Pathology/Laboratory and Molecular Pathology/MAAA/GSP CPT® Code Change Applications February 2027 Editorial Panel Meeting

Pathology/Laboratory and Molecular Pathology/MAAA/GSP CPT Code Change Applications (CCAs) that have been submitted for consideration by the CPT Editorial Panel at its February 2027 meeting are listed below. These applications will also be included in the proposed Panel agenda that will be posted to the AMA website on December 4, 2026. This listing includes the code application names, code(s) affected, and a description of the request. **Until such time as the CPT Editorial Panel acts on these requests, the following information is provided for informational purposes only, giving interested individuals the information to help determine whether or not to attend the meeting and provide comment on a given topic(s).**

This listing of Pathology/Laboratory and Molecular Pathology/MAAA/GSP applications is being posted ahead of the full February Panel meeting agenda in order to provide the Molecular Pathology Advisory Group (MPAG) and the Pathology Coding Caucus (PCC) sufficient time to review comments from interested stakeholders prior to making their recommendations to the CPT Editorial Panel.

Codes that contain an 'X' (e.g., 10X24, 23X42, 03X0T) below are temporary codes that are intended to give readers an idea of the proposed placement in the code set of the potential code changes. **These temporary codes are not used for claims reporting and will be removed and not retained when the final CPT Datafiles are distributed on August 31st of each year. To report the services described by the "X" codes listed on this form, please refer to the actual codes as they appear in the CPT Datafiles publication distributed on August 31st of the corresponding year.**

NOTICE –INTERESTED PARTY PROCESS

Upon review of this agenda, if the reviewer believes that they will need to provide comment on an issue, they must seek Interested Party status by submitting a request for a copy of the application and associated materials. **Requests are to be submitted through the Smart App's CPT Interested Party dashboard.** Those interested in review of the agenda materials are required to complete this form in full.

Any interested parties wishing to provide written comments on any agenda items should be aware of the following relevant deadlines for provision of written comments on the agenda to ensure comment review by all parties. Additional verbal comments on any issue can be provided in person at the Panel meeting following a statement of conflict of interest. The applicant(s) who submitted the original code change application is automatically considered an interested party and is notified by AMA staff of any request for review submitted by another party.

*Interested party requests will not be processed until the interested party submits a signed confidentiality agreement and disclosure of interest form. Please follow the instructions in the correspondence that accompanies the materials.

Issues	Tabs	Deadline to Request Materials *NEW: you may request materials through Friday of the Panel Meeting.	Comments Deadline (5PM, Pacific) for Path/Lab
Pathology/Laboratory	**15-20**	**-------**	**Dec. 4, 2026, 5 p.m. Pacific**
Lab-related Category III	**32-37**	**-------**	**Jan. 4, 2027, 5 p.m. Pacific**

During the time between now and the Panel meeting, this listing of Pathology/Laboratory and Molecular Pathology/MAAA/GSP CCAs may be modified to reflect changes – additions, deletions or updates. Please check back frequently for the most up to date information. Outcomes on these actions will be listed in the CPT Editorial Panel Summary of Actions for the February 2027 meeting, which will be published on February 19, 2027, to the CPT home page of the AMA website http://www.ama-assn.org/go/panel-actions.

	Name	Code #	Request-Description
15	MoPath Tier 1-CYP2B6	● 8XX33	Establish code 8XX33 to report CYP2B6 gene analysis.

	Name	Code #	Request-Description
16	MoPath Tier 1-APOE	▲81401 ●8XX34	Revise Molecular Pathology Tier 2 code 81401 by deleting apolipoprotein E (APOE) gene analysis; and establish Molecular Pathology Tier 1 code 8XX34 for reporting APOE testing for Alzheimer's disease.
17	MoPath Tier 1-NAT2	●8XX36	Establish Molecular Pathology Tier I code 8XX36 to report NAT2 genetic testing.
18	MAAA-Neurology (Multiple Sclerosis)	●81XXX	Establish Category I MAAA code 81XXX to report algorithmic analysis of 18 protein biomarkers, using antibody-based proteomics for disease activity score and likelihood of benefit from multiple sclerosis disease-modifying therapy
19	HPV Specimen Self-collection Processing	●8XX35	Establish add-on code 8XX35 for reporting additional laboratory services related to at-home, self-collected vaginal specimens for high-risk human papillomavirus (HPV) testing
20	Dexamethasone Assay	●80XXX	Establish code 80XXX for reporting Dexamethasone assay.

	Name	Code #	Request-Description
32	Cat III-Algorithmic Analysis Services	▲1063T ▲1064T ▲1097T ▲1106T ▲1107T ▲1119T	Revise and relocate Category III codes 1063T, 1064T, 1097T, 1106T, 1107T, and 1119T to a dedicated subsection with guidelines in the Category III section for reporting algorithmic analysis services.
33	Cat III-Algorithmic Analysis-Digitized Slides-Bladder Cancer	▲1063T	Revise Category III code 1063T by removing the specified bladder cancer type, non-muscle-invasive bladder cancer (NMIBC).
34	Cat III-Algorithmic Analysis-Digitized Slides-Tumor	●X729T	Establish Category III code X729T for reporting augmentative algorithmic analysis of tumor microenvironment biomarkers to support individualized recurrence-risk estimate and likelihood of benefit from systemic therapy.
35	Cat III-Algorithmic Analysis-Digitized Slides-Colorectal Cancer	●X733T	Establish Category III code X733T to report augmentative algorithmic analysis of histomorphologic features in digitized slides for prognosis of recurrence or progression in colorectal cancer.
36	Cat III-Self-Collection Capillary Blood Specimen	●X730T	Establish Category III code X730T to report patient-collection of a capillary blood specimen using a collection device
