

# Physicians bring economic health to North Dakota's communities.

Beyond their role in safeguarding the health of our communities, physicians in North Dakota are a major driver of the state economy, spurring economic growth and creating jobs across all industries.

North Dakota physicians hire locally, buy locally and support the local economy. Through the **creation of jobs** with strong wages and benefits paid to workers across the state, physicians empower a high-quality, sustainable workforce that **generates state and local tax revenue** for community investments. Physicians' economic output—the value of the goods and services provided—helps other businesses grow through their own purchasing and through the purchasing of their employees. Each dollar in direct output applied to physician services supports \$1.72 in economic activity in North Dakota, and **physician-driven economic activity** is greater than legal services, home health care, higher education, and nursing home and residential care.

View the **2018 American Medical Association Economic Impact Study** to learn more about the contributions physicians make to the health of North Dakota's economy at [PhysiciansEconomicImpact.org](http://PhysiciansEconomicImpact.org).

## VITAL SIGNS: THE ECONOMIC IMPACT OF PHYSICIANS IN NORTH DAKOTA<sup>1</sup>
