

Medical Education Committee June 2021 Update

Your AMA-YPS Medical Education Committee has been continuing to monitor developments within the ABMS Vision Initiative such as remediation programs for loss of certification, certification standards, and other ongoing discussions. Feedback and additional members are welcome.

In addition, your Medical Education committee continues to brainstorm areas for improved AMA Policy and Advocacy with regard to implicit bias and USMLE scoring.

Finally, expect a survey from the Medical Education committee this summer regarding your experience with the ABMS Continuing Certification process. Please fill it out so we can get feedback to key decision makers!"
