

Approved stems by the USAN Council at the December 3, 2021 Meeting

New stems

Stem	Definition	Examples
-binop	nociceptin opion receptor (NOP) agonists	<i>sunobinop</i>
-camten	allosteric cardiac myosin modulators	<i>mavacamten</i>
-feport	ferrroportin receptor modulators	<i>vamifeport</i>
-fosine	cytostatic phospholipid derivatives	<i>iopofosine</i>
-lixron	liver X nuclear hormone (LXR) receptor agonists	<i>abequolixron</i>
-rebant	retinol binding protein 4 (RBP4) antagonists	<i>tinlarebant</i>
-rogant	retinoid-related orphan receptor- γ t (ROR γ t) antagonists/inverse agonists	<i>cedirogant</i>
-sirvat	silent mating type information regulator (SIRT1) receptor agonists	<i>dalosirvat</i>
-stat -clustat	Cluster of differentiation (CD) inhibitors (alternative: CD73 inhibitors)	<i>quemliclustat</i>
-sumstat	small ubiquitin-like modifier inhibitor	<i>subasumstat</i>
-vir -trelvir	inhibitor of COVID 3CL protease	<i>nirmatrelvir</i>

Revised stems (for harmonization with INN)

Old stem	New stem	Definition	Examples
None			

Revised Definitions for Discussion

Stem	Old Definition	New Definition
None		

New Modifiers for Radicals and Anions

Revised stems (for harmonization with INN)

Modifier	Structure	Chemical Name
none
