion of evaluation component. Typically, 30 minutes are spent face-to-face with the patient and/or family.

RUC Referrals to CPT Editorial Panel - Outstanding Issues

32405	Biopsy, lung or mediastinum, percutaneous needle	Screen	RUC Meeting	Specialty Society:	CPT Meeting
		Codes Reported Together 75%or More-Part4	January 2018	ACR, SIR	February 2019

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of \$5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

64415	Injection, anesthetic agent; brachial plexus, single	Screen	RUC Meeting	Specialty Society:	CPT Meeting
		CMS Fastest Growing	October 2018	AAPM, ASA	May 2019

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

64416	Injection, anesthetic agent; brachial plexus, continuous infusion by catheter (including catheter placement)	Screen	RUC Meeting	Specialty Society:	CPT Meeting
		Site of Service Anomaly / High Volume Growth2	October 2018	ASA	May 2019

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

64448	Injection, anesthetic agent; femoral nerve, continuous infusion by catheter (including catheter placement)	<u>Screen</u> Site of Service Anomaly / High Volume Growth1 / CMS Fastest Growing / High Volume Growth2	<u>RUC Meeting</u> October 2018	<u>Specialty Society:</u> ASA	<u>CPT Meeting</u> May 2019
-------	---	--	--	--	--

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

74425	Urography, antegrade (pyelostogram, nephrostogram, loopogram), radiological supervision and interpretation	<u>Screen</u> Codes Reported Together 75% or More-Part2	<u>RUC Meeting</u> October 2018	<u>Specialty Society:</u> ACR, AUA, SIR	<u>CPT Meeting</u> May 2019
-------	---	--	--	--	--

Background: CPT code 74425 was bundled with 50398 at the October 2014 CPT/January 2015 meetings for CPT 2016. . While this code is not being deleted, it was unclear what the typical vignette will be for this procedure once the majority of its utilization has migrated to the new codes. The RUC agreed with the specialty societies that two years of Medicare claims data should be reviewed prior to re-survey. The RUC recommends a delay to the survey of CPT code 74425 until at least two years of Medicare claims data is available (October 2018). In October 2018, the RUC referred CPT code 74425 to CPT for editorial changes to the descriptor and vignette to clarify between pyelostogram, nephrostogram, and loopogram.

RUC Referrals to CPT Editorial Panel - Outstanding Issues

76942	Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation	<u>Screen</u> CMS-Other - Utilization over 500,000 / CMS Request - Final Rule for 2014 / High Volume Growth3	<u>RUC Meeting</u> April 2014	<u>Specialty Society:</u> AAACE, AAOS, AAPMR, ACR, ACRrh, APMA, ASA, ASBS, ASIPP, AUA, SIR, TES	<u>CPT Meeting</u> May 2019
-------	--	---	--	--	--

Background: During the October 2018 RUC presentation of the Somatic Nerve Injection family of services, the specialty societies stated that codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with code 76942 Ultrasonic guidance for needle placement (eg, biopsy, aspiration, injection, localization device), imaging supervision and interpretation more than 50 percent of the time. Specifically, 76 percent with 64415, 85 percent with 64416, 68 percent with 64417, 77 percent with 64446, 77 percent with 66447, and 79 percent with 64448. The societies indicated they would submit a code change application to bundle 76942 into codes 64415, 64416, 64417, 64446, 64447, and 64448 for the 2021 cycle. This overlap was accounted for in the above RUC recommendations for these services. The RUC refers CPT codes 64415, 64416, 64417, 64446, 64447 and 64448 to be bundled with ultrasound guidance, CPT code 76942 to the CPT Editorial Panel for CPT 2021.

77012	Computed tomography guidance for needle placement (eg, biopsy, aspiration, injection, localization device), radiological supervision and interpretation	<u>Screen</u> CMS-Other - Utilization over 100,000 / Codes Reported Together 75%or More- Part4	<u>RUC Meeting</u> January 2018	<u>Specialty Society:</u> ACR, SIR	<u>CPT Meeting</u> February 2019
-------	--	---	--	---	---

Background: In October 2017, maintaining the consistency with previous iterations, AMA staff used the 2016 estimated Medicare 5% sample claims data to determine when a code pair is reported on the same day, same patient and same NPI number at or more than 75% of the time. Only groups that totaled allowed charges of \$5 million or more were included. As with previous iterations, any code pairs in which one of the codes was either below 1,000 in Medicare claims data and/or contained at least one ZZZ global service were removed. Based on these criteria 32405/77012 were identified. In January 2018, the RUC recommended to refer to CPT to bundle with 32405 with 77012 for CPT 2020.

77014	Computed tomography guidance for placement of radiation therapy fields	<u>Screen</u> CMS Request - Practice Expense Review / CMS-Other - Utilization over 500,000 / CMS High Expenditure Procedural Codes1 / High Volume Growth3	<u>RUC Meeting</u> January 2016	<u>Specialty Society:</u> ASTRO, ACR	<u>CPT Meeting</u>
-------	---	---	--	---	------------------------------------

Background: Revise based on CMS input regarding the radiation oncology services. CMS maintains G codes at this time. Specialty society will revise once CMS makes final determinations on the radiation oncology CPT codes. TBD.

92585	Auditory evoked potentials for evoked response audiometry and/or testing of the central nervous system; comprehensive	<u>Screen</u> CMS-Other - Utilization over 30,000	<u>RUC Meeting</u> January 2018	<u>Specialty Society:</u> AAA, AANEM, ACNS, ASHA	<u>CPT Meeting</u> February 2019
-------	--	--	--	---	---

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to refer to Feb 2019 CPT meeting to clarify the code descriptors to better define limited/comprehensive and develop a new related procedure, Vestibular Evoked Myogenic Potentials (VEMP), has recently been approved by the FDA. A VEMP specific code should be developed and will replace some use of CPT code 92585.

RUC Referrals to CPT Editorial Panel - Outstanding Issues

93299	Interrogation device evaluation(s), (remote) up to 30 days; implantable cardiovascular monitor system or implantable loop recorder system, remote data acquisition(s), receipt of transmissions and technician review, technical support and distribution of results	Screen CMS High Expenditure Procedural Codes2 / Contractor Priced High Volume	RUC Meeting October 2018	Specialty Society: ACC, HRS	CPT Meeting May 2019
-------	---	---	---	--	---

Background: In October 2018, the RUC recommended new practice expense inputs for practice expense only code. The specialty society indicated that they intend to submit a coding proposal to the CPT Editorial Panel to delete CPT code 93299, as it will no longer be necessary to have a separate code for practice expense once CPT codes 93297 and 93298 are allocated direct practice expense inputs in 2020. The RUC recommends that CPT code 93299 be referred to CPT for deletion.

G0396	Alcohol and/or substance (other than tobacco) abuse structured assessment (e.g., audit, dast), and brief intervention 15 to 30 minutes	Screen CMS-Other - Utilization over 30,000	RUC Meeting January 2018	Specialty Society: AAFP, ASA, ASAM	CPT Meeting
-------	---	---	---	---	-----------------------------

Background: In October 2017, the RAW requested that AMA staff compile a list of CMS/Other codes with Medicare utilization of 30,000 or more. This list resulted in 34 services and the RAW requested action plans to be reviewed at the January 2018 meeting. In January 2018, the RUC recommended to maintain the physician work and refer to CPT to editorially remove "screening" from 99408 and 99409 to "assessment" to mirror G0396. At the February 2018 CPT meeting, the Panel postponed until time uncertain this request to revise codes 99408-99409 to identify assessment of alcohol and/or substance abuse. As a rationale for postponement, the Panel said that the service described in this application did not meet the General Criteria for Category I because the proposed service is not unique or well defined, and does not describe a service that is clearly identified and distinguished from existing services already described in CPT by other codes. The Panel's additional rationale for postponement of this item was to allow the relevant specialty societies an opportunity to submit a new code change application to address the differences between assessment and screening services.

RUC Recommendations to Develop CPT Assistant Articles - Outstanding Issues

958X3	<u>Screen:</u> High Volume Growth2 / CMS Request - Final Rule for 2016	<u>RUC Meeting:</u> October 2017	<u>RUC Rec:</u> 0.95 and Refer to CPT Assistant	<u>Specialty Society:</u> AAN, AANS/CNS, ACNS	<u>CPT Asst Status:</u> Specialty societies are drafting the article for the February 2019 publication.
-------	--	-------------------------------------	---	---	--

Background: In June 2017, the CPT Editorial Panel revised codes 95970, 95971, and 95972, deleted codes 95974, 95975, 95978, and 95979 and created four new codes for analysis and programming of implanted cranial nerve neurostimulator pulse generator, analysis, and programming of brain neurostimulator pulse generator systems and analysis of stored neurophysiology recording data. Introductory guidelines were also revised extensively. In October 2017, the RUC noted code 95X83 is defined as simple programming of cranial nerve neurostimulator (adjustment of 1-3 parameters) versus deleted code 95974 which was time based and defined as the first hour of programming and 95X84 is defined as complex programming of cranial nerve neurostimulator (adjustment of more than 3 parameters) versus deleted code 95975, which was a time-based add-on code defined as each additional 30 minutes of programming. The RUC recommends that the specialty societies develop a CPT Assistant article to direct providers on when to report simple versus complex cranial nerve neurostimulator services. The specialty societies indicated they will submit an article to be published in the January or February 2018 CPT Assistant.

958X4	<u>Screen:</u> High Volume Growth2 / CMS Request - Final Rule for 2016	<u>RUC Meeting:</u> October 2017	<u>RUC Rec:</u> 1.19 and Refer to CPT Assistant	<u>Specialty Society:</u> AAN, AANS/CNS, ACNS	<u>CPT Asst Status:</u> Specialty societies are drafting the article for the February 2019 publication.
-------	--	-------------------------------------	---	---	--
