Pharmaceuticals in Value-Based Care: Lessons from Integrated Health Systems

Driving Outcomes through Strategic Pharmacy Leadership & Transformation

Why Now? Our Current Realities

- Continued expansion of health system footprint with disparate operations
- Unsustainable healthcare costs
- Rising burden of chronic disease
- Uneven outcomes despite rising spending
- Value-based care models and alternate reimbursement strategies are accelerating
- Continued expensive and increasingly complex drug pipeline
- Volatile landscape impacting pharmacy supply chain
- Continued legislation intended to reduce drug prices and patient out of pocket expense for medications
- Challenges within the pharmacy workforce
- Rising PBM, payer and drug manufacturer strategies that challenge pharmacy services
- Continued rise in regulatory & compliance requirements for federal, state, and accrediting bodies
- Rising drug shortages

=  operational expenses

=  care gaps & safety risks

Further demands need of integrating pharmacy into VBC!

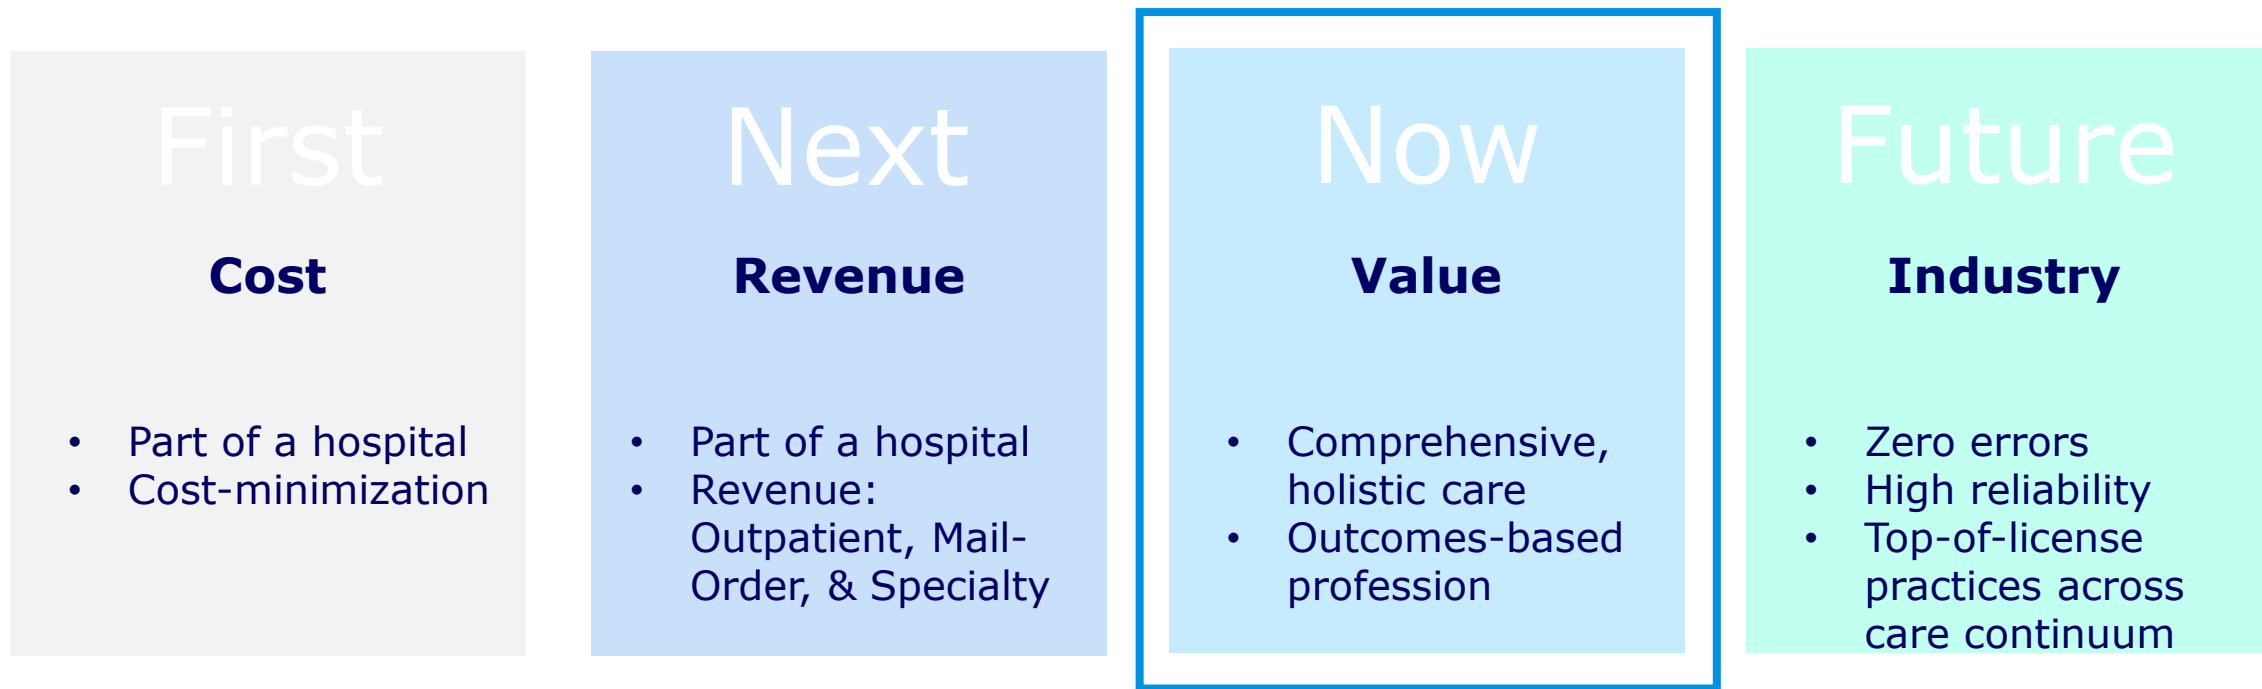

Why Not? Our Current Barriers

- Organizational structure
- Misaligned financial incentives across health system portfolio
- Lack of data transparency & analytics infrastructure
- Lack of transparency into VBC agreements & measures
- Operational silos (clinical, financial, pharmacy)
- Readiness of providers and systems
- Competing internal and external interests
- Limited productive engagement with manufacturers and PBMs
- Initial vs. Future models for funding clinical pharmacists
- Technology inoperability challenges
- Lack of resources

Pharmacy within Health-Systems

As the widest-ranging asset in the health-system portfolio, Pharmacy is uniquely positioned to be an **unmatched value generator** for our mission and communities.

Invest in Pharmacy!

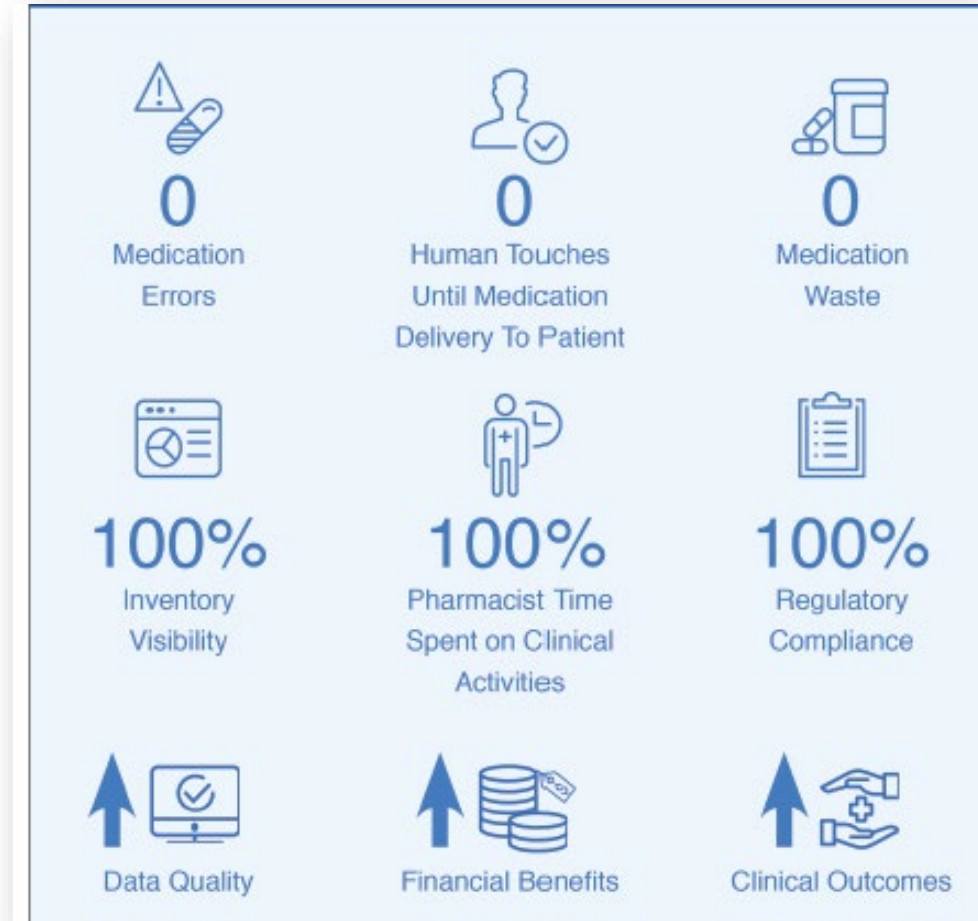

HENRY FORD HEALTH

- Located in Southeast & Central Michigan
- 550+ Sites across region
- 13 Acute Care Hospitals
- 3 Behavioral Health Facilities
- 1 Adult Hemophilia Treatment Center
- 80+ Ambulatory Medical Centers
- 43 Outpatient Pharmacies

- Health Alliance Plan
- 21 OptimEyes Optical Centers
- 15 Greenfield Health Dialysis Centers
- Home Health, Infusion, & Hospice
- Over 6,000 physicians practicing in >50 Specialties (Additional 3,000 residents/fellows)
- 50,000+ team members

HFH High Value Pharmacy Enterprise (HVPE)

- Achieve pharmacy systemness potential related to:
 - Economies of scale/synergy
 - Efficiency (elimination of redundancy)
 - Clarity in roles and accountabilities
 - Shared vision and goals
- Relentless pursuit of value to our patients and our organization
 - Grow revenue in outpatient areas
 - Optimize and reduce expenses
 - Innovate and pursue new business opportunities
 - Eliminate waste and redundancy
 - Maximize “top of license” capabilities
 - Adopt and innovate national best practices

HFH Value & Impact

Our Reach

HVPE has the most points of connection across all sites of care, including acute care hospitals, transitional care, clinics, and the community, making us the most wide-ranging asset in HFH's portfolio.

Our Approach

We leverage innovative practice models and technology to increase the quality of care for all patients—both by creating capacity, while focusing on a path to zero errors, and providing more personalized care.

The Result

Henry Ford Health redefined the future of pharmacy by setting new standards for integrated, high-quality, and patient-centered care across the entire continuum.

HENRY FORD HEALTH®

How?

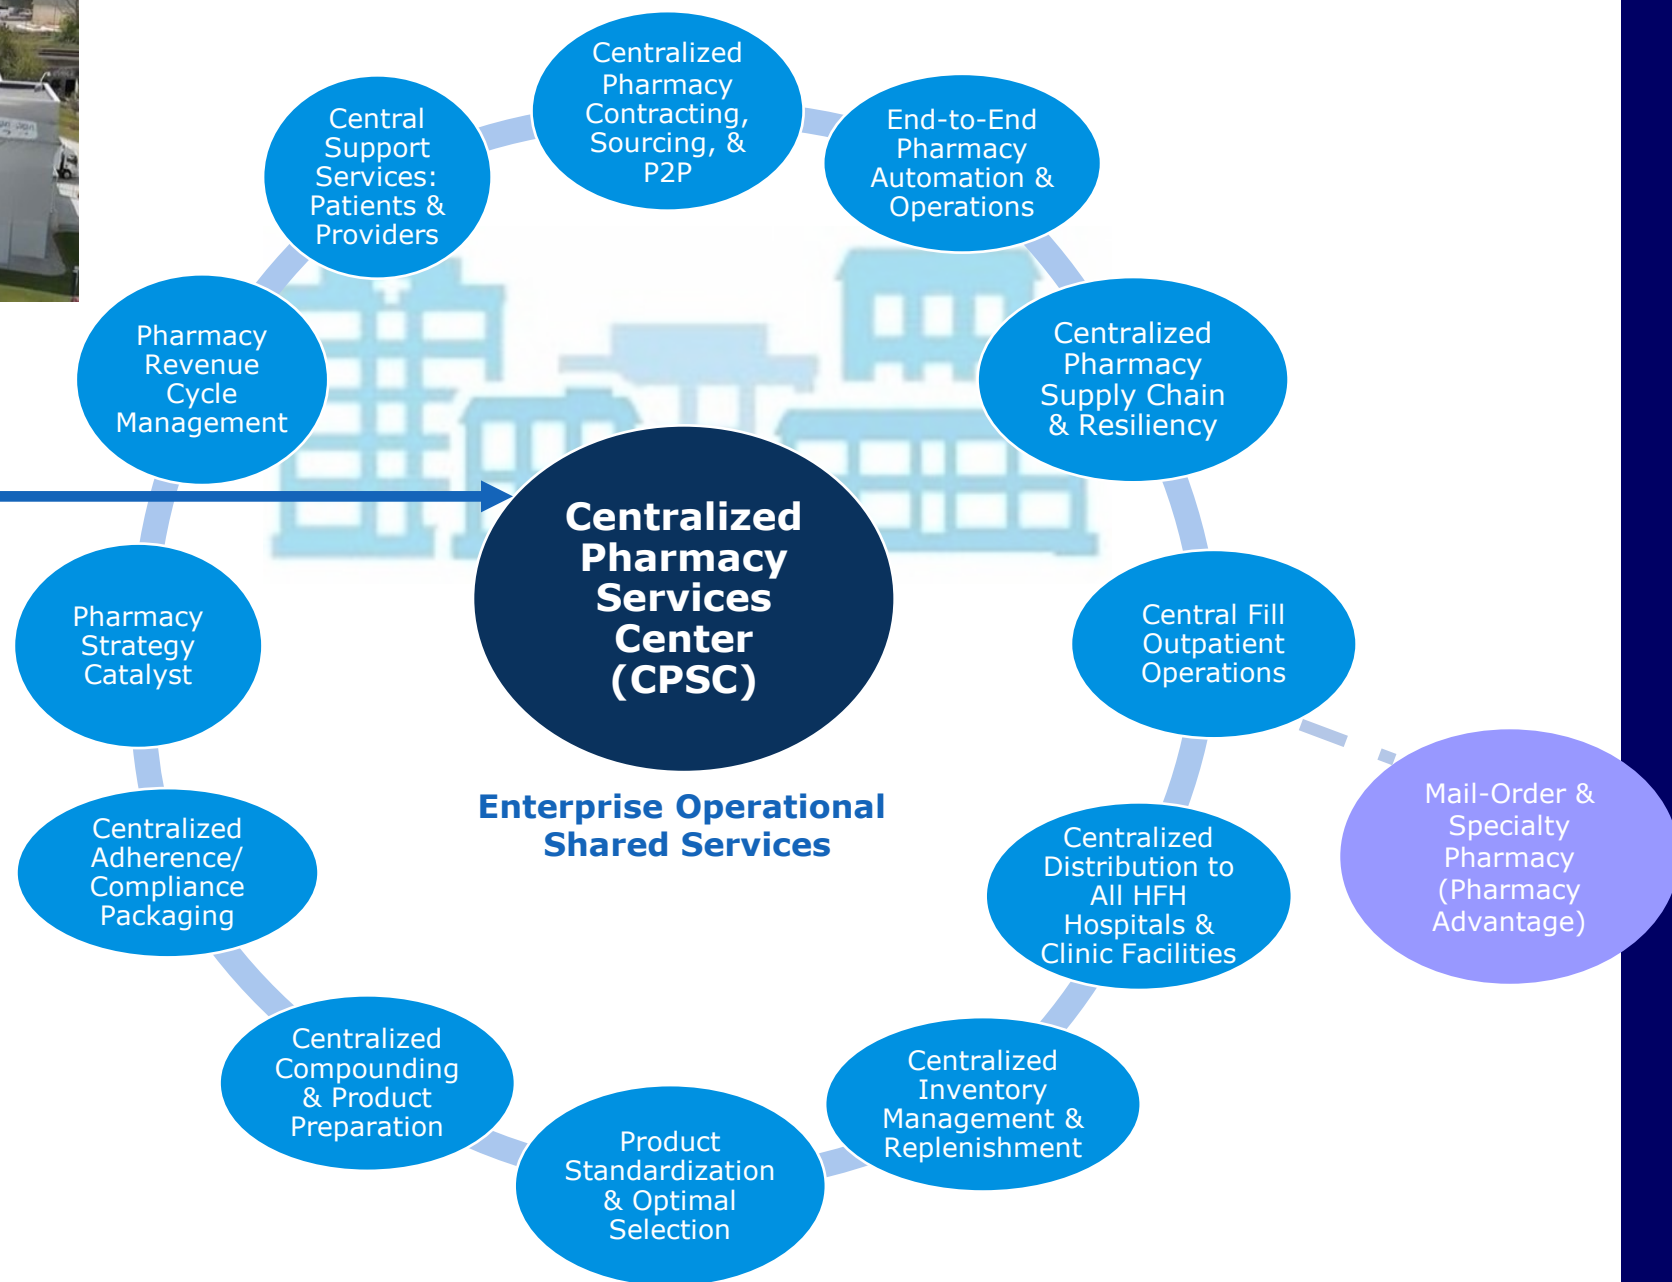

- Established Shared Services within single Pharmacy Enterprise matrix structure.
- Shared Services, allows us to actively integrate, standardize, and centralize pharmacy services across the health system through *high reliability* models.
- The design capitalizes on: efficiency, accountability, transparency, synergy, resource stewardship, and future growth.
- Governance of full medication management across health-system portfolio
- Implemented solutions via our Centralized Pharmacy Services Center (CPSC), *a 1st in industry*, that address all dimensions of pharmaceutical utilization and expense.
- **Enables fully integrated *End-to-End Medication Management* – One ecosystem across care continuum**
- Positions pharmacy as a strategic asset, care partner, and lever within the health system to drive optimal patient outcomes!
 - Hardwires “Value Center” concept
- Facilitates “Pharmacy Front Door” Transformation

Enterprise Clinical Shared Services

- Analytics & Quality
- Contract Performance Management
- Drug Database & Technology Management
- Drug Use Analysis & Evaluation
- Drug Use Policy Management
- Emerging Therapies Pipeline Management
- Formulary Management – *Single Formulary*
- Health Plan Pharmacy
- Informatics & EHR Optimization
- Investigational Drug Services (IDS)
- Medication Management Committee (i.e. *System P&T*) & Subcommittees
- Medication Safety Program
- Medication Stewardship Programs
- Outcomes Research
- Regulatory Compliance Program
- Residency Program Support – PGY1/PGY2
