jn-learning/pages/coronavirus-alert](https://edhub.ama-assn.org/jn-learning/pages/coronavirus-alert)

# 1

**Represents physicians**  
with a unified voice

# 3

**Removes obstacles**  
that interfere with  
patient care

**Leads the charge**  
on confronting today's  
public health crises

# 2

**Drives the future of**  
innovation in health care

# 4

**Physicians' powerful ally in patient care**

# Making health care technology an asset, NOT a burden

Promoting innovation to tackle the biggest problems in health care by...

- Bringing the physician perspective to the front-end of health care technology development, and
- Building a powerful network to drive the future of health technology

## THE GOAL

To return physicians' time and attention to their patients, the work of paramount value to physicians and to the health care system.

# Physician burnout must be addressed

## Changes in Burnout and Satisfaction With Work-Life Integration in Physicians and the General US Working Population Between 2011 and 2017

Tait D. Shanafelt, MD<sup>a,\*</sup>  Colin P. West, MD, PhD<sup>c</sup>; Christine Sinsky, MD<sup>e</sup>; Mickey Trockel, MD, PhD<sup>b</sup>; Michael Tutty, PhD<sup>e</sup>; Daniel V. Satele, BS<sup>d</sup>; Lindsey E. Carlasare, MBA<sup>f</sup>; Lotte N. Dyrbye, MD, MHPE<sup>c</sup>

## Strategy on Reducing Regulatory and Administrative Burden Relating to the Use of Health IT and EHRs

### Allocation of Physician Time in Ambulatory Practice: A Time and Motion Study in 4 Specialties

Christine Sinsky, MD; Lacey Colligan, MD; Ling Li, PhD; Mirela Prgomet, PhD; Sam Reynolds, MBA; Lindsey Goeders, MBA; Johanna Westbrook, PhD; Michael Tutty, PhD; George Blike, MD

**Results:** During the office day, physicians spent 27.0% of their total time on direct clinical face time with patients and 49.2% of their time on EHR and desk work. While in the examination room with patients, physicians spent 52.9% of the time on direct clinical face time and 37.0% on EHR and desk work. The 21 physicians who completed after-hours diaries reported 1 to 2 hours of after-hours work each night, devoted mostly to EHR tasks.

### How physician burnout is costing your organization

A growing body of research reveals that spending a moderate amount on programs to reduce physician burnout appears to be an investment that is worth it in the long run.

# The opportunity – Begin planning now!

- CMS **accepted, in full**, the revised E/M revisions for CY 2021
- In a survey, done by the AMA, of major commercial payers **100%** said they would be adopting new E/M guidelines
- Health Systems—Begin planning **now** with your EHR vendor to remove the old documentation interfaces and implement new ones
- EHR Vendors—Prioritize **implementing** these revisions so that physicians can maximize the burden relief

Independent study finds time savings of **nearly 45 minutes per day** for busy primary care practices

Active planning is critical to realize the massive potential to **reduce physician burden** and **improve patient care**.

# The AMA approach to CPT® E/M revisions

**Lase Ajayi, MD**  
Member since 2013

# Why did the AMA tackle CPT® E/M Office Visits?

---

CPT E/M office visits last updated  
nearly **30 years ago**

---

Rise of EHR use in physician  
offices has led to **“up-coding”**

CMS Proposed Rule for 2019:  
**Big changes** to E/M office visit  
documentation/payment

- Administrative relief (e.g. no longer need to re-document chief complaint/history)
- Simplify code selection (e.g. Choose MDM or Time)
- Payment collapse (two payment levels for each of 5 E/M levels)
- Addition of add-on code for “higher complexity” specialties

---

# AMA: The right convener

Dedication to removing obstacles to good patient care

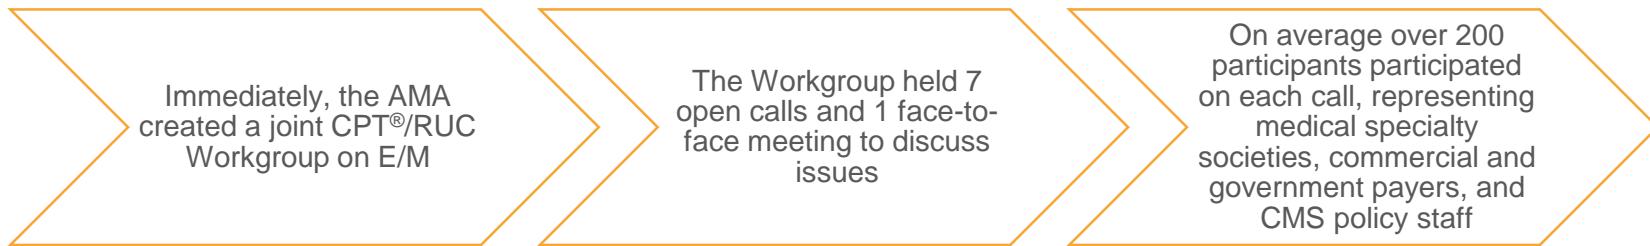

Connection with public and private payers

**The CPT® Editorial Panel** – Robust, data-driven process  
with hundreds of clinical experts from every medical  
specialty

# AMA approach: Stakeholder collaboration

The CPT®/RUC Workgroup on E/M is committed to changing the current coding and documentation requirements for office E/M visits to **simplify** the work of the health care provider and **improve the health** of the patient.

## GUIDING PRINCIPLES

1. To decrease administrative burden of documentation and coding
2. To decrease the need for audits
3. To decrease unnecessary documentation in the medical record that is not needed for patient care
4. To ensure that payment for E/M is resource based and has no direct goal for payment redistribution between specialties.

A photograph of the U.S. Capitol dome at night, with the American flag flying prominently in the foreground on the left side of the image.

# Revisions to the CPT® E/M Office Visits

# CAUTION

ONLY E/M  
OFFICE VISITS

ACTIVE 2021

# What characterizes E/M documentation today?

Note bloat – copying and pasting,  
leading to **meaningless data  
accumulation**

- Mandatory reporting of history  
and physical exam

---

Extensive, confusing  
documentation, leading to  
**increased time** outside clinic hours  
(going unpaid)

## THE RESULT

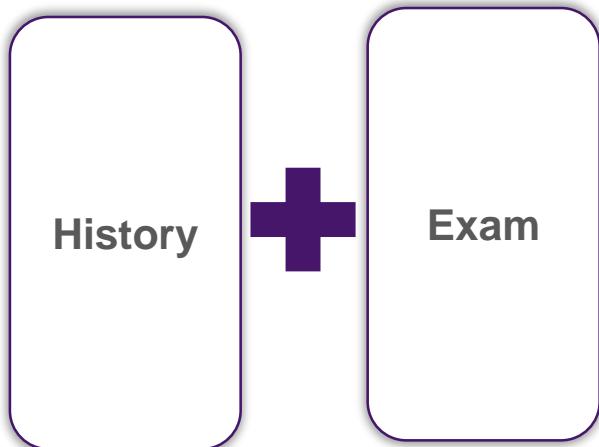

- Record is clinically outdated
- Irrelevant patient information
- Consequences on “downstream”  
physicians

# Coding E/M services – January 1, 2021

# Summary of major E/M revisions for 2021: Office or Other Outpatient Services

- Extensive E/M guideline additions, revisions, and restructuring
- Deletion of code 99201 and revision of codes 99202-99215
  - Codes 99201 and 99202 currently both require straightforward MDM
- Addition of a shorter 15-minute prolonged service code (99XXX)
- Components for code selection:
  - Medically appropriate history and/or examination
  - Choose your reporting pathway:
    - MDM; or
    - Total time on the date of the encounter

# Summary of major E/M revisions for 2021: Office or Other Outpatient Services

- E/M level of service for office or other outpatient services can be based on:
  - **MDM**
    - Extensive clarifications provided in the guidelines to define the elements of MDM
  - **Time:** *Total* time spent with the patient on the date of the encounter
    - Including non-face-to-face services
    - Clear time ranges for each code
- Addition of a shorter 15-minute prolonged service code (99XXX)
  - To be reported only when the visit is based on time and after the total time of the highest-level service (ie, 99205 or 99215) has been exceeded.

# Clear focus on patient care and burden reduction

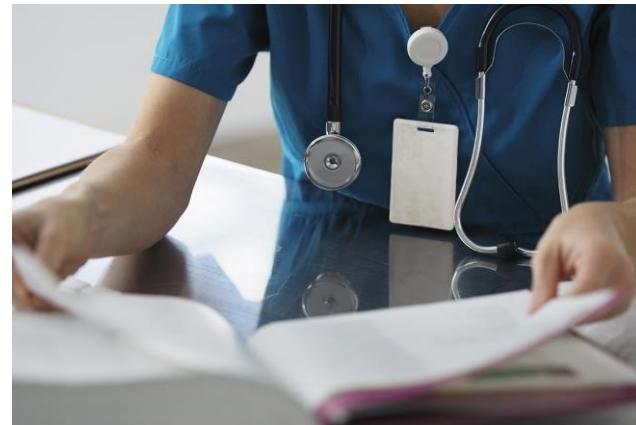

- ✓ Removed scoring (e.g. checking boxes) for History and Examination
- ✓ Code the way physicians/other qualified health care professional (QHP) think
- ✓ Promote higher-level activities of MDM
- ✓ More detail in CPT® codes to promote payer consistency if audits are performed and to promote coding consistency

# Clear focus on patient care and burden reduction

Independent study of administrative burden reduction initiatives by CMS and revisions to CPT E/M office visits showed:

Over 2 minutes saved per visit

For a busy primary care physician –  
Potential savings of nearly 45 minutes

# AMA education

## CPT® E/M MICROSITE

- Education modules
- Full code descriptors/guidelines

## LIVE EDUCATION

- 2021 E/M primer for health plans
- CPT/RBRVS Annual Symposium

## OTHER EDUCATIONAL APPROACHES

- Direct payer reach out
- Direct IT vendor education/solutions
- Official CPT education

[ama-assn.org/cpt-office-visits](http://ama-assn.org/cpt-office-visits)

# New E/M tools

**Saby Karuppiah, MD**  
Member since 2008

# E/M coding burden reduction

- Support the **education** and **simple use** of new E/M codes via a set of software solutions
  - Reflect the rule simplification as reduced coding burden
- Target **Providers**, **Coders**, **Billers** and **HIT Vendors**
- Enable provider and practice adoption via **mobile web** and other E/M delivery tools (e.g., EHR-embedded apps)
- Enable the HIT industry adoption of via **plug and play technology** solutions for clinical and billing products
- Offer technology solutions to the market ahead of 2021 to **reduce friction**

# E/M digital tools

---

**Ongoing commitment** by the AMA to update and expand digital solutions as E/M codes expand and are updated

---

AMA solutions to enable **accurate** E/M coding that is **responsive** to rule changes

## Three flavors of **integration**

- Stand alone mobile web app
- Leverage interoperability/privacy standards to capture appropriate clinical data and enable accurate coding – minimizing manual tasks
- Integrated to EHR/Coding workflow using SMART on FHIR
- Integrated to EHR/Coding workflow using native APIs

---

**Note:** If E/M service is performed at the time of another encounter, a modifier may be necessary. Please consult the current edition of CPT® Professional, Appendix A, for proper modifier use.

**Disclaimer:** The information in the Licensed Application is intended to assist health care providers and/or their staff in the identification of Current Procedural Terminology (CPT®) code(s) that may be appropriate to report Evaluation and Management services furnished in the office or other outpatient setting based on user inputs and published AMA coding guidelines. This Licensed Application includes a truncated version of the "full" instructions that appear in the most current CPT publication; providers and/or their staff should be certain to review these full instructions before using and/or if they have any questions while using this tool. This Licensed Application is intended for reference use only, and is not intended to serve as reimbursement advice, a guarantee of coverage, or a guarantee of payment at any particular rate. Third-party payment for medical services is affected by numerous factors. The decision of which code to report must be made by health care providers and/or their staff considering the clinical facts, circumstances, and applicable coding instructions (e.g., the CPT Guidelines contained in this Licensed Application and in the most current CPT publication). Please refer to payer policies and other published instructions for additional information.

The Center for Medicare and Medicaid Services is responsible for the Medicare content contained in this application and no endorsement by the AMA is intended or should be implied. Users are encouraged to refer to the current official Medicare program provisions contained in relevant laws, regulations, and rulings.

**Number and Complexity of Problems Addressed****Moderate****Minimal** 1 self-limited or minor problem**Low** 2 or more self-limited or minor problems 1 stable chronic illness Stable, chronic illness:

A problem with an expected duration of at least a year or until the death of the patient. For the purpose of defining chronicity, conditions are treated as chronic whether or not stage or severity changes (eg, uncontrolled diabetes and controlled diabetes are a single chronic condition). 'Stable' for the purposes of categorizing medical decision making is defined by the specific treatment goals for an individual patient. A patient that is not at their treatment goal is not stable, even if the condition has not changed and there is no short-term threat to life or function. For example, a patient with persistently poorly controlled blood pressure for whom better control is a goal is not stable, even if the pressures are not changing and the patient is asymptomatic. The risk of morbidity without treatment is significant. Examples may include well-controlled hypertension, non-insulin dependent diabetes, cataract, or benign prostatic hyperplasia.

**Moderate** 1 or more chronic illnesses with exacerbation, progression, or side effects of treatment 2 or more stable chronic illnesses

uncertain prognosis
