

Member At Large

Ahmad Gill, MD

Residency Program: Department of IM, Kirk Kerkorian School of Medicine at UNLV

Fellowship Program:

Specialty: Internal Medicine

Statement of Interest

I am motivated to apply for the Member-at-Large position because of my passion for collective advocacy. As a Member-at-Large, I would work diligently to ensure that the voices of residents and fellows are heard within the AMA and in the broader medical community. I will strive to engage with policymakers, medical institutions, and professional organizations to advance policies that benefit residents, fellows, and our patients. I am particularly interested in promoting health equity and addressing systemic barriers that perpetuate disparities in healthcare.

Another goal of mine would be to contribute to the well-being of residents. I recognize that the challenges residents face can significantly impact their personal lives, professional growth, and ability to provide patient care. I am dedicated to further developing initiatives that address the unique needs of residents, such as mental health support, mentorship programs, and work-life balance.

Lastly, I desire to cultivate connections within the medical research community. With a background in publishing and presenting research at a national and international level, I am committed to fostering interdisciplinary collaborations that provide opportunities for residents and fellows to engage with researchers in various fields, hone their research skills, and contribute to advancing medical knowledge.

Diversity Statement

I will add diversity to the RFS Governing Council in numerous ways. My research experience has been extensive, with multiple published manuscripts and over 20 abstracts presented at national and international cardiology conferences. This background has honed my skills in scientific inquiry, data analysis, and interdisciplinary collaboration, which are essential to advancing the AMA's mission. As a Member-at-Large, I will leverage my research expertise to facilitate evidence-based decision-making and foster research connections among residents and fellows.

My heritage as a Pakistani Muslim American also brings a unique perspective to the RFS Governing Council. I am committed to using my position to amplify the voices of underrepresented minorities, address health disparities, and create an environment where residents and fellows feel valued and supported. By fostering a diverse and inclusive medical community, we can better understand and address the unique needs of our patients and improve healthcare outcomes.

My previous leadership roles further demonstrate how I will add diversity to our medical community. As the leader of the Cardiology Interest Group, I have worked to create research and networking opportunities for medical residents and students passionate about cardiology. Additionally, my involvement in my residency's curriculum and medical student learning committees has allowed me to collaborate with faculty, administrators, and peers to shape our medical education program. These experiences have honed my leadership, communication, and problem-solving skills, which I am eager to bring to the RFS Governing Council.
