

# CPT<sup>®</sup> Category I New SARS-CoV-2 Vaccine Codes Long Descriptors

## Most recent changes to the CPT<sup>®</sup> Category I New Vaccine Codes Long Descriptor document

- Addition of February 27, 2021 effective date for codes 0031A and 91303. Guidelines and parenthetical notes are only effective for codes that have received FDA Emergency Use Authorization (EUA) approval.
- Removal of FDA approval pending symbol (✓) from code 91303.
- Addition of revised Evaluation and Management guideline that include vaccine codes 0001A, 0002A, 0011A, 0012A, 0021A, 0022A, 0031A, 91300, 91301, 91302, 91303.
- Update vaccine code range from 90476-90749 to 90476-90756 throughout the code set.

It is important to note that further CPT Editorial Panel or Executive Committee actions may affect these codes and/or descriptors. For this reason, code numbers and/or descriptor language in the CPT code set may differ at the time of publication. In addition, further Panel actions may result in gaps in code number sequencing.

The following codes were accepted by the CPT Editorial Panel. Codes 0001A, 0002A, and 91300 are effective December 11, 2020. Codes 0011A, 0012A, and 91301 are effective December 18, 2020. Codes 0031A and 91303 are effective February 27, 2021. Codes 0021A, 0022A, and 91302 will be effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration. \*Note codes 0001A, 0002A, 0011A, 0012A, 0021A, 0022A, and 0031A will follow code 90474 and resequenced codes 91300, 91301, 91302, and 91303 will precede code 90476.

	<p><b>Medicine Immunization Administration for Vaccines/Toxoids</b></p> <p>► Report vaccine immunization administration codes (90460, 90461, 90471-90474, <u>0001A, 0002A, 0011A, 0012A, 0021A, 0022A, 0031A</u>) in addition to the vaccine and toxoid code(s) (<del>90476-90749</del><u>90756, 91300, 91301, 91302, 91303</u>).</p> <p>Report codes 90460 and 90461 only when the physician or qualified health care professional provides face-to-face counseling of the patient/family during the administration of a vaccine <u>other than when performed for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) (coronavirus disease [COVID-19]) vaccines</u>. For immunization administration of any vaccine, <u>other than SARS-CoV-2 (coronavirus disease [COVID-19]) vaccines</u>, that is not accompanied by face-to-face physician or qualified health care professional counseling to the patient/family/<u>guardian</u> or for administration of vaccines to patients over 18 years of age, report 90471-90474. (See also <b>Instructions for Use of the CPT Codebook</b> for definition of reporting qualifications.) ◀</p>	<p><b>New and Revised Guidelines Released to AMA Website</b></p> <p>November 10, 2020 December 17, 2020 January 19, 2021 <b>March 1, 2021</b></p>	<p><b>New and Revised Guidelines Effective</b></p> <p>0001A, 0002A, 91300: December 11, 2020  0011A, 0012A, 91301: December 18, 2020  <b>0031A, 91303: February 27, 2021</b></p> <p>0021A, 0022A, 91302: Effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration</p>	<p><b>New and Revised Guidelines Publication</b></p> <p>CPT® 2022</p>

## CPT® Category I New SARS-CoV-2 Vaccine Codes Long Descriptors

	<p>► Report 0001A, 0002A, 0011A, 0012A, 0021A, 0022A, <u>0031A</u> for immunization administration of SARS-CoV-2 (coronavirus disease [COVID-19]) vaccines only. Each administration code is specific to each individual vaccine product (eg, 91300, 91301, 91302, <u>91303</u>), the dosage schedule (eg, first dose, second dose), and counseling, when performed. The appropriate administration code is chosen based on the type of vaccine and the specific dose number the patient receives in the schedule. For example, 0012A is reported for the second dose of vaccine 91301. Do not report 90460-90474 for the administration of SARS-CoV-2 (coronavirus disease [COVID-19]) vaccines. Codes related to SARS-CoV-2 (coronavirus disease [COVID-19]) vaccine administration are listed in Appendix Q, with their associated vaccine code descriptors, vaccine administration codes, vaccine manufacturer, vaccine name(s), National Drug Code (NDC) Labeler Product ID, and interval between doses. In order to report these codes, the vaccine must fulfill the code descriptor and must be the vaccine represented by the manufacturer and vaccine name listed in Appendix Q. ◀</p> <p>If a significant separately identifiable Evaluation and Management service (eg, new or established patient office or other outpatient services [99202-99215], office or other outpatient consultations [99241-99245], emergency department services [99281-99285], preventive medicine services [99381-99429]) is performed, the appropriate E/M service code should be reported in addition to the vaccine and toxoid administration codes.</p> <p>A component refers to all antigens in a vaccine that prevent disease(s) caused by one organism (90460 and 90461). Multi-valent antigens or multiple serotypes of antigens against a single organism are considered a single component of vaccines. Combination vaccines are those vaccines that contain multiple vaccine components. Conjugates or adjuvants contained in vaccines are not considered to be component parts of the vaccine as defined above.</p> <p style="padding-left: 40px;">(For allergy testing, see 95004 et seq)</p> <p style="padding-left: 40px;">(For skin testing of bacterial, viral, fungal extracts, see 86485-86580)</p> <p style="padding-left: 40px;">(For therapeutic or diagnostic injections, see 96372-96379)</p>	<p><b>New and Revised Guidelines Released to AMA Website</b></p> <p>November 10, 2020</p> <p>December 17, 2020</p> <p>January 19, 2021</p>	<p><b>New and Revised Guidelines Effective</b></p> <p>0001A, 0002A, 91300: December 11, 2020</p> <p>0011A, 0012A, 91301: December 18, 2020</p> <p><u>0031A, 91303:</u> <u>February 27, 2021</u></p> <p>0021A, 0022A, 91302: Effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration</p>	<p><b>New and Revised Guidelines Publication</b></p> <p>CPT® 2022</p>
90460	<p>Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered</p>			

## CPT<sup>®</sup> Category I New SARS-CoV-2 Vaccine Codes Long Descriptors

<p>✚90461</p>	<p>each additional vaccine or toxoid component administered (List separately in addition to code for primary procedure)</p> <p>(Use 90460 for each vaccine administered. For vaccines with multiple components [combination vaccines], report 90460 in conjunction with 90461 for each additional component in a given vaccine)</p> <p>► (Do not report 90460, 90461 in conjunction with 91300, 91301, 91302, <u>91303</u> unless both a severe acute respiratory syndrome coronavirus 2 [SARS-CoV-2] [coronavirus disease {COVID-19}] vaccine/toxoid product and at least one vaccine/toxoid product from 90476-<del>90749</del><u>90756</u> are administered at the same encounter) ◀</p>	<p><b>New Parenthetical Note Released to AMA Website</b></p> <p>November 10, 2020</p> <p><b>Revised Parenthetical Note Released to AMA Website</b></p> <p>December 17, 2020</p> <p>January 19, 2021</p> <p><u>March 1, 2021</u></p>	<p><b>New and Revised Parenthetical Note Effective</b></p> <p>91300: December 11, 2020</p> <p>91301: December 18, 2020</p> <p><u>91303: February 27, 2021</u></p> <p>91302: Effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration</p>	<p><b>New and Revised Parenthetical Note Publication</b></p> <p>CPT<sup>®</sup> 2022</p>

	<p><b>Vaccines, Toxoids</b></p> <p>To assist users to report the most recent new or revised vaccine product codes, the American Medical Association (AMA) currently uses the CPT website, which features updates of CPT Editorial Panel actions regarding these products. Once approved by the CPT Editorial Panel, these codes will be made available for release on a semiannual (twice a year: July 1 and January 1) basis. As part of the electronic distribution, there is a six-month implementation period from the initial release date (ie, codes released on January 1 are eligible for use on July 1 and codes released on July 1 are eligible for use January 1).</p> <p>The CPT Editorial Panel, in recognition of the public health interest in vaccine products, has chosen to publish new vaccine product codes prior to approval by the US Food and Drug Administration (FDA). These codes are indicated with the <b>✓</b> symbol and will be tracked by the AMA to monitor FDA approval status. Once the FDA status changes to approval, the <b>✓</b> symbol will be removed. CPT users should refer to the AMA CPT website (<a href="http://www.ama-assn.org/go/cpt-vaccine">www.ama-assn.org/go/cpt-vaccine</a>) for the most up-to-date information on codes with the <b>✓</b> symbol.</p>			

## CPT<sup>®</sup> Category I New SARS-CoV-2 Vaccine Codes Long Descriptors

<p>► Codes 90476-<del>9074990756</del>, 91300, 91301, 91302, 91303 identify the vaccine product only. To report the administration of a vaccine/toxoid other than SARS-CoV-2 (coronavirus disease [COVID-19]), the vaccine/toxoid product codes (<del>90476-9074990756</del>) must be used in addition to an immunization administration code(s) (90460, 90461, 90471, 90472, 90473, 90474). To report the administration of a SARS-CoV-2 (coronavirus disease [COVID-19]) vaccine, the vaccine/toxoid product codes (91300, 91301, 91302, 91303) should be reported with the corresponding immunization administration code (0001A, 0002A, 0011A, 0012A, 0021A, 0022A, 0031A). All SARS-CoV-2 (coronavirus disease [COVID-19]) vaccine codes in this section are listed in Appendix Q with their associated vaccine code descriptors, vaccine administration codes, vaccine manufacturer, vaccine name(s), NDC Labeler Product ID, and interval between doses. In order to report these codes, the vaccine must fulfill the code descriptor and must be the vaccine represented by the manufacturer and vaccine name listed in Appendix Q. ◀</p> <p>► Do not report 90476-<del>9074990756</del> in conjunction with the SARS-CoV-2 (coronavirus disease [COVID-19]) immunization administration codes 0001A, 0002A, 0011A, 0012A, 0021A, 0022A, <u>0031A</u> unless both a SARS-CoV-2 (coronavirus disease [COVID-19]) vaccine/toxoid product and at least one vaccine/toxoid product from 90476-<del>9074990756</del> are administered at the same encounter. ◀</p> <p>► Modifier 51 should not be reported with vaccine/toxoid codes 90476-<del>9074990756</del>, 91300, 91301, 91302, 91303 when reported in conjunction with administration codes 90460, 90461, 90471, 90472, 90473, 90474, <u>0001A, 0002A, 0011A, 0012A, 0021A, 0022A, 0031A</u>. ◀</p> <p>If a significantly separately identifiable Evaluation and Management (E/M) service (eg, office or other outpatient services, preventive medicine services) is performed, the appropriate E/M service code should be reported in addition to the vaccine and toxoid administration codes.</p> <p>To meet the reporting requirements of immunization registries, vaccine distribution programs, and reporting systems (eg, Vaccine Adverse Event Reporting System) the exact vaccine product administered needs to be reported. Multiple codes for a particular vaccine are provided in the CPT codebook when the schedule (number of doses or timing) differs for two or more products of the same vaccine type (eg, hepatitis A, Hib) or the vaccine product is available in more than one chemical formulation, dosage, or route of administration.</p>	<p><b>New and Revised Guidelines Released to AMA Website</b></p> <p>November 10, 2020</p> <p>December 17, 2020</p> <p>January 19, 2021</p> <p style="background-color: #cccccc;">March 1, 2021</p>	<p><b>New and Revised Guidelines Effective</b></p> <p>0001A, 0002A, 91300: December 11, 2020</p> <p>0011A, 0012A, 91301: December 18, 2020</p> <p style="background-color: #cccccc;">0031A, 91303: February 27, 2021</p> <p>0021A, 0022A, 91302: Effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration</p>	<p><b>New and Revised Guidelines Publication</b></p> <p>CPT<sup>®</sup> 2022</p>

## CPT<sup>®</sup> Category I New SARS-CoV-2 Vaccine Codes Long Descriptors

	<p>The “when administered to” age descriptions included in CPT vaccine codes are not intended to identify a product’s licensed age indication. The term “preservative free” includes use for vaccines that contain no preservative and vaccines that contain trace amounts of preservative agents that are not present in a sufficient concentration for the purpose of preserving the final vaccine formulation. The absence of a designation regarding a preservative does not necessarily indicate the presence or absence of preservative in the vaccine. Refer to the product’s prescribing information (PI) for the licensed age indication before administering vaccine to a patient.</p> <p>Separate codes are available for combination vaccines (eg, Hib-HepB, DTap-IPV/Hib). It is inappropriate to code each component of a combination vaccine separately. If a specific vaccine code is not available, the unlisted procedure code should be reported, until a new code becomes available.</p> <p>►The vaccine/toxoid abbreviations listed in codes 90476-<del>90748</del>90756, 91300, 91301, 91302, 91303 reflect the most recent US vaccine abbreviations references used in the Advisory Committee on Immunization Practices (ACIP) recommendations at the time of CPT code set publication. Interim updates to vaccine code descriptors will be made following abbreviation approval by the ACIP on a timely basis via the AMA CPT website (<a href="http://www.ama-assn.org/go/cpt-vaccine">www.ama-assn.org/go/cpt-vaccine</a>). The accuracy of the ACIP vaccine abbreviation designations in the CPT code set does not affect the validity of the vaccine code and its reporting function. ◀</p> <p>(For immune globulins, see 90281-90399. For administration of immune globulins, see 96365-96375)</p>	<p><b>New and Revised Guidelines Released to AMA Website</b></p> <p>November 10, 2020</p> <p>December 17, 2020</p> <p>January 19, 2021</p> <p><b>March 1, 2021</b></p>	<p><b>New and Revised Guidelines Effective</b></p> <p>91300: December 11, 2020</p> <p>91301: December 18, 2020</p> <p><b>91303: February 27, 2021</b></p> <p>91302: Effective upon receiving Emergency Use Authorization or approval from the Food and Drug Administration</p>	<p><b>New and Revised Guidelines Publication</b></p> <p>CPT<sup>®</sup> 2022</p>
