Whereas, The Centers for Disease Control and Prevention (CDC) defines an "e-cigarette" (also known as “e-cig,” “e-hookah,” “mod,” “vape pen,” “vape,” “tank system,” and “electronic nicotine delivery system”) as a device that produces an aerosol by heating a liquid that usually contains nicotine, flavorings, and other chemicals, such as diacetyl, volatile organic compounds, and heavy metals, that help to make the aerosol; and

Whereas, Per the CDC, the act of using this device is termed as “vaping,” which allows for ultrafine particles to be inhaled deeply into the lungs; and

Whereas, Youth use of electronic cigarettes is widespread in the US, with 10.5% of middle school students and 27.5% of high school students reporting in 2019 that they used electronic cigarettes in the past 30 days; and

Whereas, From July 2019 through February 2020, electronic cigarette, or vaping, product use-associated lung injury (EVALI) resulted in the hospitalization of 2,807 people across the United States and at least 68 deaths, with a majority of affected patients being under 25 years of age; and

Whereas, A single cartridge of the e-cigarettes used by the majority of US youth has a nicotine content equivalent to roughly 20 combustible cigarettes, and nicotine has been determined to be a highly addictive substance that can adversely harm the developing adolescent brain; and

Whereas, The safety and health effects of long-term inhalation of the volatile organic compounds, heavy metals, and known cancer-causing agents contained in e-cigarettes are currently unknown; and

Whereas, The Food and Drug Administration (FDA)’s restrictions on flavored e-cigarettes passed in February 2020 narrowly targeted pre-filled cartridge-based vaping devices and do not apply to disposable or refillable tank-based products based on the FDA’s “interest in balancing between preventing youth usage and preserving options for adults trying to transition away from combustible products”; and

Whereas, Existing AMA-MSS policy 490.025MSS “acknowledges the known harms of electronic nicotine delivery systems, particularly their ineffectiveness of smoking cessation devices” and existing AMA policy D-495.992 acknowledges the insufficiency of data on the safety and effectiveness of e-cigarettes products for tobacco cessation purposes; and

Whereas, Recent news reports suggest an immediate increase in youth use of flavored disposable e-cigarettes in response the FDA’s restrictions on cartridge-based e-cigarettes; and
Whereas, Prior to the recent popularity of cartridge-based devices, refillable tank-based devices were the most popular e-cigarette type among youth, with 51.8% of youth using tank-based e-cigarettes as compared to 47.1% using cartridge-based e-cigarettes in 2017; and

Whereas, Disposable e-cigarettes and tank-based devices contain the same ingredients as cartridge-based devices and are considered by the CDC to be in the same overarching category as cartridge-based devices; and

Whereas, Despite use of e-liquids with the same nicotine concentration, modifiable tank-based e-cigarette products are thought to deliver higher levels of nicotine as compared to other e-cigarette products; and

Whereas, High tobacco retailer density increases access to tobacco products and the likelihood of smoking initiation, particularly among youth because identification is requested less often, prices decrease due to increased competition, and there are more advertisements that incentivize purchase in high-density tobacco retail areas; and

Whereas, Experimental smoking among high school-aged minors increases when tobacco retailers are closer to schools and densely populate those locations; and

Whereas, Higher tobacco retailer densities proximal to schools and homes are disproportionately prevalent in low-income communities and communities of color, posing a significant public health injustice, and policies banning tobacco product sales near schools have been projected to reduce or eliminate existing disparities in tobacco retailer density by income level and by proportion of African American residents; and

Whereas, Proximity-based point of sale laws that restrict sale of tobacco or opening of new tobacco retailers within a certain distance of schools, playgrounds, parks, libraries, and existing retailers have been successfully implemented in California, Illinois, Louisiana, and Rhode Island; and

Whereas, E-cigarette marketing in the US contains features that are particularly more appealing to youth, and youth exposed to e-cigarette advertisements are significantly more likely to initiate vaping; and

Whereas, E-cigarette package warning labels that communicate the health risks of e-cigarettes can reduce students’ intention to use e-cigarettes and increase perceived risks of e-cigarette use; and

Whereas, Adolescents who vape e-cigarettes in nontraditional flavors are more likely to continue vaping and take more puffs per vaping occasion, compared with those who exclusively vaped tobacco-flavored, mint- or menthol-flavored, or flavorless e-cigarettes; therefore be it

RESOLVED, That our American Medical Association support the inclusion of disposable and tank-based e-cigarettes in the language and implementation of any restrictions that are applied by the Food and Drug Administration or other bodies to cartridge-based e-cigarettes (New HOD Policy); and be it further
RESOLVED, That AMA policy H-495.986, “Tobacco Product Sales and Distribution,” be amended by addition to read as follows:

Tobacco Product Sales and Distribution, H-495.986

Our AMA:

(1) recognizes the use of e-cigarettes and vaping as an urgent public health epidemic and will actively work with the Food and Drug Administration and other relevant stakeholders to counteract the marketing and use of addictive e-cigarette and vaping devices, including but not limited to bans and strict restrictions on marketing to minors under the age of 21;

(2) encourages the passage of laws, ordinances and regulations that would set the minimum age for purchasing tobacco products, including electronic nicotine delivery systems (ENDS) and e-cigarettes, at 21 years, and urges strict enforcement of laws prohibiting the sale of tobacco products to minors;

(3) supports the development of model legislation regarding enforcement of laws restricting children’s access to tobacco, including but not limited to attention to the following issues: (a) provision for licensure to sell tobacco and for the revocation thereof; (b) appropriate civil or criminal penalties (e.g., fines, prison terms, license revocation) to deter violation of laws restricting children’s access to and possession of tobacco; (c) requirements for merchants to post notices warning minors against attempting to purchase tobacco and to obtain proof of age for would-be purchasers; (d) measures to facilitate enforcement; (e) banning out-of-package cigarette sales (“loosies”); and (f) requiring tobacco purchasers and vendors to be of legal smoking age;

(4) requests that states adequately fund the enforcement of the laws related to tobacco sales to minors;

(5) opposes the use of vending machines to distribute tobacco products and supports ordinances and legislation to ban the use of vending machines for distribution of tobacco products;

(6) seeks a ban on the production, distribution, and sale of candy products that depict or resemble tobacco products;

(7) opposes the distribution of free tobacco products by any means and supports the enactment of legislation prohibiting the disbursement of samples of tobacco and tobacco products by mail;

(8) (a) publicly commends (and so urges local medical societies) pharmacies and pharmacy owners who have chosen not to sell tobacco products, and asks its members to encourage patients to seek out and patronize pharmacies that do not sell tobacco products; (b) encourages other pharmacists and pharmacy owners individually and through their professional associations to remove such products from their stores; (c) urges the American Pharmacists Association, the National Association of Retail Druggists, and other pharmaceutical associations to adopt a position calling for their members to remove tobacco products from their stores; and (d) encourages state medical associations to develop lists of pharmacies that have voluntarily banned the sale of tobacco for distribution to their members; and

(9) opposes the sale of tobacco at any facility where health services are provided; and

(10) supports that the sale of tobacco products be restricted to tobacco specialty stores.

(11) supports measures that prevent retailers from opening new tobacco specialty stores in proximity to elementary schools, middle schools, and high schools; and
Resolution: 919 (I-22)

(12) support measures that decrease the overall density of tobacco specialty stores, including but not limited to, preventing retailers from opening new tobacco specialty stores in proximity to existing tobacco specialty stores. (Modify Current HOD Policy)

Fiscal Note: Not yet determined

RELEVANT AMA POLICY

Tobacco Prevention and Youth H-490.914

Our AMA:

(1) (a) urges the medical community, related groups, educational institutions, and government agencies to demonstrate more effectively the health hazards inherent in the use of tobacco products (including but not limited to, cigarettes, smokeless tobacco, chewing tobacco, and hookah/water pipe tobacco); (b) encourages state and local medical societies to actively advise municipalities and school districts against use of health education material sponsored or distributed by the tobacco industry; and (c) publicly rejects the tobacco industry as a credible source of health education material;

(2) opposes the use of tobacco products of any kind in day care centers or other establishments where pre-school children attend for educational or child care purposes;

(3) advises public and private schools about the very early smoking habits observed in children and encourages appropriate school authorities to prohibit the use of all tobacco products in elementary through senior high school by anyone during the school day and during other school-related activities;

(4) (a) supports the concept that a comprehensive health education program stressing health maintenance be part of the required curriculum through 12th grade to: (i) help pre-teens, adolescents, and young adults avoid the use of tobacco products, including smokeless tobacco; and (ii) emphasize the benefits of remaining free of the use of tobacco products; (b) will work with other public and private parties to actively identify and promote tobacco prevention programs for minors and encourages the development, evaluation, and incorporation of appropriate intervention programs, including smoking cessation programs, that are tailored to the needs of children; and (c) recommends that student councils and student leaders be encouraged to join in an anti-smoking campaign.

(5) urges state medical societies to promote the use of appropriate educational films and educational programs that reduce tobacco use by young people;

(6) (a) favors providing financial support to promising behavioral research into why people, especially youth, begin smoking, why they continue, and why and how they quit; (b) encourages research into further reducing the risks of cigarette smoking; and (c) continues to support research and education programs, funded through general revenues and private sources, that are concerned with health problems associated with tobacco and alcohol use;

(7) opposes the practice of tobacco companies using the names and distinctive hallmarks of well-known organizations and celebrities, such as fashion designers, in marketing their products, as youth are particularly susceptible;

(8) supports working with appropriate organizations to develop a list of physicians and others recommended as speakers for local radio and television to discuss the harmful effects of tobacco usage and to advocate a tobacco-free society; and

(9) commends the following entities for their exemplary efforts to inform the Congress, state legislatures, education officials and the public of the health hazards of tobacco use: American Cancer Society, American Lung Association, American Heart Association, Action on Smoking and Health, Inc., Groups Against Smoker's Pollution, National Congress of Parents and Teachers, National Cancer Institute, and National Clearinghouse on Smoking (HEW).

FDA Regulation of Tobacco Products H-495.988

1. Our AMA: (A) acknowledges that all tobacco products (including but not limited to, cigarettes, smokeless tobacco, chewing tobacco, and hookah/water pipe tobacco) are harmful to health, and that there is no such thing as a safe cigarette; (B) recognizes that currently available evidence from short-term
studies points to electronic cigarettes as containing fewer toxicants than combustible cigarettes, but the use of electronic cigarettes is not harmless and increases youth risk of using combustible tobacco cigarettes; (C) encourages long-term studies of vaping (the use of electronic nicotine delivery systems) and recognizes that complete cessation of the use of tobacco and nicotine-related products is the goal; (D) asserts that tobacco is a raw form of the drug nicotine and that tobacco products are delivery devices for an addictive substance; (E) reaffirms its position that the Food and Drug Administration (FDA) does, and should continue to have, authority to regulate tobacco products, including their manufacture, sale, distribution, and marketing; (F) strongly supports the substance of the August 1996 FDA regulations intended to reduce use of tobacco by children and adolescents as sound public health policy and opposes any federal legislative proposal that would weaken the proposed FDA regulations; (G) urges Congress to pass legislation to phase in the production of reduced nicotine content tobacco products and to authorize the FDA have broad-based powers to regulate tobacco products; (H) encourages the FDA and other appropriate agencies to conduct or fund research on how tobacco products might be modified to facilitate cessation of use, including elimination of nicotine and elimination of additives (e.g., ammonia) that enhance addictiveness; and (I) strongly opposes legislation which would undermine the FDA's authority to regulate tobacco products and encourages state medical associations to contact their state delegations to oppose legislation which would undermine the FDA's authority to regulate tobacco products.

2. Our AMA: (A) supports the US Food and Drug Administration (FDA) as it takes an important first step in establishing basic regulations of all tobacco products; (B) strongly opposes any FDA rule that exempts any tobacco or nicotine-containing product, including all cigars, from FDA regulation; and (C) will join with physician and public health organizations in submitting comments on FDA proposed rule to regulate all tobacco products.

3. Our AMA: (A) will continue to monitor the FDA's progress towards establishing a low nicotine product standard for tobacco products and will submit comments on the proposed rule that are in line with the current scientific evidence and (B) recognizes that rigorous and comprehensive post-market surveillance and product testing to monitor for unintended tobacco use patterns will be critical to the success of a nicotine reduction policy.

Opposition to Addition of Flavors to Tobacco Products H-495.971

Our AMA: (1) supports state and local legislation to prohibit the sale or distribution of all flavored tobacco products, including menthol, mint and wintergreen flavors; (2) urges local and state medical societies and federation members to support state and local legislation to prohibit the sale or distribution of all flavored tobacco products; and (3) encourages the FDA to prohibit the use of all flavoring agents in tobacco products, which includes electronic nicotine delivery systems as well as combustible cigarettes, cigars and smokeless tobacco.

Electronic Cigarettes, Vaping, and Health H-495.972

1. Our AMA urges physicians to: (a) educate themselves about electronic nicotine delivery systems (ENDS), including e-cigarettes, be prepared to counsel patients about the use of these products and the potential for nicotine addiction and the potential hazards of dual use with conventional cigarettes, and be sensitive to the possibility that when patients ask about e-cigarettes, they may be asking for help to quit smoking; (b) consider expanding clinical interviews to inquire about “vaping” or the use of e-cigarettes; (c) promote the use of FDA-approved smoking cessation tools and resources for their patients and caregivers; and (d) advise patients who use e-cigarettes to take measures to assure the safety of children in the home who could be exposed to risks of nicotine overdose via ingestion of replacement e-cigarette liquid that is capped or stored improperly.

2. Our AMA: (a) encourages further clinical and epidemiological research on e-cigarettes; (b) supports education of the public on the health effects, including toxins and carcinogens of electronic nicotine delivery systems (ENDS) including e-cigarettes; and (c) recognizes that the use of products containing nicotine in any form among youth, including e-cigarettes, is unsafe and can cause addiction.

3. Our AMA supports legislation and associated initiatives and will work in coordination with the Surgeon General to prevent e-cigarettes from reaching youth and young adults through various means, including,
but not limited to, CDC research, education and a campaign for preventing and reducing use by youth, young adults and others of e-cigarettes, and combustible and emerging tobacco products.

FDA to Extend Regulatory Jurisdiction Over All Non-Pharmaceutical Nicotine and Tobacco Products H-495.973

Our AMA: (1) supports the U.S. Food and Drug Administration’s (FDA) proposed rule that would implement its deeming authority allowing the agency to extend FDA regulation of tobacco products to pipes, cigars, hookahs, e-cigarettes and all other non-pharmaceutical tobacco/nicotine products not currently covered by the Federal Food, Drug, and Cosmetic Act, as amended by the Family Smoking Prevention and Tobacco Control Act; (2) supports legislation and/or regulation of electronic cigarettes and all other non-pharmaceutical tobacco/nicotine products that: (a) establishes a minimum legal purchasing age of 21; (b) prohibits use in all places that tobacco cigarette use is prohibited, including in hospitals and other places in which health care is delivered; (c) applies the same marketing and sales restrictions that are applied to tobacco cigarettes, including prohibitions on television advertising, product placement in television and films, and the use of celebrity spokespeople; (d) prohibits product claims of reduced risk or effectiveness as tobacco cessation tools, until such time that credible evidence is available, evaluated, and supported by the FDA; (e) requires the use of secure, child- and tamper-proof packaging and design, and safety labeling on containers of replacement fluids (e-liquids) used in e-cigarettes; (f) establishes manufacturing and product (including e-liquids) standards for identity, strength, purity, packaging, and labeling with instructions and contraindications for use; (g) requires transparency and disclosure concerning product design, contents, and emissions; and (h) prohibits the use of characterizing flavors that may enhance the appeal of such products to youth; and (3) urges federal officials, including but not limited to the U.S. Food and Drug Administration to: (a) prohibit the sale of any e-cigarette cartridges and e-liquid refills that do not include a complete list of ingredients on its packaging, in the order of prevalence (similar to food labeling); and (b) require that an accurate nicotine content of e-cigarettes, e-cigarette cartridges, and e-liquid refills be prominently displayed on the product alongside a warning of the addictive quality of nicotine.

Tobacco Advertising and Media H-495.984

Our AMA:

(1) in keeping with its long-standing objective of protecting the health of the public, strongly supports a statutory ban on all advertising and promotion of tobacco products;

(2) as an interim step toward a complete ban on tobacco advertising, supports the restriction of tobacco advertising to a "generic" style, which allows only black-and-white advertisements in a standard typeface without cartoons, logos, illustrations, photographs, graphics or other colors;

(3) (a) recognizes and condemns the targeting of advertisements for cigarettes and other tobacco products toward children, minorities, and women as representing a serious health hazard; (b) calls for the curtailment of such marketing tactics; and (c) advocates comprehensive legislation to prevent tobacco companies or other companies promoting look-alike products designed to appeal to children from targeting the youth of America with their strategic marketing programs;

(4) supports the concept of free advertising space for anti-tobacco public service advertisements and the use of counter-advertising approved by the health community on government-owned property where tobacco ads are posted;

(5) (a) supports petitioning appropriate government agencies to exercise their regulatory authority to prohibit advertising that falsely promotes the alleged benefits and pleasures of smoking as well worth the risks to health and life; and (b) supports restrictions on the format and content of tobacco advertising substantially comparable to those that apply by law to prescription drug advertising;

(6) publicly commends those publications that have refused to accept cigarette advertisements and supports publishing annually, via JAMA and other appropriate publications, a list of those magazines that have voluntarily chosen to decline tobacco ads, and circulation of a list of those publications to every AMA member;
(7) urges physicians to mark the covers of magazines in the waiting area that contain tobacco advertising with a disclaimer saying that the physician does not support the use of any tobacco products and encourages physicians to substitute magazines without tobacco ads for those with tobacco ads in their office reception areas;
(8) urges state, county, and specialty societies to discontinue selling or providing mailing lists of their members to magazine subscription companies that offer magazines containing tobacco advertising;
(9) encourages state and county medical societies to recognize and express appreciation to any broadcasting company in their area that voluntarily declines to accept tobacco advertising of any kind;
(10) urges the 100 most widely circulating newspapers and the 100 most widely circulating magazines in the country that have not already done so to refuse to accept tobacco product advertisements, and continues to support efforts by physicians and the public, including the use of written correspondence, to persuade those media that accept tobacco product advertising to refuse such advertising;
(11) (a) supports efforts to ensure that sports promoters stop accepting tobacco companies as sponsors; (b) opposes the practice of using athletes to endorse tobacco products and encourages voluntary cessation of this practice; and (c) opposes the practice of tobacco companies using the names and distinctive hallmarks of well-known organizations and celebrities, such as fashion designers, in marketing their products;
(12) will communicate to the organizations that represent professional and amateur sports figures that the use of all tobacco products while performing or coaching in a public athletic event is unacceptable. Tobacco use by role models sabotages the work of physicians, educators, and public health experts who have striven to control the epidemic of tobacco-related disease;
(13) (a) encourages the entertainment industry, including movies, videos, and professional sporting events, to stop portraying the use of tobacco products as glamorous and sophisticated and to continue to de-emphasize the role of smoking on television and in the movies; (b) will aggressively lobby appropriate entertainment, sports, and fashion industry executives, the media and related trade associations to cease the use of tobacco products, trademarks and logos in their activities, productions, advertisements, and media accessible to minors; and (c) advocates comprehensive legislation to prevent tobacco companies from targeting the youth of America with their strategic marketing programs; and
(14) encourages the motion picture industry to apply an "R" rating to all new films depicting cigarette smoking and other tobacco use.

Sales and Distribution of Tobacco Products and Electronic Nicotine Delivery Systems (ENDS) and E-cigarettes H-495.986

H-495.986 Tobacco Product Sales and Distribution

Our AMA:
(1) recognizes the use of e-cigarettes and vaping as an urgent public health epidemic and will actively work with the Food and Drug Administration and other relevant stakeholders to counteract the marketing and use of addictive e-cigarette and vaping devices, including but not limited to bans and strict restrictions on marketing to minors under the age of 21;
(2) encourages the passage of laws, ordinances and regulations that would set the minimum age for purchasing tobacco products, including electronic nicotine delivery systems (ENDS) and e-cigarettes, at 21 years, and urges strict enforcement of laws prohibiting the sale of tobacco products to minors;
(3) supports the development of model legislation regarding enforcement of laws restricting children’s access to tobacco, including but not limited to attention to the following issues: (a) provision for licensure to sell tobacco and for the revocation thereof; (b) appropriate civil or criminal penalties (e.g., fines, prison terms, license revocation) to deter violation of laws restricting children's access to and possession of tobacco; (c) requirements for merchants to post notices warning minors against attempting to purchase tobacco and to obtain proof of age for would-be purchasers; (d) measures to facilitate enforcement; (e) banning out-of-package cigarette sales ("loosies"); and (f) requiring tobacco purchasers and vendors to be of legal smoking age;
(4) requests that states adequately fund the enforcement of the laws related to tobacco sales to minors;
(5) opposes the use of vending machines to distribute tobacco products and supports ordinances and legislation to ban the use of vending machines for distribution of tobacco products;
(6) seeks a ban on the production, distribution, and sale of candy products that depict or resemble tobacco products;
(7) opposes the distribution of free tobacco products by any means and supports the enactment of legislation prohibiting the disbursement of samples of tobacco and tobacco products by mail;
(8) (a) publicly commends (and so urges local medical societies) pharmacies and pharmacy owners who have chosen not to sell tobacco products, and asks its members to encourage patients to seek out and patronize pharmacies that do not sell tobacco products; (b) encourages other pharmacists and pharmacy owners individually and through their professional associations to remove such products from their stores; (c) urges the American Pharmacists Association, the National Association of Retail Druggists, and other pharmaceutical associations to adopt a position calling for their members to remove tobacco products from their stores; and (d) encourages state medical associations to develop lists of pharmacies that have voluntarily banned the sale of tobacco for distribution to their members; and (9) opposes the sale of tobacco at any facility where health services are provided; and (10) supports that the sale of tobacco products be restricted to tobacco specialty stores.

Tobacco Product Labeling H-495.989
Our AMA: (1) supports requiring more explicit and effective health warnings, such as graphic warning labels, regarding the use of tobacco (and alcohol) products (including but not limited to, cigarettes, smokeless tobacco, chewing tobacco, and hookah/water pipe tobacco, and ingredients of tobacco products sold in the United States); (2) encourages the Food and Drug Administration, as required under Federal law, to revise its rules to require color graphic warning labels on all cigarette packages depicting the negative health consequences of smoking; (3) supports legislation or regulations that require (a) tobacco companies to accurately label their products, including electronic nicotine delivery systems (ENDS), indicating nicotine content in easily understandable and meaningful terms that have plausible biological significance; (b) picture-based warning labels on tobacco products produced in, sold in, or exported from the United States; (c) an increase in the size of warning labels to include the statement that smoking is ADDICTIVE and may result in DEATH; and (d) all advertisements for cigarettes and each pack of cigarettes to carry a legible, boxed warning such as: "Warning: Cigarette Smoking causes CANCER OF THE MOUTH, LARYNX, AND LUNG, is a major cause of HEART DISEASE AND EMPHYSEMA, is ADDICTIVE, and may result in DEATH. Infants and children living with smokers have an increased risk of respiratory infections and cancer;" (4) urges the Congress to require that: (a) warning labels on cigarette packs should appear on the front and the back and occupy twenty-five percent of the total surface area on each side and be set out in black-and-white block; (b) in the case of cigarette advertisements, warning labels of cigarette packs should be moved to the top of the ad and should be enlarged to twenty-five percent of total ad space; and (c) warning labels following these specifications should be included on cigarette packs of U.S. companies being distributed for sale in foreign markets; and (5) supports requiring warning labels on all ENDS products, starting with the warning that nicotine is addictive.

Legal Action to Compel FDA to Regulate E-Cigarettes D-495.992
1. Our AMA will consider joining other medical organizations in an amicus brief supporting the American Academy of Pediatrics legal action to compel the U.S. Food and Drug Administration to take timely action to establish effective regulation of e-cigarettes, cigars and other nicotine tobacco products.
2. Our AMA will: (a) urgently advocate for regulatory, legislative, and/or legal action at the federal and/or state levels to ban the sale and distribution of all e-cigarette and vaping products, with the exception of those which may be approved by the FDA for tobacco cessation purposes and made available by prescription only; and (b) will advocate for research funding to sufficiently study the safety and effectiveness of e-cigarette and vaping products for tobacco cessation purposes.
