The Morrill Act and Its Impact on the Diversity of the Physician Workforce
Reference Committee C

EXECUTIVE SUMMARY

This report was written in response to Resolution 308 brought forth by the Medical Student Section at the 2022 Annual Meeting of the House of Delegates. This resolution was referred for decision due to concern about legal implications of the first resolve related to both federal and state laws regarding affirmative action, land grant status, and federal trust responsibilities. To inform this action, a management report was subsequently submitted to the Board of Trustees (BOT) entitled “University Land Grant Status in Medical School Admissions.” The management report summarized concerns about implementing original Resolution 308-A-22 due to unknown legal implications and potentially unintended and negative consequences for communities that have been historically excluded from medicine. Also, it emphasized the importance of improving the health status of American Indian and Alaska Native (AI/AN) communities and increasing the number of AI/AN physicians who are uniquely qualified to provide care to these communities as well as the need be better understand the Morrill Act and its impact on efforts to diversify the physician workforce. Thus, the management report recommended that in lieu of Resolution 308-A-22, the AMA “study the historical and economic significance of the Morrill Act as it relates to its impact on diversity of the physician workforce.”

This report summarizes the extensive history of land acquisition, public education, federal recognition of tribes, the Morrill Act, economic impacts, and current physician workforce. It also reviews the role of the American Medical Association in that history as well as more recent improvement efforts. The report addresses concerns cited by the original author and notes the substantial role that medical education and organized medicine has played and can continue to play for the betterment of the physician workforce and AI/AN students and populations. Diversification of the physician workforce is imperative to meeting the health care needs in underserved communities across the U.S., particularly AI/AN populations. Medical education and organized medicine have much to learn from tribal nations, schools, and agencies to provide more culturally responsive information, understanding, and support. The report offers recommendations to strengthen its existing policies and provide leadership in more actionable efforts.
REPORT OF THE BOARD OF TRUSTEES

B of T Report 31-A-24

Subject: The Morrill Act and Its Impact on the Diversity of the Physician Workforce

Presented by: Willie Underwood, III, MD, MSc, MPH, Chair

Referred to: Reference Committee C

INTRODUCTION

At the 2022 Annual Meeting of the House of Delegates, the Medical Student Section authored Resolution 308 that asked the American Medical Association (AMA) to:

(1) work with the Association of American Medical Colleges, Liaison Committee on Medical Education, Association of American Indian Physicians, and Association of Native American Medical Students to design and promulgate medical school admissions recommendations in line with the federal trust responsibility; and (2) amend Policy H-350.981, “AMA Support of American Indian Health Career Opportunities,” by addition to read as follows: (2) Our AMA support the inclusion of American Indians in established medical training programs in numbers adequate to meet their needs. Such training programs for American Indians should be operated for a sufficient period of time to ensure a continuous supply of physicians and other health professionals. These efforts should include, but are not limited to, priority consideration of applicants who self-identify as American Indian or Alaska Native and can provide some form of affiliation with an American Indian or Alaska Native tribe in the United States, and robust mentorship programs that support the successful advancement of these trainees. (3) Our AMA utilize its resources to create a better awareness among physicians and other health providers of the special problems and needs of American Indians and that particular emphasis be placed on the need for stronger clinical exposure and a greater number of health professionals to work among the American Indian population. (5) Our AMA acknowledges long-standing federal precedent that membership or lineal descent from an enrolled member in a federally recognized tribe is distinct from racial identification as American Indian or Alaska Native and should be considered in medical school admissions even when restrictions on race-conscious admissions policies are in effect, (6) Our AMA will engage with the Association of Native American Medical Students and Association of American Indian Physicians to design and disseminate American Indian and Alaska Native medical education curricula that prepares trainees to serve AI/AN communities.

This resolution was referred for decision, due to concern about legal implications of the first resolve related to both federal and state laws regarding affirmative action, land grant status, and federal trust responsibilities. To inform this action, a management report was subsequently submitted to the Board of Trustees (BOT) entitled “University Land Grant Status in Medical School Admissions.” That report noted the central issue is improving the health status of AI/AN communities and the need to increase the number of AI/AN physicians who are uniquely qualified to provide culturally humble care to these communities. Further, it noted there may be risks associated with implementing original Resolution 308-A-22 due to unknown legal implications and potentially unintended and negative consequences for communities that have been historically
excluded from medicine. The management report identified a need to further understand all
components of the Morrill Act that may impact efforts to diversify the physician workforce prior to
developing any new policy recommendations. It recommended that in lieu of Resolution 308-A-22,
the AMA:

1. Work with the Association of American Medical Colleges, American Association of
Colleges of Osteopathic Medicine, Association of American Indian Physicians, and
Association of Native American Medical Students to increase representation of American
Indian physicians in medicine by promoting effective practices in recruitment,
matriculation, retention and graduation of American Indian medical students. (Directive to
Take Action)

Opportunities,” by addition and deletion to read as follows:
(2) Our AMA support the inclusion of American Indians in established medical training
programs in numbers adequate to meet their needs. Such training programs for American
Indians should be operated for a sufficient period of time to ensure a continuous supply of
physicians and other health professionals, prioritize consideration of applicants who self-
identify as American Indian or Alaska Native and can provide some form of affiliation
with an American Indian or Alaska Native tribe in the United States, and support the
successful advancement of these trainees. (3) Our AMA utilize its resources to create a
better awareness among physicians and other health providers of the special problems and
needs of American Indians and that particular emphasis be placed on the need for stronger
clinical exposure and a greater number of health professionals to work among the
American Indian population. (5) Our AMA acknowledges long-standing federal precedent
that membership or lineal descent from an enrolled member in a federally recognized tribe
is distinct from racial identification as American Indian or Alaska Native and should be
considered in medical school admissions even when restrictions on race-conscious
admissions policies are in effect. (Modify Current HOD Policy)

3. Study the historical and economic significance of the Morrill Act as it relates to its
impact on diversity of the physician workforce. (Directive to Take Action)

This BOT report is in response to Recommendation #3 above.

BACKGROUND

To better understand the Morrill Act and its impact, it is important to review the history of land
acquisition and public education as well as the federal recognition of tribes.

Public education and land acquisition

Support for public education was realized early in the formation of the republic. According to the
Northwest Ordinance of 1787, “Knowledge, being necessary to good government and the
happiness of mankind, schools and the means of education shall forever be encouraged.” Those
who did receive instruction were primarily white children. Financing for early schools varied and
often charged tuition. Thus, many children were not included, depending on income, race,
ethnicity, gender, geographic location, and other reasons. Some rural areas had no schools. The
nation’s leaders at the time “believed strongly that preserving democracy would require an
educated population that could understand political and social issues and would participate in civic
life, vote wisely (only white men could vote), protect their rights and freedoms, and resist tyrants
Free public education began to expand in the 1830s, with states taking on the provision of public education. Land acquisition, however, was key to implementing such education widely. The largest occupier and ‘owner’ of such land at the time were American Indians — the native and original caregivers of what is now the United States.

By 1887, American Indian tribes owned 138 million acres. However, the passage of the General Allotment Act of 1887 (The Dawes Act) greatly impacted such ownership as their land became subject to state and local taxation, of which many could not afford. By 1934, the total had dropped to 48 million acres. The Indian Reorganization Act of 1934 (IRA) tamed this era of allotment and marked a shift toward the promotion of tribal self-government. Subsequent Congressional acts impacting tribes and their land — ownership, use, and development — include the following:

- Indian Mineral Leasing Act: 1938
- Indian Self-Determination and Education Assistance Act: 1975
- Indian Mineral Development Act: 1982
- Indian Tribal Energy Development and Self-Determination Act: 2005
- Indian Tribal Energy Development and Self-Determination Act Amendments: 2017

There are approximately 2.4 billion acres in today’s United States. About 56 million acres of that land (2.3%) is currently held in trust by the U.S. for various American Indian tribes and individuals, making up the majority of American Indian land. With trust land, the federal government holds legal title but the beneficial interest remains with the individual or tribe. Trust lands held on behalf of individuals are known as allotments. Fee land, on the other hand, is purchased by tribes whereby the tribe acquires legal title under specific statutory authority.

The Morrill Act and land-grant universities

In 1862, Congress passed the Morrill Act named after Senator Justin Morrill of Vermont. “This act made it possible for states to establish public colleges funded by the development or sale of associated federal land grants. The original intention was to fund colleges of agriculture and mechanical arts. Over 10 million acres provided by these grants were expropriated from tribal lands of Native communities. The new land-grant institutions, which emphasized agriculture and mechanic arts, opened opportunities to thousands of farmers and working people previously excluded from higher education.” Much of this land was taken from American Indian tribes for the benefit of white people by way of treaties and agreements (many of which the federal government did not uphold its end) as well as seizure. In other words, “The government took the land for which it paid little or nothing, from tribes with little bargaining power, that were impoverished, and that were sometimes subject to threats to withhold rations and other benefits if they did not comply.” These now ‘public lands’ were surveyed into townships, and sections were reserved for public schools; however, the land itself was often sold off, with proceeds used to fund the school program. “The system invited misuse by opportunists, and substantial portions of the educational land-grants never benefited education.” Support for land-grants was a significant factor in providing education to white American children.

By way of the Morrill Act, the government granted each state 30,000 acres of public land, issued to its Congressional representatives and senators to be used in establishing a “land grant” university. Some of the land sales financed existing institutions while others chartered new schools. This allocation grew to over 100 million acres. The Morrill land grants put into place a national system of state colleges and universities. Examples of major universities that were chartered as land-grant schools are Cornell University, Washington State University, Clemson University, and University of Nebraska-Lincoln.
Following the Civil War, a Second Morill Act was passed in 1890 to address the exclusion of Black individuals from these educational opportunities due to their race. “It required states to establish separate land-grant institutions for Black students or demonstrate that admission was not restricted by race. The act granted money instead of land.” The 1890 Foundation provides additional information about these 19 historically Black colleges and universities (HBCUs), which include Tuskegee University, Tennessee State University, and Alabama A&M University. In 1994, a third land-grant act was passed — the Equity in Educational Land-Grant Status Act — that bestowed land-grant status to American Indian tribal colleges. As a result, these colleges are referred to as the “1994 land-grants.” Today’s land grant university (LGU) system is comprised of institutions resulting from the above-mentioned acts passed in 1862 (57 original), 1890 (19 HBCUs), and 1994 (35 Tribal). “LGUs are located in all 50 states as well as the District of Columbia and six U.S. territories. Of note, the “1994 institutions receive fewer federal funds administered by National Institute of Food and Agriculture — in total — than 1862 and 1890 institutions, and they are ineligible for certain grant types available to 1862 and 1890 institutions. Whereas the 1862 and 1890 institutions receive federal capacity funds specific to agricultural research and extension (which brings research to the public through nonformal education activities), 1994 institutions do not. Although 1994 institutions have more limited enrollment and offer fewer postsecondary degrees than 1862 and 1890 institutions, some argue that funding for agricultural research and extension at the 1994 institutions is insufficient and should be increased.”

Education of American Indians

The inaccurate perception of American Indians as unintelligent and uncivilized led Congress to pass the Indian Civilization Act in 1819 which paid missionaries to educate Natives and promote the government’s notion of civility. Most American Indian children at that time were forcefully relocated and brought to these schools to begin the assimilation into the “Western way of life” under the authority of that Act — thus beginning the troubled history of American Indian boarding schools that is still felt by current generations. One such school built in 1879, the Carlisle Indian Industrial School, coined the term “Kill the Indian to save the man” summarizing a belief system to erase Native culture through assimilation. These children were forcibly separated from their families and not allowed to practice their spirituality, speak their language, or live according to their culture under threat of punishment. They were even given new names. These practices continued through the 1960s. In 1969, a Senate report of the Committee on Labor and Public Welfare, entitled “Indian Education: A National Tragedy--A National Challenge,” summarized the devastating effects of forced assimilation of Native children and the failures of the education system where students also experienced physical abuse, sexual violence, hunger, forced sterilizations, and exposure to diseases. The trauma associated with this contributes to a well-documented historical trauma that has been correlated to the high number of suicides and health inequities experienced by American Indians in the U.S. This trauma has had a devastating impact on the potential number of students who consider enrollment in higher education due to a distrust of any system associated with the U.S. government. Many who have been directly affected by historical traumas have to overcome barriers like depression or other chronic diseases to participate in a system that still does not align to their way of knowing. There was little consideration for the higher education of American Indians (nor how to include a non-colonial perspective) until 1972 with the formation of the American Indian Higher Education Consortium (AIHEC). Through its network of tribal colleges and universities (TCUs), AIHEC “provides leadership and influences public policy on American Indian higher education issues through advocacy, research, and program initiatives; promotes and strengthens indigenous languages, cultures, communities, and tribal nations; and through its unique position, serves member institutions and emerging TCUs.”
American Indian affairs and federal recognition of tribes

In 1775, Congress created a Committee on Indian Affairs under the leadership of Benjamin Franklin. The U.S. Constitution (Article I, Section 8, Clause 3) gave Congress the power “to regulate commerce with foreign nations, and among the several States, and with the Indian tribes.” The Bureau of Indian Affairs (BIA) — known over the years as the Indian Office, the Indian Bureau, the Indian Department, and the Indian Service — was established in 1824 to oversee and carry out the government’s trade and treaty relations with the tribes. The BIA received statutory authority from Congress in 1832; in 1849, it was transferred to the newly created U.S. Department of the Interior. “Over the years, the BIA has been involved in the implementation of federal laws that have directly affected all Americans. The General Allotment Act of 1887 opened tribal lands west of the Mississippi to non-Indian settlers, the Indian Citizenship Act of 1924 granted American Indians and Alaska Natives U.S. citizenship and limited rights to vote, and the New Deal and the Indian Reorganization Act of 1934 restored self-determination and dictated a model the United States expected tribal governments to use. The World War II period of relocation and the post-War termination era of the 1950s led to the activism of the 1960s and 1970s that saw the takeover of the BIA’s headquarters and resulted in the creation of the Indian Self-Determination and Education Assistance Act of 1975. This act as well as the Tribal Self-Governance Act of 1994 have fundamentally changed how the federal government and the tribes conduct business with each other.” Although the BIA was once responsible for providing health care services to American Indians and Alaska Natives, that role was legislatively transferred to the U.S. Department of Health, Education, and Welfare (now known as the Department of Health and Human Services) in 1954. It remains there under the auspices of the Indian Health Service (IHS). However, funding for this continues to be a problem. In 2019, IHS spending per capita was only $4,078 while the national average spending per capita was $9,726. At that time, it was also reported that American Indians and Alaska Natives (AI/AN) had a life expectancy 5.5 years less than the U.S. all races population (73.0 years compared to 78.5 years) and “die at higher rates than other Americans in many categories, including chronic liver disease and cirrhosis, diabetes mellitus, unintentional injuries, assault/homicide, intentional self-harm/suicide, and chronic lower respiratory diseases.” Groups such as the Tribal Sovereign Leaders on the national Tribal Budget Formulation Workgroup (TBFWG) have provided, and continue to provide, significant insights to inform IHS budget requests.

According to the BIA, “a federally recognized tribe is an AI/AN tribal entity that is recognized as having a government-to-government relationship with the United States, with the responsibilities, powers, limitations, and obligations attached to that designation, and is eligible for funding and services from the BIA. Furthermore, federally recognized tribes are recognized as possessing certain inherent rights of self-government (i.e., tribal sovereignty) and are entitled to receive certain federal benefits, services, and protections because of their special relationship with the United States.” Over the years, most of today’s federally recognized tribes received federal recognition status by way of treaties, acts of Congress, presidential executive orders or other federal administrative actions, or federal court decisions. In 1978, the Department of the Interior issued procedures for federal acknowledgment of Indian tribes to more uniformly handle requests — found in Part 83 of Chapter 25 of the Code of Federal Regulations. In 1994, Congress enacted the Federally Recognized Indian Tribe List Act. It formally established three ways to achieve federal recognition: (1) by act of Congress, (2) by the administrative procedures under 25 C.F.R. Part 83, or (3) by decision of a United States court. Congress has the authority to terminate a relationship with a tribe, and only Congress can restore its federal recognition. The act also requires the Secretary of the Interior to annually publish information on federally recognized tribal entities.
As of January 2023, there were 574 federally recognized Tribal entities. There are also many tribes that are not state or federally recognized. There are 324 federally recognized American Indian reservations where 13 percent of the AI/AN population lives. The 2020 Census indicates that 87 percent live outside of tribal statistical areas. It also shows that 9.1 million people identify as AI/AN alone or in combination (2.9 percent of total U.S. population).

**DISCUSSION**

**Economic and educational impacts**

The Morill Act, as well as the Homestead Act of 1862, had a significant impact on American expansion. The Homestead Act encouraged western migration by providing settlers with 160 acres of land. Such settlers were required to live on and cultivate the land. After five years, they were entitled to the property upon payment of a small filing fee. While they certainly fostered prosperity and educational opportunities for new American settlers, these came at the expense of the original people — American Indians. The economic significance of these acts cannot be understated. In 2019, sixteen land-grant universities retained over half a million acres of Indigenous lands, generating at least $8.7 million. See Appendix A for a table of remaining Morrill Act lands and revenue by university.

In addition to the economic impact, thousands of American Indian families were affected by the Indian Civilization Act and boarding schools. Given the lingering effects to this day, it stands to reason that many AI/AN students have a negative attitude toward the education system. According to the Bureau of Indian Education (BIE), “Native youth have the lowest high school graduation rate of students across all schools. Nationally, the AI/AN high school graduation rate is 69 percent, far below the national average of 81 percent.” The BIE funds elementary and secondary schools on 64 reservations in 23 states, serving approximately 42,000 Indian students. These BIE schools hold an average graduation rate of 53 percent. The BIE also serves AI/AN post-secondary students through higher education scholarships, supports funding for tribal colleges and universities, and directly operates two post-secondary institutions — Haskell Indian Nations University in Kansas and the Southwestern Indian Polytechnic Institute in New Mexico.

**Medical education and the physician workforce**

Significant school dropout rates and lower enrollment in higher education have negatively impacted AI/AN representation in medical education and the physician workforce. According to 2023-2024 data from the Association of American Medical Colleges (AAMC), 1,045 AI/AN students were enrolled in MD-granting medical schools (about 1 percent of the total student population). Further, only 188 AI/AN students graduated from MD-granting medical schools. This significant decline from enrollment to graduation is very concerning; medical education needs to figure out why and what to do about it. The entire educational pathway (PreK-12 and undergraduate) may need to be considered to help AI/AN students to prepare for their studies, promote a sense of belonging, and avail themselves of mentorship opportunities. Tribes have a vested interest in the training of AI/AN students, given they are more likely to return to and serve their own communities as physicians. Such efforts will ultimately foster tribal self-governance and self-determination.

Several universities have taken steps to increase AI/AN representation in medical schools. In 1973, the University of North Dakota launched the Indians Into Medicine (INMED) program, which has recruited, supported, and trained 250 AI/AN physicians. This program has served as a model for other health professions within the university as well as for other medical schools that receive IHS
funding. Since many students face financial hardship, INMED offers a free summer program called Med Prep that provides students with stipends, and it helps its medical school students identify potential scholarship options. The university went one step further in 2020 to launch the country’s first PhD. program in Indigenous health.\textsuperscript{25} Another example is Oregon Health & Science University (OHSU) School of Medicine and its Wy’east Pathway, a 10-month postbaccalaureate program for AI/AN students who unsuccessfully applied to medical school, have an MCAT score below a certain cutoff, or lack clinical experience. The program provides biomedical and MCAT classes as well as cultural support and skills-building to promote success in medical school.\textsuperscript{26} Not only do programs like these directly support AI/AN students, but they also promote collaboration with and inclusion of non-indigenous allies. This combination can help to turn the tide on the workforce issue.

The impact of low representation in medical schools is evident when examining the diversity of physician workforce. In 2022, 0.3\% of active physicians identified as AI/AN.\textsuperscript{27} According to a 2018 report from the U.S. Government Accountability Office, the vacancy rate at IHS clinics among staff physician positions was about 29\% across the eight IHS geographic regions; the highest vacancy was 46\% in the areas servicing Bemidji, Minnesota, and Billings, Montana.\textsuperscript{28} In addition to representation in practicing medicine, there are also deficits in AI/AN representation in academic positions. One study found that, compared with their white peers, AI/AN individuals had 48\% lower odds of holding a full-time faculty position post residency.\textsuperscript{29}

As mentioned in other parts of this report, there is distrust in colonial constructs (U.S. laws, policies, and institutions), but there may also be distrust in the colonial medicine through IHS because of the history of forced sterilization and because traditional forms of medicine were outlawed (as well as any religious/cultural beliefs associated with them). In fact, the Department of the Interior’s 1883 Code of Indian Offenses noted that “any medicine man convicted of encouraging others to follow traditional practices was to be confined in the agency prison for not less than 10 days or until he could provide evidence that he had abandoned his beliefs.”\textsuperscript{30} This context has given rise to a distrust of medicine and medical education that continues today.

In June 2023, the Supreme Court of the U.S. (SCOTUS) issued a ruling on affirmative action that eliminated race as a consideration in college and universities’ admission processes. This ruling should not change tribal colleges; however, will it likely impact AI/AN students who attend non-tribal institutions because most wrongly collect tribal identity as a racial category. “Most, if not all, mainstream colleges and universities rely entirely on self-reporting when it comes to determining tribal identity of students. This means if a Native student doesn’t indicate they are a tribal citizen, then they are not counted as such.”\textsuperscript{31} This lack of data can impact the understanding of student enrollment as well as funding opportunities. It is critical to re-emphasize that “Native American” is not only a racial category but also the designation which gives those who are enrolled in federally recognized tribes a protected classification by treaty and is not subject to the SCOTUS decision on race/ethnicity. Many schools may not include identifying Native Americans in their admissions consideration as they may fear violation of the SCOTUS decision.

The AMA’s role: accountability and restitution

The AMA and its members play a complicated role in the history of American Indians. AMA members were party to the claiming of land in the “Western territories” in the mid-1850s, as described in the A-1857 report “Report on the Fauna and Medical Topography of Washington Territory.” AMA archives contain a 1865 report entitled “On Some Causes Tending to Promote the Extinction of the Aborigines of America” which details study of the Onondoga tribe, concluding “But those of us who pity and strive to arrest the downward course of this remnant of the original
lords of the forest, may delay what we are wholly unable to prevent, for I much fear that before the poor Indian has learned the laws of his physical nature and how to obey them, economy of time and means, industry, and reliance upon his own muscles and broad acres for his support, instead of looking for the government to hire his teacher and physician, and for his wants to be met by others, without forecast and plan of us own — before these radical changes in his habits are effected — the waning remnant of the Onondagas will forever have passed away.32

Physicians were involved in American Indian boarding schools, the development of the Indian Health Service, and the study of illnesses and healing practices on AI/AN tribes. Their works were published in JAMA and included:

- The Medicine and Surgery of the Winnebago and Dakota Indians (1883)
- Improved Sanitary and Social Conditions of the Seminoles of Florida (1896)
- Indian Method of Treating Measles (1903)
- The Indian Medical Service (1913)

Past harms also include the AMA’s role in promulgating discriminatory practices resulting from the Flexner Report, a landmark 1910 criticism of U.S. medical education resulting in a reduction in the number of medical schools including the closing of 5 out of the 7 historically black medical schools. Past decisions such as these continue to negatively impact populations in need. The AMA acknowledges that AI/AN populations experience significant health disparities up to the present including lower access to care and underfunding of public programs such as the Indian Health Service serving AI/AN communities. In addition, AI/AN persons continue to be severely underrepresented in the physician and healthcare workforce.

The AMA launched various supportive efforts such as:

- Asked the federal government to step in to stop the spread of trachoma in Native communities (A-1924) and provide better health services for the population (A-1929);
- Issued AMA Statement on Infant Mortality (A-1968);
- Advocated for the transfer of functions relating to health and hospitalization of American Indians from the Bureau of Indian Affairs to the U.S. Public Health Service (I-1953);
- Appealed for more funding for hospitals and health services on reservations (I-1957);
- Collaborated with the IHS on efforts related to health care delivery and health aide training programs (I-1970);
- Led large-scale study of health care for American Indians that was used to guide the Senate’s “Indian Health Care Improvement Act” of 1976 (I-1973);
- Created Project USA to recruit physicians to medically underserved areas, including AI/AN reservations (I-1975);
- Sought to exempt Indian Health Services from competitive procurement practices regulations (A-1984);
- Initiated a project with the AAIP to improve health care for American Indians (A-1995);
- With the National Medical Association, established the Commission to End Health Care Disparities in 2004 – a collaboration of health care organizations to address racial and ethnic health care disparities and diversity in the physician workforce.
- In 2013, the AMA launched its innovative “Accelerating Change in Medical Education” initiative to rebuild medical education from the ground up. Now known as the ChangeMedEd initiative, this effort has fostered collaborations with schools like Oregon Health & Science University School of Medicine and the University of Washington School of Medicine to increase the numbers of AI/AN students and faculty.
Although the Commission was retired in 2016, a new effort emerged in 2018 through the adoption of policy calling for a strategic framework to address health equity on a national scale — resulting in the creation of the AMA Center for Health Equity. Among other things, the Center is leading a task force that will “guide organizational transformation within and beyond the AMA toward restorative justice to promote truth, reconciliation, and healing in medicine and medical education. …The task force will inform and advise the AMA on ways to establish restorative justice dialogues between AMA leaders, physicians from historically marginalized racial and ethnic groups and their physician associations, and other critical stakeholders.”

Recently, an AMA article from December 2023 addressed vacancies at the Indian Health Service. Also, an AMA Update on January 8, 2024 discussed how tribal medical education programs could solve the rural health care crisis. Featuring Oklahoma State University College of Osteopathic Medicine’s unique partnership with The Cherokee Nation, the discussion addressed the importance of physicians truly understanding the communities they serve.

AMA Advocacy has been actively participating in efforts to support AI/AN populations and related physicians. Federal efforts in just the last two years include:

- **May 2022:** Letter sent to Senators Mastro and Murkowski in support of the Indian Health Service Health Professions Tax Fairness Act (S.2874).
- **April 2023:** Letter sent to U.S. Department of Agriculture addressing Menu Planning Options for American Indian and Alaska Native Students.
- **October 2023:** Letter sent to U.S. Department of Health and Human Services and Indian Health Service to highlight the importance of high quality, timely care for American Indians, Alaska Natives, and Native Hawaiians, particularly as it related to physician and medical student members.
- **February 2024:** Multi-organizational letter sent to both the House Appropriations Subcommittee on Interior and Senate Appropriations Subcommittee on Interior, Environment, and Related Agencies. This letter detailed support for the inclusion of $30 million in new funding in the FY2025 Interior, Environment, and Related Agencies appropriations bills to address chronic clinical staff shortages across Indian Country through GME programming.

The AMA Foundation (AMAF) funds the Physicians of Tomorrow Program. This program distributes a $10,000 tuition assistance scholarship to medical students approaching their final year of school with the goal of creating a diverse cohort of students who are dedicated to serving underserved communities. The AMAF is also bringing attention to AI/AN issues in medical education, as seen in a 2022 article featuring AMA members.

The AMA Ed Hub offers a variety of equity-related educational opportunities — from its panel discussion on Truth and Reconciliation in Medicine to its Prioritizing Equity series. Titles of relevance include:

- For Us, By Us: Advocating for Change in Native Health Policy
- Getting to Justice in Education
- The Root Cause and Considerations for Health Care Professionals
- How the Past Informs the Present in Healthcare

RELEVANT AMA POLICIES

The AMA has several policies in support of AI/AN tribes and communities as well as students and trainees in order to foster diversity of the physician workforce in an effort to improve public health including AI/AN populations. For example:
• **AMA Support of American Indian Health Career Opportunities H-350.981** promotes recruitment of AI/AN into health careers including medicine and the concept of AI/AN self-determination.

• **Promising Practices Among Pathway Programs to Increase Diversity in Medicine D-350.980** establishes a task force to guide organizational transformation within and beyond the AMA toward restorative justice to promote truth, reconciliation, and healing in medicine and medical education.

• **Underrepresented Student Access to US Medical Schools H-350.960** recognizes some people have been historically underrepresented, excluded from, and marginalized in medical education and medicine because of their race, ethnicity, disability status, sexual orientation, gender identity, socioeconomic origin, and rurality, due to racism and other systems of exclusion and discrimination.

• **Strategies for Enhancing Diversity in the Physician Workforce H-200.951** supports increased diversity across all specialties in the physician workforce in the categories of race, ethnicity, disability status, sexual orientation, gender identity, socioeconomic origin, and rurality.

• **Cultural Leave for American Indian Trainees H-350.957** recognizes the importance of cultural identity in fostering trainee success and supports accommodating cultural observances.

See Appendix B for the full policies. Additional policies can be accessed in the AMA Policy Finder database, which include:

• **Strategies for Enhancing Diversity in the Physician Workforce D-200.985**

• **Continued Support for Diversity in Medical Education D-295.963**

• **AMA Support of American Indian Health Career Opportunities H-350.981**

• **Indian Health Service H-350.977**

• **Desired Qualifications for Indian Health Service Director H-440.816**

• **Strong Opposition to Cuts in Federal Funding for the Indian Health Service D-350.987**

• **Improving Health Care of American Indians H-350.976**

• **Plan for Continued Progress Toward Health Equity H-180.944**

**SUMMARY AND RECOMMENDATIONS**

This report illuminates these concerns as well as the substantial part that medical education and organized medicine has played and can continue to play for the betterment of the physician workforce and AI/AN students and populations. Organizations like the Association of American Indian Physicians (AAIP) hold an esteemed role in such efforts. AAIP was established in 1971 by a group of 14 AI/AN physicians to support AI/AN communities and serve as an educational, scientific, and charitable nonprofit.

As stated in the AAMC’s 2018 publication, Reshaping the Journey: American Indians and Alaska Natives in Medicine, “Medical schools are chiefly responsible for the development of what the physician workforce looks like today and what it will look like in the future…. We must view this issue as a national crisis facing not just the American Indian-Alaskan Native (AI/AN) communities, but all medical schools and teaching hospitals…. We need transformative thinking and a new systems-based approach if we are to resolve this crisis with a plausible solution.”

Diversification of the physician workforce is imperative to meeting the health care needs in underserved communities across the U.S., particularly AI/AN populations. Also, medical education has much to learn from tribal nations, schools, and organizations to provide more culturally responsive information, understanding, and support.
The Board of Trustees that the following recommendations be adopted, and the remainder of this
report be filed. That our AMA:

1. Amend **AMA Support of American Indian Health Career Opportunities H-350.981** by
   addition to read:
   
   (4) Our AMA will continue to support the concept of American Indian self-
   determination as imperative to the success of American Indian programs and recognize
   that enduring acceptable solutions to American Indian health problems can only result
   from program and project beneficiaries having initial and continued contributions in
   planning and program operations to include training a workforce from and for these
   tribal nations.
   
   (6) Our AMA acknowledges the significance of the Morrill Act of 1862, the resulting
   land-grant university system, and the federal trust responsibility related to tribal
   nations.

2. Amend **AMA Support of American Indian Health Career Opportunities D-350.976** by
   deletion of clause (2) as having been accomplished by this report.
   
   (2) study the historical and economic significance of the Morrill Act as it relates to
   its impact on diversity of the physician workforce.

3. Amend **AMA Support of American Indian Health Career Opportunities D-350.976** by
   addition of a new clause to read:
   Convene key parties, including but not limited to the Association of American Indian
   Physicians (AAIP) and American Indian/Alaska Native (AI/AN) tribes/entities such as
   Indian Health Service and National Indian Health Board, to discuss the representation
   of AI/AN physicians in medicine and promotion of effective practices in recruitment,
   matriculation, retention, and graduation of medical students.

4. Reaffirm the following policies:
   a. **Indian Health Service H-350.977**
   b. **Underrepresented Student Access to US Medical Schools H-350.960**
   c. **Strategies for Enhancing Diversity in the Physician Workforce H-200.951**
   d. **Continued Support for Diversity in Medical Education D-295.963**
   e. **AMA Support of American Indian Health Career Opportunities D-350.976**.

APPENDIX B – RELEVANT AMA POLICIES

AMA Support of American Indian Health Career Opportunities H-350.981
AMA policy on American Indian health career opportunities is as follows:

(1) Our AMA, and other national, state, specialty, and county medical societies recommend special programs for the recruitment and training of American Indians in health careers at all levels and urge that these be expanded. (2) Our AMA supports the inclusion of American Indians in established medical training programs in numbers adequate to meet their needs. Such training programs for American Indians should be operated for a sufficient period of time to ensure a continuous supply of physicians and other health professionals, prioritize consideration of applicants who self-identify as American Indian or Alaska Native and can provide some form of affiliation with an American Indian or Alaska Native tribe in the United States, and support the successful advancement of these trainees. (3) Our AMA will utilize its resources to create a better awareness among physicians and other health providers of the special problems and needs of American Indians and particular emphasis will be placed on the need for stronger clinical exposure and a greater number of health professionals to work among the American Indian population. (4) Our AMA will continue to support the concept of American Indian self-determination as imperative to the success of American Indian programs and recognize that enduring acceptable solutions to American Indian health problems can only result from program and project beneficiaries having initial and continued contributions in planning and program operations. (5) Our AMA acknowledges long-standing federal precedent that membership or lineal descent from an enrolled member in a federally recognized tribe is distinct from racial identification as American Indian or Alaska Native and should be considered in medical school admissions even when restrictions on race-conscious admissions policies are in effect.

Promising Practices Among Pathway Programs to Increase Diversity in Medicine D-350.980
Our AMA will establish a task force to guide organizational transformation within and beyond the AMA toward restorative justice to promote truth, reconciliation, and healing in medicine and medical education.

Underrepresented Student Access to US Medical Schools H-350.960
Our AMA: (1) recommends that medical schools should consider in their planning: elements of diversity including but not limited to gender, racial, cultural and economic, reflective of the diversity of their patient population; (2) supports the development of new and the enhancement of existing programs that will identify and prepare underrepresented students from the high-school level onward and to enroll, retain and graduate increased numbers of underrepresented students; (3) recognizes some people have been historically underrepresented, excluded from, and marginalized in medical education and medicine because of their race, ethnicity, disability status, sexual orientation, gender identity, socioeconomic origin, and rurality, due to racism and other systems of exclusion and discrimination; (4) is committed to promoting truth and reconciliation in medical education as it relates to improving equity; (5) recognizes the harm caused by the Flexner Report to historically Black medical schools, the diversity of the physician workforce, and the outcomes of minoritized and marginalized patient populations; (6) will urge medical schools to develop or expand the reach of existing pathway programs for underrepresented middle school, high school and college aged students to motivate them to pursue and prepare them for a career in medicine; (7) will encourage collegiate programs to establish criteria by which completion of such programs will secure an interview for admission to the sponsoring medical school; (8) will recommend that medical school pathway programs for underrepresented students be free-of-charge or provide financial support with need-based scholarships and grants; (9) will encourage all physicians to actively participate in programs and mentorship opportunities that help expose underrepresented students to potential careers in medicine; and (10) will consider quality of K-12 education a social determinant of health and thus advocate for implementation of Policy H-350.979, (1) (a) encouraging state and local governments to make quality elementary and secondary education available to all.

Strategies for Enhancing Diversity in the Physician Workforce H-200.951
Our AMA: (1) supports increased diversity across all specialties in the physician workforce in the categories of race, ethnicity, disability status, sexual orientation, gender identity, socioeconomic origin, and rurality; (2) commends the Institute of Medicine (now known as the National Academies of Sciences, Engineering, and Medicine) for its report, "In the Nation's Compelling Interest: Ensuring Diversity in the Health Care Workforce," and supports the concept that a racially and ethnically diverse educational experience results in
better educational outcomes; (3) encourages the development of evidence-informed programs to build role models among academic leadership and faculty for the mentorship of students, residents, and fellows underrepresented in medicine and in specific specialties; (4) encourages physicians to engage in their communities to guide, support, and mentor high school and undergraduate students with a calling to medicine; (5) encourages medical schools, health care institutions, managed care and other appropriate groups to adopt and utilize activities that bolster efforts to include and support individuals who are underrepresented in medicine by developing policies that articulate the value and importance of diversity as a goal that benefits all participants, cultivating and funding programs that nurture a culture of diversity on campus, and recruiting faculty and staff who share this goal; and (6) continue to study and provide recommendations to improve the future of health equity and racial justice in medical education, the diversity of the health workforce, and the outcomes of marginalized patient populations.

Cultural Leave for American Indian Trainees H-350.957
Our AMA recognizes the importance of cultural identity in fostering trainee success and encourages residency programs, fellowship programs, and medical schools to accommodate cultural observances for trainees from American Indian, Alaska Native, and Native Hawaiian communities.

Strategies for Enhancing Diversity in the Physician Workforce D-200.985
1. Our AMA, independently and in collaboration with other groups such as the Association of American Medical Colleges (AAMC), will actively work and advocate for funding at the federal and state levels and in the private sector to support the following: (a) Pipeline programs to prepare and motivate members of underrepresented groups to enter medical school; (b) Diversity or minority affairs offices at medical schools; (c) Financial aid programs for students from groups that are underrepresented in medicine; and (d) Financial support programs to recruit and develop faculty members from underrepresented groups.
2. Our AMA will work to obtain full restoration and protection of federal Title VII funding, and similar state funding programs, for the Centers of Excellence Program, Health Careers Opportunity Program, Area Health Education Centers, and other programs that support physician training, recruitment, and retention in geographically underserved areas.
3. Our AMA will take a leadership role in efforts to enhance diversity in the physician workforce, including engaging in broad-based efforts that involve partners within and beyond the medical profession and medical education community.
4. Our AMA will encourage the Liaison Committee on Medical Education to assure that medical schools demonstrate compliance with their requirements for a diverse student body and faculty.
5. Our AMA will develop an internal education program for its members on the issues and possibilities involved in creating a diverse physician population.
6. Our AMA will provide on-line educational materials for its membership that address diversity issues in patient care including, but not limited to, culture, religion, race and ethnicity.
7. Our AMA will create and support programs that introduce elementary through high school students, especially those from groups that are underrepresented in medicine (URM), to healthcare careers.
8. Our AMA will create and support pipeline programs and encourage support services for URM college students that will support them as they move through college, medical school and residency programs.
9. Our AMA will recommend that medical school admissions committees and residency/fellowship programs use holistic assessments of applicants that take into account the diversity of preparation and the variety of talents that applicants bring to their education with the goal of improving health care for all communities.
10. Our AMA will advocate for the tracking and reporting to interested stakeholders of demographic information pertaining to URM status collected from Electronic Residency Application Service (ERAS) applications through the National Resident Matching Program (NRMP).
11. Our AMA will continue the research, advocacy, collaborative partnerships and other work that was initiated by the Commission to End Health Care Disparities.
12. Our AMA unequivocally opposes legislation that would dissolve affirmative action or punish institutions for properly employing race-conscious admissions as a measure of affirmative action in order to promote a diverse student population.
13. Our AMA will work with the AAMC and other stakeholders to create a question for the AAMC electronic medical school application to identify previous pipeline program (also known as pathway program) participation and create a plan to analyze the data in order to determine the effectiveness of pipeline programs.

Continued Support for Diversity in Medical Education D-295.963
Our AMA will: (1) publicly state and reaffirm its support for diversity in medical education and acknowledge the incorporation of DEI efforts as a vital aspect of medical training; (2) request that the Liaison Committee...
AMA policy on American Indian health career opportunities is as follows:

1. Our AMA, and other national, state, specialty, and county medical societies recommend special programs for the recruitment and training of American Indians in health careers at all levels and urge that these be expanded.

2. Our AMA supports the inclusion of American Indians in established medical training programs in numbers adequate to meet their needs. Such training programs for American Indians should be operated for a sufficient period of time to ensure a continuous supply of physicians and other health professionals, prioritize consideration of applicants who self-identify as American Indian or Alaska Native and can provide some form of affiliation with an American Indian or Alaska Native tribe in the United States, and support the successful advancement of these trainees.

3. Our AMA will utilize its resources to create a better awareness among physicians and other health providers of the special problems and needs of American Indians and particular emphasis will be placed on the need for stronger clinical exposure and a greater number of health professionals to work among the American Indian population.

4. Our AMA will continue to support the concept of American Indian self-determination as imperative to the success of American Indian programs and recognize that enduring acceptable solutions to American Indian health problems can only result from program and project beneficiaries having initial and continued contributions in planning and program operations.

5. Our AMA acknowledges long-standing federal precedent that membership or lineal descent from an enrolled member in a federally recognized tribe is distinct from racial identification as American Indian or Alaska Native and should be considered in medical school admissions even when restrictions on race-conscious admissions policies are in effect.

Indian Health Service H-350.977

The policy of the AMA is to support efforts in Congress to enable the Indian Health Service to meet its obligation to bring American Indian health up to the general population level. The AMA specifically recommends: (1) Indian Population: (a) In current education programs, and in the expansion of educational activities suggested below, special consideration be given to involving the American Indian and Alaska native population in training for the various health professions, in the expectation that such professionals, if provided with adequate professional resources, facilities, and income, will be more likely to serve the tribal areas permanently; (b) Exploration with American Indian leaders of the possibility of increased numbers of nonfederal American Indian health centers, under tribal sponsorship, to expand the American Indian role in its own health care; (c) Increased involvement of private practitioners and facilities in American Indian care, through such mechanisms as agreements with tribal leaders or Indian Health Service contracts, as well as normal private practice relationships; and (d) Improvement in transportation to make access to existing private care easier for the American Indian population. (2) Federal Facilities: Based on the distribution of the eligible population, transportation facilities and roads, and the availability of alternative nonfederal resources, the AMA recommends that those Indian Health Service facilities currently necessary for American Indian
care be identified and that an immediate construction and modernization program be initiated to bring these facilities up to current standards of practice and accreditation. (3) Manpower: (a) Compensation for Indian Health Service physicians be increased to a level competitive with other Federal agencies and nongovernmental service; (b) Consideration should be given to increased compensation for service in remote areas; (c) In conjunction with improvement of Service facilities, efforts should be made to establish closer ties with teaching centers, thus increasing both the available manpower and the level of professional expertise available for consultation; (d) Allied health professional staffing of Service facilities should be maintained at a level appropriate to the special needs of the population served; (e) Continuing education opportunities should be provided for those health professionals serving these communities, and especially those in remote areas, and, increased peer contact, both to maintain the quality of care and to avert professional isolation; and (f) Consideration should be given to a federal statement of policy supporting continuation of the Public Health Service to reduce the great uncertainty now felt by many career officers of the corps. (4) Medical Societies: In those states where Indian Health Service facilities are located, and in counties containing or adjacent to Service facilities, that the appropriate medical societies should explore the possibility of increased formal liaison with local Indian Health Service physicians. Increased support from organized medicine for improvement of health care provided under their direction, including professional consultation and involvement in society activities should be pursued. (5) Our AMA also support the removal of any requirement for competitive bidding in the Indian Health Service that compromises proper care for the American Indian population. (6) Our AMA will advocate that the Indian Health Service (IHS) establish an Office of Academic Affiliations responsible for coordinating partnerships with LCME- and COCA-accredited medical schools and ACGME-accredited residency programs. (7) Our AMA will encourage the development of funding streams to promote rotations and learning opportunities at Indian Health Service, Tribal, and Urban Indian Health Programs.

**Desired Qualifications for Indian Health Service Director H-440.816**

Our AMA supports the following qualifications for the Director of the Indian Health Service:

1. Health profession, preferably an MD or DO, degree and at least five years of clinical experience at an Indian Health Service medical site or facility. 2. Demonstrated long-term interest, commitment, and activity within the field of Indian Health. 3. Lived on tribal lands or rural American Indian or Alaska Native community or has interacted closely with an urban Indian community. 4. Leadership position in American Indian/Alaska Native health care or a leadership position in an academic setting with activity in American Indian/Alaska Native health care. 5. Experience in the Indian Health Service or has worked extensively with Indian Health Service, Tribal, or Urban Indian health programs. 6. Knowledge and understanding of social and cultural issues affecting the health of American Indian and Alaska Native people. 7. Knowledge of health disparities among Native Americans / Alaska Natives, including the pathophysiological basis of the disease process and the social determinants of health that affect disparities. 8. Experience working with Indian Tribes and Nations and an understanding of the Trust Responsibility of the Federal Government for American Indian and Alaska Natives as well as an understanding of the sovereignty of American Indian and Alaska Native Nations. 9. Experience with management, budget, and federal programs.

**Strong Opposition to Cuts in Federal Funding for the Indian Health Service D-350.987**

1. Our AMA will strongly advocate that all of the facilities that serve Native Americans under the Indian Health Service be adequately funded to fulfill their mission and their obligations to patients and providers. 2. Our AMA will ask Congress to take all necessary action to immediately restore full and adequate funding to the Indian Health Service. 3. Our AMA adopts as new policy that the Indian Health Service not be treated more adversely than other health plans in the application of any across the board federal funding reduction. 4. In the event of federal inaction to restore full and adequate funding to the Indian Health Service, our AMA will consider the option of joining in legal action seeking to require the federal government to honor existing treaties, obligations, and previously established laws regarding funding of the Indian Health Service. 5. Our AMA will request that Congress: (A) amend the Indian Health Care Improvement Act to authorize Advanced Appropriations; (B) include our recommendation for the Indian Health Service (IHS) Advanced Appropriations in the Budget Resolution; and (C) include in the enacted appropriations bill IHS Advanced Appropriations. 6. Our AMA supports an increase to the Federal Medical Assistance Percentage (FMAP) to 100% for medical services which are received at or through an Urban Indian Organization that has a grant or contract with the Indian Health Service (IHS) and encourages state and federal governments to reinvest Medicaid savings from 100% FMAP into tribally driven health improvement programs.
Improving Health Care of American Indians H-350.976
Our AMA recommends that: (1) All individuals, special interest groups, and levels of government recognize the American Indian people as full citizens of the U.S., entitled to the same equal rights and privileges as other U.S. citizens. (2) The federal government provide sufficient funds to support needed health services for American Indians. (3) State and local governments give special attention to the health and health-related needs of non-reservation American Indians in an effort to improve their quality of life. (4) American Indian religions and cultural beliefs be recognized and respected by those responsible for planning and providing services in Indian health programs. (5) Our AMA recognize the "medicine man" as an integral and culturally necessary individual in delivering health care to American Indians. (6) Strong emphasis be given to mental health programs for American Indians in an effort to reduce the high incidence of alcoholism, homicide, suicide, and accidents. (7) A team approach drawing from traditional health providers supplemented by psychiatric social workers, health aides, visiting nurses, and health educators be utilized in solving these problems. (8) Our AMA continue its liaison with the Indian Health Service and the National Indian Health Board and establish a liaison with the Association of American Indian Physicians. (9) State and county medical associations establish liaisons with intertribal health councils in those states where American Indians reside. (10) Our AMA supports and encourages further development and use of innovative delivery systems and staffing configurations to meet American Indian health needs but opposes overemphasis on research for the sake of research, particularly if needed federal funds are diverted from direct services for American Indians. (11) Our AMA strongly supports those bills before Congressional committees that aim to improve the health of and health-related services provided to American Indians and further recommends that members of appropriate AMA councils and committees provide testimony in favor of effective legislation and proposed regulations.

Plan for Continued Progress Toward Health Equity H-180.944
Health equity, defined as optimal health for all, is a goal toward which our AMA will work by advocating for health care access, research, and data collection; promoting equity in care; increasing health workforce diversity; influencing determinants of health; and voicing and modeling commitment to health equity.
REFERENCES

Policy **G-600.110**, “Sunset Mechanism for AMA Policy,” calls for the decennial review of American Medical Association (AMA) policies to ensure that our AMA’s policy database is current, coherent, and relevant:

1. As the House of Delegates adopts policies, a maximum ten-year time horizon shall exist. A policy will typically sunset after ten years unless action is taken by the House of Delegates to retain it. Any action of our AMA House that reaffirms or amends an existing policy position shall reset the sunset “clock,” making the reaffirmed or amended policy viable for another 10 years.

2. In the implementation and ongoing operation of our AMA policy sunset mechanism, the following procedures shall be followed: (a) Each year, the Speakers shall provide a list of policies that are subject to review under the policy sunset mechanism; (b) Such policies shall be assigned to the appropriate AMA councils for review; (c) Each AMA council that has been asked to review policies shall develop and submit a report to the House of Delegates identifying policies that are scheduled to sunset; (d) For each policy under review, the reviewing council can recommend one of the following actions: (i) retain the policy; (ii) sunset the policy; (iii) retain part of the policy; or (iv) reconcile the policy with more recent and like policy; (e) For each recommendation that it makes to retain a policy in any fashion, the reviewing council shall provide a succinct, but cogent justification; (f) The Speakers shall determine the best way for the House of Delegates to handle the sunset reports.

3. Nothing in this policy shall prohibit a report to the HOD or resolution to sunset a policy earlier than its 10-year horizon if it is no longer relevant, has been superseded by a more current policy, or has been accomplished.

4. The AMA councils and the House of Delegates should conform to the following guidelines for sunset: (a) when a policy is no longer relevant or necessary; (b) when a policy or directive has been accomplished; or (c) when the policy or directive is part of an established AMA practice that is transparent to the House and codified elsewhere such as the AMA Bylaws or the AMA House of Delegates Reference Manual: Procedures, Policies and Practices.

5. The most recent policy shall be deemed to supersede contradictory past AMA policies.

6. Sunset policies will be retained in the AMA historical archives.

See Appendix for a table of 2014 policies and recommended actions.

RECOMMENDATION
The Council on Medical Education recommends that the House of Delegates policies listed in the appendix to this report be acted upon in the manner indicated and the remainder of this report be filed. (Directive to Take Action)

Fiscal Note: $1,000.
## APPENDIX: RECOMMENDED ACTIONS

<table>
<thead>
<tr>
<th>Policy Number</th>
<th>Title</th>
<th>Text</th>
<th>Recommendations</th>
</tr>
</thead>
</table>
| D-275.958     | USMLE Step 1 Timing                                                  | Our AMA will ask the appropriate stakeholders to track United States Medical Licensing Examination (USMLE) Step 1 Exam timing and subsequently publish aggregate data to determine the significance of advanced clinical experience on Step 1 Exam performance.  
(Res. 911, I-14)                                                                 | Sunset - accomplished.  
After I-14, the Association of American Medical Colleges (AAMC), National Board of Medical Examiners (NBME), and Federation of State Medical Boards (FSMB) were notified of the HOD directive. It was also communicated via the MedEd Update newsletter to each medical school, residency program director, directors of medical education at U.S. teaching hospitals, and other interested groups. |
| D-275.981     | Potential Impact of the USMLE Step 2 CS and COMLEX-USA Level 2-PE on Undergraduate and Graduate Medical Education | Our AMA will: (1) continue to closely monitor the USMLE Step 2 CS and the COMLEX-USA Level 2-PE, collecting data on initial and final pass rates, delays in students starting residency training due to scheduling of examinations, economic impact on students, and the potential impact of ethnicity on passing rates; and (2) encourage residency program directors to proactively evaluate their access to resources needed to assist resident physicians who have not passed these examinations to remediate.  
USMLE Step 2 CS and the COMLEX-USA Level 2-PE were discontinued in 2021 and 2022 respectively.                                                                                                             |
| D.275.983     | Physicians’ Right to Reasonable Privacy Protection and the Federation Credentials Verification Service | Our AMA will request the Federation Credentials Verification Service (FCVS) to (1) add to its "Affidavit and Release" and "Authorization for Release of Records" forms appropriate language that: (a) allows physicians to revoke a prior authorization to the FCVS at any time through an affirmative action on the part of the physician (e.g., written notice) and (b) informs physicians their authorization will remain in effect unless and until revoked by the physician in accordance with guidance provided by the FCVS; and (2) clarify its release does not extend to liability which arises from the gross negligence or willful misconduct of FCVS.  
(BOT Rep. 22, A-04; Reaffirmed: CMS Rep. 1, A-14)                                                                 | Retain – still relevant. Amend title to read as follows:  
Physicians’ Right to Reasonable Privacy Protection and the Federation Credentials Verification Service  
After A-04, the FSMB was notified of this HOD directive.  
The current FCVS waiver does not contain language contained in the AMA policy. FSMB has shared this AMA policy with their FCVS department and legal staff for review and welcome any AMA language for consideration. |

| D-275.995 | Licensure and Credentialing Issues | Our AMA will: (1) support recognition of the Federation of State Medical Boards’ (FSMB) Credentials Verification Service by all licensing jurisdictions; and (2) encourage the National Commission on Quality Assurance (NCQA) and all other organizations to accept the Federation of State Medical Boards’ Credentials Verification Service, the Educational Commission for Foreign Medical Graduates’ Certification Verification Service, and the AMA Masterfile as primary source verification of credentials. Res. 303, I-00; Reaffirmation A-04; Modified: (CCB/CLRPD Rep. 2, A-14; Reaffirmed: BOT Rep. 3, I-14) | Retain - still relevant. Amend policy with change in title to read as follows:
Licensure and Credentialing Issues
Primary Source Verification of Credentials
Our AMA will: (1) support recognition of the Federation of State Medical Boards’ (FSMB) Credentials Verification Service by all licensing jurisdictions; and (2) encourage the National Commission on Quality Assurance (NCQA) and all other organizations to accept recognition of the Federation of State Medical Boards’ Credentials Verification Service, the Educational Commission for Foreign Medical Graduates’ Certification Verification Service, and the AMA Masterfile as primary source verification of credentials. |

| D-300.984 | Physician Reentry | Our AMA:
1. Will continue to collaborate with other appropriate organizations on physician reentry issues including research on the need for and the effectiveness of reentry programs.
2. Will work collaboratively with the American Academy of Pediatrics and other interested groups to convene a conference on physician reentry which will bring together key stakeholders to address the development of reentry programs as well as the educational needs of physicians reentering clinical practice.
3. Will work with interested parties to establish a physician reentry program (PREP) information data base that is publicly accessible to physician applicants and which includes information pertaining to program characteristics.
4. Will support efforts to ensure the affordability and accessibility, and to address the unique liability issues related to PREPs.
5. Will make available to all interested parties the physician reentry program (PREP) system Guiding Principles for use as a basis for all reentry programs: (a) Accessible: The PREP system is accessible by geography, time and cost. Reentry programs are available and accessible geographically across the United States and include national and regional pools of reentry positions. Reentering physicians with families or community ties are not burdened by having to relocate to attend a program. The length of time of reentry programs is standardized and is |

Retain – in part. Sunset clauses (2) and (3) as having been accomplished and (6) as no longer relevant. Amend policy to read as follows:

Our AMA:
1. Will continue to collaborate with other appropriate organizations on physician reentry issues including research on the need for and the effectiveness of reentry programs.
2. Will work collaboratively with the American Academy of Pediatrics and other interested groups to convene a conference on physician reentry which will bring together key stakeholders to address the development of reentry programs as well as the educational needs of physicians reentering clinical practice.
3. Will work with interested parties to establish a physician reentry program (PREP) information data base that is publicly accessible to physician applicants and which includes information pertaining to program characteristics.
4. Will support efforts to ensure the affordability and accessibility, and to address the unique liability issues related to PREPs.
5. Will make available to all interested parties the physician reentry program (PREP) system Guiding Principles for use as a basis for all reentry programs: (a) Accessible: The PREP system is accessible by geography, time, and cost. Reentry programs are available and accessible geographically across the United States and include national and regional pools of reentry positions. Reentering physicians with families or community ties are not burdened by having to relocate to attend a program. The length of time of reentry programs is standardized and is commensurate with the assessed clinical and... |
commensurate with the assessed clinical and educational needs of reentering physicians. The cost of reentry programs is not prohibitive to the physician, health care institutions or the health care system. b. Collaborative: The PREP system is designed to be collaborative to improve communication and resource sharing. Information and materials including evaluation instruments are shared across specialties, to the extent possible, to improve program and physician performance. A common nomenclature is used to maximize communication across specialties. Reentry programs share resources and create a common repository for such resources, which are easily accessible. c. Comprehensive: The PREP system is comprehensive to maximize program utility. Physician reentry programs prepare physicians to return to clinical activity in the discipline in which they have been trained or certified and in the practice settings they expect to work including community-based, public health, and hospital-based or academic practice. d. Ethical: The PREP system is based on accepted principles of medical ethics. Physician reentry programs will conform to physician licensure statues. The standards of professionalism, as stated in the AMA Code of Medical Ethics, must be followed. e. Flexible: The PREP system is flexible in structure in order to maximize program relevancy and usefulness. Physician reentry programs can accommodate modifications to program requirements and activities in ways that are optimal to the needs of reentering physicians. f. Modular: Physician reentry programs are modularized, individualized and competency-based. They are tailored to the learning needs of reentering physicians, which prevents the need for large, expensive, and standardized programs. Physicians should only be required to take those modules that allow them to meet an identified educational need. g. Innovative: Innovation is built into a PREP system allowing programs to offer state of the art learning and meet the diverse and changing needs of reentry physicians. Physician reentry programs develop and utilize learning tools including experimenting with innovative and novel curricular methodologies such as distance learning technologies and simulation. h. Accountable: The PREP system Has mechanisms for assessment and is open to evaluation. Physician reentry programs have an evaluation component that is comparable among all specialties. Program assessments use objective measures to evaluate physician's competence at time of entry, during the program and at time of completion. Program outcomes are measured. Reliability and validity of
Accountable: The PREP system has mechanisms for assessment and is open to evaluation. Physician reentry programs have an evaluation component that is comparable among all specialties. Program assessments use objective measures to evaluate physician's competence at time of entry, during the program and at time of completion. Program outcomes are measured. Reliability and validity of the measures are established. Standardization of measures exist across programs to assess whether or not national standards are being met. (i) Stable: A funding scheme is in place to ensure the PREP system is financially stable over the long-term. Adequate funding allows physician reentry programs to operate at sufficient and appropriate capacity. (j) Responsive: The PREP system makes refinements, updates, and other changes when necessary. Physician reentry programs are equipped to address systemic changes such as changes in regulations. Additionally, the PREP system is prepared to respond efficiently to urgent health care needs within society including mobilizing clinically inactive physicians temporarily into the workforce to attend to an acute public health crisis, such as a terrorist, biological, chemical, or natural disaster.

6. Our AMA will encourages each state that does not grant a full and unrestricted license to physicians undergoing reentry to develop a non-disciplinary category of licensure for physicians during their reentry process.

Remove references to “PREP” as it does not reflect current nomenclature.

REPORT 2 OF THE COUNCIL ON MEDICAL EDUCATION (A-24)
The Current Match Process and Alternatives (Resolution 302-A-23)

EXECUTIVE SUMMARY

This report was written in response to Resolution 302, brought forth by the Resident and Fellow Section at the 2023 Annual Meeting of the House of Delegates. This resolution was referred for study. Now AMA Policy D-310.944, it asks that the American Medical Association “study alternatives to the current residency and fellowship Match process which would be less restrictive on free market competition for applicants.”

This report summarizes the history of The Match® and time before The Match, differentiates between the application process versus The Match, explains aspects of The Match process as well as independent match processes, and offers perspective from the National Resident Matching Program® (NRMP®). The Council on Medical Education understands the concerns presented by the authors of Resolution 302-A-23 and their frustrations related to lack of control over their own destinies. This report illuminates the importance of ongoing communication and transparency by the NRMP as well as collaboration among all invested parties. Further, this report makes clear that there are no currently identified alternatives other than an unstructured, open market approach, which the Council believes would be detrimental to the majority of trainees in comparison to the current Match process. Thus, attention should be focused on what can be done to improve The Match and other specialty matches rather than focusing on its replacement, as a match process continues to be the best solution for trainees at this time.
REPORT OF THE COUNCIL ON MEDICAL EDUCATION

CME Report 02-A-24

Subject: The Current Match Process and Alternatives (Resolution 302-A-23)

Presented by: Cynthia Jumper, MD, MPH, Chair

Referred to: Reference Committee C

INTRODUCTION

At the 2023 Annual Meeting of the House of Delegates, Resolution 302-A-23 entitled “Antitrust Legislation Regarding the AAMC, ACGME, NRMP and Other Relevant Associations or Organizations” asked “that our American Medical Association study alternatives to the current residency and fellowship Match process which would be less restrictive on free market competition for applicants.” The Resident and Fellow Section (RFS), authors of the resolution, noted concerns related to preservation of the process of free market competition, antitrust laws, and The Match®. Their resolution stated, “The Match poses significant anticompetition concerns and the procompetitive effect of streamlining residency job applications and increasing percentage of position filled needs to be outweighed by the anticompetitive effect of the lack of negotiation power of residents.”1

The resolution, now American Medical Association (AMA) Policy D-310.944, was referred for study. This report seeks to address this directive by providing historical context, differentiating between the application process versus The Match, explaining aspects of The Match process as well as independent match processes, and offering perspective from the National Resident Matching Program® (NRMP®). It seeks to illuminate what can be done within the confines of The Match to make it better and clarify that there are no currently identified “alternatives” other than the free market approach. To provide context, The Match is defined by the NRMP as “a computerized mathematical algorithm, the matching algorithm, to place applicants into the most preferred residency and fellowship positions at programs that also prefer them.”2 It is intended to favor the rank list of the applicant.

BACKGROUND

History of The Match

The trainee internship experience began in the late 1800s and was formalized shortly thereafter. Such positions began to outnumber the students available. “In the early 1900s, competition among hospitals for interns and among medical students for good internships led to increasingly early offers of internships to students. By the 1940s, appointments were often made as early as the beginning of the junior year of medical school. ...From 1945 through 1951, efforts were made to enforce a uniform date for accepting offers. However, students were still faced with offers having very short deadlines, compelling them to accept or reject offers without knowing what other offers might be forthcoming.”3 Such challenges led to the creation of a centralized clearinghouse to allow for students to benefit from uniform appointment dates while reducing congestion and pressure.
The clearinghouse was created by the National Interassociation Committee on Internships, who later changed its name to the National Intern Matching Program (NIMP). It included national organizations such as the AMA (Council on Medical Education), American Hospital Association, Association of American Medical Colleges (AAMC) and federal hospitals involved in resident training. Dissatisfaction among students led to proposals of algorithms that were felt to be more equitable.

The NIMP was established as a 501c(3) and operated through the 1960s. In 1966, the Millis Commission Report, authorized by the AMA Council on Medical Education, examined medical education in the U.S., particularly the length and quality of graduate medical education. It supported a broader move to integrated residency training. The NIMP became the NIRMP in 1968. The organization, in 1972, revised its participation requirements such that The Match expanded to include all first-year resident positions and required all institutions participating in The Match to select U.S. senior students in allopathic medical schools through it. By 1975, the NIRMP had become the NRMP.

The NRMP oversees The Match, which is the mathematical algorithm to match applicants and programs to their most preferred ranked choices. In 2012, researchers Lloyd Shapley and Alvin Roth won the Nobel Prize in Economics for developing the “theory of stable allocations and the practice of market design” which led to the development of the algorithm used for The Match. They “pioneered theoretical concepts to understand and solve the matching problem and clarified those ideas and applied them to engineer algorithms that are now widely used in the real world.” The current algorithm has been used since 1998. The Match continues to be updated to address the changing needs of applicants and to yield a favorable match while producing a stable outcome.

In the past, osteopathic medical students could also participate in the American Osteopathic Association (AOA) national match process through the National Matching Services (NMS). Starting in July 2015, the AOA and the Accreditation Council for Graduate Medical Education (ACGME) began a transition to a single accreditation system (SAS) to combine the AOA and NRMP match programs. Between 2015 and 2020, AOA programs applied for accreditation to the ACGME, and if granted, these programs could take residents through the NRMP match. By 2020, most AOA programs had transitioned to the SAS or had withdrawn and were no longer taking new residents but were allowed to complete the training of the residents remaining in their programs under AOA accreditation until the last resident finished. The intent of the SAS was to foster inclusion for osteopathic medical students as well as residents at former AOA programs. Data from 2020-2023 indicates that Doctor of Osteopathic Medicine (DO) applicants have an increased match rate from 90.7% to 91.6%, which also correlates with the opening of more DO schools.

The intention of The Match is to make the best possible match for all participants and ensure the uniform process is fair, efficient, transparent, and reliable. Referred to as the Main Residency Match, it is part of a larger undertaking that begins with applying to and interviewing with training programs. Most applicants use the Electronic Residency Application Service® (ERAS®), a product of the AAMC, to apply to programs per their chosen specialty. This centralized online application service delivers applications and supporting documents to residency programs. Next, applicants register for The Match in the NRMP’s Registration, Ranking, and Results® (R3®) system. Applicants are invited to interview per the criteria set by each program. Both applicants and programs submit their rank order preferences in the R3 system by a predetermined deadline, usually in early March. The NRMP runs their matching algorithm according to the preferences submitted and all parties are notified of the results later that month. Matched applicants and
programs enter into an agreement. Unmatched applicants and programs may elect to participate in the NRMP’s Supplemental Offer and Acceptance Program (SOAP) during Match Week. See Appendix A for an infographic of this process. The NRMP website provides data on the Main Residency Match (including 2023) as well as research reports, survey reports, and research briefs.

The NRMP’s Main Residency All In Policy asserts that if a program is registering for the Main Residency Match®, then they must register and attempt to fill all positions through the Match (or another national matching plan). This policy only applies to those positions a program wishes to fill. Programs planning to participate in The Match cannot offer positions outside The Match. If that were to happen prior to program registration and activation, then the program is ineligible to enroll in The Match (unless the NRMP grants an exception). Per the Fellowship Match All In Policy, Specialties Matching Service® (SMS®) Match sponsors may voluntarily implement the All In Policy for their fellowship matches. AMA Policy D-310.977(6) “does not support the current ‘All-In’ policy for the Main Residency Match to the extent that it eliminates flexibility within the match process.”

In its current form, the NRMP contends that The Match process is uncongested, defers acceptance, promotes true preferences, and establishes a thick market “which allows for multi-specialty applications and couple matching (including for mixed-specialty couples).” It is built upon the following core components:

---

---

Independent match processes

According to the NRMP, “U.S. medical school graduates and students and graduates of international medical schools can be offered positions outside of the Main Residency Match provided it is in a program that does not participate in the Match and thus not subject to the All In Policy. No applicant can accept a position outside of the Match after the Rank Order List Certification Deadline.” Some programs choose to participate in an early match process, and the percentage of outside-the-match offers varies by specialty. Not all are affiliated with the NRMP.
For example, students in the Health Professions Scholarship Program and the Uniformed Services University of the Health Sciences who wish to apply for military PGY-1 positions go through a similar process overseen by the Joint Service Graduate Medical Education Selection Board. While they still use the ERAS system, military medical students complete a different application that includes ranking programs. Deadlines also differ, as materials are submitted late August through mid-October, and results are announced in mid-December. The military does not use a computer-generated algorithm, rather it is a process of discussions and negotiations. An applicant can be placed in a program that they did not even rank. Other examples include:

- Preventive Medicine and Public Health: First implemented in 2017, the American College of Preventive Medicine (ACPM) oversees their own match called the Residency Standardized Acceptance Process (SAP).

- Plastic Surgery and Ophthalmology: The San Francisco Residency Match, more commonly referred to as SF Match, is a residency and fellowship matching service that has been used by several specialties and subspecialties for over 40 years. It includes residencies in plastic surgery and ophthalmology, overseen by the American Council of Academic Plastic Surgeons and Association of University Professors of Ophthalmology respectively. It also currently includes 25 fellowship matches, ranging from abdominal transplant surgery to rhinology.

- Urology: For over 30 years, the American Urological Association, in conjunction with the Society of Academic Urologists, has overseen the Urology Residency Match Program.

- Neuromuscular medicine: Starting in 2020, the American Association of Neuromuscular & Electrodagnostic Medicine started its own standardized match process called the Neuromuscular Fellowship Application Portal that uses an online hub through which residents submit application materials, communicate with programs, and receive offers. The first cycle hosted a partial match process, whereby programs submitted rank lists but applicants did not rank programs. The following cycle was a full match process.

DISCUSSION

Before The Match and other match processes

The time before The Match and other match processes presented real challenges, added stress to the residency application process, and fueled unequal treatment. One reflection written about the time before The Match noted, “Medical students and hospitals once negotiated directly with each other. Competition for talent was fierce amid a tight labor market, with residency programs extending offers to medical students up to two years before graduation. This process had significant downsides: Students had to deal with exploding offers and felt pressure to commit to a program before getting sufficient exposure to different medical specialties. Medical students, residents, and hospitals all backed reform.” While The Match offered solutions to those who experienced life before it, a new generation of residency applicants has questioned its efficacy.

Perceived challenges faced by residency applicants

As summarized in the introduction, the RFS, as authors of the original resolution, noted concerns about lack of negotiation power of residents. Consternations were also raised regarding the possibility of residency/fellowship out-of-match offers being better than those in The Match;
however, there is no data to support this notion. Discussions of these concerns among trainees are
evident on social media platforms and the internet. For example, The Student Doctor Network, “a
non-profit educational website dedicated to building a diverse doctor workforce,” has hosted
forums that debate this very issue. In a 2021 forum called “What are the alternatives to the
Match? What do you think would happen if it were abolished?”, trainees raised several points for
consideration. They shared that it is within the realm of possibility that programs would have zero
incentive to increase wages to be more competitive if The Match went away. Without The Match
or some unified system of application, programs could try to fill their spots earlier and such timing
may not align with the applicant’s desired specialty training. In the non-physician job market, a
candidate often has to make a decision about accepting a position without knowing the full extent
of the employment details. The NRMP and other matches are not involved in any negotiations or
agreements between programs and applicants, and if what a program is willing to offer to an
applicant is unacceptable to the applicant, the applicant can simply not include that program in
their rank list.

The impact of The Match on competition for residency positions

Another concern raised by the RFS is alleged lack of competition. In 1890, Congress passed The
Sherman Act, the first antitrust law, followed in 1914 by two additional antitrust laws—the Federal
Trade Commission Act (which formed the FTC) and the Clayton Act. Challenges to The Match
were brought forth in a class-action lawsuit in 2002, alleging The Match as violating the Sherman
Antitrust Act as described in the AMA Journal of Ethics. However, U.S. Code 37b was passed
into law in 2004, entitled “Confirmation of antitrust status of graduate medical resident matching
programs,” to “confirm that the antitrust laws do not prohibit sponsoring, conducting, or
participating in a graduate medical education residency matching program, or agreeing to do so;
and ensure that those who sponsor, conduct or participate in such matching programs are not
subjected to the burden and expense of defending against litigation that challenges such matching
programs under the antitrust laws.”

Concern was also raised about The Match possibly having a negative impact on resident salaries. A
2006 economic study by Bulow and Levin is frequently cited to support this claim. However,
Bulow and Levin also noted that The Match “was developed for efficiency reasons, and on that
score, it appears to do quite well.” Research published since the Bulow-Levin paper does not
support their conclusions. Agarwal noted that “The Match is not the likely cause of low salaries.”
According to Konishi & Sapozhnikov, “competitive salary vector is the best-case scenario for
applicants in the decentralized market. [..] The reference salary vector adopted by Bulow and
Levin (2006) for the decentralized market outcome might not have a strong justification and could
be regarded as rather optimistic.” Also, it is important to consider that most resident salaries are
funded by clinical revenues from the sponsoring institution and federal government sources,
particularly Medicare graduate medical education funds from a budget set by Congress. Since
clinical revenue and institutional funding can vary by specialty and setting, disparities in pay may
result, even across residency programs at the same institution unfortunately.

Resolution 308 implied that a free-market approach may be more beneficial for trainees. As
described earlier in this report regarding the history of The Match and the era before its
implementation, the free market posed many problems. Returning to such a process would not
likely improve the challenges experienced previously. Economists agree that a free-market
approach is not without flaws. For example, “Apart from agriculture, few real-world markets
are perfectly competitive.” Roth asserts that a centralized matching system can improve the
welfare of all participants in that market and, depending on its design, can address the problems of
unraveling and the congestion. It seems that further analysis of what works well and what does
not work well is warranted in order to improve The Match process. As described in this report, the NRMP and others are committed to continued review and improvement.

The Council on Medical Education recently addressed mechanisms to advocate for the needs of residents in its report, “Organizations to Represent the Interests of Resident and Fellow Trainees” (CME 5-I-23), which was adopted at the Interim 2023 Meeting. It also reviewed duty hour standards; work conditions; the impact of private equity; and the roles of government agencies, accreditors, medical staff organizations, associations, and unions. The adoption of that report signifies renewed efforts to advocate for the interests of trainees.

**Coalition for Physician Accountability recommendations**

The **Coalition for Physician Accountability** (CPA) is comprised of representatives from national organizations (including the AMA) responsible for the oversight, education, and assessment of medical students and physicians throughout their medical careers. In April 2021, the CPA’s Undergraduate Medical Education-Graduate Medical Education Review Committee (UGRC) released 28 recommendations for comprehensive improvement of the UME-GME transition. The UGRC was comprised of several workgroups, one of which focused on the mechanics of the application/selection process from the graduate medical education perspective. The final recommendations were categorized according to themes and refer to the residency application process as well as The Match and other matching processes. Two themes of note address an equitable, mission-driven application review (Recommendations #14-20) as well as optimization of the application, interview, and selection processes (Recommendations #21-24). Specifically, Recommendation #23 states that “Innovations to the residency application process should be piloted to reduce application numbers and concentrate applicants at programs where mutual interest is high, while maximizing applicant placement into residency positions. Well-designed pilots should receive all available support from the medical community and be implemented as soon as the 2022-2023 application cycle; successful pilots should be expanded expeditiously toward a unified process.”

**Recent NRMP proposals**

The NRMP maintains that it is committed to considering ways to inform the transition to residency or improve the matching process. In 2021, the NRMP issued a statement on the feasibility of an early match. Specifically, NRMP was asked to pilot the Early Result and Acceptance Program (ERAP) proposed for obstetrics and gynecology. This pilot program was created through a grant provided by the AMA’s Reimagining Residency program. The NRMP concluded that an early match would disadvantage applicants, and that changes to the process could potentially cause behavior changes that could negatively affect outcomes for all participants.

To consider the feasibility of a proposed Two-Phase Main Residency Match (that would replace The Match and SOAP), the NRMP Board of Directors opened a call for comment period in August-September 2022. The goal was to “alleviate some of the stressors inherent in the current transition to residency based on available evidence.” After considering the over 8,000 responses to the call, the NRMP Board of Directors decided to not pursue the proposal as written, stating that although the benefits/advantages articulated by the community are significant, the risks/disadvantages are considered of greater consequence. The AAMC hosted several listening sessions with their constituency to discuss this two-phase proposal and issued a statement concluding that a long-term evaluation plan would be needed with a focus on “learners and equity.” The AAMC also noted that ERAS would still play a role in a two-phase match and recommended further discussions.
AMA ENGAGEMENT

The AMA has been actively engaged in monitoring this process, is in regular communication with the NRMP, and actively participates in the CPA. The AMA Medical Student Section (MSS) and RFS each offer to their members the opportunity to apply to represent the AMA on the NRMP Board. Both AMA sections have solicited for or nominated members every year for at least the last ten years. The NRMP board offers three seats for student directors and three seats for resident physician directors. The NRMP no longer has designated AMA seats for students or residents due to a change in their bylaws in 2017. To promote effective communication, fostering relationships among key parties is vital. The AMA will continue to look for opportunities to collaborate with the NRMP and other matching organizations.

Through the AMA’s ChangeMedEd initiative, efforts are underway across the continuum with visionary partners to create bold innovations. Specifically, Reimagining Residency is a grant program dedicated to promoting systemic change in graduate medical education (GME). “It supports bold and innovative projects that provide a meaningful and safe transition from undergraduate medical education to graduate medical education.” Several Reimagining Residency projects directly address the transition from undergraduate medical education (UME) to GME. “Right Resident, Right Program, Ready Day One,” a collaboration with the Association of Professors of Gynecology & Obstetrics (APGO), raises cross-specialty standards for the residency application and interview process. It promotes signaling to reduce the number of applications submitted by formalizing communication about true preferences. APGO has also developed an Alignment Check Index (ACI). This adjunct to AMA’s FREIDA platform seeks to better align applicant preferences and characteristics with those being sought by specific residency programs. A project at New York University (NYU), called the “Transition to Residency Advantage,” builds on experience with UME coaching to train a cadre of GME coaches and then effect a learner-driven warm handoff from UME to GME. Two additional projects, the “California Oregon Medical Partnership to Address Rural Disparities in Rural Education and Health” (COMPADRE) and the University of North Carolina’s “Fully Integrated Readiness for Service Training” (FIRST) are creating pathways to rural practice that entail dedicated pathways from medical school to residency that meet the needs of those areas. Also, the AMA helps to inform future GME advocacy by addressing concerns regarding the challenges faced by the current GME system. A 2023 compendium of such GME advocacy initiatives is available for review.

Council on Medical Education efforts

Since 2012, the Council on Medical Education has offered several reports that address residency and The Match as listed below. Additional Council reports can be accessed in the AMA Council Report Finder database.

- Organizations to Represent the Interests of Resident and Fellow Trainees” (CME 5-I-23)
- Optimizing Match Outcomes (CME Report 3-A-21)
- Standardizing the Residency Match System and Timeline (CME Report 3-A-19)
- The Transition from Undergraduate Medical Education to Graduate Medical Education (CME Report 5-I-19)
- Options for Unmatched Medical Students (CME Report 5-A-17)
- Standardizing the Allopathic Residency Match System and Timeline (CME Report 6-A-17)
- Resident and Fellow Compensation and Health Care System Value (CME Report 4-A-16)
Relevant AMA Policy

The AMA has ample policy in support of trainees that address such topics as The Match, other match processes, residency application process, and graduate medical education. These policies exemplify the AMA’s commitment to closely monitor these issues and engage with the NRMP and others to optimize successful, equitable matching. See Appendix B for the following full policies:

- Study of the Current Match Process and Alternatives D-310.944
- Residents and Fellows’ Bill of Rights H-310.912
- Preliminary Year Program Placement H-310.910
- Closing of Residency Programs H-310.943
- Protection of Resident and Fellow Training in the Case of Hospital or Training Program Closure D-310.948
- Residency Interview Schedules H-310.998

Of note, Policy D-310.977 “National Resident Matching Program Reform” includes the following clauses that state the AMA:

1. will continue to review the NRMP’s policies and procedures and make recommendations for improvements as the need arises, to include making the conditions of the Match agreement more transparent while assuring the confidentiality of the match;
2. will work with the Accreditation Council for Graduate Medical Education (ACGME) and other appropriate agencies to assure that the terms of employment for resident physicians are fair and equitable and reflect the unique and extensive amount of education and experience acquired by physicians;
3. does not support the current the “All-In” policy for the Main Residency Match to the extent that it eliminates flexibility within the match process;
4. will work with the NRMP, and other residency match programs, in revising Match policy, including the secondary match or scramble process to create more standardized rules for all candidates including application timelines and requirements;
5. will work with the NRMP and other external bodies to develop mechanisms that limit disparities within the residency application process and allow both flexibility and standard rules for applicants;

Additional related policies, such as those listed below, can be accessed in the AMA Policy Finder database:

- Strengthening Interview Guidelines for American Indian and Alaska Native Medical School, Residency, and Fellowship Applicants H-295.852
- Mitigating Demographic and Socioeconomic Inequities in the Residency and Fellowship Selection Process D-310.945
- Eliminating Questions Regarding Marital Status, Dependents, Plans for Marriage or Children, Sexual Orientation, Gender Identity, Age, Race, National Origin and Religion During the Residency and Fellowship Application Process H-310.919
- Strategies for Enhancing Diversity in the Physician Workforce D-200.985
- US Physician Shortage H-200.954
- Collective Bargaining: Antitrust Immunity D-383.983
- AMA’s Aggressive Pursuit of Antitrust Reform D-383.990
- Antitrust Relief for Physicians Through Federal Legislation H-383.990
- Antitrust Relief H-383.992

SUMMARY AND RECOMMENDATIONS
The Council on Medical Education understands the concerns presented by the authors of Resolution 302-A-23 and their frustrations related to lack of control over their own destinies. This report describes the origins of The Match and its current state as well as information about independent match processes. It also clarifies the difference between the AAMC’s ERAS application process versus NRMP’s Match process, acknowledges challenges, and summarizes recent considerations and recommendations. This report illuminates the importance of ongoing communication and transparency by the NRMP as well as collaboration among all invested parties. Further, this report makes clear that there are no currently identified alternatives other than an unstructured, open market approach, which the Council believes would be detrimental to the majority of trainees in comparison to the current Match process. Accordingly, attention should be focused on what can be done to improve The Match and other specialty matches rather than focusing on its replacement, as a match process continues to be the best solution for trainees at this time.

The Council on Medical Education therefore recommends that the following recommendations be adopted and the remainder of this report be filed. That our AMA:

1. AMA Policy D-310.977, “National Resident Matching Program Reform” be amended by addition to read as follows. Our AMA:

   (20) Encourages the piloting of innovations to the residency application process with aims to reduce application numbers, focus applicants on programs with reciprocal interest, and maximize residency placement. With support from the medical education community, successful pilots should be expanded to enhance the standardized process.

   (21) Continues to engage the National Resident Matching Program® (NRMP®) and other matching organizations on behalf of residents and medical students to further develop ongoing relationships, improve communications, and seek additional opportunities to collaborate including the submission of suitable nominees for their governing bodies as appropriate. (Modify Current HOD Policy)

3. Rescind AMA policy D-310.944, “Study of the Current Match Process and Alternatives,” as having been accomplished by this report. (Rescind HOD Policy)

Fiscal note: $1,000
APPENDIX A: THE MATCH PROCESS

The Matching Process

Individual Applications
Individuals do not apply through the National Matching Program (NMP). They apply to organizations either directly or through a centralized application service.

Interviews
Organizations determine the criteria for eligibility and conduct interviews.

NMP Registration
Individuals and Organizations Register for the Match in the iMatchSM System.
Registration must be completed by the published deadline for the Match.

NMP Ranking
Individuals and Organizations Submit Rank Order Lists Through iMatch
Participants are encouraged to list their true preferences, in order from most to least preferred. Rank Order Lists must be certified by the published deadline for the Match.

NMP Results
Participants Receive Match Results
Individuals and organizations log in to the iMatch system to learn the outcome of the Match.
With the Match complete, participants are ready to embark on their next professional, educational, or other philanthropic opportunity.

How a Match Works. Copyright National Resident Matching Program. Reprinted with permission.
APPENDIX B: RELEVANT AMA POLICY

**National Resident Matching Program Reform D-310.977**

Our AMA:

1. will work with the National Resident Matching Program (NRMP) to develop and distribute educational programs to better inform applicants about the NRMP matching process, including the existing NRMP waiver and violations review policies;
2. will actively participate in the evaluation of, and provide timely comments about, all proposals to modify the NRMP Match;
3. will request that the NRMP explore the possibility of including the Osteopathic Match in the NRMP Match;
4. will continue to review the NRMP’s policies and procedures and make recommendations for improvements as the need arises, to include making the conditions of the Match agreement more transparent while assuring the confidentiality of the match;
5. will work with the Accreditation Council for Graduate Medical Education (ACGME) and other appropriate agencies to assure that the terms of employment for resident physicians are fair and equitable and reflect the unique and extensive amount of education and experience acquired by physicians;
6. does not support the current the “All-In” policy for the Main Residency Match to the extent that it eliminates flexibility within the match process;
7. will work with the NRMP, and other residency match programs, in revising Match policy, including the secondary match or scramble process to create more standardized rules for all candidates including application timelines and requirements;
8. will work with the NRMP and other external bodies to develop mechanisms that limit disparities within the residency application process and allow both flexibility and standard rules for applicants;
9. encourages the National Resident Matching Program to study and publish the effects of implementation of the Supplemental Offer and Acceptance Program on the number of residency spots not filled through the Main Residency Match and include stratified analysis by specialty and other relevant areas;
10. will work with the NRMP and ACGME to evaluate the challenges in moving from a time-based education framework toward a competency-based system, including: a) analysis of time-based implications of the ACGME milestones for residency programs; b) the impact on the NRMP and entry into residency programs if medical education programs offer variable time lengths based on acquisition of competencies; c) the impact on financial aid for medical students with variable time lengths of medical education programs; d) the implications for interprofessional education and rewarding teamwork; and e) the implications for residents and students who achieve milestones earlier or later than their peers;
11. will work with the Association of American Medical Colleges (AAMC), American Osteopathic Association (AOA), American Association of Colleges of Osteopathic Medicine (AACOM), and National Resident Matching Program (NRMP) to evaluate the current available data or propose new studies that would help us learn how many students graduating from US medical schools each year do not enter into a US residency program; how many never enter into a US residency program; whether there is disproportionate impact on individuals of minority racial and ethnic groups; and what careers are pursued by those with an MD or DO degree who do not enter residency programs;
12. will work with the AAMC, AOA, AACOM and appropriate licensing boards to study whether US medical school graduates and international medical graduates who do not enter residency programs may be able to serve unmet national health care needs;
13. will work with the AAMC, AOA, AACOM and the NRMP to evaluate the feasibility of a national tracking system for US medical students who do not initially match into a categorical residency program;
14. will discuss with the National Resident Matching Program, Association of American Medical Colleges, American Osteopathic Association, Liaison Committee on Medical Education, Accreditation Council for Graduate Medical Education, and other interested bodies potential pathways for reengagement in medicine following an unsuccessful match and report back on the results of those discussions;
15. encourages the Association of American Medical Colleges to work with U.S. medical schools to identify best practices, including career counseling, used by medical schools to facilitate successful matches for medical school seniors, and reduce the number who do not match;
16. supports the movement toward a unified and standardized residency application and match system for all non-military residencies;
(17) encourages the Educational Commission for Foreign Medical Graduates (ECFMG) and other interested stakeholders to study the personal and financial consequences of ECFMG-certified U.S. IMGs who do not match in the National Resident Matching Program and are therefore unable to get a residency or practice medicine;

(18) encourages the AAMC, AACOM, NRMP, and other key stakeholders to jointly create a no-fee, easily accessible clearinghouse of reliable and valid advice and tools for residency program applicants seeking cost-effective methods for applying to and successfully matching into residency; and

(19) will work with appropriate stakeholders to study options for improving transparency in the resident application process.

Study of the Current Match Process and Alternatives D-310.944
Our American Medical Association will study alternatives to the current residency and fellowship Match process which would be less restrictive on free market competition for applicants.

Residents and Fellows’ Bill of Rights H-310.912
1. Our AMA continues to advocate for improvements in the ACGME Institutional and Common Program Requirements that support AMA policies as follows: a) adequate financial support for and guaranteed leave to attend professional meetings; b) submission of training verification information to requesting agencies within 30 days of the request; c) adequate compensation with consideration to local cost-of-living factors and years of training, and to include the orientation period; d) health insurance benefits to include dental and vision services; e) paid leave for all purposes (family, educational, vacation, sick) to be no less than six weeks per year; and f) stronger due process guidelines.

2. Our AMA encourages the ACGME to ensure access to educational programs and curricula as necessary to facilitate a deeper understanding by resident physicians of the US health care system and to increase their communication skills.

3. Our AMA regularly communicates to residency and fellowship programs and other GME stakeholders this Resident/Fellows Physicians’ Bill of Rights.

4. Our AMA: a) will promote residency and fellowship training programs to evaluate their own institution’s process for repayment and develop a leaner approach. This includes disbursement of funds by direct deposit as opposed to a paper check and an online system of applying for funds; b) encourages a system of expedited repayment for purchases of $200 or less (or an equivalent institutional threshold), for example through payment directly from their residency and fellowship programs (in contrast to following traditional workflow for reimbursement); and c) encourages training programs to develop a budget and strategy for planned expenses versus unplanned expenses, where planned expenses should be estimated using historical data, and should include trainee reimbursements for items such as educational materials, attendance at conferences, and entertaining applicants. Payment in advance or within one month of document submission is strongly recommended.

5. Our AMA will partner with ACGME and other relevant stakeholders to encourage training programs to reduce financial burdens on residents and fellows by providing employee benefits including, but not limited to, on-call meal allowances, transportation support, relocation stipends, and childcare services.

6. Our AMA will work with the Accreditation Council for Graduate Medical Education (ACGME) and other relevant stakeholders to amend the ACGME Common Program Requirements to allow flexibility in the specialty-specific ACGME program requirements enabling specialties to require salary reimbursement or “protected time” for resident and fellow education by “core faculty,” program directors, and assistant/associate program directors.

7. Our AMA encourages teaching institutions to offer retirement plan options, retirement plan matching, financial advising and personal finance education.

8. Our AMA adopts the following “Residents and Fellows’ Bill of Rights” as applicable to all resident and fellow physicians in ACGME-accredited training programs:

   RESIDENT/FELLOW PHYSICIANS’ BILL OF RIGHTS
   Residents and fellows have a right to:
   A. An education that fosters professional development, takes priority over service, and leads to independent practice.

   With regard to education, residents and fellows should expect: (1) A graduate medical education experience that facilitates their professional and ethical development, to include regularly scheduled didactics for which they are released from clinical duties. Service obligations should not interfere with
educational opportunities and clinical education should be given priority over service obligations; (2) Faculty who devote sufficient time to the educational program to fulfill their teaching and supervisory responsibilities; (3) Adequate clerical and clinical support services that minimize the extraneous, time-consuming work that draws attention from patient care issues and offers no educational value; (4) 24-hour per day access to information resources to educate themselves further about appropriate patient care; and (5) Resources that will allow them to pursue scholarly activities to include financial support and education leave to attend professional meetings.

B. Appropriate supervision by qualified physician faculty with progressive resident responsibility toward independent practice.

With regard to supervision, residents and fellows must be ultimately supervised by physicians who are adequately qualified and allow them to assume progressive responsibility appropriate to their level of education, competence, and experience. In instances where clinical education is provided by non-physicians, there must be an identified physician supervisor providing indirect supervision, along with mechanisms for reporting inappropriate, non-physician supervision to the training program, sponsoring institution or ACGME as appropriate.

C. Regular and timely feedback and evaluation based on valid assessments of resident performance.

With regard to evaluation and assessment processes, residents and fellows should expect: (1) Timely and substantive evaluations during each rotation in which their competence is objectively assessed by faculty who have directly supervised their work; (2) To evaluate the faculty and the program confidentially and in writing at least once annually and expect that the training program will address deficiencies revealed by these evaluations in a timely fashion; (3) Access to their training file and to be made aware of the contents of their file on an annual basis; and (4) Training programs to complete primary verification/credentialing forms and recredentialing forms, apply all required signatures to the forms, and then have the forms permanently secured in their educational files at the completion of training or a period of training and, when requested by any organization involved in credentialing process, ensure the submission of those documents to the requesting organization within thirty days of the request.

D. A safe and supportive workplace with appropriate facilities.

With regard to the workplace, residents and fellows should have access to: (1) A safe workplace that enables them to fulfill their clinical duties and educational obligations; (2) Secure, clean, and comfortable on-call rooms and parking facilities which are secure and well-lit; (3) Opportunities to participate on committees whose actions may affect their education, patient care, workplace, or contract.

E. Adequate compensation and benefits that provide for resident well-being and health.

(1) With regard to contracts, residents and fellows should receive: a. Information about the interviewing residency or fellowship program including a copy of the currently used contract clearly outlining the conditions for (re)appointment, details of remuneration, specific responsibilities including call obligations, and a detailed protocol for handling any grievance; and b. At least four months advance notice of contract non-renewal and the reason for non-renewal.

(2) With regard to compensation, residents and fellows should receive: a. Compensation for time at orientation; and b. Salaries commensurate with their level of training and experience. Compensation should reflect cost of living differences based on local economic factors, such as housing, transportation, and energy costs (which affect the purchasing power of wages), and include appropriate adjustments for changes in the cost of living.

(3) With regard to benefits, residents and fellows must be fully informed of and should receive: a. Quality and affordable comprehensive medical, mental health, dental, and vision care for residents and their families, as well as retirement plan options, professional liability insurance and disability insurance to all residents for disabilities resulting from activities that are part of the educational program; b. An institutional written policy on and education in the signs of excessive fatigue, clinical depression, substance abuse and dependence, and other physician impairment issues; c. Confidential access to mental health and substance abuse services; d. A guaranteed, predetermined amount of paid vacation leave, sick leave, family and medical leave and educational/professional leave during each year in their training program, the total amount of which should not be less than six weeks; e. Leave in compliance with the Family and Medical Leave Act; and f. The conditions under which sleeping quarters, meals and laundry or their equivalent are to be provided.

F. Clinical and educational work hours that protect patient safety and facilitate resident well-being and education.
With regard to clinical and educational work hours, residents and fellows should experience: (1) A reasonable work schedule that is in compliance with clinical and educational work hour requirements set forth by the ACGME; and (2) At-home call that is not so frequent or demanding such that rest periods are significantly diminished or that clinical and educational work hour requirements are effectively circumvented. Refer to AMA Policy H-310.907, “Resident/Fellow Clinical and Educational Work Hours,” for more information.

G. Due process in cases of allegations of misconduct or poor performance.

With regard to the complaints and appeals process, residents and fellows should have the opportunity to defend themselves against any allegations presented against them by a patient, health professional, or training program in accordance with the due process guidelines established by the AMA.

H. Access to and protection by institutional and accreditation authorities when reporting violations.

With regard to reporting violations to the ACGME, residents and fellows should: (1) Be informed by their program at the beginning of their training and again at each semi-annual review of the resources and processes available within the residency program for addressing resident concerns or complaints, including the program director, Residency Training Committee, and the designated institutional official; (2) Be able to file a formal complaint with the ACGME to address program violations of residency training requirements without fear of recrimination and with the guarantee of due process; and (3) Have the opportunity to address their concerns about the training program through confidential channels, including the ACGME concern process and/or the annual ACGME Resident Survey.

9. Our AMA will work with the ACGME and other relevant stakeholders to advocate for ways to defray additional costs related to residency and fellowship training, including essential amenities and/or high cost specialty-specific equipment required to perform clinical duties.

10. Our AMA believes that healthcare trainee salary, benefits, and overall compensation should, at minimum, reflect length of pre-training education, hours worked, and level of independence and complexity of care allowed by an individual’s training program (for example when comparing physicians in training and midlevel providers at equal postgraduate training levels).

11. The Residents and Fellows' Bill of Rights will be prominently published online on the AMA website and disseminated to residency and fellowship programs.

12. Our AMA will distribute and promote the Residents and Fellows’ Bill of Rights online and individually to residency and fellowship training programs and encourage changes to institutional processes that embody these principles.

**Preliminary Year Program Placement H-310.910**

1. Our AMA encourages the Accreditation Council for Graduate Medical Education, the American Osteopathic Association, and other involved organizations to strongly encourage residency programs that now require a preliminary year to match residents for their specialty and then arrange with another department or another medical center for the preliminary year of training unless the applicant chooses to pursue preliminary year training separately.

2. Our AMA encourages appropriate stakeholders to explore options to decrease the burden upon medical students who must apply to separate preliminary PGY-1 and categorical PGY-2 positions.

3. Our AMA will work with the Accreditation Council for Graduate Medical Education to encourage programs with PGY-2 positions in the National Resident Matching Program (NRMP) with insufficient availability of local PGY-1 positions to create local PGY-1 positions that will enable coordinated applications and interviews for medical students.

4. Our AMA encourages the NRMP, the San Francisco Match, the American Urological Association, the Electronic Residency Application Service, and other stakeholders to reduce barriers for medical students, residents, and physicians applying to match into training programs, including barriers to “couples matching,” and to ensure that all applicants have access to robust, informative statistics to assist in decision-making.

5. Our AMA encourages the NRMP, San Francisco Match, American Urological Association, Electronic Residency Application Service, and other stakeholders to collect and publish data on a) the impact of separate matches on the personal and professional lives of medical students and b) the impact on medical students who are unable to successfully “couples match” with their significant others due to staggered entry into residency, utilization of unlinked match services, or other causes.

**Closing of Residency Programs H-310.943**
1. Our AMA: (a) encourages the Accreditation Council for Graduate Medical Education (ACGME) to address the problem of non-educational closing or downsizing of residency training programs; (b) reminds all institutions involved in educating residents of their contractual responsibilities to the resident; (c) encourages the ACGME and the various Residency Review Committees to reexamine requirements for "years of continuous training" to determine the need for implementing waivers to accommodate residents affected by non-educational closure or downsizing; (d) will work with the American Board of Medical Specialties Member Boards to encourage all its member boards to develop a mechanism to accommodate the discontinuities in training that arise from residency closures, regardless of cause, including waiving continuity care requirements and granting residents credit for partial years of training; (e) urges residency programs and teaching hospitals be monitored by the applicable Residency Review Committees to ensure that decreases in resident numbers do not place undue stress on remaining residents by affecting work hours or working conditions, as specified in Residency Review Committee requirements; (f) opposes the closure of residency/fellowship programs or reductions in the number of current positions in programs as a result of changes in GME funding; and (g) will work with the Centers for Medicare and Medicaid Services (CMS), ACGME, and other appropriate organizations to advocate for the development and implementation of effective policies to permit graduate medical education funding to follow the resident physician from a closing to the receiving residency program (including waivers of CMS caps), in the event of temporary or permanent residency program closure.

2. Our AMA will work with the Centers for Medicare and Medicaid Services (CMS) to establish regulations that protect residents and fellows impacted by program or hospital closure, which may include recommendations for:
   A. Notice by the training hospital, intending to file for bankruptcy within 30 days, to all residents and fellows primarily associated with the training hospital, as well as those contractually matched at that training institution who may not yet have matriculated, of its intention to close, along with provision of reasonable and appropriate procedures to assist current and matched residents and fellows to find and obtain alternative training positions that minimize undue financial and professional consequences, including but not limited to maintenance of specialty choice, length of training, initial expected time of graduation, location and reallocation of funding, and coverage of tail medical malpractice insurance that would have been offered had the program or hospital not closed;
   B. Revision of the current CMS guidelines that may prohibit transfer of funding prior to formal financial closure of a teaching institution;
   C. Improved provisions regarding transfer of GME funding for displaced residents and fellows for the duration of their training in the event of program closure at a training institution; and
   D. Protections against the discrimination of displaced residents and fellows consistent with H-295.969.

3. Our AMA will work with the Accreditation Council for Graduate Medical Education, Association of American Medical Colleges, National Resident Matching Program, Educational Commission for Foreign Medical Graduates, Centers for Medicare and Medicaid Services, and other relevant stakeholders to identify a process by which displaced residents and fellows may be directly represented in proceedings surrounding the closure of a training hospital or program.

4. Our AMA will work with the Accreditation Council for Graduate Medical Education, Association of American Medical Colleges, National Resident Matching Program, Educational Commission for Foreign Medical Graduates, Centers for Medicare and Medicaid Services, and other relevant stakeholders to:
   A. Develop a stepwise algorithm for designated institutional officials and program directors to assist residents and fellows with finding and obtaining alternative training positions;
   B. Create a centralized, regulated process for displaced residents and fellows to obtain new training positions; and
   C. Develop pathways that ensure that closing and accepting institutions provide liability insurance coverage to residents, at no cost to residents.

**Protection of Resident and Fellow Training in the Case of Hospital or Training Program Closure D-310.948**

Our AMA will:
1. ask the Centers for Medicare & Medicaid Services (CMS) to stipulate in its regulations that residency slots are not assets that belong to the teaching institution;
2. encourage the Association of American Medical Colleges (AAMC), American Association of Colleges of Osteopathic Medicine (AACOM), and National Resident Matching Program (NRMP) to develop a process
similar to the Supplemental Offer and Acceptance Program (SOAP) that could be used in the event of a sudden teaching institution or program closure;
3. encourage the Accreditation Council for Graduate Medical Education (ACGME) to specify in its Institutional Requirements that sponsoring institutions are to provide residents and residency applicants information regarding the financial health of the institution, such as its credit rating, or if it has recently been part of an acquisition or merger;
4. work with AAMC, AACOM, ACGME, and relevant state and specialty societies to coordinate and collaborate on the communication with sponsoring institutions, residency programs, and resident physicians in the event of a sudden institution or program closure to minimize confusion, reduce misinformation, and increase clarity;
5. encourage ACGME to revise its Institutional Requirements, under section IV.E., Professional Liability Insurance, to state that sponsoring institutions must create and maintain a fund that will ensure professional liability coverage for residents in the event of an institution or program closure; and
6. continue to work with ACGME, interested specialty societies, and others to monitor issues, collect data, and share information related to training programs run by nonprofit and for-profit entities and their effect on medical education.

**Residency Interview Schedules H-310.998**
1. Our AMA encourages residency and fellowship programs to incorporate in their interview dates increased flexibility, whenever possible, to accommodate applicants' schedules. Our AMA encourages the ACGME and other accrediting bodies to require programs to provide, by electronic or other means, representative contracts to applicants prior to the interview. Our AMA encourages residency and fellowship programs to inform applicants in a timely manner confirming receipt of application and ongoing changes in the status of consideration of the application.
2. Our AMA will: (a) oppose changes to residency and fellowship application requirements unless (i) those changes have been evaluated by working groups which have students and residents as representatives, (ii) there are data which demonstrates that the proposed application components contribute to an accurate representation of the candidate, (iii) there are data available to demonstrate that the new application requirements reduce, or at least do not increase, the impact of bias that affects medical students and residents from underrepresented minority backgrounds, and (iv) the costs to medical students and residents are mitigated; and (b) continue to work with specialty societies, the Association of American Medical Colleges, the National Resident Matching Program and other relevant stakeholders to improve the application process in an effort to accomplish these requirements.

Accessed March 18, 2024. https://forums.studentdoctor.net/threads/what-are-the-alternatives-to-the-match-what-do-you-think-would-happen-if-it-were-abolished.1439067/

AMERICAN MEDICAL ASSOCIATION HOUSE OF DELEGATES

Resolution: 301
(A-24)

Introduced by: Medical Student Section

Subject: Fairness for International Medical Students

Referred to: Reference Committee C

Whereas, international students comprise over 10% of US graduate students but only 0.6% of US medical students, indicating that the US recruits globally for academia, research, and other highly educated professions, but not for medicine1–3; and

Whereas, only 35% of medical schools consider international applicants, only 17% of whom are admitted compared to 38% of domestic applicants4–7; and

Whereas, international medical students are ineligible for public loans, may be ineligible for medical school scholarships, require a US cosigner for private loans, and may be required to deposit up to four years of tuition upfront into an escrow account prior to matriculation7–10; and

Whereas, many common national medical student scholarships, including the AMA Physicians of Tomorrow scholarship, the Tylenol Future Care scholarship, and the National Medical Fellowships awards, are restricted to domestic students only11–13; and

Whereas, international medical students offer valuable diversity of thought, cultural perspectives, and unique life experiences that enrich medical schools, complement efforts to improve physician workforce diversity, address physician shortages, and allow the US to attract and retain the best and brightest future doctors from around the world9,14; therefore be it

RESOLVED, that our American Medical Association encourage additional medical schools to consider applications from and to admit international students to their programs alongside domestic students (New HOD Policy); and be it further

RESOLVED, that our AMA amend policy H-255.968 “Advance Tuition Payment Requirements for International Students Enrolled in US Medical Schools” by addition and deletion to read as follows;

Advance Tuition Payment Requirements for International Students Enrolled in US Medical Schools H-255.968

Our AMA:

1. supports the autonomy of medical schools to determine optimal tuition requirements for international students;

2. encourages medical schools and undergraduate institutions to fully inform international students interested in medical education in the US of the limited options available to them for tuition assistance;

3. supports the Association of American Medical Colleges (AAMC) in its efforts to increase transparency in the medical school application process for international students by including school policy on tuition requirements in the Medical School Admission Requirements (MSAR); and
4. supports efforts to re-evaluate and minimize the use of pre-payment requirements specific to international medical students; and

5. encourages medical schools to explore alternative means of prepayment, such as a letter of credit, for four years for covering the costs of medical school. (Modify Current HOD Policy); and be it further RESOLVED, that our AMA advocate for increased scholarship and funding opportunities for international students accepted to or currently attending United States medical schools. (Directive to Take Action)

Fiscal Note: Minimal - less than $1,000

Received: 3/28/2024

RELEVANT AMA POLICY

D-255.980 Impact of Immigration Barriers on the Nation’s Health
1. Our AMA recognizes the valuable contributions and affirms our support of international medical students and international medical graduates and their participation in U.S. medical schools, residency and fellowship training programs and in the practice of medicine.
2. Our AMA will oppose laws and regulations that would broadly deny entry or re-entry to the United States of persons who currently have legal visas, including permanent resident status (green card) and student visas, based on their country of origin and/or religion.
3. Our AMA will oppose policies that would broadly deny issuance of legal visas to persons based on their country of origin and/or religion.
4. Our AMA will advocate for the immediate reinstatement of premium processing of H-1B visas for physicians and trainees to prevent any negative impact on patient care.
5. Our AMA will advocate for the timely processing of visas for all physicians, including residents, fellows, and physicians in independent practice.
6. Our AMA will work with other stakeholders to study the current impact of immigration reform efforts on residency and fellowship programs, physician supply, and timely access of patients to health care throughout the U.S. [Alt. Res. 308, A-17; Modified: CME Rep. 01, A-18; Reaffirmation: A-19; Reaffirmed: CME Rep. 4, A-21; Reaffirmed: Res. 234, A-22; Reaffirmed: Res. 210, A-23]

H-295.888 Progress in Medical Education: the Medical School Admission Process
1. Our AMA encourages: (A) research on ways to reliably evaluate the personal qualities (such as empathy, integrity, commitment to service) of applicants to medical school and support broad dissemination of the results. Medical schools should be encouraged to give significant weight to these qualities in the admissions process; (B) premedical coursework in the humanities, behavioral sciences, and social sciences, as a way to ensure a broadly-educated applicant pool; and (C) dissemination of models that allow medical schools to meet their goals related to diversity in the context of existing legal requirements, for example through outreach to elementary schools, high schools, and colleges.

2. Our AMA: (A) will continue to work with the Association of American Medical Colleges (AAMC) and other relevant organizations to encourage improved assessment of personal qualities in the recruitment process for medical school applicants including types of information to be solicited in applications to medical school; (B) will work with the AAMC and other relevant organizations to explore the range of measures used to assess personal qualities among applicants, including those used by related fields; (C) encourages the development of innovative methodologies to assess personal qualities among medical school applicants; (D) will work with medical schools and other relevant stakeholder groups to review the ways in which medical schools communicate the importance of personal qualities among applicants, including how and when specified personal qualities will be assessed in the admissions process; (E) encourages continued research on the personal qualities most pertinent to success as a medical student and as a physician to assist admissions committees to adequately assess applicants; and (F) encourages continued research on the factors that impact negatively on humanistic and empathetic traits of medical students during medical school. [CME Rep. 8, I-99; Reaffirmed: CME Rep. 2, A-09; Appended: CME Rep. 3, A-11; Reaffirmed: CME Rep. 1, A-21]
Whereas, the principle of lifelong learning is fundamental to maintaining and enhancing the quality of patient care delivered by physicians; and

Whereas, certified medical education (CME) already plays a pivotal role in facilitating lifelong learning by offering opportunities for physicians to stay current with advances in medical knowledge and technology; and

Whereas, specialty boards contend that the process of re-certification and maintenance of certification (MOC) contributes to the enhancement of patient care quality by counteracting a natural decline in medical knowledge and skills over time during active practice, although existing evidence is at odds with this assertion and does not suggest that re-certification and MOC significantly enhance the quality of care provided by physicians\(^1\); and

Whereas, the current landscape of board certification lacks sufficient competition which has resulted in elevated costs for physicians seeking certification in their respective specialties, competition policy experts noting the harms of consolidation in the market for certification, spirited public debate amongst physicians about the value of MOC to both patients and physicians, and the Department of Justice advocating for efforts to increase competition in the market for physician board certification\(^3\); and

Whereas, the obligation of high-stakes testing as part of MOC is not a comprehensive or optimal way to assess clinical knowledge or competence for physicians who have maintained active clinical practice; and

Whereas, our American Medical Association has a responsibility to investigate issues that impact physicians and their patients; therefore be it

RESOLVED, that our American Medical Association adopt a policy that states that maintenance of certification requirements should not be duplicative of continuing medical education requirements and not be used to determine or dictate hospital privileges, insurance network credentialing, or hiring practices (New HOD Policy); and be it further

RESOLVED, that our AMA recognizes the importance of fostering competition in the market for board certification, allowing physicians to have the autonomy to choose the most suitable pathway for their individual learning and professional development needs (New HOD Policy); and be it further

RESOLVED, that our AMA undertake a comprehensive review of the available evidence concerning the impact of maintenance of certification on the quality and safety of patient care and report the findings of this investigation to its members and stakeholders, including
policymakers and legislators, to inform future healthcare policy with a report back to the House of Delegates by Annual 2025 (Directive to Take Action).

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY
Continuing Board Certification D-275.954
Our AMA will:
1. Continue to monitor the evolution of Continuing Board Certification (CBC), continue its active engagement in discussions regarding their implementation, encourage specialty boards to investigate and/or establish alternative approaches for CBC, and prepare a report regarding the CBC process at the request of the House of Delegates or when deemed necessary by the Council on Medical Education.
2. Continue to review, through its Council on Medical Education, published literature and emerging data as part of the Council’s ongoing efforts to critically review CBC issues.
3. Continue to monitor the progress by the American Board of Medical Specialties (ABMS) and its member boards on implementation of CBC, and encourage the ABMS to report its research findings on the issues surrounding certification and CBC on a periodic basis.
4. Encourage the ABMS and its member boards to continue to explore other ways to measure the ability of physicians to access and apply knowledge to care for patients, and to continue to examine the evidence supporting the value of specialty board certification and CBC.
5. Work with the ABMS to streamline and improve the Cognitive Expertise (Part III) component of CBC, including the exploration of alternative formats, in ways that effectively evaluate acquisition of new knowledge while reducing or eliminating the burden of a high-stakes examination.
6. Work with interested parties to ensure that CBC uses more than one pathway to assess accurately the competence of practicing physicians, to monitor for exam relevance and to ensure that CBC does not lead to unintended economic hardship such as hospital de-credentialing of practicing physicians.
7. Recommend that the ABMS not introduce additional assessment modalities that have not been validated to show improvement in physician performance and/or patient safety.
8. Work with the ABMS to eliminate practice performance assessment modules, as currently written, from CBC requirements.
9. Encourage the ABMS to ensure that all ABMS member boards provide full transparency related to the costs of preparing, administering, scoring and reporting CBC and certifying examinations.
10. Encourage the ABMS to ensure that CBC and certifying examinations do not result in substantial financial gain to ABMS member boards, and advocate that the ABMS develop fiduciary standards for its member boards that are consistent with this principle.
11. Work with the ABMS to lessen the burden of CBC on physicians with multiple board certifications, particularly to ensure that CBC is specifically relevant to the physician's current practice.
12. Work with key stakeholders to (a) support ongoing ABMS member board efforts to allow multiple and diverse physician educational and quality improvement activities to qualify for CBC; (b) support ABMS member board activities in facilitating the use of CBC quality improvement activities to count for other accountability requirements or programs, such as pay for quality/performance or PQRS reimbursement; (c) encourage ABMS member boards to enhance the consistency of quality improvement programs across all boards; and (d) work with specialty societies and ABMS member boards to develop tools and services that help physicians meet CBC requirements.

13. Work with the ABMS and its member boards to collect data on why physicians choose to maintain or discontinue their board certification.

14. Work with the ABMS to study whether CBC is an important factor in a physician’s decision to retire and to determine its impact on the US physician workforce.

15. Encourage the ABMS to use data from CBC to track whether physicians are maintaining certification and share this data with the AMA.

16. Encourage AMA members to be proactive in shaping CBC by seeking leadership positions on the ABMS member boards, American Osteopathic Association (AOA) specialty certifying boards, and CBC Committees.

17. Continue to monitor the actions of professional societies regarding recommendations for modification of CBC.

18. Encourage medical specialty societies’ leadership to work with the ABMS, and its member boards, to identify those specialty organizations that have developed an appropriate and relevant CBC process for its members.

19. Continue to work with the ABMS to ensure that physicians are clearly informed of the CBC requirements for their specific board and the timelines for accomplishing those requirements.

20. Encourage the ABMS and its member boards to develop a system to actively alert physicians of the due dates of the multi-stage requirements of continuous professional development and performance in practice, thereby assisting them with maintaining their board certification.

21. Recommend to the ABMS that all physician members of those boards governing the CBC process be required to participate in CBC.

22. Continue to participate in the Coalition for Physician Accountability, formerly known as the National Alliance for Physician Competence forums.

23. Encourage the PCPI Foundation, the ABMS, and the Council of Medical Specialty Societies to work together toward utilizing Consortium performance measures in Part IV of CBC.

24. Continue to assist physicians in practice performance improvement.

25. Encourage all specialty societies to grant certified CME credit for activities that they offer to fulfill requirements of their respective specialty board’s CBC and associated processes.

26. Support the American College of Physicians as well as other professional societies in their efforts to work with the American Board of Internal Medicine (ABIM) to improve the CBC program.

27. Oppose those maintenance of certification programs administered by the specialty boards of the ABMS, or of any other similar physician certifying organization, which do not appropriately adhere to the principles codified as AMA Policy on Continuing Board Certification.

28. Ask the ABMS to encourage its member boards to review their maintenance of certification policies regarding the requirements for maintaining underlying primary or initial specialty board certification in addition to subspecialty board certification, if they have not yet done so, to allow physicians the option to focus on continuing board certification activities relevant to their practice.

29. Call for the immediate end of any mandatory, secured recertifying examination by the ABMS or other certifying organizations as part of the recertification process for all those specialties that still require a secure, high-stakes recertification examination.

30. Support a recertification process based on high quality, appropriate Continuing Medical Education (CME) material directed by the AMA recognized specialty societies covering the physician’s practice area, in cooperation with other willing stakeholders, that would be completed on a regular basis as determined by the individual medical specialty, to ensure lifelong learning.

31. Continue to work with the ABMS to encourage the development by and the sharing between specialty boards of alternative ways to assess medical knowledge other than by a secure high stakes exam.

32. Continue to support the requirement of CME and ongoing, quality assessments of physicians, where such CME is proven to be cost-effective and shown by evidence to improve quality of care for patients.

33. Through legislative, regulatory, or collaborative efforts, will work with interested state medical societies and other interested parties by creating model state legislation and model medical staff bylaws while advocating that Continuing Board Certification not be a requirement for: (a) medical staff
membership, privileging, credentialing, or recredentialing; (b) insurance panel participation; or (c) state medical licensure.

34. Increase its efforts to work with the insurance industry to ensure that continuing board certification does not become a requirement for insurance panel participation.

35. Advocate that physicians who participate in programs related to quality improvement and/or patient safety receive credit for CBC Part IV.

36. Continue to work with the medical societies and the American Board of Medical Specialties (ABMS) member boards that have not yet moved to a process to improve the Part III secure, high-stakes examination to encourage them to do so.

37. Our AMA, through its Council on Medical Education, will continue to work with the American Board of Medical Specialties (ABMS), ABMS Committee on Continuing Certification (3C), and ABMS Stakeholder Council to pursue opportunities to implement the recommendations of the Continuing Board Certification: Vision for the Future Commission and AMA policies related to continuing board certification.

38. Our AMA, through its Council on Medical Education, will continue to work with the American Board of Medical Specialties (ABMS) and ABMS member boards to implement key recommendations outlined by the Continuing Board Certification: Vision for the Future Commission in its final report, including the development and release of new, integrated standards for continuing certification programs that will address the Commission’s recommendations for flexibility in knowledge assessment and advancing practice, feedback to diplomates, and consistency.

39. Our AMA will work with the ABMS and its member boards to reduce financial burdens for physicians holding multiple certificates who are actively participating in continuing certification through an ABMS member board, by developing opportunities for reciprocity for certification requirements as well as consideration of reduced or waived fee structures.

40. Our AMA will continue to publicly report its work on enforcing AMA Principles on Continuing Board Certification.

MOC Provisions of Interstate Medical Licensure Compact D-275.955

Our American Medical Association will, in collaboration with the Federation of State Medical Boards and interested state medical boards, request a clarifying statement from the Interstate Medical Licensure Compact Commission that the intent of the language in the model legislation requiring that a physician "holds" specialty certification refers only to initial specialty certification recognized by the American Board of Medical Specialties or the American Osteopathic Association's (AOA's) Bureau of Osteopathic Specialists and that there is no requirement for participation in ABMS's Maintenance of Certification or AOA's Osteopathic Continuous Certification (OCC) program in order to receive initial or continued licensure under the Interstate Medical Licensure Compact.

Citation: Res. 235, A-15

An Update on Maintenance of Licensure D-275.957

Our American Medical Association will: 1. Continue to monitor the evolution of Maintenance of Licensure (MOL), continue its active engagement in discussions regarding MOL implementation, and report back to the House of Delegates on this issue.

2. Continue to review, through its Council on Medical Education, published literature and emerging data as part of the Council's ongoing efforts to critically review MOL issues.

3. Work with the Federation of State Medical Boards (FSMB) to study whether the principles of MOL are important factors in a physician's decision to retire or have a direct impact on the U.S. physician workforce.

4. Work with interested state medical societies and support collaboration with state specialty medical societies and state medical boards on establishing criteria and regulations for the implementation of MOL that reflect AMA guidelines for implementation of state MOL programs and the FSMB's Guiding Principles for MOL.

5. Explore the feasibility of developing, in collaboration with other stakeholders, AMA products and
services that may help shape and support MOL for physicians.

6. Encourage the FSMB to continue to work with state medical boards to accept physician participation in the American Board of Medical Specialties maintenance of certification (MOC) and the American Osteopathic Association Bureau of Osteopathic Specialists (AOA-BOS) osteopathic continuous certification (OCC) as meeting the requirements for MOL and to develop alternatives for physicians who are not certified/recertified, and advocate that MOC or OCC not be the only pathway to MOL for physicians.

7. Continue to work with the FSMB to establish and assess MOL principles, with the AMA to assess the impact of MOL on the practicing physician and the FSMB to study its impact on state medical boards.

8. Encourage rigorous evaluation of the impact on physicians of any future proposed changes to MOL processes, including cost, staffing, and time.

Citation: CME Rep. 3, A-15; Modified: CME Rep. 2, I-15
AMERICAN MEDICAL ASSOCIATION HOUSE OF DELEGATES

Resolution: 303
(A-24)

Introduced by: Young Physicians Section

Referred to: Reference Committee C

Whereas, physicians strive for the highest degree of patient care and professionalism; and
Whereas, professionalism in medicine has been achieved through self-governance and self-regulation; and
Whereas, non-physicians serving in executive and board leadership roles in physician organizations compromises the objective of self-regulation and self-governance; and
Whereas, the president and CEO of the National Resident Matching Program (NRMP) is a non-physician, holds the following credentials D.H.Sc., M.B.A., B.S.N., has never participated in the MATCH, never completed a residency or fellowship, and yet has held prior leadership positions overseeing accreditation of physician residency and fellowship programs, was an executive director at the ACGME, and held the position of designated institution official (DIO) for a graduate medical education (GME) program; and
Whereas, the newly elected vice chair of the National Board of Medical Examiners (NBME) is a non-physician, holds the following credentials R.N., Ph.D., received a bachelor of science in nursing, received a master of science in nursing education, received a doctor of philosophy in theory development and research in nursing, has never taken any NBME examination for board certification, and yet now holds the position of vice chair for the organization; and
Whereas, the current chair of the Accreditation Council for Graduate Medical Education (ACGME) is a non-physician, holds the following credentials M.A., and is co-founder of a strategic human resource consulting firm; and
Whereas, the recently elected President and current Vice President of the American College of Cardiology (ACC) is a non-physician, holds the following credentials R.N., M.S.N., and is president and CEO of Cardiovascular Management of Illinois, a cardiology physician practice management company; and
Whereas, non-physicians, who do not themselves go through physician education, accreditation, certification, licensing, and credentialing, may have difficulty appreciating the needs and challenges of physician trainees and practicing physicians from lack of personal experience, and therefore should not be making major decisions for physicians or representing physicians in the highest roles of these organizations; and

Whereas, the purpose of having non-physicians on physician boards is to have a public voice on these boards, not to lead the organization itself (i.e. in the highest roles of the organizations); and

Whereas, non-physicians can participate on physician boards as a public member without leading these organizations in the highest roles; and

Whereas, one of the focal points of the AMA Recovery Plan is to fight scope creep, and works to educate legislators about the differences in training between physicians and non-physicians; and

Whereas, having non-physicians lead physician boards is contradictory to the AMA message about scope creep and the importance of physician-led teams; and

Whereas, our advocacy to legislators about the importance of physician education is compromised by a conflict of interest if we have non-physicians in the highest roles determining physician standards; and

Whereas, there are highly qualified physicians that could hold these leadership roles now held by non-physicians; and

Whereas, having these non-physicians lead national standard-setting organizations in our physician profession undermines physician confidence in these organizations; and

Whereas, the current title of policy D-275.948 does not match the content of the policy; therefore be it

RESOLVED, that our American Medical Association amend the title of policy D-275.948 by substitution and deletion as follows:

Education, Training and Credentialing of Non-Physician Health Care Professionals and Their Impact on Physician Education and Training Addressing Non-physician Positions and Participation on Physician Regulatory Boards and Bodies and Potential Conflicts of Interest D-275.948 (Modify Current HOD Policy); and be it further

RESOLVED, that our AMA work with relevant stakeholders and regulatory bodies and boards involved in physician education, accreditation, certification, licensing, and credentialing to advocate for physician leadership of these regulatory bodies and boards in order to be
consistent with the AMA Recovery Plan’s efforts to fight scope creep, and prevent undermining physician confidence in these organizations (Directive to Take Action); and be it further RESOLVED, that our AMA create a task force with the mission to increase physician awareness of and participation in leadership positions on regulatory bodies and boards involved in physician education, accreditation, certification, licensing, and credentialing through mechanisms including but not limited to mentorship programs, leadership training programs, board nominations, publicizing the opportunities to the membership, and creating a centralized list of required qualifications and methods to apply for these positions. (Directive to Take Action)

Fiscal Note: To Be Determined

RELEVANT AMA POLICY

Education, Training and Credentialing of Non-Physician Health Care Professionals and Their Impact on Physician Education and Training D-275.948
1. Our AMA acknowledges that a conflict of interest exists when non-physician health care professionals hold positions on physician regulatory bodies or physician boards when these individuals represent a field that either possesses or seeks to possess the ability to practice without physician supervision.
2. Our AMA will encourage key regulatory bodies involved with physician education, accreditation, certification, licensing, and credentialing to: (A) increase transparency of the process by encouraging them to openly disclose how their board is composed and members are selected; and (B) review and amend their conflict of interest and other policies related to non-physician health care professionals holding formal leadership positions (e.g., board, committee) when that non-physician professional represents a field that either possesses or seeks to possess the ability to practice without physician supervision. [CME Rep. 5, A-22; Modified: Res. 323, A-23]
AMERICAN MEDICAL ASSOCIATION HOUSE OF DELEGATES

Resolution: 304
(A-24)

Introduced by: Academic Physicians Section

Subject: Spirituality in Medical Education and Practice

Referred to: Reference Committee C

Whereas, current AMA policy recognizes the importance of spirituality concerns to many patients and encourages patient access to spiritual care services (H-160.900) but does not detail how the provision of spiritual care to patients would optimally involve physicians, physicians-in-training, or other members of the care team; and

Whereas, the term “spiritual care” does not require, yet does not exclude, the invoking of any general or specific religious beliefs; rather, spirituality is broadly defined as seeking meaning, purpose, and connectedness, and is inclusive of all ways people may understand spirituality in their lives; and

Whereas, our AMA’s policies on diversity, equity, and inclusion note the need to respect people and their diverse backgrounds, which applies specifically to the quality and equity of patient care, in that members of medical care teams should demonstrate respect for the culture and spirituality of the patient (and the patient’s family); and

Whereas, many health organizations, including the World Health Organization (WHO), via its Resolution on Palliative Care, have noted the need for prevention and relief of suffering by means of early identification and correct assessment and treatment of pain and other problems, whether physical, psychosocial, or spiritual – and in the case of WHO, have declared that the treatment of all severe pain, including spiritual pain, is a human right;¹ and

Whereas, many patients value clinicians who are able to integrate inquiry about patients’ spirituality as related to their health, and benefit from access to specialist spiritual care services, when such access is enabled for them; and

Whereas, a Delphi review of the literature found sufficient evidence to recommend education on spirituality and health in the care of patients with serious and/or chronic illness;²,³ and

Whereas, patient referral and access to spiritual care services would be enhanced if all physicians and medical students had learned how to provide generalist spiritual care through the assessment and treatment of spiritual distress as a clinical symptom, with treatment options to include compassionate listening and presence to patients’ suffering, reflective inquiry to enable patients to fully express their spiritual distress, referral to and collaboration with spiritual care specialists, and continued follow up with the patient on spiritual issues as indicated; and

Whereas, instruction in medical education regarding spiritual health as part of whole person care, assessment, and treatment of spiritual distress could be expected to enhance “emotional intelligence” and the recognition of opportunities for either providing spiritual care or referring the patient to a spiritual care specialist; and
Whereas, burnout—a condition characterized by feelings of pervasive energy depletion or
exhaustion, negativism or cynicism about one’s occupation or occupational role, and/or a sense
of inadequacy or ineffectiveness in one’s occupational role, is a pervasive emotion and state
among clinicians and clinicians-in-training; and

Whereas, spiritual distress can contribute to burnout across the continuum of medical education
and practice, with an association between increased burnout and decreased meaning in work,
while the practice of spirituality may be a protective factor against burnout, with such
interventions as “reflection rounds” helping health professionals and students rekindle their
sense of meaning in their chosen vocation; and

Whereas, it is therefore reasonable to hope that by providing physicians and physicians-in
training with opportunities to become more well-educated regarding matters of spirituality, and
by enabling them to implement a spiritual approach to their own life and life stresses—including
use of spiritual resources such as meditation, seeking professional spiritual care if needed,
and/or finding a spiritual community of support—that these individuals may be favorably
impacted and be less susceptible to burnout; and

Whereas, by extension, increased knowledge and awareness of spiritual principles may
enhance the abilities of caregivers to not only provide more effective care to others, but also to
provide more effective self-care to themselves; therefore be it

RESOLVED, that our American Medical Association amend Policy H-160.900 to read as
follows:

Addressing Patient Spirituality in Medicine Medical Education and Practice

(1) Our AMA recognizes the importance of individual patient spirituality and its impact on
health and encourages patient access to spiritual care services.

(2) Our AMA encourages the availability of education about spiritual health, defined as
meaning, purpose, and connectedness, in curricula in medical school, graduate medical
education, and continuing physician professional development as an integral part of
whole person care, which could include:
(a) assessing spiritual health as part of the history and physical;
(b) addressing treatment of spiritual distress by the clinician, with appropriate referral to
spiritual care professionals;
(c) acknowledging patients’ spiritual resources;
(d) developing compassionate listening skills;
(e) ensuring ongoing follow-up of patients’ spiritual health by clinicians as appropriate;
(f) describing respect for the spiritual, religious, existential, and cultural value of those
they serve and understanding why it is important to not impose their own personal
values and beliefs on those served; and
(g) self-reflection on one’s own spirituality within professional development courses,
especially as related to their vocation and wellbeing. (Modify Current HOD Policy)

Fiscal Note: Minimal - less than $1,000

Addressing Patient Spirituality in Medicine H-160.900
Our AMA recognizes the importance of individual patient spirituality and its impact on health and encourages patient access to spiritual care services.

Redesigning the Medicare Hospice Benefit D-330.895
Our American Medical Association advocates for:
1. A 21st century evolution of the Medicare hospice benefit that meets the quadruple aim of health care; advances health equity; and improves access, support, and outcomes for seriously ill patients across all geographies, including underserved and low-resource communities; and
2. A reformed Medicare hospice benefit that may incorporate the following components:
   a. Hospice eligibility should not be based solely on a specified prognosis or life expectancy but rather on patients’ needs.
   b. Patients must continue to have an open choice of hospice providers.
   c. Hospice services, including telehealth or telemedicine, should be provided by a full, physician-led interdisciplinary team.
   d. Patients and their caregivers should receive adequate support using home- or facility-based hospice services, identified by a thorough assessment of their social determinants of health. This would incorporate 24-hour a day care for beneficiaries with very limited life expectancy who lack around the clock caregivers.
   e. Patients should have concurrent access to disease-directed treatments along with palliative services.
   f. Payments to hospices should be sufficient to support the quality, experience, scope, and frequency of care that beneficiaries deserve throughout the later stages of serious illness as dictated by their physical, psychological, social, spiritual, and practical needs.
   g. The hospice benefit should be consistent, including with regard to the quality and intensity of services, regardless of which Medicare program or entity pays for services.
   h. Metrics for health provider accountability should focus on those aspects of care and experience that matter most to patients, families, and caregivers.
AMERICAN MEDICAL ASSOCIATION HOUSE OF DELEGATES

Resolution: 305
(A-24)

Introduced by: Oklahoma
Subject: Public Service Loan Forgiveness Reform
Referred to: Reference Committee C

Whereas, there is a physician shortage across all specialties, locations, and practice types in the United States; and

Whereas, the federal government is responsible for direct healthcare services through the Veteran’s Health Administration (VHA) and Indian Health Service (IHS); and

Whereas, the VHA and IHS both experience chronic, nationwide physician shortages (12.9% at VHA as of 2022, 25% at IHS as of 2018), paralleling the nation’s physician shortage; and

Whereas, the VHA loan repayment program offers up to $200,000 in relief to physicians over five years, with no service commitment, while the IHS loan repayment program offers up to $50,000 in relief to physicians, with a two-year service commitment; and

Whereas, the VHA has bolstered physician retention and reduced physician burnout by offering competitive financial relief to physicians and making improvements in workload, organizational satisfaction, and psychological safety; and

Whereas, the VHA compensates physicians using Title 38 pay scales, which provides special authority to recruit and retain employees in certain health care occupations, and also allows the agency to be competitive with other healthcare facilities in the area; and

Whereas, the IHS compensates physicians using Title 5 pay scales, which are generally less than Title 38 pay scales; and

Whereas, the Partnership for Public Service and Boston Consulting Group (PPS-BCG) reported that the IHS ranked in the bottom-quartile of agencies within the U.S. Department of Health and Human Services for employee engagement and satisfaction (332 of 432) in 2022; and

Whereas, the PPS-BCG reported that nearly half of IHS physicians and other employees were not satisfied with their pay and nearly a third were not satisfied with their work-life balance in 2022; and

Whereas, the AMA recommends that compensation for IHS physicians be increased to a level competitive with other federal agencies and non-governmental service (H-350.977); and

Whereas, physicians employed by the federal government may be eligible for the Public Service Loan Forgiveness Program, which forgives qualifying federal loans after a standard ten-year repayment plan; and
Whereas, loan repayment can address physician retention and decrease physician burnout in facilities that may not provide competitive pay or are in geographically remote locations; and

Whereas, the AMA has stated that reducing physician burnout should be an urgent priority; and

Whereas, the AMA already supports immediate changes in the Public Service Loan Forgiveness Program to allow physicians to receive immediate loan forgiveness when they practice in a Veteran’s Health Administration facility due to the VA physician shortage; therefore be it

RESOLVED, that our American Medical Association amend Indian Health Service H-350.977 by addition and deletion as follows:

Indian Health Service H-350.977

The policy of the AMA is to support efforts in Congress to enable the Indian Health Service to meet its obligation to bring American Indian health up to the general population level. The AMA specifically recommends: (1) Indian Population: (a) In current education programs, and in the expansion of educational activities suggested below, special consideration be given to involving the American Indian and Alaska native population in training for the various health professions, in the expectation that such professionals, if provided with adequate professional resources, facilities, and income, will be more likely to serve the tribal areas permanently; (b) Exploration with American Indian leaders of the possibility of increased numbers of nonfederal American Indian health centers, under tribal sponsorship, to expand the American Indian role in its own health care; (c) Increased involvement of private practitioners and facilities in American Indian care, through such mechanisms as agreements with tribal leaders or Indian Health Service contracts, as well as normal private practice relationships; and (d) Improvement in transportation to make access to existing private care easier for the American Indian population.

(2) Federal Facilities: Based on the distribution of the eligible population, transportation facilities and roads, and the availability of alternative nonfederal resources, the AMA recommends that those Indian Health Service facilities currently necessary for American Indian care be identified and that an immediate construction and modernization program be initiated to bring these facilities up to current standards of practice and accreditation.

(3) Personnel Manpower: (a) Compensation scales for Indian Health Service physicians be increased to a level competitive with other Federal agencies and nongovernmental service; (b) Consideration should be given to increased compensation for specialty and primary care service in remote areas; (c) In conjunction with improvement of Service facilities, efforts should be made to establish closer ties with teaching centers and other federal health agencies, thus increasing both the available staffing manpower and the level of professional expertise available for consultation; (d) Allied health professional staffing of Service facilities should be maintained at a level appropriate to the special needs of the population served without detracting from physician compensation; (e) Continuing education opportunities should be provided for those health professionals serving these communities, and especially those in remote areas, and, increased peer contact, both to maintain the quality of care and to avert professional isolation and burnout; and (f) Consideration should be given to a federal statement of policy supporting continuation of the Public Health Service to reduce the great uncertainty now felt by many career officers of the corps.

(4) Medical Societies: In those states where Indian Health Service facilities are located, and in counties containing or adjacent to Service facilities, that the appropriate medical societies should explore the possibility of increased formal liaison with local Indian Health Service physicians. Increased support from organized medicine for improvement of health care provided
under their direction, including professional consultation and involvement in society activities should be pursued.

(5) Our AMA also support the removal of any requirement for competitive bidding in the Indian Health Service that compromises proper care for the American Indian population.

(6) Our AMA will advocate that the Indian Health Service (IHS) establish an Office of Academic Affiliations responsible for coordinating partnerships with LCME- and COCA-accredited medical schools and ACGME-accredited residency programs.

(7) Our AMA will encourage the development of funding streams to promote rotations and learning opportunities at Indian Health Service, Tribal, and Urban Indian Health Programs.

(8) Our AMA will call for an immediate change in the Public Service Loan Forgiveness Program to allow physicians to receive immediate loan forgiveness when they practice in an Indian Health Service, Tribal, or Urban Indian Health Program. (Modify Current HOD Policy)

Fiscal Note: Modest - between $1,000 - $5,000

RELEVANT AMA POLICY

Indian Health Service H-350.977
The policy of the AMA is to support efforts in Congress to enable the Indian Health Service to meet its obligation to bring American Indian health up to the general population level. The AMA specifically recommends: (1) Indian Population: (a) In current education programs, and in the expansion of educational activities suggested below, special consideration be given to involving the American Indian and Alaska native population in training for the various health professions, in the expectation that such professionals, if provided with adequate professional resources, facilities, and income, will be more likely to serve the tribal areas permanently; (b) Exploration with American Indian leaders of the possibility of increased numbers of nonfederal American Indian health centers, under tribal sponsorship, to expand the American Indian role in its own health care; (c) Increased involvement of private practitioners and facilities in American Indian care, through such mechanisms as agreements with tribal leaders or Indian Health Service contracts, as well as normal private practice relationships; and (d) Improvement in transportation to make access to existing private care easier for the American Indian population. (2) Federal Facilities: Based on the distribution of the eligible population, transportation facilities and roads, and the availability of alternative nonfederal resources, the AMA recommends that those Indian Health Service facilities currently necessary for American Indian care be identified and that an immediate construction and modernization program be initiated to bring these facilities up to current standards of practice and accreditation. (3) Manpower: (a) Compensation for Indian Health Service physicians be increased to a level competitive with other Federal agencies and nongovernmental service; (b) Consideration should be given to increased compensation for service in remote areas; (c) In conjunction with improvement of Service facilities, efforts should be made to establish closer ties with teaching centers, thus increasing both the available manpower and the level of professional expertise available for consultation; (d) Allied health professional staffing of Service facilities should be maintained at a level appropriate to the special needs of the population served; (e) Continuing education opportunities should be provided for those health professionals serving these communities, and especially those in remote areas, and, increased peer contact, both to maintain the quality of care and to avert professional isolation; and (f) Consideration should be given to a federal statement of policy supporting continuation of the Public Health Service to reduce the great uncertainty now felt by many career officers of the corps. (4) Medical Societies: In those states where Indian Health Service facilities are located, and in counties containing or adjacent to Service facilities, that the appropriate medical societies should explore the possibility of increased formal liaison with local Indian Health Service physicians. Increased support from organized medicine for improvement of health care provided under their direction, including professional consultation and involvement in society activities should be pursued. (5) Our AMA also support the removal of any requirement for competitive bidding in the Indian Health Service that compromises proper care for the American Indian population. (6) Our AMA will advocate that the Indian Health Service (IHS) establish an Office of Academic Affiliations responsible for coordinating partnerships with LCME- and COCA-accredited medical schools and ACGME-accredited residency programs. (7) Our AMA will encourage the development of funding streams to promote rotations and learning opportunities at Indian Health Service, Tribal, and Urban Indian Health Programs.

Fixing the VA Physician Shortage with Physicians D-510.990
1. Our AMA will work with the VA to enhance its loan forgiveness efforts to further incentivize physician recruiting and retention and improve patient access in the Veterans Administration facilities. 2. Our AMA will call for an immediate change in the Public Service Loan Forgiveness Program to allow physicians to receive immediate loan forgiveness when they practice in a Veterans Administration facility. 3. Our AMA will work with the Veterans Administration to minimize the administrative burdens that discourage or prevent non-VA physicians without compensation (WOCs) from volunteering their time to care for veterans. 4. Our AMA will: (a) continue to support the mission of the Department of Veterans Affairs Office of Academic Affiliations for expansion of graduate medical education (GME) residency positions; and (b) collaborate with appropriate stakeholder organizations to advocate for preservation of Veterans Health Administration funding for GME and support its efforts to expand GME residency positions in the federal budget and appropriations process. 5. Our AMA supports postgraduate medical education service obligations through programs where the
expectation for service, such as military service, is reasonable and explicitly delineated in the contract with the trainee.

6. Our AMA opposes the blanket imposition of service obligations through any program where physician trainees rotate through the facility as one of many sites for their training.

Physician Burnout D-405.972
Our AMA will work with: (1) Centers for Medicare and Medicaid Services (CMS), The Joint Commission, and other accrediting bodies and interested stakeholders to add an institutional focus on physician wellbeing as an accreditation standard for hospitals, focusing on system-wide interventions that do not add additional burden to physicians; and (2) hospitals and other stakeholders to determine areas of focus on physician wellbeing, to include the removal of intrusive questions regarding physician physical or mental health or related treatments on initial or renewal hospital credentialing applications.

Principles of and Actions to Address Medical Education Costs and Student Debt H-305.925
The costs of medical education should never be a barrier to the pursuit of a career in medicine nor to the decision to practice in a given specialty. To help address this issue, our American Medical Association (AMA) will:

1. Collaborate with members of the Federation and the medical education community, and with other interested organizations, to address the cost of medical education and medical student debt through public- and private-sector advocacy.
2. Vigorously advocate for and support expansion of and adequate funding for federal scholarship and loan repayment programs--such as those from the National Health Service Corps, Indian Health Service, Armed Forces, and Department of Veterans Affairs, and for comparable programs from states and the private sector--to promote practice in underserved areas, the military, and academic medicine or clinical research.
3. Encourage the expansion of National Institutes of Health programs that provide loan repayment in exchange for a commitment to conduct targeted research.
4. Advocate for increased funding for the National Health Service Corps Loan Repayment Program to assure adequate funding of primary care within the National Health Service Corps, as well as to permit: (a) inclusion of all medical specialties in need, and (b) service in clinical settings that care for the underserved but are not necessarily located in health professions shortage areas.
5. Encourage the National Health Service Corps to have repayment policies that are consistent with other federal loan forgiveness programs, thereby decreasing the amount of loans in default and increasing the number of physicians practicing in underserved areas.
6. Work to reinstate the economic hardship deferment qualification criterion known as the “20/220 pathway,” and support alternate mechanisms that better address the financial needs of trainees with educational debt.
7. Advocate for federal legislation to support the creation of student loan savings accounts that allow for pre-tax dollars to be used to pay for student loans.
8. Work with other concerned organizations to advocate for legislation and regulation that would result in favorable terms and conditions for borrowing and for loan repayment, and would permit 100% tax deductibility of interest on student loans and elimination of taxes on aid from service-based programs.
9. Encourage the creation of private-sector financial aid programs with favorable interest rates or service obligations (such as community- or institution-based loan repayment programs or state medical society loan programs).
10. Support stable funding for medical education programs to limit excessive tuition increases, and collect and disseminate information on medical school programs that cap medical education debt, including the types of debt management education that are provided.
11. Work with state medical societies to advocate for the creation of either tuition caps or, if caps are not feasible, pre-defined tuition increases, so that medical students will be aware of their tuition and fee costs for the total period of their enrollment.
12. Encourage medical schools to (a) Study the costs and benefits associated with non-traditional instructional formats (such as online and distance learning, and combined baccalaureate/MD or DO programs) to determine if cost savings to medical schools and to medical students could be realized without jeopardizing the quality of medical education; (b) Engage in fundraising activities to increase the availability of scholarship support, with the support of the Federation, medical schools, and state and specialty medical societies, and develop or enhance financial aid opportunities for medical students, such as self-managed, low-interest loan programs; (c) Cooperate with postsecondary institutions to establish
collaborative debt counseling for entering first-year medical students; (d) Allow for flexible scheduling for medical students who encounter financial difficulties that can be remedied only by employment, and consider creating opportunities for paid employment for medical students; (e) Counsel individual medical student borrowers on the status of their indebtedness and payment schedules prior to their graduation; (f) Inform students of all government loan opportunities and disclose the reasons that preferred lenders were chosen; (g) Ensure that all medical student fees are earmarked for specific and well-defined purposes, and avoid charging any overly broad and ill-defined fees, such as but not limited to professional fees; (h) Use their collective purchasing power to obtain discounts for their students on necessary medical equipment, textbooks, and other educational supplies; (i) Work to ensure stable funding, to eliminate the need for increases in tuition and fees to compensate for unanticipated decreases in other sources of revenue; mid-year and retroactive tuition increases should be opposed.

13. Support and encourage state medical societies to support further expansion of state loan repayment programs, particularly those that encompass physicians in non-primary care specialties.

14. Take an active advocacy role during reauthorization of the Higher Education Act and similar legislation, to achieve the following goals: (a) Eliminating the single holder rule; (b) Making the availability of loan deferment more flexible, including broadening the definition of economic hardship and expanding the period for loan deferment to include the entire length of residency and fellowship training; (c) Retaining the option of loan forbearance for residents ineligible for loan deferment; (d) Including, explicitly, dependent care expenses in the definition of the “cost of attendance”; (e) Including room and board expenses in the definition of tax-exempt scholarship income; (f) Continuing the federal Direct Loan Consolidation program, including the ability to “lock in” a fixed interest rate, and giving consideration to grace periods in renewals of federal loan programs; (g) Adding the ability to refinance Federal Consolidation Loans; (h) Eliminating the cap on the student loan interest deduction; (i) Increasing the income limits for taking the interest deduction; (j) Making permanent the education tax incentives that our AMA successfully lobbied for as part of Economic Growth and Tax Relief Reconciliation Act of 2001; (k) Ensuring that loan repayment programs do not place greater burdens upon married couples than for similarly situated couples who are cohabitating; (l) Increasing efforts to collect overdue debts from the present medical student loan programs in a manner that would not interfere with the provision of future loan funds to medical students.

15. Continue to work with state and county medical societies to advocate for adequate levels of medical school funding and to oppose legislative or regulatory provisions that would result in significant or unplanned tuition increases.

16. Continue to study medical education financing, so as to identify long-term strategies to mitigate the debt burden of medical students, and monitor the short-and long-term impact of the economic environment on the availability of institutional and external sources of financial aid for medical students, as well as on choice of specialty and practice location.

17. Collect and disseminate information on successful strategies used by medical schools to cap or reduce tuition.

18. Continue to monitor the availability of and encourage medical schools and residency/fellowship programs to (a) provide financial aid opportunities and financial planning/debt management counseling to medical students and resident/fellow physicians; (b) work with key stakeholders to develop and disseminate standardized information on these topics for use by medical students, resident/fellow physicians, and young physicians; and (c) share innovative approaches with the medical education community.

19. Seek federal legislation or rule changes that would stop Medicare and Medicaid decertification of physicians due to unpaid student loan debt. The AMA believes that it is improper for physicians not to repay their educational loans, but assistance should be available to those physicians who are experiencing hardship in meeting their obligations.

20. Related to the Public Service Loan Forgiveness (PSLF) Program, our AMA supports increased medical student and physician participation in the program, and will: (a) Advocate that all resident/fellow physicians have access to PSLF during their training years; (b) Advocate against a monetary cap on PSLF and other federal loan forgiveness programs; (c) Work with the United States Department of Education to ensure that any cap on loan forgiveness under PSLF be at least equal to the principal amount borrowed; (d) Ask the United States Department of Education to include all terms of PSLF in the contractual obligations of the Master Promissory Note; (e) Encourage the Accreditation Council for Graduate Medical Education (ACGME) to require residency/fellowship programs to include within the terms, conditions, and benefits of program appointment information on the employer’s PSLF program qualifying status; (f) Advocate that the profit status of a physician’s training institution not be a factor for
PSLF eligibility; (g) Encourage medical school financial advisors to counsel wise borrowing by medical students, in the event that the PSLF program is eliminated or severely curtailed; (h) Encourage medical school financial advisors to increase medical student engagement in service-based loan repayment options, and other federal and military programs, as an attractive alternative to the PSLF in terms of financial prospects as well as providing the opportunity to provide care in medically underserved areas; (i) Strongly advocate that the terms of the PSLF that existed at the time of the agreement remain unchanged for any program participant in the event of any future restrictive changes; (j) Monitor the denial rates for physician applicants to the PSLF; (k) Undertake expanded federal advocacy, in the event denial rates for physician applicants are unexpectedly high, to encourage release of information on the basis for the high denial rates, increased transparency and streamlining of program requirements, consistent and accurate communication between loan servicers and borrowers, and clear expectations regarding oversight and accountability of the loan servicers responsible for the program; (l) Work with the United States Department of Education to ensure that applicants to the PSLF and its supplemental extensions, such as Temporary Expanded Public Service Loan Forgiveness (TEPSLF), are provided with the necessary information to successfully complete the program(s) in a timely manner; and (m) Work with the United States Department of Education to ensure that individuals who would otherwise qualify for PSLF and its supplemental extensions, such as TEPSLF, are not disqualified from the program(s).

21. Advocate for continued funding of programs including Income-Driven Repayment plans for the benefit of reducing medical student load burden.

22. Strongly advocate for the passage of legislation to allow medical students, residents and fellows who have education loans to qualify for interest-free deferment on their student loans while serving in a medical internship, residency, or fellowship program, as well as permitting the conversion of currently unsubsidized Stafford and Graduate Plus loans to interest free status for the duration of undergraduate and graduate medical education.

23. Continue to monitor opportunities to reduce additional expense burden upon medical students including reduced-cost or free programs for residency applications, virtual or hybrid interviews, and other cost-reduction initiatives aimed at reducing non-educational debt.

24. Encourage medical students, residents, fellows and physicians in practice to take advantage of available loan forgiveness programs and grants and scholarships that have been historically underutilized, as well as financial information and resources available through the Association of American Medical Colleges and American Association of Colleges of Osteopathic Medicine, as required by the Liaison Committee on Medical Education and Commission on Osteopathic College Accreditation, and resources available at the federal, state and local levels.

25. Support federal efforts to forgive debt incurred during medical school and other higher education by physicians and medical students, including educational and cost of attendance debt.

26. Support that residency and fellowship application services grant fee assistance to applicants who previously received fee assistance from medical school application services or are determined to have financial need through another formal mechanism.

**Cares Act Equity and Loan Forgiveness in the Medicare Accelerated Payment Program D-305.953**

In the setting of the COVID-19 pandemic, our AMA will advocate for additional financial relief for physicians to reduce medical school educational debt.
Whereas, the U.S. is expected to have an alarming and deeply concerning shortage of physicians in primary and specialty care; and

Whereas, the number of practicing physicians is decreasing due to burnout, retirement, pursuing non-clinical practices, and other causes; and

Whereas, the current number of medical students, residents, and fellows will not prevent such a shortage; and

Whereas, the U.S. Congress has repeatedly failed to provide funding to educate the necessary number of physicians to provide needed care of our aging and expanding population; and

Whereas, physician assistants (PAs), and advanced practice providers (APPs)/Nurse Practitioners (NPs) have increasingly replaced licensed physicians in providing primary and some specialty care due to geographic and economic shortage of physicians; and

Whereas, many states have allowed non-physician extenders to practice medicine independently rather than in collaboration with licensed physicians; and

Whereas, a large number of physicians graduate from medical schools in the U.S. or abroad take and pass USMLE part one and two, then apply for residency, but fail to get one of the limited number of post graduate training spots in the U.S.; and

Whereas, these graduating physicians spend six to eight years in undergraduate and graduate studies before graduating, and some of them serve a year of internship required to graduate. They spend huge sums of money to complete their studies, sit for and pass the rigorous USMLE tests, spend thousands of dollars on their applications for the matching programs and interviews; and

Whereas, these unfortunate physicians face the very hard reality of a sudden irreversible interruption of their careers, including, but not limited to large outstanding debts they cannot repay, temporary to permanent interruption of their education, and the threat of never being able to care for patients, while others who are less qualified, less educated, and less financially burdened, such as APPs/NPs can practice medicine with or without collaborating with a licensed physician; and

Whereas, in 2014, Missouri passed a law allowing these unfortunate graduating physicians to obtain a license called Assistant Physician (AP) which allow these physicians without residency to work in underserved areas in primary care, and only in collaboration with a licensed Missouri physician; and
Whereas, many other states have passed similar or much less restrictive laws, under different titles and processes such as Graduate Physician, Associate Physician, etc., some of them allowing this group to gradually practice independently without a residency; and

Whereas, the number of these unfortunate graduating physicians has grown by the thousands each year, yet Congress did not provide the needed funding to create enough residency slots to train these physicians who would partially solve the expected shortages; and

Whereas, many of these graduating physicians, after practicing in collaboration with licensed physicians, acquiring additional skills and experience, were able to match into a residency program; therefore be it

RESOLVED, that our American Medical Association Board of Trustees study the role these unmatched physicians can play in providing care to our patients, their impact of lessening the impact of physician shortages, and provide recommendations on how to enroll these graduating physicians with a uniform title, privileges, geographic restrictions, and collaboration choices, and report to the House of Delegates at the next Interim meeting. (Directive to Take Action)

Fiscal Note: Minimal - less than $1,000

Received: 4/22/2024
Whereas, the Supreme Court’s 2022 ruling in Dobbs v. Jackson overturned the 1972 Roe v Wade decision; and

Whereas, at least 26 states immediately enacted laws to ban or restrict abortion care in response to the Supreme Court’s ruling in Dobbs v. Jackson; and

Whereas, national specialty societies host mandatory board certification exams in locations that often require interstate travel for trainees completing residency and fellowship programs; and

Whereas, existing AMA policy supports encouraging American Board of Medical Specialties member boards to assess whether initial board certification processes should be revised to allow for testing requirements and arrangements that accommodate physicians’ training and employment schedules; and

Whereas, pregnant trainees may encounter health emergencies during the time frame of completing mandatory board certification exam requirements that necessitate access to a full spectrum of reproductive healthcare services, interventions and treatment options, including abortion; therefore be it

RESOLVED, that our American Medical Association encourage national specialty boards who hold in-person centralized mandatory exams for board certification to offer alternative methods of taking mandatory board certification examinations, such as virtual boards examinations, or to locate them outside of states that are in the process of banning or restricting or that have banned or restricted abortion, gender affirming care or reproductive healthcare services. (New HOD Policy)

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY

H-295.923 Medical Training and Termination of Pregnancy
1. Our AMA supports the education of medical students, residents and young physicians about the need for physicians who provide termination of pregnancy services, the medical and public health importance of access to safe termination of pregnancy, and the medical, ethical, legal and psychological principles associated with termination of pregnancy.
2. Our AMA will advocate for the availability of abortion education and clinical exposure to medication and procedural abortion for medical students and resident/fellow physicians and opposes efforts to interfere
with or restrict the availability of this education and training.

3. In the event that medication and procedural abortion are limited or illegal in a home institution, our AMA will support pathways for medical students and resident/fellow physicians to receive this training at another location.

4. Our AMA will advocate for funding for institutions that provide clinical training on reproductive health services, including medication and procedural abortion, to medical students and resident/fellow physicians from other programs, so that they can expand their capacity to accept out-of-state medical students and resident/fellow physicians seeking this training.

5. Our AMA encourages the Accreditation Council for Graduate Medical Education to consistently enforce compliance with the standardization of abortion training opportunities as per the requirements set forth by the relevant Residency Review Committees.

D-5.999 Preserving Access to Reproductive Health Services

Our AMA: (1) recognizes that healthcare, including reproductive health services like contraception and abortion, is a human right; (2) opposes limitations on access to evidence-based reproductive health services, including fertility treatments, contraception, and abortion; (3) will work with interested state medical societies and medical specialty societies to vigorously advocate for broad, equitable access to reproductive health services, including fertility treatments, fertility preservation, contraception, and abortion; (4) supports shared decision-making between patients and their physicians regarding reproductive healthcare; (5) opposes any effort to undermine the basic medical principle that clinical assessments, such as viability of the pregnancy and safety of the pregnant person, are determinations to be made only by healthcare professionals with their patients; (6) opposes the imposition of criminal and civil penalties or other retaliatory efforts, including adverse medical licensing actions and the termination of medical liability coverage or clinical privileges against patients, patient advocates, physicians, other healthcare workers, and health systems for receiving, assisting in, referring patients to, or providing reproductive health services; (7) will advocate for legal protections for patients who cross state lines to receive reproductive health services, including contraception and abortion, or who receive medications for contraception and abortion from across state lines, and legal protections for those that provide, support, or refer patients to these services; and (8) will advocate for legal protections for medical students and physicians who cross state lines to receive education in or deliver reproductive health services, including contraception and abortion. [Appended: Res. 711, A-23; Reaffirmation: A-23; Appended: Res. 317, I-22; Modified: BOT Rep. 4, I-22; Reaffirmed: Res. 224, I-22; Res. 028, A-22.]
Whereas, the United States Medical Licensing Examination (USMLE) Step 3 is the final licensure examination in the USMLE series for physician licensure, which is taken during residency training; and

Whereas, Step 3 is a two-day examination, with the first day ("Foundations of Independent Practice," 7 hours of testing) focused on basic science principles and the second day ("Advanced Clinical Medicine," 9 hours of testing) focused on application of clinical knowledge; and

Whereas, the first testing day consists of multiple-choice questions and the second day consists of a combination of multiple-choice questions and computer-based case simulations; and

Whereas, the cost of registering to take Step 3 was $915 in 2023, with an increase to $925 in 2024 and subsequent annual fee increases; and

Whereas, the Step 3 test preparation question bank costs an individual resident $429 in 2023, which an increase for each renewal period; and

Whereas, given that the computer-based simulation section utilizes software from a company called Primum, which differs drastically from the Electronic Medical Record, trainees often purchase CCS Cases to learn the software, which costs at minimum $70; and

Whereas, therefore, the total cost of Step 3 preparation and examination is at least $1,400 per trainee, not including two missed days of work; and

Whereas, trainees may have to use their designated days off to prepare for and to sit for the examination, exacerbating moral injury and burnout; and

Whereas, the objective of Step 3 is to test general medicine concepts primarily in an ambulatory setting, which does not accurately reflect the sub-specialization and complexity of modern-day medicine, and, therefore, does not justify a numerical score across disciplines; and

Whereas, Step 3 was designed for examination after successful completion of one’s medical degree, however, USMLE recommends completion of one post-graduate year of training prior to taking the exam; and

Whereas, specialty choice is highly predictive of examination score; trainees in general medicine fields (i.e. family medicine, emergency medicine, internal medicine, medicine-
Whereas, the National Board of Medical Examiners (NBME) published data from 275,392 board-certified physicians who passed Step 3 between 2000 and 2017 indicating that a higher score inversely correlated with likelihood of disciplinary action from the medical board (though limitations included treating all disciplinary actions equally, which does not translate directly to medical and/or surgical skills); and

Whereas, there are no published data that correlate one’s numeric Step 3 score with true clinical skills and beneficial patient outcomes; and

Whereas, preparing for Step 3 on top of clinical duties during residency may detract from on-the-job learning and patient care, especially for trainees who pursue fellowships, as Step 3 scores are a component of the application process; and

Whereas, residency programs do not give residents protected study time for Step 3, thus, residents must prepare for the examination on top of their 60-80+ hour work-weeks; and

Whereas, a one-day, pass/fail examination has the potential to reduce trainee costs, promote trainee well-being, and encourage more learning via patient care in lieu of question banks; therefore be it

RESOLVED, that our American Medical Association supports changing the United States Medical Licensing Examination (USMLE) Step 3 from a numerically-scored examination to a pass/fail examination (New HOD Policy); and be it further

RESOLVED, that our AMA supports changing USMLE Step 3 from a two-day examination to a one-day examination (New HOD Policy); and be it further

RESOLVED, that our AMA supports the option to take USMLE Step 3 after passing Step 2-Clinical Knowledge (CK) during medical school (New HOD Policy); and be it further

RESOLVED, that our AMA advocates that residents taking the USMLE Step 3 exam be allowed days off to take the exam without having this time counted for PTO or vacation balance. (Directive to Take Action)

RELEVANT AMA POLICY:

Proposed Single Examination for Licensure H-275.962: Our AMA: (1) endorses the concept of a single examination for medical licensure; (2) urges the NBME and the FSMB to place responsibility for developing Steps I and II of the new single examination for licensure with the faculty of U.S. medical schools working through the NBME; (3) continues its vigorous support of the LCME and its accreditation of medical schools and supports monitoring the impact of a single examination on the effectiveness of the LCME; (4) urges the NBME and the FSMB to establish a high standard for passing the examination; (5) strongly recommends and supports actively pursuing efforts to assure that the standard for passing be criterion-based; that is, that passing the examination indicate a degree of knowledge acceptable for practicing medicine; and (6) will work with the appropriate stakeholders to study the advantages, disadvantages, and practicality of combining the USMLE Step 1 and Step 2 CK exams into a single licensure exam measuring both foundational science and clinical knowledge competencies. [CME Rep. B, I-89; Reaffirmed: Sunset Report, A-00; Modified: CME Rep. 2, A-10; Reaffirmed: BOT Rep. 3, I-14; Appended: Res. 309, A-17]
Whereas, founded in 1902, the Alpha Omega Alpha (AOA) Honor Medical Society consists of over 200,000 medical student and physician members across 135 chapters with a mission to recognize high educational achievement; and

Whereas, AOA membership is disproportionately White: a 2017 cohort study of 4,655 medical students illustrated that AOA membership for White students was nearly 6 times greater than that for Black students and nearly 2 times greater than that for Asian students; and

Whereas, Black medical students are significantly less likely to be inducted into AOA compared to other groups, according to a 2019 cohort study that examined data from 11,781 ERAS applications; and

Whereas, exclusion from AOA membership also disproportionately impacts Hispanic/Latino, American Indian/Alaska Native, and Native Hawaiian/Pacific Islander students; and

Whereas, these inequities are especially concerning given the differential access AOA membership affords; AOA members are prioritized for interview invites and have greater odds of matching into traditionally competitive specialties (i.e., dermatology, plastic surgery, orthopedic surgery, urology, radiation oncology, and otolaryngology); and

Whereas, according to AOA’s website, 75% of medical school deans are AOA members, suggesting that membership can amplify success over the course of one’s career; and

Whereas, entry into AOA relies heavily upon clerkship grades, which are subject to significant biases, with studies showing students of color tend to receive lower clerkship grades compared to their White counterparts, particularly those who are underrepresented in medicine (UIM), even after controlling for test scores; and

Whereas, in clinical evaluations, White medical students have a greater propensity to be characterized by their professional attributes such as “knowledgeable,” while Black students are more likely to be described by personal characteristics like “pleasant;” and

Whereas, UIM students face additional burdens and energy expenditures that non-UIM students do not experience, such as activation via triggers, internal dialogue, and threat response, which may negatively impact their clerkship grades; and

Whereas, UIM students additionally face difficulty finding peer support networks, trouble establishing peer-working relationships, and experiences of racism while being expected to lead
uncompensated diversity, equity, and inclusion efforts at their institutions, all of which can
detract from academic and clinical duties; and

Whereas, multiple institutions have disaffiliated from AOA due to racial inequities in
membership, including the University of San Francisco School of Medicine, the Yale School of
Medicine, and the Icahn School of Medicine at Mount Sinai7-9; and

Whereas, in 2020, AOA evolved eligibility criteria to promote diversity by increasing the number
of members per class and by allowing chapters to develop their own metrics, although this
change has failed to address the structural issues perpetuated by AOA10,11; and

Whereas, disaffiliation from AOA entails eliminating institutional ties to the AOA national
organization, and residency applicants select “no AOA chapter at my school” under the ERAS
awards section; and

Whereas, disaffiliation from AOA is a critical step toward promoting equity in admissions and
medical education at large, and disaffiliation sends a compelling message that medical
education needs alternative, equitable mechanisms to recognize the excellence of trainees;
therefore be it

RESOLVED, that our American Medical Association recognizes that the Alpha Omega Alpha
Honor Medical Society disproportionately benefits privileged trainees (New HOD Policy); and be
it further

RESOLVED, that our AMA supports institutional disaffiliation from the Alpha Omega Alpha
Honor Medical Society due to its perpetuation of racial inequities in medicine (New HOD Policy); and
be it further

RESOLVED, that our AMA recognizes that the Alpha Omega Alpha Honor Medical Society
perpetuates and accentuates discrimination against trainees of color that is inherent in medical
training. (New HOD Policy)

Whereas, funding for Graduate Medical Education (GME) is derived from both public and private sources; and

Whereas, the federal government is by far the largest contributor to GME; and

Whereas, various programs that support physician workforce development are managed by agencies within the Departments of Health and Human Services, Veterans Affairs, and Defense; and

Whereas, Medicare is the largest source of federal GME funding and Medicaid, a joint federal-state program, is the second largest source of support for GME; and

Whereas, the ACGME does not control and has no involvement in resident/fellow salaries; and

Whereas, each Sponsoring Institution’s Graduate Medical Education Committee must approve annual recommendations to administration regarding resident/fellow salaries and benefits; and

Whereas, the Institute of Medicine's (IOM) Committee on Government and Financing of Graduate Medical Education (GME) put out their report “Graduate Medical Education That Meets the Nation’s Health Needs” in 2014; and

Whereas, it was in 2016 that CME last gave its report on Accountability and Transparency in GME funding (CME Report 5-A-16); and

Whereas, it was from CME report 5 at A-16 that our American Medical Association adopted policy H305.929 with provisions 3) and 4) committing to overall transparency and specifically financial transparency with regard to Graduate Medical Education; and

Whereas, The Consolidated Appropriations Act of 2021 added 1000 new Medicare-funded residency positions for the first time since 1997; and

Whereas, it was in 2022 that our AMA, through house policy H305.930, called for appropriate increases in resident salaries; and therefore be it

RESOLVED, that our American Medical Association work with interested parties (including but not limited to the CMS, VA, DOD and others) to issue an annual report detailing the quantity of GME funding for each year including how those funds are allocated on a per resident or fellow basis, for a minimum of the previous 5 years (Directive to Take Action): and be it further,

RESOLVED, that our AMA reaffirm policy H 305.929 (Last modified 2016). (Reaffirm HOD Policy)
Fiscal Note: Minimal - less than $1,000

Received: 4/24/2024
Whereas, within Pennsylvania there have been discussions of healthcare organizations expanding the involvement of Advanced Care Practitioners (APP) within the healthcare organization boards; and

Whereas, in the state of Pennsylvania, the Pennsylvania Medical Society has passed a prophylactic policy "that all doctor’s medical and surgical societies both existing and newly established should be chaired by MD’s or DO’s"; and

Whereas, our AMA supports physician participation in healthcare organizations via H 405.953 (2017) which says:
1. Our AMA will advocate for and promote the membership of physicians on the boards of healthcare organizations including, but not limited to, acute care providers; insurance entities; medical device manufacturers; and health technology service organizations.
2. Our AMA will promote educational programs on corporate governance that prepare and enable physicians to participate on health organization boards.
3. Our AMA will provide physicians, the public, and health care organizations information on the positive impact of physician leadership; therefore be it

RESOLVED, that our American Medical Association reaffirm H 405.953. (Reaffirm HOD Policy)

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY

Participation of Physicians on Healthcare Organization Boards H-405.953
1. Our AMA will advocate for and promote the membership of physicians on the boards of healthcare organizations including, but not limited to, acute care providers; insurance entities; medical device manufacturers; and health technology service organizations.
2. Our AMA will promote educational programs on corporate governance that prepare and enable physicians to participate on health organization boards.
3. Our AMA will provide physicians, the public, and health care organizations information on the positive impact of physician leadership.
Citation: Res. 001, A-17;
Whereas, physicians take time out of continuous practice for a variety of reasons, such as for mental or physical health issues, family or personal life events; and

Whereas, such time off from practice raises questions about a physician’s fitness to return to active practice; and

Whereas, state medical boards are charged with protecting the public and must evaluate physicians wishing to return to practice to determine their readiness to practice in a safe and competent manner; and

Whereas, the Federation of State Medical Boards (FSMB) established the Workgroup on Reentry in 2023 to evaluate and revise its existing policies on physician reentry to practice; and

Whereas, the FSMB Workgroup on Reentry found a paucity of research to support development of reentry policies, procedures, and resources for state medical boards; and

Whereas, a survey of state medical boards found that only 57% have a policy or formal process for the evaluation or retraining for physician reentry to practice; and

Whereas, no structured/consistent criteria or standardized processes exist across the country to facilitate reentry without subjectivity, bias or possibly arbitrariness; and

Whereas, there is a need for a consistent approach to reentry to practice, informed by evidence based criteria, where available; and

Whereas, the collection of relevant research and data will require multiple sources of information beyond state medical boards, including specialty societies, certification boards and post licensure training programs; and

Whereas, the AMA, with its broad representation within the House of Medicine has the resources to support such data collection and research; therefore be it

RESOLVED, that our American Medical Association work with the FSMB, specialty and subspecialty societies, and other relevant stakeholders to study and develop evidence-based criteria for determining a physician’s readiness to reenter practice and identify resources for the evaluation and retraining of physicians seeking to reenter active practice. (Directive to Take Action)

Fiscal Note: Modest - between $1,000 - $5,000

RELEVANT AMA POLICY

Physician Reentry D-300.984
Our AMA:
1. Will continue to collaborate with other appropriate organizations on physician reentry issues including research on the need for and the effectiveness of reentry programs.
2. Will work collaboratively with the American Academy of Pediatrics and other interested groups to convene a conference on physician reentry which will bring together key stakeholders to address the development of reentry programs as well as the educational needs of physicians reentering clinical practice.
3. Will work with interested parties to establish a physician reentry program (PREP) information data base that is publicly accessible to physician applicants and which includes information pertaining to program characteristics.
4. Will support efforts to ensure the affordability and accessibility, and to address the unique liability issues related to PREPs.
5. Will make available to all interested parties the physician reentry program (PREP) system Guiding Principles for use as a basis for all reentry programs: a. Accessible: The PREP system is accessible by geography, time and cost. Reentry programs are available and accessible geographically across the United States and include national and regional pools of reentry positions. Reentering physicians with families or community ties are not burdened by having to relocate to attend a program. The length of time of reentry programs is standardized and is commensurate with the assessed clinical and educational needs of reentering physicians. The cost of reentry programs is not prohibitive to the physician, health care institutions or the health care system. b. Collaborative: The PREP system is designed to be collaborative to improve communication and resource sharing. Information and materials including evaluation instruments are shared across specialties, to the extent possible, to improve program and physician performance. A common nomenclature is used to maximize communication across specialties. Reentry programs share resources and create a common repository for such resources, which are easily accessible. c. Comprehensive: The PREP system is comprehensive to maximize program utility. Physician reentry programs prepare physicians to return to clinical activity in the discipline in which they have been trained or certified and in the practice settings they expect to work including community-based, public health, and hospital-based or academic practice. d. Ethical: The PREP system is based on accepted principles of medical ethics. Physician reentry programs will conform to physician licensure statues. The standards of professionalism, as stated in the AMA Code of Medical Ethics, must be followed. e. Flexible: The PREP system is flexible in structure in order to maximize program relevancy and usefulness. Physician reentry programs can accommodate modifications to program requirements and activities in ways that are optimal to the needs of reentering physicians. f. Modular: Physician reentry programs are modularized, individualized and competency-based. They are tailored to the learning needs of reentering physicians, which prevents the need for large, expensive, and standardized programs. Physicians should only be required to take those modules that allow them to meet an identified educational need. g. Innovative: Innovation is built into a PREP system allowing programs to offer state of the art learning and meet the diverse and changing needs of reentry physicians. Physician reentry programs develop and utilize learning tools including experimenting with innovative and novel curricular methodologies such as distance learning technologies and simulation. h. Accountable: The PREP system has mechanisms for assessment and is open to evaluation. Physician reentry programs have an evaluation component that is comparable among all specialties. Program assessments use objective measures to evaluate physician's competence at time of entry, during the program and at time of completion. Program outcomes are measured. Reliability and validity of the measures are established. Standardization of measures exist across programs to assess whether or not national standards are being met. i. Stable: A funding scheme is in place to ensure the PREP system is financially stable over the long-term. Adequate funding allows physician reentry programs to operate at sufficient and
appropriate capacity. j. Responsive: The PREP system makes refinements, updates and other changes when necessary. Physician reentry programs are equipped to address systemic changes such as changes in regulations. Additionally, the PREP system is prepared to respond efficiently to urgent health care needs within society including mobilizing clinically inactive physicians temporarily into the workforce to attend to an acute public health crisis, such as a terrorist, biological, chemical, or natural disaster.

6. Our AMA encourages each state which does not grant a full and unrestricted license to physicians undergoing reentry to develop a non-disciplinary category of licensure for physicians during their reentry process.

Citation: (CME Rep. 6, A-08; Reaffirmed: CME Rep. 11, A-12; Modified: CCB/CLRDPD Rep. 2, A-14; Appended: Res. 310, A-14)
 Whereas, rural Americans are more likely to die from heart disease, cancer, unintentional injury, chronic lower respiratory disease, and stroke than their urban counterparts; and

 Whereas, there are fewer health care providers per capita in nonmetropolitan areas; Although nearly 20% of the U.S. population lives in rural areas, less than 10% of U.S. doctors practice in rural areas; and

 Whereas, there are fewer health care providers per capita in nonmetropolitan areas; Although nearly 20% of the U.S. population lives in rural areas, less than 10% of U.S. doctors practice in rural areas; and

 Whereas, Continuing Medical Education (CME) credits are vital to all physicians; and

 Whereas, being a “preceptor” for medical students, residents, fellows, and other allied health professional students requires countless hours of preparation; and

 Whereas, the American Osteopathic Association (AOA) offers category 1B credit to its members for participation in the AOA Didactic and Preceptor Program; and

 Whereas, 60 AOA category 1B credits may be applied to the required 120 hours of CME for AOA physicians; and

 Whereas, the American Academy of Family Physicians offers CME credits to its members for teaching of medical students, residents, and other allied health professional students; and

 Whereas, the American Medical Association (AMA) does not recognize the AOA credits awarded for teaching and being a preceptor; and

 Whereas, recognizing such efforts would encourage more physicians to be involved in preceptor programs especially rural, which in turn would expose more students to the practice of medicine in more rural and underserved areas; therefore be it

 RESOLVED, that our American Medical Association along with the Council of Medical Education, formulate a “toolkit” to teach physicians who serve as preceptors, especially in rural and underserved areas, how to be better preceptors and the process on claiming AMA Category 1 credits for preparation and teaching medical students, residents, fellows, and other allied health professional students training in Liaison Committee on Medical Education/Accreditation Council for Graduate Medical Education accredited institutions, thereby making them a more effective preceptor (Directive to Take Action); and be it further
RESOLVED, that our AMA study formulating a plan, in collaboration with other interested bodies, to award AMA Category 1 credits to physicians who serve as preceptors in rural and underserved areas teaching medical students, residents, fellows, and other allied health professional students training in Liaison Committee on Medical Education/Accreditation Council for Graduate Medical Education accredited institutions thereby improving the rural healthcare workforce shortage (Directive to Take Action); and be it further

RESOLVED, that our AMA devise a method of converting those credits awarded by other organizations into AMA recognized credits for the purpose of CME. (Directive to Take Action)

RELEVANT AMA POLICY

H-300.977, Revisions to Physician’s Registration Award
Our AMA has adopted the following changes in the Physician's Recognition Award:
(1) to accept recertification by an AMA-recognized specialty board in satisfaction of requirements for a three-year PRA certificate;
(2) to allow credit for international conferences when these have been approved by the AMA prior to the event; and
(3) to allow credit for teaching to be reported for AMA PRA Category 2 Credit™ toward the award.

H-300.988, Restoring Integrity to Continuing Medical Education
The AMA (1) supports retention of the definitions of continuing medical education in the Physicians’ Recognition Award ("Continuing medical education consists of educational activities which serve to maintain, develop, or increase the knowledge, skills, and professional performance and relationships that a physician uses to provide services for patients, the public, or the profession. The content of CME is that body of knowledge and skills generally recognized and accepted by the profession as within the basic medical sciences, the discipline of clinical medicine, and the provision of health care to the public."); (2) urges members of the medical profession to be attentive to the distinction between continuing medical education and continuing education which is not related directly to their professional activities; (3) believes that accredited sponsors should designate as continuing medical education only those continuing education activities which meet the definition of continuing medical education; (4) encourages the ACCME and state medical associations on the state level to weigh seriously, in considering the sponsor’s continued accreditation, instances where an accredited sponsor identifies non-continuing medical education activities as continuing medical education; and (5) encourages state medical boards to accept for credit continuing education which relates directly to the professional activities of physicians, although each state with mandatory continuing medical education for reregistration of license has the prerogative of defining the continuing education it will accept for credit.
Whereas, the value of a college education was demonstrated in a 2002 Census Bureau study that “estimated in 1999, the average lifetime earnings of a Bachelor’s degree holder was $2.7 million, and 75 percent more than that earned by high school graduates in 1999”; and

Whereas, according to the Georgetown’s College Payoff report, those who possess “some postsecondary education, even without earning a degree, add nearly one quarter of a million dollars to lifetime earnings…and earnings rise substantially for those with Doctoral and Professional degrees…”; and

Whereas, the Social Security Administration reports that “lifetime earnings have important implications for retirement outcomes, including the level of Social Security benefits”; and

Whereas, “there are substantial differences in lifetime earnings by educational attainment”; and

Whereas, the Social Security Administration states recent research reflects that “men with graduate degrees earn $1.5 million more in median lifetime earnings than high school graduates, and women with graduate degrees earn $1.1 million more”; and

Whereas, according to the Georgetown College Payoff report, “the largest gender gap in earnings is for those with professional degrees…men earn about a million dollars more over a lifetime than women with these degrees”; and

Whereas, the Federal Registrar states that gainful employment reflects the “reasonable relationship between the loan debt incurred by students in a training program and income from employment after the training”; and

Whereas, “the Higher Education Act requires that certificate programs at all institutions and degree programs at private for-profit colleges must provide training that prepares students for gainful employment in a recognized occupation;” and “programs would have to show that:

a. “Graduates can afford their yearly debt payments…and the share of their annual earnings needed to devote to paying their debt must be equal to or less than 8 percent, or equal to or less than 20 percent of their discretionary earnings.”

b. “At least half of graduates have higher earnings than a typical high school graduate in their State’s labor force who never pursued a postsecondary education”; and

Whereas, according to the U.S. Department of Education, the Biden-Harris Administration “released final regulations that establish the most effective set of safeguards ever against
unaffordable debt or insufficient earnings for postsecondary students” and continue to seek ways to reduce the student debt burden; therefore be it

RESOLVED, that our American Medical Association collaborate with higher education authorities to research physician career outcomes and explore financial value transparency among higher educational institutional programs that grant professional and doctoral degrees beyond six years following graduation in light of the new gainful employment regulations and transparency provisions that will take effect July 1, 2024 (Directive to Take Action); and be it further

RESOLVED, that our AMA continue to work with key stakeholders and advocate for the resolution of the student loan crisis to protect physicians from unaffordable student debt and poor earning outcomes. (Directive to Take Action)

RELEVANT AMA POLICY

Principles of and Actions to Address Medical Education Costs and Student Debt H-305.925
The costs of medical education should never be a barrier to the pursuit of a career in medicine nor to the decision to practice in a given specialty. To help address this issue, our American Medical Association (AMA) will:

1. Collaborate with members of the Federation and the medical education community, and with other interested organizations, to address the cost of medical education and medical student debt through public- and private-sector advocacy.
2. Vigorously advocate for and support expansion of and adequate funding for federal scholarship and loan repayment programs—such as those from the National Health Service Corps, Indian Health Service, Armed Forces, and Department of Veterans Affairs, and for comparable programs from states and the private sector—to promote practice in underserved areas, the military, and academic medicine or clinical research.
3. Encourage the expansion of National Institutes of Health programs that provide loan repayment in exchange for a commitment to conduct targeted research.
4. Advocate for increased funding for the National Health Service Corps Loan Repayment Program to assure adequate funding of primary care within the National Health Service Corps, as well as to permit: (a) inclusion of all medical specialties in need, and (b) service in clinical settings that care for the underserved but are not necessarily located in health professions shortage areas.
5. Encourage the National Health Service Corps to have repayment policies that are consistent with other federal loan forgiveness programs, thereby decreasing the amount of loans in default and increasing the number of physicians practicing in underserved areas.
6. Work to reinstate the economic hardship deferment qualification criterion known as the “20/220 pathway,” and support alternate mechanisms that better address the financial needs of trainees with
educational debt.
7. Advocate for federal legislation to support the creation of student loan savings accounts that allow for pre-tax dollars to be used to pay for student loans.
8. Work with other concerned organizations to advocate for legislation and regulation that would result in favorable terms and conditions for borrowing and for loan repayment, and would permit 100% tax deductibility of interest on student loans and elimination of taxes on aid from service-based programs.
9. Encourage the creation of private-sector financial aid programs with favorable interest rates or service obligations (such as community- or institution-based loan repayment programs or state medical society loan programs).
10. Support stable funding for medical education programs to limit excessive tuition increases, and collect and disseminate information on medical school programs that cap medical education debt, including the types of debt management education that are provided.
11. Work with state medical societies to advocate for the creation of either tuition caps or, if caps are not feasible, pre-defined tuition increases, so that medical students will be aware of their tuition and fee costs for the total period of their enrollment.
12. Encourage medical schools to (a) Study the costs and benefits associated with non-traditional instructional formats (such as online and distance learning, and combined baccalaureate/MD or DO programs) to determine if cost savings to medical schools and to medical students could be realized without jeopardizing the quality of medical education; (b) Engage in fundraising activities to increase the availability of scholarship support, with the support of the Federation, medical schools, and state and specialty medical societies, and develop or enhance financial aid opportunities for medical students, such as self-managed, low-interest loan programs; (c) Cooperate with postsecondary institutions to establish collaborative debt counseling for entering first-year medical students; (d) Allow for flexible scheduling for medical students who encounter financial difficulties that can be remedied only by employment, and consider creating opportunities for paid employment for medical students; (e) Counsel individual medical student borrowers on the status of their indebtedness and payment schedules prior to their graduation; (f) Inform students of all government loan opportunities and disclose the reasons that preferred lenders were chosen; (g) Ensure that all medical student fees are earmarked for specific and well-defined purposes, and avoid charging any overly broad and ill-defined fees, such as but not limited to professional fees; (h) Use their collective purchasing power to obtain discounts for their students on necessary medical equipment, textbooks, and other educational supplies; (i) Work to ensure stable funding, to eliminate the need for increases in tuition and fees to compensate for unanticipated decreases in other sources of revenue; mid-year and retroactive tuition increases should be opposed.
13. Support and encourage state medical societies to support further expansion of state loan repayment programs, particularly those that encompass physicians in non-primary care specialties.
14. Take an active advocacy role during reauthorization of the Higher Education Act and similar legislation, to achieve the following goals: (a) Eliminating the single holder rule; (b) Making the availability of loan deferment more flexible, including broadening the definition of economic hardship and expanding the period for loan deferment to include the entire length of residency and fellowship training; (c) Retaining the option of loan forbearance for residents ineligible for loan deferment; (d) Including, explicitly, dependent care expenses in the definition of the "cost of attendance"; (e) Including room and board expenses in the definition of tax-exempt scholarship income; (f) Continuing the federal Direct Loan Consolidation program, including the ability to "lock in" a fixed interest rate, and giving consideration to grace periods in renewals of federal loan programs; (g) Adding the ability to refinance Federal Consolidation Loans; (h) Eliminating the cap on the student loan interest deduction; (i) Increasing the income limits for taking the interest deduction; (j) Making permanent the education tax incentives that our AMA successfully lobbied for as part of Economic Growth and Tax Relief Reconciliation Act of 2001; (k) Ensuring that loan repayment programs do not place greater burdens upon married couples than for similarly situated couples who are cohabitating; (l) Increasing efforts to collect overdue debts from the present medical student loan programs in a manner that would not interfere with the provision of future loan funds to medical students.
15. Continue to work with state and county medical societies to advocate for adequate levels of medical school funding and to oppose legislative or regulatory provisions that would result in significant or unplanned tuition increases.
16. Continue to study medical education financing, so as to identify long-term strategies to mitigate the debt burden of medical students, and monitor the short-and long-term impact of the economic environment on the availability of institutional and external sources of financial aid for medical students, as well as on choice of specialty and practice location.
17. Collect and disseminate information on successful strategies used by medical schools to cap or reduce tuition.

18. Continue to monitor the availability of and encourage medical schools and residency/fellowship programs to (a) provide financial aid opportunities and financial planning/debt management counseling to medical students and resident/fellow physicians; (b) work with key stakeholders to develop and disseminate standardized information on these topics for use by medical students, resident/fellow physicians, and young physicians; and (c) share innovative approaches with the medical education community.

19. Seek federal legislation or rule changes that would stop Medicare and Medicaid decertification of physicians due to unpaid student loan debt. The AMA believes that it is improper for physicians not to repay their educational loans, but assistance should be available to those physicians who are experiencing hardship in meeting their obligations.

20. Related to the Public Service Loan Forgiveness (PSLF) Program, our AMA supports increased medical student and physician participation in the program, and will: (a) Advocate that all resident/fellow physicians have access to PSLF during their training years; (b) Advocate against a monetary cap on PSLF and other federal loan forgiveness programs; (c) Work with the United States Department of Education to ensure that any cap on loan forgiveness under PSLF be at least equal to the principal amount borrowed; (d) Ask the United States Department of Education to include all terms of PSLF in the contractual obligations of the Master Promissory Note; (e) Encourage the Accreditation Council for Graduate Medical Education (ACGME) to require residency/fellowship programs to include within the terms, conditions, and benefits of program appointment information on the employer's PSLF program qualifying status; (f) Advocate that the profit status of a physician's training institution not be a factor for PSLF eligibility; (g) Encourage medical school financial advisors to counsel wise borrowing by medical students, in the event that the PSLF program is eliminated or severely curtailed; (h) Encourage medical school financial advisors to increase medical student engagement in service-based loan repayment options, and other federal and military programs, as an attractive alternative to the PSLF in terms of financial prospects as well as providing the opportunity to provide care in medically underserved areas; (i) Strongly advocate that the terms of the PSLF that existed at the time of the agreement remain unchanged for any program participant in the event of any future restrictive changes; (j) Monitor the denial rates for physician applicants to the PSLF; (k) Undertake expanded federal advocacy, in the event denial rates for physician applicants are unexpectedly high, to encourage release of information on the basis for the high denial rates, increased transparency and streamlining of program requirements, consistent and accurate communication between loan servicers and borrowers, and clear expectations regarding oversight and accountability of the loan servicers responsible for the program; (l) Work with the United States Department of Education to ensure that applicants to the PSLF and its supplemental extensions, such as Temporary Expanded Public Service Loan Forgiveness (TEPSLF), are provided with the necessary information to successfully complete the program(s) in a timely manner; and (m) Work with the United States Department of Education to ensure that individuals who would otherwise qualify for PSLF and its supplemental extensions, such as TEPSLF, are not disqualified from the program(s).

21. Advocate for continued funding of programs including Income-Driven Repayment plans for the benefit of reducing medical student load burden.

22. Strongly advocate for the passage of legislation to allow medical students, residents and fellows who have education loans to qualify for interest-free deferment on their student loans while serving in a medical internship, residency, or fellowship program, as well as permitting the conversion of currently unsubsidized Stafford and Graduate Plus loans to interest free status for the duration of undergraduate and graduate medical education.

23. Continue to monitor opportunities to reduce additional expense burden upon medical students including reduced-cost or free programs for residency applications, virtual or hybrid interviews, and other cost-reduction initiatives aimed at reducing non-educational debt.

24. Encourage medical students, residents, fellows and physicians in practice to take advantage of available loan forgiveness programs and grants and scholarships that have been historically underutilized, as well as financial information and resources available through the Association of American Medical Colleges and American Association of Colleges of Osteopathic Medicine, as required by the Liaison Committee on Medical Education and Commission on Osteopathic College Accreditation, and resources available at the federal, state and local levels.

25. Support federal efforts to forgive debt incurred during medical school and other higher education by physicians and medical students, including educational and cost of attendance debt.
26. Support that residency and fellowship application services grant fee assistance to applicants who previously received fee assistance from medical school application services or are determined to have financial need through another formal mechanism. [CME Report 05, I-18; Appended: Res. 953, I-18; Reaffirmation: A-19; Appended: Res. 316, A-19; Appended: Res. 226, A-21; Reaffirmed in lieu of: Res. 311, A-21; Modified: CME Rep. 4, I-21; Reaffirmation: A-22; Appended: CME Rep. 02, A-23; Appended: Res. 311, A-23]

Medical Education Debt Cancellation in the Face of a Physician Shortage During the COVID-19 Pandemic D-305.951
Our AMA will study the issue of medical education debt cancellation and consider the opportunities for integration of this into a broader solution addressing debt for all medical students and physicians. [Res. 301, A-22]

Exclusion of Medical Debt That Has Been Fully Paid or Settled H-373.996
Our AMA supports the principles contained in The Medical Debt Relief Act as drafted and passed by the US House of Representatives to provide relief to the American consumer from a complicated collections process and supports medical debt resolution being portrayed in a positive and productive manner. [Res. 226, I-10; Reaffirmed: BOT Rep. 04, A-20]

Medical Student Debt and Career Choice D-305.952
1. Our AMA encourages key stakeholders to collect and disseminate data on the impacts of medical education debt on career choice, especially with regard to the potentially intersecting impacts of race/ethnicity, socioeconomic status, and other key sociodemographic factors.
2. Our AMA will monitor new policies and novel approaches to influence career choice based on the key factors that affect the decision to enter a given specialty and subspecialty.[CME Rep. 4, I-21;Reaffirmed: CME Rep. 02, A-23]

Principles for Graduate Medical Education H-310.929
Our AMA urges the Accreditation Council for Graduate Medical Education (ACGME) to incorporate these principles in its Institutional Requirements, if they are not already present.

(1) PURPOSE OF GRADUATE MEDICAL EDUCATION AND ITS RELATIONSHIP TO PATIENT CARE. There must be objectives for residency education in each specialty that promote the development of the knowledge, skills, attitudes, and behavior necessary to become a competent practitioner in a recognized medical specialty. Exemplary patient care is a vital component for any residency/fellowship program. Graduate medical education enhances the quality of patient care in the institution sponsoring an accredited program. Graduate medical education must never compromise the quality of patient care. Institutions sponsoring residency programs and the director of each program must assure the highest quality of care for patients and the attainment of the program’s educational objectives for the residents.

(2) RELATION OF ACCREDITATION TO THE PURPOSE OF RESIDENCY TRAINING. Accreditation requirements should relate to the stated purpose of a residency program and to the knowledge, skills, attitudes, and behaviors that a resident physician should have on completing residency education.

(3) EDUCATION IN THE BROAD FIELD OF MEDICINE. GME should provide a resident physician with broad clinical experiences that address the general competencies and professionalism expected of all physicians, adding depth as well as breadth to the competencies introduced in medical school.

(4) SCHOLARLY ACTIVITIES FOR RESIDENTS. Graduate medical education should always occur in a milieu that includes scholarship. Resident physicians should learn to appreciate the importance of scholarly activities and should be knowledgeable about scientific method. However, the accreditation requirements, the structure, and the content of graduate medical education should be directed toward preparing physicians to practice in a medical specialty. Individual educational opportunities beyond the residency program should be provided for resident physicians who have an interest in, and show an aptitude for, academic and research pursuits. The continued development of evidence-based medicine in the graduate medical education curriculum reinforces the integrity of the scientific method in the everyday practice of clinical medicine.

(5) FACULTY SCHOLARSHIP. All residency faculty members must engage in scholarly activities and/or scientific inquiry. Suitable examples of this work must not be limited to basic biomedical research. Faculty can comply with this principle through participation in scholarly meetings, journal club, lectures, and similar academic pursuits.
(6) INSTITUTIONAL RESPONSIBILITY FOR PROGRAMS. Specialty-specific GME must operate under a system of institutional governance responsible for the development and implementation of policies regarding the following: the initial authorization of programs, the appointment of program directors, compliance with the accreditation requirements of the ACGME, the advancement of resident physicians, the disciplining of resident physicians when this is appropriate, the maintenance of permanent records, and the credentialing of resident physicians who successfully complete the program. If an institution closes or has to reduce the size of a residency program, the institution must inform the residents as soon as possible. Institutions must make every effort to allow residents already in the program to complete their education in the affected program. When this is not possible, institutions must assist residents to enroll in another program in which they can continue their education. Programs must also make arrangements, when necessary, for the disposition of program files so that future confirmation of the completion of residency education is possible. Institutions should allow residents to form housestaff organizations, or similar organizations, to address patient care and resident work environment concerns. Institutional committees should include resident members.

(7) COMPENSATION OF RESIDENT PHYSICIANS. All residents should be compensated. Residents should receive fringe benefits, including, but not limited to, health, disability, and professional liability insurance and parental leave and should have access to other benefits offered by the institution. Residents must be informed of employment policies and fringe benefits, and their access to them. Restrictive covenants must not be required of residents or applicants for residency education.

(8) LENGTH OF TRAINING. The usual duration of an accredited residency in a specialty should be defined in the “Program Requirements.” The required minimum duration should be the same for all programs in a specialty and should be sufficient to meet the stated objectives of residency education for the specialty and to cover the course content specified in the Program Requirements. The time required for an individual resident physician’s education might be modified depending on the aptitude of the resident physician and the availability of required clinical experiences.

(9) PROVISION OF FORMAL EDUCATIONAL EXPERIENCES. Graduate medical education must include a formal educational component in addition to supervised clinical experience. This component should assist resident physicians in acquiring the knowledge and skill base required for practice in the specialty. The assignment of clinical responsibility to resident physicians must permit time for study of the basic sciences and clinical pathophysiology related to the specialty.

(10) INNOVATION OF GRADUATE MEDICAL EDUCATION. The requirements for accreditation of residency training should encourage educational innovation and continual improvement. New topic areas such as continuous quality improvement (CQI), outcome management, informatics and information systems, and population-based medicine should be included as appropriate to the specialty.

(11) THE ENVIRONMENT OF GRADUATE MEDICAL EDUCATION. Sponsoring organizations and other GME programs must create an environment that is conducive to learning. There must be an appropriate balance between education and service. Resident physicians must be treated as colleagues.

(12) SUPERVISION OF RESIDENT PHYSICIANS. Program directors must supervise and evaluate the clinical performance of resident physicians. The policies of the sponsoring institution, as enforced by the program director, and specified in the ACGME Institutional Requirements and related accreditation documents, must ensure that the clinical activities of each resident physician are supervised to a degree that reflects the ability of the resident physician and the level of responsibility for the care of patients that may be safely delegated to the resident. The sponsoring institution’s GME Committee must monitor programs’ supervision of residents and ensure that supervision is consistent with: (A) Provision of safe and effective patient care; (B) Educational needs of residents; (C) Progressive responsibility appropriate to residents’ level of education, competence, and experience; and (D) Other applicable Common and specialty/subspecialty specific Program Requirements. The program director, in cooperation with the institution, is responsible for maintaining work schedules for each resident based on the intensity and variability of assignments in conformity with ACGME Review Committee recommendations, and in compliance with the ACGME clinical and educational work hour standards. Integral to resident supervision is the necessity for frequent evaluation of residents by faculty, with discussion between faculty and resident. It is a cardinal principle that responsibility for the treatment of each patient and the education of resident and fellow physicians lies with the physician/faculty to whom the patient is assigned and who supervises all care rendered to the patient by residents and fellows. Each patient’s attending physician must decide, within guidelines established by the program director, the extent to which responsibility may be delegated to the resident, and the appropriate degree of supervision of the resident’s participation in the care of the patient. The attending physician, or designate, must be available to the resident for consultation at all times.
(13) EVALUATION OF RESIDENTS AND SPECIALTY BOARD CERTIFICATION. Residency program directors and faculty are responsible for evaluating and documenting the continuing development and competency of residents, as well as the readiness of residents to enter independent clinical practice upon completion of training. Program directors should also document any deficiency or concern that could interfere with the practice of medicine and which requires remediation, treatment, or removal from training. Inherent within the concept of specialty board certification is the necessity for the residency program to attest and affirm to the competence of the residents completing their training program and being recommended to the specialty board as candidates for examination. This attestation of competency should be accepted by specialty boards as fulfilling the educational and training requirements allowing candidates to sit for the certifying examination of each member board of the ABMS.

(14) GRADUATE MEDICAL EDUCATION IN THE AMBULATORY SETTING. Graduate medical education programs must provide educational experiences to residents in the broadest possible range of educational sites, so that residents are trained in the same types of sites in which they may practice after completing GME. It should include experiences in a variety of ambulatory settings, in addition to the traditional inpatient experience. The amount and types of ambulatory training is a function of the given specialty.

(15) VERIFICATION OF RESIDENT PHYSICIAN EXPERIENCE. The program director must document a resident physician’s specific experiences and demonstrated knowledge, skills, attitudes, and behavior, and a record must be maintained within the institution. [CME Rep. 9, A-99; Reaffirmed: CME Rep. 2, A-09; Reaffirmed: CME Rep. 14, A-09; Modified: CME Rep. 06, I-18; Reaffirmed: CME Rep. 01, I-22]

Abolish Discrimination in Licensure of IMGs H-255.966
1. Our AMA supports the following principles related to medical licensure of international medical graduates (IMGs):
   A. State medical boards should ensure uniformity of licensure requirements for IMGs and graduates of U.S. and Canadian medical schools, including eliminating any disparity in the years of graduate medical education (GME) required for licensure and a uniform standard for the allowed number of administrations of licensure examinations.
   B. All physicians seeking licensure should be evaluated on the basis of their individual education, training, qualifications, skills, character, ethics, experience and past practice.
   C. Discrimination against physicians solely on the basis of national origin and/or the country in which they completed their medical education is inappropriate.
   D. U.S. states and territories retain the right and responsibility to determine the qualifications of individuals applying for licensure to practice medicine within their respective jurisdictions.
   E. State medical boards should be discouraged from a) using arbitrary and non-criteria-based lists of approved or unapproved foreign medical schools for licensure decisions and b) requiring an interview or oral examination prior to licensure endorsement. More effective methods for evaluating the quality of IMGs' undergraduate medical education should be pursued with the Federation of State Medical Boards (FSMB) and other relevant organizations. When available, the results should be a part of the determination of eligibility for licensure.
2. Our AMA will continue to work with the FSMB to encourage parity in licensure requirements for all physicians, whether U.S. medical school graduates or international medical graduates.
3. Our AMA will continue to work with the Educational Commission for Foreign Medical Graduates and other appropriate organizations in developing effective methods to evaluate the clinical skills of IMGs.
4. Our AMA will work with state medical societies in states with discriminatory licensure requirements between IMGs and graduates of U.S. and Canadian medical schools to advocate for parity in licensure requirements, using the AMA International Medical Graduate Section licensure parity model resolution as a resource.
5. Our AMA will: (a) encourage states to study existing strategies to improve policies and processes to assist IMGs with credentialing and licensure to enable them to care for patients in underserved areas; and (b) encourage the FSMB and state medical boards to evaluate the progress of programs aimed at reducing barriers to licensure—including successes, failures, and barriers to implementation. [BOT Rep. 25, A-15; Appended: CME Rep. 4, A-21]

Recommendations for Future Directions for Medical Education H-295.995
Our AMA supports the following recommendations relating to the future directions for medical education:
(1) The medical profession and those responsible for medical education should strengthen the general or
broad components of both undergraduate and graduate medical education. All medical students and resident physicians should have general knowledge of the whole field of medicine regardless of their projected choice of specialty.

(2) Schools of medicine should accept the principle and should state in their requirements for admission that a broad cultural education in the arts, humanities, and social sciences, as well as in the biological and physical sciences, is desirable.

(3) Medical schools should make their goals and objectives known to prospective students and premedical counselors in order that applicants may apply to medical schools whose programs are most in accord with their career goals.

(4) Medical schools should state explicitly in publications their admission requirements and the methods they employ in the selection of students.

(5) Medical schools should require their admissions committees to make every effort to determine that the students admitted possess integrity as well as the ability to acquire the knowledge and skills required of a physician.

(6) Although the results of standardized admission testing may be an important predictor of the ability of students to complete courses in the preclinical sciences successfully, medical schools should utilize such tests as only one of several criteria for the selection of students. Continuing review of admission tests is encouraged because the subject content of such examinations has an influence on premedical education and counseling.

(7) Medical schools should improve their liaison with college counselors so that potential medical students can be given early and effective advice. The resources of regional and national organizations can be useful in developing this communication.

(8) Medical schools are chartered for the unique purpose of educating students to become physicians and should not assume obligations that would significantly compromise this purpose.

(9) Medical schools should inform the public that, although they have a unique capability to identify the changing medical needs of society and to propose responses to them, they are only one of the elements of society that may be involved in responding. Medical schools should continue to identify social problems related to health and should continue to recommend solutions.

(10) Medical school faculties should continue to exercise prudent judgment in adjusting educational programs in response to social change and societal needs.

(11) Faculties should continue to evaluate curricula periodically as a means of insuring that graduates will have the capability to recognize the diverse nature of disease, and the potential to provide preventive and comprehensive medical care. Medical schools, within the framework of their respective institutional goals and regardless of the organizational structure of the faculty, should provide a broad general education in both basic sciences and the art and science of clinical medicine.

(12) The curriculum of a medical school should be designed to provide students with experience in clinical medicine ranging from primary to tertiary care in a variety of inpatient and outpatient settings, such as university hospitals, community hospitals, and other health care facilities. Medical schools should establish standards and apply them to all components of the clinical educational program regardless of where they are conducted. Regular evaluation of the quality of each experience and its contribution to the total program should be conducted.

(13) Faculties of medical schools have the responsibility to evaluate the cognitive abilities of their students. Extramural examinations may be used for this purpose, but never as the sole criterion for promotion or graduation of a student.

(14) As part of the responsibility for granting the MD degree, faculties of medical schools have the obligation to evaluate as thoroughly as possible the non-cognitive abilities of their medical students.

(15) Medical schools and residency programs should continue to recognize that the instruction provided by volunteer and part-time members of the faculty and the use of facilities in which they practice make important contributions to the education of medical students and resident physicians. Development of means by which the volunteer and part-time faculty can express their professional viewpoints regarding the educational environment and curriculum should be encouraged.

(16) Each medical school should establish, or review already established, criteria for the initial appointment, continuation of appointment, and promotion of all categories of faculty. Regular evaluation of the contribution of all faculty members should be conducted in accordance with institutional policy and practice.

(17a) Faculties of medical schools should reevaluate the current elements of their fourth or final year with the intent of increasing the breadth of clinical experience through a more formal structure and improved faculty counseling. An appropriate number of electives or selected options should be included. (17b)
Counseling of medical students by faculty and others should be directed toward increasing the breadth of clinical experience. Students should be encouraged to choose experience in disciplines that will not be an integral part of their projected graduate medical education.

(18) Directors of residency programs should not permit medical students to make commitments to a residency program prior to the final year of medical school.

(19) The first year of postdoctoral medical education for all graduates should consist of a broad year of general training. (a) For physicians entering residencies in internal medicine, pediatrics, and general surgery, postdoctoral medical education should include at least four months of training in a specialty or specialties other than the one in which the resident has been appointed. (A residency in family practice provides a broad education in medicine because it includes training in several fields.) (b) For physicians entering residencies in specialties other than internal medicine, pediatrics, general surgery, and family practice, the first postdoctoral year of medical education should be devoted to one of the four above-named specialties or to a program following the general requirements of a transitional year stipulated in the "General Requirements" section of the "Essentials of Accredited Residencies." (c) A program for the transitional year should be planned, designed, administered, conducted, and evaluated as an entity by the sponsoring institution rather than one or more departments. Responsibility for the executive direction of the program should be assigned to one physician whose responsibility is the administration of the program. Educational programs for a transitional year should be subjected to thorough surveillance by the appropriate accrediting body as a means of assuring that the content, conduct, and internal evaluation of the educational program conform to national standards. The impact of the transitional year should not be deleterious to the educational programs of the specialty disciplines.

(20) The ACGME, individual specialty boards, and respective residency review committees should improve communication with directors of residency programs because of their shared responsibility for programs in graduate medical education.

(21) Specialty boards should be aware of and concerned with the impact that the requirements for certification and the content of the examination have upon the content and structure of graduate medical education. Requirements for certification should not be so specific that they inhibit program directors from exercising judgment and flexibility in the design and operation of their programs.

(22) An essential goal of a specialty board should be to determine that the standards that it has set for certification continue to assure that successful candidates possess the knowledge, skills, and the commitment to upgrade continually the quality of medical care.

(23) Specialty boards should endeavor to develop a consensus concerning the significance of certification by specialty and publicize it so that the purposes and limitations of certification can be clearly understood by the profession and the public.

(24) The importance of certification by specialty boards requires that communication be improved between the specialty boards and the medical profession as a whole, particularly between the boards and their sponsoring, nominating, or constituent organizations and also between the boards and their diplomates.

(25) Specialty boards should consider having members of the public participate in appropriate board activities.

(26) Specialty boards should consider having physicians and other professionals from related disciplines participate in board activities.

(27) The AMA recommends to state licensing authorities that they require individual applicants, to be eligible to be licensed to practice medicine, to possess the degree of Doctor of Medicine or its equivalent from a school or program that meets the standards of the LCME or accredited by the American Osteopathic Association, or to demonstrate as individuals, comparable academic and personal achievements. All applicants for full and unrestricted licensure should provide evidence of the satisfactory completion of at least one year of an accredited program of graduate medical education in the US. Satisfactory completion should be based upon an assessment of the applicant's knowledge, problem-solving ability, and clinical skills in the general field of medicine. The AMA recommends to legislatures and governmental regulatory authorities that they not impose requirements for licensure that are so specific that they restrict the responsibility of medical educators to determine the content of undergraduate and graduate medical education.

(28) The medical profession should continue to encourage participation in continuing medical education related to the physician's professional needs and activities. Efforts to evaluate the effectiveness of such education should be continued.

(29) The medical profession and the public should recognize the difficulties related to an objective and valid assessment of clinical performance. Research efforts to improve existing methods of evaluation and
to develop new methods having an acceptable degree of reliability and validity should be supported. (30) Methods currently being used to evaluate the readiness of graduates of foreign medical schools to enter accredited programs in graduate medical education in this country should be critically reviewed and modified as necessary. No graduate of any medical school should be admitted to or continued in a residency program if his or her participation can reasonably be expected to affect adversely the quality of patient care or to jeopardize the quality of the educational experiences of other residents or of students in educational programs within the hospital.

(31) The Educational Commission for Foreign Medical Graduates should be encouraged to study the feasibility of including in its procedures for certification of graduates of foreign medical schools a period of observation adequate for the evaluation of clinical skills and the application of knowledge to clinical problems.

(32) The AMA, in cooperation with others, supports continued efforts to review and define standards for medical education at all levels. The AMA supports continued participation in the evaluation and accreditation of medical education at all levels.

(33) The AMA, when appropriate, supports the use of selected consultants from the public and from the professions for consideration of special issues related to medical education.

(34) The AMA encourages entities that profile physicians to provide them with feedback on their performance and with access to education to assist them in meeting norms of practice; and supports the creation of experiences across the continuum of medical education designed to teach about the process of physician profiling and about the principles of utilization review/quality assurance.

(35) Our AMA encourages the accrediting bodies for MD- and DO-granting medical schools to review, on an ongoing basis, their accreditation standards to assure that they protect the quality and integrity of medical education in the context of the emergence of new models of medical school organization and governance.

(36) Our AMA will strongly advocate for the rights of medical students, residents, and fellows to have physician-led (MD or DO as defined by the AMA) clinical training, supervision, and evaluation while recognizing the contribution of non-physicians to medical education.

Whereas, in September 2021, the United States Medical Licensing Examination (USMLE) made an official announcement regarding the implementation of a revised assessment format for STEP1, wherein the conventional numeric scoring system and binary pass/fail outcomes would be replaced solely with a pass/fail designation for examinations commencing in January 2022; and

Whereas, alongside this transition, the passing threshold for STEP1 was heightened, and the permissible number of attempts was reduced from six to four, with the aim of alleviating the psychological burden commonly associated with the examination process, while concurrently fostering a more comprehensive evaluation of applicants; and

Whereas, the pass rate for all examinees in 2022 declined to 82%, compared to the previous rate of 88% in 2021 prior to the introduction of the new scoring system and

Whereas, studies have indicated significant performance disparities between men and women taking STEP1, as well as variations based on the age at the time of examination; and

Whereas, the process of preparing for and undertaking the USMLE STEP1 exam has been associated with excessive stress and social isolation and

Whereas, research has revealed that medical students encounter higher levels of burnout, depressive symptoms, suicidal ideation, and substance use compared to the general population; and

Whereas, the transition to a binary scoring system has led to heightened pressure to pass the exam on the first attempt; and

Whereas, the implementation of the pass/fail scoring system has also led to an increased emphasis on extracurricular activities and the STEP2 exam, a more clinically relevant exam, as the primary means of distinguishing applicants and maintaining competitiveness; and

Whereas, in contrast to the STEP2 exam, STEP1 is considered less clinically relevant and an inadequate indicator of future professional competence as a physician; and

Whereas, given that STEP1 has moved to pass/fail and is now a mere threshold to be crossed, lacks clinical significance compared to STEP2, and is an inadequate indicator of future professional competence as a physician, it is reasonable to move away from reporting failed attempts or total number of attempts to residency and fellowship programs, as well as licensure authorities; and
Whereas, transitioning away from reporting failed attempts on the STEP1 and Level 1 examinations would be another potential avenue to better support medical student mental health and wellness and would align with the goal of creating a more comprehensive and balanced evaluation of medical students; and

Whereas, our AMA has ample policy regarding supporting the mental health and wellness of trainees in both the undergraduate and graduate medical education levels (H-345.970); and

Whereas, our AMA has expressed its support for the holistic review of medical school applicants and has encouraged residency directors not to utilize ranked passing scores as a screening criterion (H-275.953); therefore be it

RESOLVED, that our American Medical Association advocate that NBME and NBOME cease reporting the total number of attempts of the STEP1 and COMLEX-USA Level 1 examinations to residency and fellowship programs and licensure. (Directive to Take Action)

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY

The Grading Policy for Medical Licensure Examinations H-275.953
1. Our AMA’s representatives to the ACGME are instructed to promote the principle that selection of residents should be based on a broad variety of evaluative criteria, and to propose that the ACGME General Requirements state clearly that residency program directors must not use NBME or USMLE ranked passing scores as a screening criterion for residency selection.
2. Our AMA adopts the following policy on NBME or USMLE examination scoring: (a) Students receive “pass/fail” scores as soon as they are available. (If students fail the examinations, they may request their numerical scores immediately.) (b) Numerical scores are reported to the state licensing authorities upon request by the applicant for licensure. At this time, the applicant may request a copy of his or her numerical scores. (c) Scores are reported in pass/fail format for each student to the medical school. The school also receives a frequency distribution of numerical scores for the aggregate of their students.
3. Our AMA will: (a) promote equal acceptance of the USMLE and COMLEX at all United States residency programs; (b) work with appropriate stakeholders including but not limited to the National Board
of Medical Examiners, Association of American Medical Colleges, National Board of Osteopathic Medical Examiners, Accreditation Council for Graduate Medical Education and American Osteopathic Association to educate Residency Program Directors on how to interpret and use COMLEX scores; and (c) work with Residency Program Directors to promote higher COMLEX utilization with residency program matches in light of the new single accreditation system.

4. Our AMA will work with appropriate stakeholders to release guidance for residency and fellowship program directors on equitably comparing students who received 3-digit United States Medical Licensing Examination Step 1 or Comprehensive Osteopathic Medical Licensing Examination of the United States Level 1 scores and students who received Pass/Fail scores.

Improving Mental Health Services for Undergraduate and Graduate Students H-345.970

Our AMA supports: (1) strategies that emphasize de-stigmatization and enable timely and affordable access to mental health services for undergraduate and graduate students, in order to improve the provision of care and increase its use by those in need; (2) colleges and universities in emphasizing to undergraduate and graduate students and parents the importance, availability, and efficacy of mental health resources; and (3) collaborations of university mental health specialists and local public or private practices and/or health centers in order to provide a larger pool of resources, such that any student is able to access care in a timely and affordable manner.
Whereas, the continuing board certification process (CBC), previously known as maintenance of certification (MOC) process put forth by the American Board of Medical Specialties (ABMS) and American Osteopathic Association (AOA) has been recognized by a variety of state medical societies and our American Medical Association (AMA) to be expensive and burdensome for physicians without providing independent studies showing benefits for physicians, patients, or the general public; and

Whereas, a 2023 Survey of Clinical Oncologists (https://connection.asco.org/magazine/asco-member-news/asco-members-weigh-abim-maintenance-certification-program) found that an overwhelming majority (82%) felt that MOC was an unnecessary addition beyond typical Continuing Medical Education (CME) requirements, with additional, widespread agreement (74%) that MOC does not improve their clinically relevant knowledge or improve the quality of patient care; and

Whereas, the National Board of Physicians and Surgeons (NBPAS), was founded in 2015 specifically to address the acknowledged onerous CBC process and offers a less burdensome and expensive alternative; and

Whereas, item 30 of policy D-275.954 calls to “Support a recertification process based on high quality, appropriate Continuing Medical Education (CME) material directed by the AMA recognized specialty societies covering the physician’s practice area…to ensure lifelong learning”, which, along with requiring initial ABMS board certification, is one of the mechanisms utilized by NBPAS to certify physicians; and

Whereas, our AMA policy, D-275.954\(^1\) Continuing Board Certification, limits discussion of CBC to only ABMS and member boards, thus imposing its imprimatur on these boards to the exclusion of alternative boards, preempting an evidenced-based, thorough, and comprehensive discussion and evaluation of the current CBC opportunities available to physicians; and

Whereas, our AMA policy, H-275.926\(^2\) Medical Specialty Board Certification Standards, specifically excludes our AMA from considering NBPAS as an accepted alternative CBC pathway because it does not provide its own certification exam nor ongoing, thus limiting physician choice and autonomy and discriminating against the approximately 11,000 physicians who are currently certified by NBPAS; and

Whereas, policies D-275.954 and H-275.926 do not provide evidence to support accepting ABMS CBC over NBPAS CBC nor provide evidence that NBPAS CBC is inferior to ABMS CBC with respect to physician competence, patient safety, patient satisfaction, malpractice rates, or any other measures of physician performance; and
Whereas, NBPAS CBC has demonstrated their legitimacy as a widely accepted certification body as they are recognized by major national accrediting bodies, including, the Joint Commission, the National Committee on Quality Assurance (NCQA), the Utilization Review Accreditation Commission (URAC), the Council for Affordable Quality Healthcare (CAQH), Medicare and Medicaid, and Det Norske Veritas, Inc. (DNV) and many insurers also accept CBC through NBPAS including Blue Cross Blue Shield (BCBS), United Healthcare (UHC), Aetna, Humana, Priority, and Geisinger Health Plan; and

Whereas, the Massachusetts Medical Society convened a meeting with the Accreditation Council for Continuing Medical Education (ACCME®) followed by a joint meeting with AOA, ABMS, and NBPAS that included presentations by each board. The data presented and discussion in those meetings failed to offer substantial evidence that ABMS CBC process subsequent to initial board certification resulted in improved quality of care and better patient outcomes compared to NBPAS, leading us to question if the current reliance on ABMS CBC and exclusion of NBPAS CBC meets the needs of physicians, patients, and the public; therefore be it

RESOLVED, that our American Medical Association undertake a thorough review and analysis of the available literature, data, and evidence to re-examine and update the accepted standards for continuing board certification including policy H-275.926, Medical Specialty Board Certification Standards, so the standards reflect the best manner to assess physicians’ knowledge and skills necessary to practice medicine. (Directive to Take Action)

Fiscal Note: Minimal - less than $1,000

RELEVANT AMA POLICY

Continuing Board Certification D-275.954
Our AMA will:
1. Continue to monitor the evolution of Continuing Board Certification (CBC), continue its active engagement in discussions regarding their implementation, encourage specialty boards to investigate and/or establish alternative approaches for CBC, and prepare a report regarding the CBC process at the request of the House of Delegates or when deemed necessary by the Council on Medical Education.
2. Continue to review, through its Council on Medical Education, published literature and emerging data as part of the Councils ongoing efforts to critically review CBC issues.
3. Continue to monitor the progress by the American Board of Medical Specialties (ABMS) and its member boards on implementation of CBC, and encourage the ABMS to report its research findings on the issues surrounding certification and CBC on a periodic basis.
4. Encourage the ABMS and its member boards to continue to explore other ways to measure the ability of physicians to access and apply knowledge to care for patients, and to continue to examine the evidence supporting the value of specialty board certification and CBC.
5. Work with the ABMS to streamline and improve the Cognitive Expertise (Part III) component of CBC, including the exploration of alternative formats, in ways that effectively evaluate acquisition of new knowledge while reducing or eliminating the burden of a high-stakes examination.
6. Work with interested parties to ensure that CBC uses more than one pathway to assess accurately the competence of practicing physicians, to monitor for exam relevance and to ensure that CBC does not lead to unintended economic hardship such as hospital de-credentialing of practicing physicians.
7. Recommend that the ABMS not introduce additional assessment modalities that have not been validated to show improvement in physician performance and/or patient safety.

8. Work with the ABMS to eliminate practice performance assessment modules, as currently written, from CBC requirements.

9. Encourage the ABMS to ensure that all ABMS member boards provide full transparency related to the costs of preparing, administering, scoring and reporting CBC and certifying examinations.

10. Encourage the ABMS to ensure that CBC and certifying examinations do not result in substantial financial gain to ABMS member boards, and advocate that the ABMS develop fiduciary standards for its member boards that are consistent with this principle.

11. Work with the ABMS to lessen the burden of CBC on physicians with multiple board certifications, particularly to ensure that CBC is specifically relevant to the physicians current practice.

12. Work with key stakeholders to (a) support ongoing ABMS member board efforts to allow multiple and diverse physician educational and quality improvement activities to qualify for CBC; (b) support ABMS member board activities in facilitating the use of CBC quality improvement activities to count for other accountability requirements or programs, such as pay for quality/performance or PQRS reimbursement; (c) encourage ABMS member boards to enhance the consistency of quality improvement programs across all boards; and (d) work with specialty societies and ABMS member boards to develop tools and services that help physicians meet CBC requirements.

13. Work with the ABMS and its member boards to collect data on why physicians choose to maintain or discontinue their board certification.

14. Work with the ABMS to study whether CBC is an important factor in a physicians decision to retire and to determine its impact on the US physician workforce.

15. Encourage the ABMS to use data from CBC to track whether physicians are maintaining certification and share this data with the AMA.

16. Encourage AMA members to be proactive in shaping CBC by seeking leadership positions on the ABMS member boards, American Osteopathic Association (AOA) specialty certifying boards, and CBC Committees.

17. Continue to monitor the actions of professional societies regarding recommendations for modification of CBC.

18. Encourage medical specialty societies leadership to work with the ABMS, and its member boards, to identify those specialty organizations that have developed an appropriate and relevant CBC process for its members.

19. Continue to work with the ABMS to ensure that physicians are clearly informed of the CBC requirements for their specific board and the timelines for accomplishing those requirements.

20. Encourage the ABMS and its member boards to develop a system to actively alert physicians of the due dates of the multi-stage requirements of continuous professional development and performance in practice, thereby assisting them with maintaining their board certification.

21. Recommend to the ABMS that all physician members of those boards governing the CBC process be required to participate in CBC.

22. Continue to participate in the Coalition for Physician Accountability, formerly known as the National Alliance for Physician Competence forums.

23. Encourage the PCPI Foundation, the ABMS, and the Council of Medical Specialty Societies to work together toward utilizing Consortium performance measures in Part IV of CBC.

24. Continue to assist physicians in practice performance improvement.

25. Encourage all specialty societies to grant certified CME credit for activities that they offer to fulfill requirements of their respective specialty boards CBC and associated processes.

26. Support the American College of Physicians as well as other professional societies in their efforts to work with the American Board of Internal Medicine (ABIM) to improve the CBC program.

27. Oppose those maintenance of certification programs administered by the specialty boards of the ABMS, or of any other similar physician certifying organization, which do not appropriately adhere to the principles codified as AMA Policy on Continuing Board Certification.

28. Ask the ABMS to encourage its member boards to review their maintenance of certification policies regarding the requirements for maintaining underlying primary or initial specialty board certification in addition to subspecialty board certification, if they have not yet done so, to allow physicians the option to focus on continuing board certification activities relevant to their practice.

29. Call for the immediate end of any mandatory, secured recertifying examination by the ABMS or other certifying organizations as part of the recertification process for all those specialties that still require a
secure, high-stakes recertification examination.

30. Support a recertification process based on high quality, appropriate Continuing Medical Education (CME) material directed by the AMA recognized specialty societies covering the physicians practice area, in cooperation with other willing stakeholders, that would be completed on a regular basis as determined by the individual medical specialty, to ensure lifelong learning.

31. Continue to work with the ABMS to encourage the development by and the sharing between specialty boards of alternative ways to assess medical knowledge other than by a secure high stakes exam.

32. Continue to support the requirement of CME and ongoing, quality assessments of physicians, where such CME is proven to be cost-effective and shown by evidence to improve quality of care for patients.

33. Through legislative, regulatory, or collaborative efforts, will work with interested state medical societies and other interested parties by creating model state legislation and model medical staff bylaws while advocating that Continuing Board Certification not be a requirement for: (a) medical staff membership, privileging, credentialing, or recredentialing; (b) insurance panel participation; or (c) state medical licensure.

34. Increase its efforts to work with the insurance industry to ensure that continuing board certification does not become a requirement for insurance panel participation.

35. Advocate that physicians who participate in programs related to quality improvement and/or patient safety receive credit for CBC Part IV.

36. Continue to work with the medical societies and the American Board of Medical Specialties (ABMS) member boards that have not yet moved to a process to improve the Part III secure, high-stakes examination to encourage them to do so.

37. Our AMA, through its Council on Medical Education, will continue to work with the American Board of Medical Specialties (ABMS), ABMS Committee on Continuing Certification (3C), and ABMS Stakeholder Council to pursue opportunities to implement the recommendations of the Continuing Board Certification: Vision for the Future Commission and AMA policies related to continuing board certification.

38. Our AMA, through its Council on Medical Education, will continue to work with the American Board of Medical Specialties (ABMS) and ABMS member boards to implement key recommendations outlined by the Continuing Board Certification: Vision for the Future Commission in its final report, including the development and release of new, integrated standards for continuing certification programs that will address the Commissions recommendations for flexibility in knowledge assessment and advancing practice, feedback to diplomates, and consistency.

39. Our AMA will work with the ABMS and its member boards to reduce financial burdens for physicians holding multiple certificates who are actively participating in continuing certification through an ABMS member board, by developing opportunities for reciprocity for certification requirements as well as consideration of reduced or waived fee structures.

40. Our AMA will continue to publicly report its work on enforcing AMA Principles on Continuing Board Certification.

Medical Specialty Board Certification Standards H-275.926

1. Our AMA:

   (1) Opposes any action, regardless of intent, that appears likely to confuse the public about the unique credentials of American Board of Medical Specialties (ABMS) or American Osteopathic Association Bureau of Osteopathic Specialists (AOA-BOS) board certified physicians in any medical specialty, or take advantage of the prestige of any medical specialty for purposes contrary to the public good and safety.

   (2) Opposes any action, regardless of intent, by organizations providing board certification for non-physicians that appears likely to confuse the public about the unique credentials of medical specialty board certification or take advantage of the prestige of medical specialty board certification for purposes contrary to the public good and safety.

   (3) Continues to work with other medical organizations to educate the profession and the public about the ABMS and AOA-BOS board certification process. It is AMA policy that when the equivalency of board certification must be determined, the certification program must first meet accepted standards for certification that include both a) a process for defining specialty-specific standards for knowledge and skills and b) offer an independent, external assessment of knowledge and skills for both initial certification and recertification or continuous certification in the medical specialty. In addition, accepted standards, such as those adopted by state medical boards or the Essentials for Approval of Examining Boards in Medical Specialties, will be utilized for that determination.
(4) Opposes discrimination against physicians based solely on lack of ABMS or equivalent AOA-BOS board certification, or where board certification is one of the criteria considered for purposes of measuring quality of care, determining eligibility to contract with managed care entities, eligibility to receive hospital staff or other clinical privileges, ascertaining competence to practice medicine, or for other purposes. Our AMA also opposes discrimination that may occur against physicians involved in the board certification process, including those who are in a clinical practice period for the specified minimum period of time that must be completed prior to taking the board certifying examination.

(5) Advocates for nomenclature to better distinguish those physicians who are in the board certification pathway from those who are not.

(6) Encourages member boards of the ABMS to adopt measures aimed at mitigating the financial burden on residents related to specialty board fees and fee procedures, including shorter preregistration periods, lower fees and easier payment terms.
Whereas, Accredited Continuing Education is recognized as essential for the continuing professional and personal development for physicians in order to improve the health and wellbeing of patients as well as the community; and

Whereas, Accredited Continuing Medical Education (ACCME) current policies and guidelines do not require an accredited provider of Continuing Education (CE) providing education for physicians to be organizations for (or led) by physicians; and

Whereas, many such non-physician led accredited CE provider entities are engaged in providing accredited CE to physicians; and

Whereas, accredited providers are not required to disclose to its physician learners whether any physicians were engaged in the planning and development of the CE activity; and

Whereas, ACCME policies require that all accredited CE identify professional practice gaps for the development of CE activities; and

Whereas, to ensure that all accredited CE for physicians addresses the needs of physician learners that CE for physicians is planned and developed with physician involvement; and

Whereas, MSSNY adopted policy 50.985 Requiring Physician Participation in the Planning and Development of Accredited Continuing Medical Education for Physicians; therefore be it

RESOLVED, that our American Medical Association petition the Accredited Continuing Medical Education to develop policies which require physician participation in the planning and development of accredited continuing education for physicians. (Directive to Take Action)

Fiscal Note: Minimal - less than $1,000

Received: 5/8/2024
Whereas, there exists significant variation in board certification requirements for physicians who complete post-graduate training (i.e. resident/fellowship) outside of the United States, "internationally trained physicians"; and

Whereas, while half of the American Board of Medical Specialties’ member boards allow board certification from physicians accredited in other countries outside of Canada, the scope and variations in board certification requirements is not well-documented and the degree to which these requirements are able to ensure quality is not well understood; and

Whereas, according to projections published by the Association of American Medical Colleges, the United States will face a physician shortage of up to 86,000 physicians by 2036; and

Whereas, the Health Resources and Services Administration projects a 34 percent non-metro adequacy for all physician types by 2036; and

Whereas, two of five physicians are reaching the traditional retirement age of 65 within the next 10 years; and

Whereas, 87% of American physicians are board certified; and

Whereas, 25% of licensed physicians are international medical graduates; and

Whereas, approximately one in five U.S. physicians were born and attended medical school outside of the United States and Canada (non-U.S. IMGs, as compared to Americans who attend medical school abroad), totaling more than 203,500 physicians as of 2021; and

Whereas, the number of international medical graduates has grown by nearly 18% since 2010, as compared to the 15% rise in U.S. medical graduates in the same time period; and

Whereas, while existing AMA and AMBS policy opposes the linkage between board certification and medical licensure or staffing/clinical privileges, the true extent to which this continues to occur is not well-understood and board certification may create a secondary barrier to practicing and may limit the locations and types of practices available to internationally-trained physicians; and

Whereas, licensing requirements in certain states can be an impediment to practice for internationally-trained physicians, certain states, such as Tennessee, Florida, Wisconsin, Virginia have begun to implement pathways for internationally-trained physicians to achieve
provisional licensure to practice medicine, and additional states such as Idaho and Arizona are considering similar legislation; and

Whereas, board certification exceeds baseline requirements for state medical licensing, assuring the public that physicians and specialists demonstrate the additional clinical skills and professional behavior to provide safe and high-quality specialty care; and

Whereas, some states have begun to consider alternate pathways to licensure without completion of an ACGME-accredited residency program for U.S. medical graduates under the pretense that this will increase access to care particularly in rural areas, it is unclear the effects these proposed pathways will actually have on rural access issues and there does not currently exist a system to ensure the quality of the training they receive post medical school; and

Whereas, according to the AMA Workforce Mapper, there has not been an substantive increase in non-physician providers practicing in rural and underserved areas, despite the broadening of scope of practice for non-physician providers under the pretense of increasing access to care; and

Whereas, advocating for increased funding for Graduate Medical Education funding continues to be a major priority of our AMA, the allocation of these funds to require full re-training for a fully-trained physician who has completed post-graduate training in another country may not be good stewardship of limited resources; therefore be it

RESOLVED, that our American Medical Association work with the American Board of Medical Specialties to study the variation in board certification requirements for internationally trained physicians as well as the impact this may have on physician practices and addressing physician shortages including the impact of these pathways on maintaining public assurance of a well-trained physician workforce (Directive to Take Action); and be it further

RESOLVED, that our AMA study the potential effects of increasing access to board certification for internationally-trained physicians on projected physician workforce shortages (Directive to Take Action); and be it further

RESOLVED, that our AMA work with the Federation of State Medical Boards to study the existing alternate pathways to licensure for physicians who have not completed an ACGME-accredited post-graduate training program and the positive and negative impacts of these pathways on addressing physician shortages. (Directive to Take Action)

Fiscal Note: Modest - between $1,000 - $5,000

RELEVANT AMA POLICY

Medical Specialty Board Certification Standards H-275.926

1. Our American Medical Association opposes any action, regardless of intent, that appears likely to confuse the public about the unique credentials of American Board of Medical Specialties (ABMS) or American Osteopathic Association Bureau of Osteopathic Specialists (AOA-BOS) board certified physicians in any medical specialty, or take advantage of the prestige of any medical specialty for purposes contrary to the public good and safety.

2. Our AMA opposes any action, regardless of intent, by organizations providing board certification for non-physicians that appears likely to confuse the public about the unique credentials of medical specialty board certification or take advantage of the prestige of medical specialty board certification for purposes contrary to the public good and safety.

3. Our AMA continues to work with other medical organizations to educate the profession and the public about the ABMS and AOA-BOS board certification process. It is AMA policy that when the equivalency of board certification must be determined, the certification program must first meet accepted standards for certification that include both
   a. a process for defining specialty-specific standards for knowledge and skills and
   b. offer an independent, external assessment of knowledge and skills for both initial certification and recertification or continuous certification in the medical specialty. In addition, accepted standards, such as those adopted by state medical boards or the Essentials for Approval of Examining Boards in Medical Specialties, will be utilized for that determination.

4. Our AMA opposes discrimination against physicians based solely on lack of ABMS or equivalent AOA-BOS board certification, or where board certification is one of the criteria considered for purposes of measuring quality of care, determining eligibility to contract with managed care entities, eligibility to receive hospital staff or other clinical privileges, ascertaining competence to practice medicine, or for other purposes. Our AMA also opposes discrimination that may occur against physicians involved in the board certification process, including those who are in a clinical practice period for the specified minimum period of time that must be completed prior to taking the board certifying examination.

5. Our AMA advocates for nomenclature to better distinguish those physicians who are in the board certification pathway from those who are not.

6. Our AMA encourages member boards of the ABMS to adopt measures aimed at mitigating the financial burden on residents related to specialty board fees and fee procedures, including shorter preregistration periods, lower fees and easier payment terms.

7. Our AMA encourages continued advocacy to federal and state legislatures, federal and state regulators, physician credentialing organizations, hospitals, and other interested parties to define physician board certification as the medical profession establishing specialty-specific standards for knowledge and skills, using an independent assessment process to determine the acquisition of knowledge and skills for initial certification and recertification.

Medical Licensure H-275.978

Our AMA: (1) urges directors of accredited residency training programs to certify the clinical competence of graduates of foreign medical schools after completion of the first year of residency training; however, program directors must not provide certification until they are satisfied that the resident is clinically competent;
(2) encourages licensing boards to require a certificate of competence for full and unrestricted licensure;
(3) urges licensing boards to review the details of application for initial licensure to assure that procedures are not unnecessarily cumbersome and that inappropriate information is not required. Accurate identification of documents and applicants is critical. It is recommended that boards continue to work cooperatively with the Federation of State Medical Boards to these ends;
(4) will continue to provide information to licensing boards and other health organizations in an effort to prevent the use of fraudulent credentials for entry to medical practice;
(5) urges those licensing boards that have not done so to develop regulations permitting the issuance of special purpose licenses, with the exception of special licensing pathways for “assistant physicians.” It is recommended that these regulations permit special purpose licensure with the minimum of educational requirements consistent with protecting the health, safety and welfare of the public;
(6) urges licensing boards, specialty boards, hospitals and their medical staffs, and other organizations that evaluate physician competence to inquire only into conditions which impair a physician’s current ability to practice medicine;
(7) urges licensing boards to maintain strict confidentiality of reported information;
(8) urges that the evaluation of information collected by licensing boards be undertaken only by persons experienced in medical licensure and competent to make judgments about physician competence. It is recommended that decisions concerning medical competence and discipline be made with the participation of physician members of the board;
(9) recommends that if confidential information is improperly released by a licensing board about a physician, the board take appropriate and immediate steps to correct any adverse consequences to the physician;
(10) urges all physicians to participate in continuing medical education as a professional obligation;
(11) urges licensing boards not to require mandatory reporting of continuing medical education as part of the process of reregistering the license to practice medicine;
(12) opposes the use of written cognitive examinations of medical knowledge at the time of reregistration except when there is reason to believe that a physician’s knowledge of medicine is deficient;
(13) supports working with the Federation of State Medical Boards to develop mechanisms to evaluate the competence of physicians who do not have hospital privileges and who are not subject to peer review;
(14) believes that licensing laws should relate only to requirements for admission to the practice of medicine and to assuring the continuing competence of physicians, and opposes efforts to achieve a variety of socioeconomic objectives through medical licensure regulation;
(15) urges licensing jurisdictions to pass laws and adopt regulations facilitating the movement of licensed physicians between licensing jurisdictions; licensing jurisdictions should limit physician movement only for reasons related to protecting the health, safety and welfare of the public;
(16) encourages the Federation of State Medical Boards and the individual medical licensing boards to continue to pursue the development of uniformity in the acceptance of examination scores on the Federation Licensing Examination and in other requirements for endorsement of medical licenses;
(17) urges licensing boards not to place time limits on the acceptability of National Board certification or on scores on the United States Medical Licensing Examination for endorsement of licenses;
(18) urges licensing boards to base endorsement on an assessment of physician competence and not on passing a written examination of cognitive ability, except in those instances when information collected by a licensing board indicates need for such an examination;
(19) urges licensing boards to accept an initial license provided by another board to a graduate of a US medical school as proof of completion of acceptable medical education;
(20) urges that documentation of graduation from a foreign medical school be maintained by boards providing an initial license, and that the documentation be provided on request to other licensing boards for review in connection with an application for licensure by endorsement;
(21) urges licensing boards to consider the completion of specialty training and evidence of competent and honorable practice of medicine in reviewing applications for licensure by endorsement;
(22) encourages national specialty boards to reconsider their practice of decertifying physicians who are capable of competently practicing medicine with a limited license;
(23) vigorously opposes any state or other government agency plan for mandated recredentialing of physicians for the purpose of relicensure or reregistration;
(24) supports the Federation of State Medical Boards’ efforts to assure that organizations that use the Federation’s copyrighted disciplinary data secure permission to do so and accompany their publications with an explanation that comparison between states based on those data alone is misleading to the public and does a disservice to the work of the state medical boards;
(25) urges that the state medical and osteopathic boards that maintain a time limit for completing licensing examination sequences for either USMLE or COMLEX to adopt a time limit of no less than 10 years for completion of the licensing exams; and
(26) urges that state medical and osteopathic licensing boards with time limits for completing the licensing examination sequence provide for exceptions that may involve personal health/family circumstances.

Licensure for International Medical Graduates Practicing in U.S. Institutions with Restricted Medical Licenses D-255.977
Our AMA will advocate that qualified international medical graduates have a pathway for licensure by encouraging state medical licensing boards and the member boards of the American Board of Medical Specialties to develop criteria that allow: (1) completion of medical school and residency training outside the U.S.; (2) extensive U.S. medical practice; and (3) evidence of good standing within the local medical community to serve as a substitute for U.S. graduate medical education requirement for physicians seeking full unrestricted licensure and board certification.

Credentialing Issues D-275.989
Our AMA encourages state medical licensing boards, the Federation of State Medical Boards, and other credentialing entities to accept certification by the Educational Commission for Foreign Medical Graduates (a member of Intealth) as proof of primary source verification of an IMG’s international medical education credentials.

Mechanisms to Measure Physician Competency H-275.936
Our AMA: (1) continues to work with the American Board of Medical Specialties and other relevant organizations to explore alternative evidence-based methods of determining ongoing clinical competency; (2) reviews and proposes improvements for assuring continued physician competence, including but not limited to performance indicators, board certification and recertification, professional experience, continuing medical education, and teaching experience; and (3) opposes the development and/or use of "Medical Competency Examination" and establishment of oversight boards for current state medical boards as proposed in the fall 1998 Report on Professional Licensure of the Pew Health Professions Commission, as an additional measure of physician competency.

Physician Competence H-275.996
Our AMA: (1) urges the American Board of Medical Specialties and its constituent boards to reconsider their positions regarding recertification as a mandatory requirement rather than as a voluntarily sought and achieved validation of excellence; (2) urges the Federation of State Medical Boards and its constituent state boards to reconsider and reverse their position urging and accepting specialty board certification as evidence of continuing competence for the purpose of re-registration of licensure; and (3) favors continued efforts to improve voluntary continuing medical education programs, to maintain the peer review process within the profession, and to develop better techniques for establishing the necessary patient care data base.
AMERICAN MEDICAL ASSOCIATION HOUSE OF DELEGATES

Resolution: 319
(A-24)

Introduced by: Minority Affairs Section

Subject: AMA Support of U.S. Pathway Programs

Referred to: Reference Committee C

Whereas, Association of American Medical Colleges (AAMC) defines “underrepresented in medicine” as those racial and ethnic populations that are underrepresented in the medical profession relative to their numbers in the general population; and

Whereas, AAMC reports that across the U.S. physician workforce, American Indian and Alaska Natives represent 0.3%; Black / African Americans represent 5.2%; Hispanic, Latino, or of Spanish Origin represent 6.3%; and Native Hawaiian / Other Pacific Islanders represent 0.1%, and comprise racial and ethnic identities that are considered underrepresented in medicine despite their significantly and respectively higher percentages in the U.S. population; and

Whereas, a U.S. Supreme Court ruling in 2023 ended affirmative action in school admissions, which is expected to result in a significant impact on medical education and diversity in medicine; and

Whereas, the AMA invested $14.1 million since 2019 through the Accelerating Change in Medical Education initiative, which awarded grants to 37 medical schools and resulted in the creation of a community of innovation aimed at creating the medical schools of the future; and

Whereas, the AMA Reimagining Residency grant program was devised to transform residency training to best address the workplace needs of our current and future health care system; and

Whereas, the AMA’s ChangeMedEd Innovation Grant Program has awarded $1.5 million in grants since 2018; and

Whereas, our AMA House of Delegates adopted Council on Medical Education Report 5 (June 2021), “Promising Practices Among Pathway Programs to Increase Diversity in Medicine”; and

Whereas, the 1910 Flexner report caused significant harm to historically Black medical schools, the diversity of the physician workforce, and the outcomes of minoritized and marginalized patient populations; therefore be it

RESOLVED, that our American Medical Association establish a grant program to support existing and new K-16 pathway, STEMM and pre-med programs whose goals include, scaling organizational grantees’ ability to expand their reach among youth; increasing diversity in medicine; achieving health equity; improving medical education (Directive to Take Action); and be it further

RESOLVED, that our AMA establish a diverse advisory body comprised of AMA member physicians and trainees, staff, and allied organization representatives in medicine and public health to co-develop the grant program (i.e., administration; grantee criteria and selection; periodic reporting) (Directive to Take Action); and be it further
RESOLVED, that our AMA convene a summit among pathway and STEMM programs regarding best practices, collaboration and strategic planning. (Directive to Take Action)

Fiscal Note: To Be Determined

Received: 5/8/2024

RELEVANT AMA POLICY

Plan for Continued Progress Toward Health Equity H-180.944
Health equity, defined as optimal health for all, is a goal toward which our AMA will work by advocating for health care access, research, and data collection; promoting equity in care; increasing health workforce diversity; influencing determinants of health; and voicing and modeling commitment to health equity. [BOT Rep. 33, A-18; Reaffirmed: CMS Rep. 5, I-21; Reaffirmed: CMS Rep. 1, I-23]

Strategies for Enhancing Diversity in the Physician Workforce D-200.985
1. Our AMA, independently and in collaboration with other groups such as the Association of American Medical Colleges (AAMC), will actively work and advocate for funding at the federal and state levels and in the private sector to support the following: (a) Pipeline programs to prepare and motivate members of underrepresented groups to enter medical school; (b) Diversity or minority affairs offices at medical schools; (c) Financial aid programs for students from groups that are underrepresented in medicine; and (d) Financial support programs to recruit and develop faculty members from underrepresented groups.
2. Our AMA will work to obtain full restoration and protection of federal Title VII funding, and similar state funding programs, for the Centers of Excellence Program, Health Careers Opportunity Program, Area Health Education Centers, and other programs that support physician training, recruitment, and retention in geographically-underserved areas.
3. Our AMA will take a leadership role in efforts to enhance diversity in the physician workforce, including engaging in broad-based efforts that involve partners within and beyond the medical profession and medical education community.
4. Our AMA will encourage the Liaison Committee on Medical Education to assure that medical schools demonstrate compliance with its requirements for a diverse student body and faculty.
5. Our AMA will develop an internal education program for its members on the issues and possibilities involved in creating a diverse physician population.
6. Our AMA will provide on-line educational materials for its membership that address diversity issues in patient care including, but not limited to, culture, religion, race and ethnicity.
7. Our AMA will create and support programs that introduce elementary through high school students, especially those from groups that are underrepresented in medicine (URM), to healthcare careers.
8. Our AMA will create and support pipeline programs and encourage support services for URM college students that will support them as they move through college, medical school and residency programs.
9. Our AMA will recommend that medical school admissions committees and residency/fellowship programs use holistic assessments of applicants that take into account the diversity of preparation and the variety of talents that applicants bring to their education with the goal of improving health care for all communities.
10. Our AMA will advocate for the tracking and reporting to interested stakeholders of demographic information pertaining to URM status collected from Electronic Residency Application Service (ERAS) applications through the National Resident Matching Program (NRMP).
11. Our AMA will continue the research, advocacy, collaborative partnerships and other work that was
initiated by the Commission to End Health Care Disparities.

12. Our AMA unequivocally opposes legislation that would dissolve affirmative action or punish institutions for properly employing race-conscious admissions as a measure of affirmative action in order to promote a diverse student population.

13. Our AMA will work with the AAMC and other stakeholders to create a question for the AAMC electronic medical school application to identify previous pipeline program (also known as pathway program) participation and create a plan to analyze the data in order to determine the effectiveness of pipeline programs. [CME Rep. 1, I-06; Reaffirmation I-10; Reaffirmation A-13; Modified: CCB/CLRPD Rep. 2, A-14; Reaffirmation: A-16; Appended: Res. 313, A-17; Appended: Res. 314, A-17; Modified: CME Rep. 01, A-18; Appended: Res. 207, I-18; Reaffirmation: A-19; Appended: Res. 304, A-19; Appended: Res. 319, A-19; Modified: CME Rep. 5, A-21; Modified: CME Rep. 02, I-22; Modified: Res. 320, A-23]

Increase the Representation of Minority and Economically Disadvantaged Populations in the Medical Profession H-350.979

Our AMA supports increasing the representation of minorities in the physician population by: (1) Supporting efforts to increase the applicant pool of qualified minority students by: (a) Encouraging state and local governments to make quality elementary and secondary education opportunities available to all; (b) Urging medical schools to strengthen or initiate programs that offer special premedical and precollegiate experiences to underrepresented minority students; (c) urging medical schools and other health training institutions to develop new and innovative measures to recruit underrepresented minority students, and (d) Supporting legislation that provides targeted financial aid to financially disadvantaged students at both the collegiate and medical school levels.

(2) Encouraging all medical schools to reaffirm the goal of increasing representation of underrepresented minorities in their student bodies and faculties.

(3) Urging medical school and undergraduate admissions committees to proactively implement policies and procedures that operationalize race-conscious admission practices in admissions decisions, among other factors.

(4) Increasing the supply of minority health professionals.

(5) Continuing its efforts to increase the proportion of minorities in medical schools and medical school faculty.

(6) Facilitating communication between medical school admission committees and premedical counselors concerning the relative importance of requirements, including grade point average and Medical College Aptitude Test scores.

(7) Continuing to urge for state legislation that will provide funds for medical education both directly to medical schools and indirectly through financial support to students.

(8) Continuing to provide strong support for federal legislation that provides financial assistance for able students whose financial need is such that otherwise they would be unable to attend medical school.

(9) Recognizing the consideration of race in admissions is a necessary safeguard in creating a pipeline to an environment within medical education that will propagate the advancement of health equity through diversification of the physician workforce. [CLRPD Rep. 3, I-98; Reaffirmed: CLRPD Rep. 1, A-08; Reaffirmed: CME Rep. 01, A-18; Modified: Res. 320, A-23; Appended: Res. 320, A-23]

Underrepresented Student Access to US Medical Schools H-350.960

Our AMA: (1) recommends that medical schools should consider in their planning: elements of diversity including but not limited to gender, racial, cultural and economic, reflective of the diversity of their patient population; (2) supports the development of new and the enhancement of existing programs that will identify and prepare underrepresented students from the high-school level onward and to enroll, retain and graduate increased numbers of underrepresented students; (3) recognizes some people have been historically underrepresented, excluded from, and marginalized in medical education and medicine because of their race, ethnicity, disability status, sexual orientation, gender identity, socioeconomic origin, and rurality, due to racism and other systems of exclusion and discrimination; (4) is committed to promoting truth and reconciliation in medical education as it relates to improving equity; (5) recognizes the harm caused by the Flexner Report to historically Black medical schools, the diversity of the physician workforce, and the outcomes of minoritized and marginalized patient populations; (6) will urge medical schools to develop or expand the reach of existing pathway programs for underrepresented middle school, high school and college aged students to motivate them to pursue and prepare them for a career in medicine; (7) will encourage collegiate programs to establish criteria by which completion of such programs will secure an interview for admission to the sponsoring medical school; (8) will recommend that
medical school pathway programs for underrepresented students be free-of-charge or provide financial
support with need-based scholarships and grants; (9) will encourage all physicians to actively participate
in programs and mentorship opportunities that help expose underrepresented students to potential
careers in medicine; and (10) will consider quality of K-12 education a social determinant of health and
thus advocate for implementation of Policy H-350.979, (1) (a) encouraging state and local governments to
make quality elementary and secondary education available to all. [Res. 908, I-08; Reaffirmed in lieu of

Revisions to AMA Policy on the Physician Workforce H-200.955
It is AMA policy that:
(1) any workforce planning efforts, done by the AMA or others, should utilize data on all aspects of the
health care system, including projected demographics of both providers and patients, the number and
roles of other health professionals in providing care, and practice environment changes. Planning should
have as a goal appropriate physician numbers, specialty mix, and geographic distribution.
(2) Our AMA encourages and collaborates in the collection of the data needed for workforce planning and
in the conduct of national and regional research on physician supply and distribution. The AMA will
independently and in collaboration with state and specialty societies, national medical organizations, and
other public and private sector groups, compile and disseminate the results of the research.
(3) The medical profession must be integrally involved in any workforce planning efforts sponsored by
federal or state governments, or by the private sector.
(4) In order to enhance access to care, our AMA collaborates with the public and private sectors to
ensure an adequate supply of physicians in all specialties and to develop strategies to mitigate the
current geographic maldistribution of physicians.
(5) There is a need to enhance underrepresented minority representation in medical schools and in the
physician workforce, as a means to ultimately improve access to care for minority and underserved
groups.
(6) There should be no decrease in the number of funded graduate medical education (GME) positions.
Any increase in the number of funded GME positions, overall or in a given specialty, and in the number of
US medical students should be based on a demonstrated regional or national need.
(7) Our AMA will collect and disseminate information on market demands and workforce needs, so as to
assist medical students and resident physicians in selecting a specialty and choosing a career.
(8) Our AMA will encourage the Health Resources & Service Administration to collaborate with specialty
societies to determine specific changes that would improve the agency’s physician workforce projections
process, to potentially include more detailed projection inputs, with the goal of producing more accurate
and detailed projections including specialty and subspecialty workforces.
(9) Our AMA will consider physician retraining during all its deliberations on physician workforce planning.

Promising Practices Among Pathway Programs D-350.980
Our AMA will establish a task force to guide organizational transformation within and beyond the AMA
toward restorative justice to promote truth, reconciliation, and healing in medicine and medical education.
[CME Rep. 5, A-21]

Continued Support for Diversity in Medical Education D-295.963
Our AMA will: (1) publicly state and reaffirm its support for diversity in medical education and
acknowledge the incorporation of DEI efforts as a vital aspect of medical training; (2) request that the
Liaison Committee on Medical Education regularly share statistics related to compliance with
accreditation standards IS-16 and MS-8 with medical schools and with other stakeholder groups; (3) work
with appropriate stakeholders to commission and enact the recommendations of a forward-looking, cross-
continuum, external study of 21st century medical education focused on reimagining the future of health
equity and racial justice in medical education, improving the diversity of the health workforce, and
ameliorating inequitable outcomes among minoritized and marginalized patient populations; (4) advocate
for funding to support the creation and sustainability of Historically Black College and University (HBCU),
Hispanic-Serving Institution (HSI), and Tribal College and University (TCU) affiliated medical schools and
residency programs, with the goal of achieving a physician workforce that is proportional to the racial,
ethnic, and gender composition of the United States population; (5) directly oppose any local, state, or
federal actions that aim to limit diversity, equity, and inclusion initiatives, curriculum requirements, or
funding in medical education; (6) advocate for resources to establish and maintain DEI offices at medical
schools that are staff-managed and student- and physician-guided as well as committed to longitudinal
community engagement; (7) investigate the impacts of state legislation regarding DEI-related efforts on
the education and careers of students, trainees, and faculty; (8) recognize the disproportionate efforts by
and additional responsibilities placed on minoritized individuals to engage in diversity, equity, and
inclusion efforts; and (9) collaborate with the Association of American Medical Colleges, the Liaison
Committee on Medical Education, and relevant stakeholders to encourage academic institutions to
utilize Diversity, Equity, and Inclusion activities and community engagement as criteria for faculty and staff
