Your reference committee recommends the following consent calendar for acceptance:

RECOMMENDED FOR ADOPTION

1. Board of Trustees Report 15 – Removing the Sex Designation from the Public Portion of the Birth Certificate
3. Resolution 417 – Amendment to Food Environments and Challenges Accessing Healthy Food, H-150.925

RECOMMENDED FOR ADOPTION AS AMENDED

4. Board of Trustees Report 10 – Protester Protections
5. Board of Trustees Report 16 – Follow-up on Abnormal Medical Test Findings
6. Council on Science and Public Health Report 3 – Addressing Increases in Youth Suicide
8. Resolution 407 – Impact of SARS-CoV-2 Pandemic on Post-Acute Care Services and Long-Term Care and Residential Facilities
9. Resolution 411 – Ongoing Use of Masks by and Among High-Risk Individuals to Reduce the Risk of Spread of Respiratory Pathogens
10. Resolution 414 – Call for Improved Personal Protective Equipment Design and Fitting
11. Resolution 415 – Amending H-440.847 to Call for National Government and States to Maintain Personal Protective Equipment and Medical Supply Stockpiles
12. Resolution 421 – Medical Misinformation in the Age of Social Media

RECOMMENDED FOR ADOPTION IN LIEU OF

13. Resolution 402 – Modernization and Standardization of Public Health Surveillance Systems
14. Resolution 410 – Ensuring Adequate Health Care Resources to Address the Long COVID Crisis
15. Resolution 413 – Call for Increased Funding and Research for Post Viral Syndromes

RECOMMENDED FOR REFERRAL

16. Resolution 401 – Universal Access for Essential Public Health Services
RECOMMENDED FOR REFERRAL FOR DECISION

17. Resolution 403 – Confronting Obesity as a Key Contributor to Maternal Mortality, Racial Disparity, Death from Covid-19, Unaffordable Health Care Cost while Restoring Health in America

*For Council on Science and Public Health Report 3, Resolution 415, and Resolution 421, the double underline and double strikethrough that are traditional format for indicating amendments from the Reference Committee are difficult to discern. Therefore, the Reference Committee has also highlighted these additions in yellow.

Amendments

RECOMMENDED FOR ADOPTION

(1) BOARD OF TRUSTEES REPORT 15 – REMOVING THE SEX DESIGNATION FROM THE PUBLIC PORTION OF THE BIRTH CERTIFICATE

RECOMMENDATION:

Recommendation in Board of Trustees Report 15 be adopted and the rest of the report be filed.

The Board of Trustees recommends that the following be adopted in lieu of Resolution 5-I-19 and the remainder of this report be filed.

The American Medical Association will advocate for the removal of sex as a legal designation on the public portion of the birth certificate, recognizing that information on an individual’s sex designation at birth will still be submitted through the U.S. Standard Certificate of Live Birth for medical, public health, and statistical use only. (Directive to Take Action).

Your Reference Committee heard testimony in strong support of Board of Trustees Report 15. It was acknowledged that this recommendation will help prevent discrimination and will be life-changing for many people, while maintaining our nation’s vital statistics for public health and research purposes. Therefore, your Reference Committee recommends that Board of Trustees Report 15 be adopted.

(2) COUNCIL ON SCIENCE AND PUBLIC HEALTH REPORT 1 – COUNCIL ON SCIENCE AND PUBLIC HEALTH SUNSET REVIEW OF 2011 HOUSE POLICIES

RECOMMENDATION:

Recommendation in Council on Science and Public Health Report 1 be adopted and the remainder of the report be filed.

The Council on Science and Public Health recommends that the House of Delegates policies listed in the appendix to this report be acted upon in the manner indicated and the remainder of this report be filed. (Directive to Take Action)

Your Reference Committee heard no testimony in opposition to the CSAPH 1. Therefore, your Reference Committee recommends that Council on Science and Public Health Report 1 be adopted.

(3) RESOLUTION 417 – AMENDMENT TO FOOD ENVIRONMENTS AND CHALLENGES ACCESSING HEALTHY FOOD, H-150.925

RECOMMENDATION:

Resolution 417 be adopted.
RESOLVED, That our AMA amend policy H-150.925, Food Environments and Challenges Accessing Healthy Food by insertion and deletion as follows:

**Food Environments and Challenges Accessing Healthy Food H-150.925**

Our AMA (1) encourages the U.S. Department of Agriculture and appropriate stakeholders to study the national prevalence, impact, and solutions to the problems of food mirages, food swamps, and food oases as food environments distinct from food deserts challenges accessing healthy affordable food, including, but not limited to, food environments like food mirages, food swamps, and food deserts; and (2) recognize that food access inequalities are a major contributor to health inequities, disproportionately affecting marginalized communities and people of color; and (3) support policy promoting community-based initiatives that empower resident businesses, create economic opportunities, and support sustainable local food supply chains to increase access to affordable healthy food. (Modify Current HOD Policy)

Your Reference Committee heard limited, but supportive testimony on Resolution 417. It was noted that the COVID-19 pandemic in particular highlights our nation’s problems with food insecurity. Addressing inequities as well as the economic barriers to food access is necessary to solve this public health problem and achieve proper nutrition at all life stages. Your Reference Committee agrees and, therefore, recommends that Resolution 417 be adopted.
RECOMMENDED FOR ADOPTION AS AMENDED

(4) BOARD OF TRUSTEES REPORT 10 – PROTESTER PROTECTIONS

RECOMMENDATION A:

Recommendation in Board of Trustees Report 10 be amended by deletion to read as follows:

Less-Lethal Weapons and Crowd Control
Our American Medical Association (1) supports prohibiting the use of rubber bullets, including rubber or plastic-coated metal bullets and those with composites of metal and plastic, by law enforcement for the purposes of crowd control and management in the United States; (2) supports prohibiting the use of chemical irritants and kinetic impact projectiles to control peaceful crowds that do not pose an immediate threat; (3) recommends that law enforcement agencies have in place specific guidelines, rigorous training, and an accountability system, including the collection and reporting of data on injuries, for the use of kinetic impact projectiles and chemical irritants; (4) encourages guidelines on the use of kinetic impact projectiles and chemical irritants to include considerations such as the proximity of non-violent individuals and bystanders; for kinetic impact projectiles, a safe shooting distance and avoidance of vital organs (head, neck, chest, and abdomen), and for all less-lethal weapons, the issuance of a warning followed by sufficient time for compliance with the order prior to discharge; (5) recommends that law enforcement personnel use appropriate de-escalation techniques to minimize the risk of violence in crowd control and provide transparency about less-lethal weapons in use and the criteria for their use; and (6) encourages relevant stakeholders including, but not limited to manufacturers and government agencies to develop and test crowd-control techniques which pose a more limited risk of physical harm. (New HOD Policy)

RECOMMENDATION B:

Board of Trustees Report be adopted as amended and the remainder of the report be filed.

The Board of Trustees recommends that the following be adopted in lieu of Resolution 409, November 2020 Special Meeting, and the remainder of this report be filed.
Less-Lethal Weapons and Crowd Control

Our American Medical Association (1) supports prohibiting the use of rubber bullets, including rubber or plastic-coated metal bullets and those with composites of metal and plastic, by law enforcement for the purposes of crowd control and management in the United States; (2) supports prohibiting the use of chemical irritants and kinetic impact projectiles to control peaceful crowds that do not pose an immediate threat; (3) recommends that law enforcement agencies have in place specific guidelines, rigorous training, and an accountability system, including the collection and reporting of data on injuries, for the use of kinetic impact projectiles and chemical irritants; (4) encourages guidelines on the use of kinetic impact projectiles and chemical irritants to include considerations such as the proximity of non-violent individuals and bystanders; for kinetic impact projectiles, a safe shooting distance and avoidance of vital organs (head, neck, chest, and abdomen), and for all less-lethal weapons, the issuance of a warning followed by sufficient time for compliance with the order prior to discharge; (5) recommends that law enforcement personnel use appropriate de-escalation techniques to minimize the risk of violence in crowd control and provide transparency about less-lethal weapons in use and the criteria for their use; and (6) encourages relevant stakeholders including, but not limited to manufacturers and government agencies to develop and test crowd-control techniques which pose a more limited risk of physical harm. (New HOD Policy)

Testimony provided was overall supportive of Board of Trustees Report 10. The Board noted that the right of assembly plays a fundamental role in public participation in democracy, expressing the will of the people, and in amplifying the voices of people who are marginalized. Those who commented acknowledged that less lethal weapons come with their own risks and there is documented morbidity and mortality associated with their use. The Board’s recommendation puts AMA policy in line with other medical specialty societies that have opposed rubber bullets as a means of crowd control. An amendment was suggested to remove the word “peaceful” since the language is redundant with “not posing an imminent threat.” Your Reference Committee agrees and therefore recommends that Board of Trustees Report 10 be adopted as amended.

(5) BOARD OF TRUSTEES REPORT 16 – FOLLOW-UP ON ABNORMAL MEDICAL TEST FINDINGS

RECOMMENDATION A:

Recommendation in Board of Trustees Report 16 be amended by addition to read as follows:

Our AMA supports the development of best practices and other clinical resources for communication of test results, including via patient portals and applications, and encourages additional research to ensure these innovative approaches and tools reach their potential to help advance patient care, while ensuring appropriate privacy safeguards.

RECOMMENDATION B:

Recommendation in Board of Trustees Report 16 be adopted as amended and the rest of the report be filed.
The Board of Trustees recommends that the language below be adopted in lieu of Resolution 309-I-19 and the remainder of this report be filed.

Our American Medical Association encourages relevant national medical specialty societies to develop and disseminate evidence-based guidelines for communication and follow-up of abnormal and critical test results to promote better patient outcomes. (New HOD Policy)

Our AMA will work with appropriate state and medical specialty societies to highlight relevant education regarding the communication and follow-up of abnormal and critical medical test findings to promote better patient outcomes. (Directive to Take Action)

Our AMA supports the development of best practices and other clinical resources for communication of test results, including via patient portals and applications, and encourages additional research to ensure these innovative approaches and tools reach their potential to help advance patient care. (New HOD Policy)

Your Reference Committee heard testimony largely in support of Board of Trustees Report 16. Testimony reaffirmed the importance of reporting test results in a timely manner and coordinated communication to ensure patient safety. The inclusion of medical specialty societies’ role to develop evidence-based guidelines for communicating abnormal test results with patients also received positive feedback. An amendment was proposed to ensure appropriate privacy safeguards are in place for patient portals and applications. Your Reference Committee agrees with this amendment and recommends that Board of Trustees Report 16 be adopted as amended.

(6) COUNCIL ON SCIENCE AND PUBLIC HEALTH REPORT

3 – ADDRESSING INCREASES IN YOUTH SUICIDE

RECOMMENDATION A:

Recommendation 1 in Council and Science and Public Health Report 3 be amended by addition and deletion to read as follows:

The Council on Science and Public Health recommends that the following be adopted, and the remainder of the report be filed:

1. That Policy H-60.937 be amended to read as follows:

**Teen Youth and Young Adult Suicide in the United States**

Our AMA:

(1) Recognizes *teen youth* and young adult suicide as a serious health concern in the US;

(2) Encourages the development and dissemination of educational resources and tools for physicians, especially those more likely to encounter youth or young adult patients, addressing effective suicide prevention, including screening tools, methods to identify risk factors and acuity, safety planning, and
appropriate follow-up care including treatment and linkages to appropriate counseling resources;

(3) Supports collaboration with federal agencies, relevant state and specialty medical societies, schools, public health agencies, community organizations, and other stakeholders to enhance awareness of the increase in youth and young adult suicide and to promote protective factors, raise awareness of risk factors, support evidence-based prevention strategies and interventions, encourage awareness of community mental health resources, and improve care for youth and young adults at risk of suicide;

(4) Encourages efforts to provide youth and young adults better and more equitable access to treatment and care for depression, substance use disorder, and other disorders that contribute to suicide risk;

(5) Encourages continued research to better understand suicide risk and effective prevention efforts in youth and young adults, especially in higher risk sub-populations such as Black, LGBTQ+, Hispanic/Latinx, and Indigenous/Native Alaskan youth and young adult populations, and among youth and young adults with disabilities;

(6) Supports the development of novel technologies and therapeutics, along with improved utilization of existing medications to address acute suicidality and underlying risk factors in youth and young adults; and

(7) Supports research to identify evidence-based universal and targeted suicide prevention programs for implementation in middle schools and high schools.

(8) Will publicly call attention to the escalating crisis in children and adolescent mental health in this country in the wake of the COVID-19 pandemic.

(Modify Current HOD policy)

RECOMMENDATION B:

Recommendation 2 in Council on Science and Public Health Report 3 be amended by addition to read as follows:

1. That Policy H-515-952, “Adverse Childhood Experiences and Trauma-Informed Care” be amended by addition to read as follows:

   1. Our AMA recognizes trauma-informed care as a practice that recognizes the widespread impact of trauma on patients, identifies the signs and
symptoms of trauma, and treats patients by fully integrating knowledge about trauma into policies, procedures, and practices and seeking to avoid re-traumatization.

2. Our AMA supports:
   a. evidence-based primary prevention strategies for Adverse Childhood Experiences (ACEs);
   b. evidence-based trauma-informed care in all medical settings that focuses on the prevention of poor health and life outcomes after ACEs or other trauma at any time in life occurs;
   c. efforts for data collection, research, and evaluation of cost-effective ACEs screening tools without additional burden for physicians.
   d. efforts to educate physicians about the facilitators, barriers and best practices for providers implementing ACEs screening and trauma-informed care approaches into a clinical setting; and
   e. funding for schools, behavioral and mental health services, professional groups, community, and government agencies to support patients with ACEs or trauma at any time in life; and
   f. increased screening for ACEs in medical settings, in recognition of the intersectionality of ACEs with significant increased risk for suicide, negative substance use-related outcomes including overdose, and a multitude of downstream negative health outcomes.

3. Our AMA supports the inclusion of ACEs and trauma-informed care into undergraduate and graduate medical education curricula.
   (Modify Current HOD policy)

RECOMMENDATION C:

The recommendations in Council on Science and Public Health Report 3 be adopted as amended and the remainder of the report be filed.

The Council on Science and Public Health recommends that the following be adopted, and the remainder of the report be filed:

2. That Policy H-60.937 be amended to read as follows:
   Teen Youth and Young Adult Suicide in the United States
   Our AMA:
(9) Recognizes the well-being and young adult suicide as a serious health concern in
the US;
(10) Encourages the development and dissemination of educational
resources and tools for physicians, especially those more likely to encounter
youth or young adult patients, addressing effective suicide prevention,
including screening tools, methods to identify risk factors and acuity, safety
planning, and appropriate follow-up care including treatment and linkages to
appropriate counseling resources;
(11) Supports collaboration with federal agencies, relevant state and
specialty medical societies, schools, public health agencies, community
organizations, and other stakeholders to enhance awareness of the increase
in youth and young adult suicide and to promote protective factors, raise
awareness of risk factors, support evidence-based prevention strategies and
interventions, encourage awareness of community mental health resources,
and improve care for youth and young adults at risk of suicide;
(12) Encourages efforts to provide youth and young adults better and more
equitable access to treatment and care for depression, substance use disorder,
and other disorders that contribute to suicide risk;
(13) Encourages continued research to better understand suicide risk and
effective prevention efforts in youth and young adults, especially in higher risk
sub-populations such as Black, LGBTQ+, Latino, and Indigenous/Native
Alaskan youth and young adult populations;
(14) Supports the development of novel technologies and therapeutics,
along with improved utilization of existing medications to address acute
suicidality and underlying risk factors in youth and young adults; and
(15) Supports research to identify evidence-based universal and targeted
suicide prevention programs for implementation in middle schools and high
schools. (Modify Current HOD policy)

Care” be amended by addition to read as follows:
4. Our AMA recognizes trauma-informed care as a practice that recognizes the
widespread impact of trauma on patients, identifies the signs and symptoms of
trauma, and treats patients by fully integrating knowledge about trauma into
policies, procedures, and practices and seeking to avoid re-traumatization.
5. Our AMA supports:
g. evidence-based primary prevention strategies for Adverse Childhood
Experiences (ACEs);
h. evidence-based trauma-informed care in all medical settings that focuses
on the prevention of poor health and life outcomes after ACEs or other
trauma at any time in life occurs;
i. efforts for data collection, research, and evaluation of cost-effective ACEs
screening tools without additional burden for physicians.
j. efforts to educate physicians about the facilitators, barriers and best
practices for providers implementing ACEs screening and trauma-informed
care approaches into a clinical setting; and
k. funding for schools, behavioral and mental health services, professional
groups, community, and government agencies to support patients with
ACEs or trauma at any time in life; and
l. increased screening for ACEs in medical settings, in recognition of the
intersectionality of ACEs with significant increased risk for suicide, negative
substance use-related outcomes including overdose, and a multitude of downstream negative health outcomes. (Modify Current HOD policy)

3. That Policy H-145.975, “Firearm Safety and Research, Reduction in Firearm Violence, and Enhancing Access to Mental Health Care,” which recognizes the role of firearms in suicides; encourages the development of curricula and training for physicians with a focus on suicide risk assessment and prevention as well as lethal means safety counseling; and encourages physicians, as a part of their suicide prevention strategy, to discuss lethal means safety and work with families to reduce access to lethal means of suicide, be reaffirmed. (Reaffirm Current HOD Policy).

4. That Policy H-170.984, “Healthy Living Behaviors,” encouraging state medical societies and physicians to promote physical and wellness activities for children and youth and to advocate for health and wellness programs for children and youth in schools and communities, be reaffirmed. (Reaffirm Current HOD Policy)

The Council was applauded for its timely report on the issue of youth suicide. It was recognized that as a nation we need to enhance our efforts related to suicide prevention and risk mitigation, and the recommendations in this report are an important step forward. Proposed amendments supported the inclusion of adverse childhood experiences and trauma-informed care into the undergraduate and graduate medical education curricula and also recognized youth with disabilities as a subpopulation at risk. These amendments were supported by your Reference Committee. The American Academy of Pediatrics suggested the addition of four Resolve statements, one of which called upon the AMA to bring attention to the mental health crisis in youth and young adults as a result of the COVID-19 pandemic. Your Reference Committee agrees that recommendation is in line with and supported by the Council’s report. The other three resolves were broader and while it was felt that they are of importance, they are beyond the focus and evidence-base addressed in this report. Additionally, whether or not the AMA should endorse the Child and Adolescent Mental and Behavioral Health Principles of 2021 is a decision that can be made by the AMA without a directive to study. Therefore, your Reference Committee recommends that Council on Science and Public Health Report 3 be adopted as amended.

(7) RESOLUTION 406 – ATTACKING DISPARITIES IN COVID-19 UNDERLYING HEALTH CONDITIONS

RECOMMENDATION A:

Resolution 406 be amended by addition and deletion to read as follows:

RESOLVED, That our American Medical Association urge federal, state, and municipal leaders to prominently note in their COVID-19 public health advisories the urgent need for individuals with underlying health medical conditions, particularly obesity, type 2 diabetes, and hypertension, to consult with their physicians to assess their health medical status and institute (or resume) appropriate treatment, which may range from updating medications and
lifestyle changes, such as reduced sodium and plant-based diets and physical activity, to aggressive medical therapy which may include medication, surgery, and complex multi-disciplinary care. (Directive to Take Action)

RECOMMENDATION B:

Resolution 406 be adopted as amended.

RECOMMENDATION C:

That the title of Resolution 406 be changed to read as follows:

ADDRESSING UNDERLYING HEALTH CONDITIONS ASSOCIATED WITH RISK FOR SEVERE COVID-19

RESOLVED, That our American Medical Association urge federal, state, and municipal leaders to prominently note in their COVID-19 public health advisories the urgent need for individuals with underlying medical conditions, particularly obesity, type 2 diabetes, and hypertension, to consult with their physicians to assess their medical status and institute (or resume) appropriate treatment, which may range from updating medications and lifestyle changes, such as reduced sodium and plant-based diets and physical activity, to aggressive medical therapy which may include medication, surgery, and complex multi-disciplinary care. (Directive to Take Action)

Your Reference Committee heard testimony in support of Resolution 406 given the role of underlying chronic conditions in making individuals more severely ill from COVID-19. Several of those who testified wished to see modifications to the conditions included in notices, such as the inclusion of mental and behavioral health, but your Reference Committee believes that more comprehensive language to be inclusive of any pre-existing condition will give the greatest flexibility for government leaders to address the populations they serve. Additionally, your Reference Committee believes that alerts from federal, state, and municipal leaders on this topic should not suggest specific treatments but rather should encourage individuals to consult with their physician. Therefore, your Reference Committee recommends that Resolution 406 be adopted as amended.

(8) RESOLUTION 407 – IMPACT OF SARS-COV-2 PANDEMIC ON POST-ACUTE CARE SERVICES AND LONG-TERM CARE AND RESIDENTIAL FACILITIES

RECOMMENDATION A:

Resolution 407 be amended by addition and deletion to read as follows:

RESOLVED, That our American Medical Association advocate for study of the impact of SARS-CoV-2 pandemic on post-acute care services and long-term care and residential facilities and collaborate with other
stakeholders to develop policy to guide federal, state, and local public health authorities to ensure safe operation of these long-term care (LTC) facilities during public health emergencies and natural disasters with policy recommendations to include but not limited to:

- Planning for adequate funding and access to resources;
- Planning for emergency staffing of health care and maintenance personnel;
- Planning for ensuring safe working conditions of LTC staff; and
- Planning for mitigation of the detrimental effects of increased isolation of residents during a natural disaster, other environmental emergency, or pandemic, or similar crisis. (Directive to Take Action)

RECOMMENDATION B:

Resolution 407 be adopted as amended.

RESOLVED, That our American Medical Association study the impact of SARS-CoV-2 pandemic on post-acute care services and long-term care and residential facilities and collaborate with other stakeholders to develop policy to guide federal, state, and local public health authorities to ensure safe operation of these facilities during public health emergencies and natural disasters with policy recommendations to include but not limited to:

- Planning for adequate funding and access to resources;
- Planning for emergency staffing of health care and maintenance personnel;
- Planning for ensuring safe working conditions of LTC staff; and
- Planning for mitigation of the detrimental effects of increased isolation of residents during a natural disaster, other environmental emergency, or pandemic, or similar crisis. (Directive to Take Action)

Your Reference Committee heard testimony in support of the intent of Resolution 407, but questions were raised as to whether the AMA is in the best position to conduct this study. Testimony noted that health care personnel and residents of long-term care (LTC) facilities have been disproportionately impacted by the Covid-19 pandemic. LTC residents tend to be older adults, immune-compromised and live in a group setting. Furthermore, reports indicate that increased isolation may have long-lasting effects on the mental health of LTC residents. The Council on Science and Public Health spoke politely in opposition to the AMA studying this issue, as those with direct, on the ground experience in responding to the pandemic within these facilities are in the best position to make policy recommendations for the future that the AMA can advocate on their behalf. Your Reference Committee agrees with the opinion of the Council and believes that this amended language will still allow for collaboration with stakeholders. Therefore, your Reference Committee recommends that Resolution 407 be adopted as amended.
(9) RESOLUTION 411 – ONGOING USE OF MASKS BY AND AMONG HIGH-RISK INDIVIDUALS TO REDUCE THE RISK OF SPREAD OF RESPIRATORY PATHOGENS

RECOMMENDATION A:

That the first Resolve of Resolution 411 be amended by addition and deletion to read as follows:

RESOLVED, That our American Medical Association support endorse the ongoing use of face masks for all those wishing to protect themselves and those around them from reduce the risk of respiratory tract infections during the time of year when respiratory pathogens are most likely to circulate and whenever respiratory infections are known to be circulating when people are in close contact and indoors (Directive to Take Action);

RECOMMENDATION B:

Resolution 411 be adopted as amended.

RECOMMENDATION C:

That the title of Resolution 411 be changed to read as follows:

USE OF FACE MASKS BY INDIVIDUALS TO REDUCE THE SPREAD OF RESPIRATORY PATHOGENS

RESOLVED, That our American Medical Association endorse the use of masks for all those wishing to reduce the risk of respiratory tract infection during the time of year when respiratory pathogens are most likely to circulate and whenever respiratory infections are known to be circulating when people are in close contact and indoors (Directive to Take Action); and be it further

RESOLVED, That our AMA promulgate scientific information to both patients and physicians about the benefits of masks to protect patients, especially those at high risk, to reduce exposure to and spread of respiratory pathogens. (Directive to Take Action)

Your Reference Committee heard testimony overwhelmingly supportive of Resolution 411. It was noted by many who testified that the impact of wearing face masks on the transmission of COVID-19 has been profound, and that many individuals will still wish to wear masks even if local masking guidelines are rescinded. Several who testified noted the benefits of mask-wearing for other respiratory infection, such as influenza, and that mask-wearing has been normalized in other countries. Your Reference Committee felt that the proposed language of the Resolution could be expanded to support all scenarios in which an individual wishes to wear a face mask to protect themselves and those around them, at any time of year. Therefore, your Reference Committee recommends that Resolution 411 be adopted as amended.
(10) RESOLUTION 414 – CALL FOR IMPROVED PERSONAL
PROTECTIVE EQUIPMENT DESIGN AND FITTING

RECOMMENDATION A:

Resolution 414 be amended by addition to read as follows:

RESOLVED, That our American Medical Association
encourage the diversification of personal protective
equipment design to better fit all body types, cultural
expressions and practices among healthcare personnel
workers. (Directive to Take Action)

RECOMMENDATION B:

Resolution 414 be adopted as amended.

Your Reference Committee heard testimony in strong support of Resolution 414. Testimony
emphasized the need for diversification of PPE sizes to accommodate varying body types,
including consideration around cultural expressions and practices, to facilitate safer working
environments for all health care personnel. Therefore, your Reference Committee
recommends that Resolution 414 be adopted as amended.

(11) RESOLUTION 415 – AMENDING H-440.847 TO CALL
FOR NATIONAL GOVERNMENT AND STATES TO
MAINTAIN PERSONAL PROTECTIVE EQUIPMENT AND
MEDICAL SUPPLY STOCKPILES

RECOMMENDATION A:

Resolution 415 be amended by addition and deletion to read as follows:

RESOLVED, That our American Medical Association
add to amendment policy H-440.847 by addition and deletion to read
as follows:

Pandemic Preparedness for Influenza H-440.847
In order to prepare for a potential influenza pandemic, our AMA:
(1) urges the Department of Health and Human Services
Emergency Care Coordination Center, in collaboration
with the leadership of the Centers for Disease Control
and Prevention (CDC), state and local health
departments, and the national organizations
representing them, to urgently assess the shortfall in
funding, staffing, supplies, vaccine, drug, and data
management capacity to prepare for and respond to an influenza pandemic or other serious public health emergency;
(2) urges Congress and the Administration to work to ensure adequate funding and other resources: (a) for the CDC, the National Institutes of Health (NIH), the Strategic National Stockpile and other appropriate federal agencies, to support the maintenance of and the implementation of an expanded capacity to produce the necessary vaccines, and anti-viral microbial drugs, medical supplies, and personal protective equipment, and to continue development of the nation's capacity to rapidly manufacture the necessary supplies needed to protect, treat, test and vaccinate the entire population and care for large numbers of seriously ill people; and (b) to bolster the infrastructure and capacity of state and local health departments to effectively prepare for and respond to, and protect the population from illness and death in an influenza pandemic or other serious public health emergency;
(3) encourages states to maintain medical and personal protective equipment stockpiles sufficient for effective preparedness and to respond to a pandemic or other major public health emergency;
(4) urges the federal government to meet treaty and trust obligations by adequately sourcing medical and personal protective equipment directly to tribal communities and the Indian Health Service for effective preparedness and to respond to a pandemic or other major public emergency;
(35) urges the CDC to develop and disseminate electronic instructional resources on procedures to follow in an influenza epidemic, pandemic, or other serious public health emergency, which are tailored to the needs of healthcare personnel—physicians and medical office staff in ambulatory direct patient care settings;
(46) supports the position that: (a) relevant national and state agencies (such as the CDC, NIH, and the state departments of health) continue take immediate action to plan and test distribution activities in advance of a public health emergency, to assure that physicians, nurses, other health care personnel professionals, and first responders having direct patient contact, receive any appropriate vaccination or medical countermeasure in a timely and efficient manner, in order to reassure them that they will have first priority in the event of such a pandemic; and (b) such agencies should publicize now, in advance of any such pandemic, what the plan will be to provide immunization to health care providers;
(7) will monitor progress in developing a contingency plan that addresses future influenza vaccine production or distribution problems and in developing a plan to respond to an influenza pandemic in the United States.

(Modify Current HOD Policy)

RECOMMENDATION B:

Resolution 415 be adopted as amended.

RESOLVED, That our American Medical Association amend policy H-440.847 by addition and deletion to read as follows:

Pandemic Preparedness for Influenza H-440.847
In order to prepare for a potential influenza pandemic, our AMA:

(1) urges the Department of Health and Human Services Emergency Care Coordination Center, in collaboration with the leadership of the Centers for Disease Control and Prevention (CDC), state and local health departments, and the national organizations representing them, to urgently assess the shortfall in funding, staffing, supplies, vaccine, drug, and data management capacity to prepare for and respond to an influenza a pandemic or other serious public health emergency;

(2) urges Congress and the Administration to work to ensure adequate funding and other resources: (a) for the CDC, the National Institutes of Health (NIH), the Strategic National Stockpile and other appropriate federal agencies, to support the maintenance of and the implementation of an expanded capacity to produce the necessary vaccines, and anti-viral microbial drugs, medical supplies, and personal protective equipment, and to continue development of the nation's capacity to rapidly manufacture the necessary supplies needed to protect, treat, test and vaccinate the entire population and care for large numbers of seriously ill people; and (b) to bolster the infrastructure and capacity of state and local health departments to effectively prepare for and respond to, and protect the population from illness and death in an influenza a pandemic or other serious public health emergency;

(3) encourages states to maintain medical and personal protective equipment stockpiles sufficient for effective preparedness and to respond to a pandemic or other major public health emergency;

(4) urges the federal government to meet treaty and trust obligations by adequately sourcing medical and personal protective equipment directly to tribal communities and the Indian Health Service for effective preparedness and to respond to a pandemic or other major public emergency;

(5) urges the CDC to develop and disseminate electronic instructional resources on procedures to follow in an influenza epidemic, pandemic, or other serious public health emergency, which are tailored to the needs of physicians and medical office staff in ambulatory care settings;

(6) supports the position that: (a) relevant national and state agencies (such as the CDC, NIH, and the state departments of health) take immediate action to assure that physicians, nurses, other health care professionals, and first responders having direct patient contact, receive any appropriate vaccination in a timely and efficient manner, in order to reassure them that they will have first priority in the event of such a pandemic; and (b) such agencies should publicize now, in advance of any such pandemic, what the plan will be to provide immunization to health care providers;
Your Reference Committee heard testimony that supported the goals reflected in Resolution 415. There was unanimous agreement surrounding the broadening of policy to reflect pandemic environments rather than narrowly addressing influenza pandemics. Testimony acknowledged the need to improve the availability of medical equipment and supplies in a pandemic, while reflecting on the utility of this policy during critical actions related to the COVID-19 pandemic last year. Select testimony urged the need to call attention toward more explicit action in accessing stockpiles, citing the difficulty in obtaining adequate amounts of PPE during COVID-19 surges as evidence. The USPHS suggested amended language that recognizes healthcare personnel and direct patient care settings as well as ensuring planning and testing of distribution models. Your Reference Committee agrees with these suggestions and recommends that Resolution 415 be adopted as amended.

(12) RESOLUTION 421 – MEDICAL MISINFORMATION IN THE AGE OF SOCIAL MEDIA

RECOMMENDATION A:

That the first Resolve of Resolution 421 be amended by addition to read as follows:

RESOLVED, That our AMA encourage social media companies and organizations to further strengthen their content moderation policies related to medical and public health misinformation, including, but not limited to enhanced content monitoring, augmentation of recommendation engines focused on false information, and stronger integration of verified health information; and be it further

RECOMMENDATION B:

That the second Resolve of Resolution 421 be amended by addition to read as follows:

RESOLVED, That our AMA encourage social media companies and organizations to recognize the spread of medical and public health misinformation over dissemination networks and collaborate with relevant stakeholders to address this problem as appropriate, including but not limited to altering underlying network dynamics or redesigning platform algorithms; and be it further

RECOMMENDATION C:

That the third Resolve of Resolution 421 be amended by addition to read as follows:
RESOLVED, That our AMA continue to support the dissemination of accurate medical and public health information by public health organizations and health policy experts; and be it further

RECOMMENDATION D:

That the fourth Resolve of Resolution 421 be amended by addition to read as follows:

RESOLVED, That our AMA work with public health agencies in an effort to establish relationships with journalists and news agencies to enhance the public reach in disseminating accurate medical and public health information; and be it further

RECOMMENDATION E:

That the fifth Resolve of Resolution 421 be amended by addition to read as follows:

RESOLVED, That our AMA amend existing policy concerning COVID-19 vaccine information to increase its scope and impact regarding medical misinformation as follows:

An Urgent Initiative to Support COVID-19 Vaccination and Information Programs D-440.921

Our AMA will institute a program to promote the integrity of a COVID-19 vaccination information program by: (1) educating physicians on speaking with patients about COVID-19 infection and vaccination, bearing in mind the historical context of “experimentation” with vaccines and other medication in communities of color, and providing physicians with culturally appropriate patient education materials; (2) educating the public about up-to-date, evidence-based information regarding COVID-19 and associated infections as well as the safety and efficacy of COVID-19 vaccines, by countering misinformation and building public confidence; (3) forming a coalition of health care and public health organizations inclusive of those respected in communities of color committed to developing and implementing a joint public education program promoting the facts about, promoting the need for, and encouraging the acceptance of COVID-19 vaccination; (4) supporting ongoing monitoring of COVID-19 vaccines to ensure that the evidence continues to support safe and effective use of vaccines among recommended populations; (5) educating physicians and other healthcare professionals on
means to disseminate accurate information and
methods to combat medical misinformation online.;
and be it further

RECOMMENDATION F:

That the sixth Resolve of Resolution 421 be referred for
decision.

RECOMMENDATION G:

Resolution 421 be adopted as amended.

RECOMMENDATION H:

That the title of Resolution 421 be changed to read as
follows:

MEDICAL AND PUBLIC HEALTH MISINFORMATION IN
THE AGE OF SOCIAL MEDIA

RESOLVED, That our AMA encourage social media organizations to further strengthen their
content moderation policies related to medical misinformation, including, but not limited to
enhanced content monitoring, augmentation of recommendation engines focused on false
information, and stronger integration of verified health information; and be it further
RESOLVED, That our AMA encourage social media organizations to recognize the spread
of medical misinformation over dissemination networks and collaborate with relevant
stakeholders to address this problem as appropriate, including but not limited to altering
underlying network dynamics or redesigning platform algorithms; and be it further
RESOLVED, That our AMA continue to support the dissemination of accurate medical
information by public health organizations and health policy experts; and be it further
RESOLVED, That our AMA work with public health agencies in an effort to establish
relationships with journalists and news agencies to enhance the public reach in
disseminating accurate medical information; and be it further
RESOLVED, That our AMA amend existing policy concerning COVID-19 vaccine
information to increase its scope and impact regarding medical misinformation as follows:

An Urgent Initiative to Support COVID-19 Vaccination Information Programs D-440.921

Our AMA will institute a program to promote the integrity of a COVID-19 vaccination
information program by: (1) educating physicians on speaking with patients about
COVID-19 infection and vaccination, bearing in mind the historical context of
“experimentation” with vaccines and other medication in communities of color, and
providing physicians with culturally appropriate patient education materials; (2)
educating the public about up-to-date, evidence-based information regarding COVID-
19 and associated infections as well as the safety and efficacy of COVID-19
vaccines, by countering misinformation and building public confidence; (3) forming a
coalition of health care and public health organizations inclusive of those respected
in communities of color committed to developing and implementing a joint public
education program promoting the facts about, promoting the need for, and
courage the acceptance of COVID-19 vaccination; (4) supporting ongoing
monitoring of COVID-19 vaccines to ensure that the evidence continues to support
safe and effective use of vaccines among recommended populations.; (5) educating
physicians and other healthcare professionals on means to disseminate accurate
information and methods to combat medical misinformation online.; and be it further

RESOLVED, That our AMA study and consider public advocacy of modifications to Section
230(c) of the Communications Decency Act, Part 2, Clause A, as follows:
any action voluntarily taken in good faith to restrict access to or availability of material
that the provider or user considers to be obscene, lewd, lascivious, excessively violent,
harassing, pose risk to public health, or be otherwise objectionable, whether or not
such material is constitutionally protected.

Your Reference Committee heard testimony in strong support of the intent of Resolution 421.
The importance of disseminating accurate information was echoed by several members due
to the burden misinformation across social media platforms places on physicians. It was also
noted that misinformation leads to patient harm. Those who commented noted that the subject
of misinformation should be broadened beyond just medical information to also encompass
public health information; to allow better support of our colleagues that work in public health
agencies. Additionally, since social media organizations are often referred to as “companies,”
Your Reference Committee also added this term to the new policy to ensure clarity. The
Council on Science and Public Health supported referral for decision of the last resolve
because of the complexity around establishing and implementing a public health exception to
the Communications Decency Act and Your Reference Committee agrees. Therefore, your
Reference Committee recommends that the first five Resolves of Resolution 421 be adopted
as amended and the last Resolve be referred for decision.
RECOMMENDED FOR ADOPTION IN LIEU OF

(13) RESOLUTION 402 – MODERNIZATION AND STANDARDIZATION OF PUBLIC HEALTH SURVEILLANCE SYSTEMS

RECOMMENDATION A:

Alternate Resolution 402 be adopted lieu of Resolution 402.

That our American Medical Association: (1) advocate for increased federal coordination and funding to support the modernization and standardization of public health surveillance systems data collection by the Centers for Disease Control and Prevention and state and local health departments and (2) support data standardization that provides for minimum national standards, while preserving the ability of states and other entities to exceed national standards based on local needs and/or the presence of unexpected urgent situations.

RECOMMENDATION B:

RESOLVED, That our American Medical Association advocate for the modernization and standardization of public health surveillance systems data collection by the Centers for Disease Control and Prevention and state and local health departments, including but not limited to increased federal coordination and funding. (Directive to Take Action)

Your Reference Committee heard testimony in support of the intent of Resolution 402. However, the Council on Science and Public Health noted that they developed existing policy addressing the modernization of public health data and surveillance systems at the 2019 Interim Meeting and the AMA has been advocating for sustainable funding in support of the CDC’s Data Modernization Initiative. Your Reference Committee agrees that strong policy already exists in support of funding for data modernization but felt that AMA policy could be strengthened around coordination and the development of national standards for public health data. As a result, Your Reference Committee proposes the adoption of alternate language as provided by the CDC and public health physicians in testimony to address these areas as well as the reaffirmation of existing policy on public health surveillance.

H-440.813, “Public Health Surveillance”
Our AMA: (1) recognizes public health surveillance as a core public health function that is essential to inform decision making, identify underlying causes and etiologies, and respond to acute, chronic, and emerging health threats; (2) recognizes the important role that physicians play in public health surveillance through reporting diseases and conditions to public health authorities; (3) encourages state legislatures to engage relevant state and
national medical specialty societies as well as public health agencies when proposing mandatory reporting requirements to ensure they are based on scientific evidence and meet the needs of population health; (4) recognizes the need for increased federal, state, and local funding to modernize our nation’s public health data systems to improve the quality and timeliness of data; (5) supports electronic case reporting, which alleviates the burden of case reporting on physicians through the automatic generation and transmission of case reports from electronic health records to public health agencies for review and action in accordance with applicable health care privacy and public health reporting laws; (6) will share updates with physicians and medical societies on public health surveillance and the progress made toward implementing electronic case reporting.

(14) RESOLUTION 410 – ENSURING ADEQUATE HEALTH CARE RESOURCES TO ADDRESS THE LONG COVID CRISIS
RESOLUTION 413 – CALL FOR INCREASED FUNDING AND RESEARCH FOR POST VIRAL SYNDROMES

RECOMMENDATION A:
Alternate Resolution 410 be adopted in lieu of Resolutions 410 and 413.

CALL FOR INCREASED FUNDING, RESEARCH, AND EDUCATION FOR POST VIRAL SYNDROMES

RESOLVED, That our American Medical Association support the development of an ICD-10 code or family of codes to recognize Post-Acute Sequelae of SARS-CoV-2 infection (“PASC” or “Long COVID”) and other novel post-viral syndromes as distinct diagnoses (New HOD Policy); and be it further

RESOLVED, That our American Medical Association advocate for legislation to provide funding for research, prevention, control, and treatment of post viral syndromes and long-term sequelae associated with viral infections, such as COVID-19 (Directive to Take Action); and be it further

RESOLVED, That our AMA provide physicians and medical students with accurate and current information on post-viral syndromes and long-term sequelae associated with viral infections, such as COVID-19 (Directive to Take Action); and be it further

RESOLVED, That our AMA collaborate with other medical and educational entities to promote education among patients about post viral syndromes and long-term sequelae associated with viral infections, such as COVID-19, to minimize the harm and disability current and future patients face. (Directive to Take Action)
RESOLVED, That our American Medical Association support the development of an ICD-10 code or family of codes to recognize Post-Acute Sequelae of SARS-CoV-2 infection (“PASC” or “Long COVID”) as a distinct diagnosis (Directive to Take Action); and be it further

RESOLVED, That our AMA advocate for the development of immediate and long-term strategies for funding and research to address equitable access to appropriate clinical care for all individuals experiencing PASC (Directive to Take Action); and be it further

RESOLVED, That our AMA disseminate up-to-date information to physicians regarding best practices to mitigate the effects of PASC in a timely manner. (Directive to Take Action)

RESOLVED, That our American Medical Association advocate for legislation to provide funding for research, prevention, control, and treatment of post viral syndromes and long-term sequelae associated with COVID-19, including but not limited to Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) (Directive to Take Action); and be it further

RESOLVED, That our AMA provide physicians and medical students with accurate and current information on post-viral syndromes and long-term sequelae associated with COVID-19, including but not limited to Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) (Directive to Take Action); and be it further

RESOLVED, That our AMA collaborate with other medical and educational entities to promote education among patients about post viral syndromes and long-term sequelae associated with COVID-19, including but not limited to Myalgic Encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS), to minimize the harm and disability current and future patients face. (Directive to Take Action)

Your Reference Committee heard thoughtful and thorough testimony related to Resolutions 413 and 410, with a majority supporting the merging of the resolutions to support funding for research and the dissemination of educational resources on post viral syndromes, particularly Long COVID-19 and Post-Acute Sequelae of SARS-CoV-2 (PASC). Testimony emphasized the need to improve the clinical definition(s) of post viral syndromes and identify the evidence necessary to appropriately assess all conditions and organ systems affected as well as the associated behavioral health conditions. Your Reference Committee is also aware that efforts to develop an ICD-10 code for these syndromes are already well underway, but felt the AMA having a policy statement in support of the activity may be helpful. Therefore, your Reference Committee recommends that Alternate Resolution 410 be adopted in lieu of Resolution 410 and Resolution 413.

(15) RESOLUTION 420 – IMPACT OF SOCIAL NETWORKING SERVICES ON THE HEALTH OF ADOLESCENTS

RECOMMENDATION A:

That Policy D-478.965, “Addressing Social Media Usage and its Negative Impacts on Mental Health,” be amended by addition and deletion in lieu of Resolution 420 to read as follows:
Addressing Social Media and Social Networking Usage and its Negative Impacts on Mental Health

Our AMA: (1) will collaborate with relevant professional organizations to: (a) support the development of continuing education programs to enhance physicians’ knowledge of the health impacts of social media and social networking usage; and (b) support the development of effective clinical tools and protocols for the identification, treatment, and referral of children, adolescents, and adults at risk for and experiencing health sequelae of social media and social networking usage; and (2) advocates for schools to provide safe and effective educational programs by which students can learn to identify and mitigate the onset of mental health sequelae of social media and social networking usage; (3) affirms that use of social media and social networking has the potential to positively or negatively impact the physical and mental health of individuals, especially adolescents and those with preexisting psychosocial conditions; (4) advocates for and support media and social networking services addressing and developing safeguards for users; and (5) advocates for the study of the positive and negative biological, psychological, and social effects of social media and social networking services use.

RECOMMENDATION B:

Policy D-478.965 be adopted as amended.

RESOLVED, That our American Medical Association affirm that use of social networking services has the potential to negatively impact the physical and mental health of individuals, especially adolescents and those with preexisting psychosocial conditions, and therefore these services should have established, evidence-based, reliable safeguards to protect vulnerable populations from harm (New HOD Policy); and be it further

RESOLVED, That our AMA advocate for the study of the biological, psychological, and social effects of social networking services use, and to advocate for legislative or regulatory action, including the expansion of Children’s Online Privacy Protection Act of 1998 protections, to mitigate the potential harm from the use of social networking services to adolescents and other vulnerable populations. (Directive to Take Action)

Your Reference Committee heard mixed testimony on Resolution 420. Testimony noted that Our AMA currently has policy related to the impact of social media on mental health. Testimony highlighted that there are both positive and negative effects associated with social media use, and that this should be reflected in AMA policy. Amendments were proffered to improve both the resolution and the existing policy, as the reliance on and impact of social media has increased during the ongoing pandemic. Additionally, there was confusion around the second Resolve, which is both calling for a study and for legislative or regulatory action. Your Reference Committee believes the best way to support this item is by amending current AMA policy to include the new concepts introduced in the resolution. Your Reference
Committee also included the term “social media” along with “social networking services” as it is broader and would be inclusive of all services. Your Reference Committee has included clauses calling for AMA advocacy related to the development of safeguards by social media and social network services and to support groups studying both the positive and negative biological, psychological, and social effects of social media and social networking services. Therefore, your Reference Committee recommends that Policy D-478.965 be adopted as amended.
RECOMMENDED FOR REFERRAL

(16) RESOLUTION 401 – UNIVERSAL ACCESS FOR ESSENTIAL PUBLIC HEALTH SERVICES

RECOMMENDATION A:

That the first Resolve of Resolution 401 be referred with report back at the next AMA HOD meeting.

RECOMMENDATION B:

That the second Resolve of Resolution 401 be adopted.

RESOLVED, That our American Medical Association study the options and/or make recommendations regarding the establishment of:

1. A list of all essential public health services that should be provided in every jurisdiction of the United States;
2. A nationwide system of information sharing and intervention coordination in order to effectively manage nationwide public health issues;
3. A federal data system that can capture the amount of federal, state, and local public health capabilities and spending that occurs in every jurisdiction to assure that their populations have universal access to all essential public health services;
4. A federal data system that can capture actionable evidence-based outcomes data from public health activities in every jurisdiction (Directive to Take Action); and be it further

RESOLVED, That our AMA prepare and publicize annual reports on current efforts and progress to achieve universal access to all essential public health services. (Directive to Take Action)

Your Reference Committee heard testimony supportive of the intent of Resolution 401, which is to strengthen our nation’s public health system for all people in all communities. It was noted in testimony by the Council on Science and Public Health and by the Department of Health and Human Services that the AMA recently participated in the task force that developed the revised 10 Essential Public Health Services released in September of 2020. If the AMA were to study the establishment of such a list, the AMAs recent work and ongoing support of the revised 10 Essential Public Health Services would be called into question and result in confusion. Your Reference Committee agrees and is not suggesting that the AMA create its own list of essential public health services. However, the Council on Science and Public Health is currently studying effective ways to strengthen the nation’s public health infrastructure, as directed by the House of Delegates in November 2020. The Council’s report, which will be informed by key stakeholder interviews, is due back to the House of Delegates in November of 2021. Your Reference Committee agrees that the first Resolve is best accomplished by referral for consideration by the Council in their upcoming report, with report back for November 2021. However, your Reference Committee believes that the second Resolve, which calls on the AMA to provide annual reports on access to essential public health services should be adopted.
RECOMMENDED FOR REFERRAL FOR DECISION

17 RESOLUTION 403 – CONFRONTING OBESITY AS A KEY CONTRIBUTOR TO MATERNAL MORTALITY, RACIAL DISPARITY, DEATH FROM COVID-19, UNAFFORDABLE HEALTH CARE COST WHILE RESTORING HEALTH IN AMERICA

RECOMMENDATION:

Resolution 403 be referred for decision.

RESOLVED, That our American Medical Association advocate for a National Task Force to be led by the medical profession along with other stakeholders to confront the epidemic of obesity primarily among minority women, prior to, during and after pregnancy, thereby reducing maternal mortality & morbidity rates, racial disparity in access to care, death from COVID-19 infection and healthcare costs while restoring health in our nation with report back at the 2021 Interim Meeting and beyond. (Directive to Take Action)

Your Reference Committee heard mixed testimony on Resolution 403. Some supported forming a national task force to address obesity, while others testified that the maternal morbidity and mortality crisis is too multifaceted to adequately be captured by effects of obesity. It was noted in online testimony that the way the resolution is written, while not intentional, might be interpreted as blaming minority women for being obese and that any task force created should evaluate and address the root causes of obesity. Others spoke in favor of referral due to the need for evidence-based reframing of the original resolution.

Additional testimony noted there is confusion as to whether said National Task Force would be created and led by our AMA, or if our AMA would advocate for the creation of a task force of which it would be a stakeholder. The Council on Science and Public Health noted that they are working on a series of reports with the Council on Medical Service to address maternal health, with the first report expected in November of 2021. Due to the confusion around this resolution and the extensive work already underway at the AMA, your Reference Committee recommends referral for decision to determine the best path forward.
Madam Speaker, this concludes the report of Reference Committee D. I would like to thank Robert L. Dannenhoffer, MD, Amish Dave, MD, Hillary Johnson-Jahangir, MD, Shawn Jones, MD, Daniel Pfeifle, MD, Neha Siddiqui, and all those who testified before the Committee as well as our AMA staff Andrea Garcia, Amy Cadwallader, Rebecca Benson, Regan Butchness, Geoff Hollett, and Katherine Kettering.
