

CPT® Molecular Pathology Tier 2 Codes

Most recent changes to the CPT® Molecular Pathology Tier 2 Codes document:

- There are no changes to report for the October 2023 Molecular Pathology Tier 2 Codes early release.

This document contains new or revised codes for Molecular Pathology (MoPath) Tier 2 procedures that have been approved at the most recent CPT Editorial Panel meetings and are provided to facilitate accurate reporting of molecular pathology procedures.

To assist users in reporting the most recently approved MoPath Tier 2 codes, this document will be updated with early publication of these codes in April, July, and October in a given CPT cycle. These dates for early release coincide with completion of Panel actions following each of the three CPT Editorial Panel meetings in a given CPT cycle (May, September, and February). The table below details the publishing timelines for Category I MoPath Tier 2 codes.

Category I Molecular Pathology Tier 2 Codes

Panel Meeting Approval	Released to the AMA Website	Effective Date
February	April 1	July 1
May	July 1	October 1
September/October	October 1*	January 1

For these codes, as well as other CPT codes, inclusion of a descriptor and its associated code number in the CPT code set does not represent endorsement by the AMA of any particular diagnostic procedure or service. Inclusion or exclusion of a procedure or service does not imply any health insurance coverage or reimbursement policy.

It is important to note that further CPT Editorial Panel (Panel) or Executive Committee actions may affect these codes and/or descriptors. For this reason, code numbers and/or descriptor language in the CPT code set may differ at the time of publication. In addition, further Panel actions may result in gaps in code number sequencing.

*Note that the release date may be delayed by several days due to the timing of the CPT Panel fall meeting.
