

Delegate or Alternate Delegate

Emma M. Rogers, MD

Residency/Fellowship Program: Fellow in Undersea & Hyperbaric Medicine at the Hospital of the University of Pennsylvania

Expected Graduation Date: June 30, 2024

Specialty: Undersea & Hyperbaric Medicine

I'm interested in serving as an AMA Delegate or Alternate Delegate for Residents and Fellows to represent trainees in Undersea and Hyperbaric Medicine and continue advocacy for quality and patient safety on a systemic level. I recently completed my residency in Emergency Medicine, during which I participated in the "Healthcare Leadership in Quality and Safety" track, was a co-leader for the Penn Women in Emergency Medicine group "Shemergency" and have worked with multidisciplinary committees to create new hospital pathways. As a fellow in Hyperbaric Medicine, I'm also interested in expanding into policy and advocacy particularly as it relates to safety of machinery causing carbon monoxide poisoning and the occupational hazards of commercial diving. I deeply value communication and collaboration between specialties, which has been highlighted when accepting and coordinating transfers from surrounding hospitals for both emergent treatment and to establish routine wound care. I would be honored to serve at the House of Delegates to continue quality and safety advocacy and to represent the perspective of fellows training in Undersea & Hyperbaric Medicine.
