

## Council on Medical Education (CME)

### Daniel Lee, MD

**Residency program:** University of South Alabama Health System  
Neurology Residency

**Specialty:** Neurology

#### Statement of Interest

Being a part of the MSS the past four years was some of the fondest times of my early medical career. Not only did I have the honor of representing my school and region as a delegate, but I had the tremendous opportunity to operate at the national level as the MSS Vice Speaker at the initial height of the COVID-19 pandemic. Additionally, I was nominated by the AMA BOT to serve on the NRMP Board and have been an avid author of resolutions ranging from public health to medical education. Now as an intern, I am serving as the Chair of the RFS Committee on Medical Education and seek to further my involvement in this sphere as your next RFS Councilor on CME.

Looking at the current state of events in our nation the RFS continues to be a voice of reason and change that I would like to further embolden in my time within the section. Now more than ever, the spotlight has been shone on residents unionizing and bargaining for fair contracts. However, AMA Policy on this subject is rather lacking and the Council on Medical Education is actively discussing these topics and preparing reports. As your next Councilor on CME, I intend to take measured steps to voice resident concerns and advocate for safer and equitable working conditions so that our education and training is prioritized.
