College of Physicians Puerto Rico Chapter 2016 – present; Course Director, Clinical Medicine Update, Association of Physicians of India, Ahmedabad 2024.

How many AMA-APS meetings have you attended?

8

Statement of interest

Our APS Section does crucial work representing Medical Education, research and patient care on behalf of our myriad learners and the faculty/practitioners who have unique insights about the present and future needs of the profession. As custodians of medical education and science, academic physicians bring a unique perspective to advocacy on within the wider arena of organized medicine and APS has been effective at educating and advocating on behalf of our members.

I have personally learned so much from serving with eminent colleagues from other institutions and the opportunity to serve on the UME committee of the Council on Medical Education has directly added value to initiatives I have undertaken at my own institution. I look forward to being able to pay this forward in APS and other roles at our AMA.

Diversity statement

I am an IMG and from an ethnic minority. I was born outside the US and immigrated here legally.
