The nation’s drug overdose and death epidemic continues to worsen. The epidemic affects every state and continues to be driven by illicitly manufactured fentanyl, methamphetamine, and cocaine, often in combination or in adulterated forms. More than 105,000 deaths were reported in the United States between December 2021 to December 2022. The AMA continues to urge policymakers’ action to increase access to evidence-based care for substance use disorders, pain and harm reduction measures.

The news articles, state health department reports and other information below cite data from multiple and varied sources, including national, state and local public health agencies, law enforcement, emergency medical services, hospitals, treatment centers, and journals. Relevant AMA advocacy, resources and recommendations to end the epidemic also are below.

- **Recommendations from the AMA Substance Use and Pain Care Task Force** and **AMA 2022 Overdose Epidemic national report** Updated recommendations that highlight physicians’ actions as well as additional steps that must be taken to have a meaningful impact on reducing drug-related mortality and improving patient outcomes.

- **AMA-Manatt Health 2022 state policy toolkit** provides more than 400 specific laws, regulations, policy guidance and other actions being implemented to help reduce mortality and improve outcomes. The toolkit builds on the 2020 **AMA-Manatt Health national policy roadmap** use of best practices to increase access to evidence-based care for mental illness, substance use disorders, comprehensive pain care and harm reduction initiatives.

- **The Fight to End the Nation’s Overdose Epidemic and Restore Compassionate Care: Profiles in Leadership** profiles the work of more than 25 practicing physicians, policymakers, researchers and advocates working daily to reduce drug-related mortality and improve patient outcomes. December 2022.

- The U.S. Centers for Disease Control and Prevention on November 4, 2022, released its **CDC Clinical Practice Guideline for Prescribing Opioids for Pain—United States, 2022**, which CDC said “updates and replaces” the 2016 guideline. The CDC makes clear in its revision that the updated guideline “is meant to be a flexible clinical tool and should not be used as a rigid standard of care or one-size-fits-all policy or law.” The AMA urges all states, payers, pharmacy chains and others to review, revise and rescind any laws or policies based on the 2016 guideline.

- **The AMA continues to urge Congress** to hold health plans accountable for nearly 15 years of failures in complying with the 2008 Mental Health Parity And Equity Addiction Act. Also see **AMA comments on Biden Administration’s National Drug Control Strategy**.

- **AMA issue brief on What medical societies can do to help end the nation’s drug overdose and death epidemic**. This includes removing prior authorization for treatment for substance use disorders, enforcing parity laws; promoting harm reduction; and focusing opioid litigation funds on evidence-based initiatives.

See below for national news and other reports from all 50 states and the District of Columbia.
