

AMERICAN MEDICAL ASSOCIATION MEDICAL STUDENT SECTION
(June 2022)

Report of the Medical Student Section Reference Committee

Glen McClain and Rajadhar Reddy, Co-Chairs

1 Your Reference Committee recommends the following consent calendar for acceptance:

2

3 **RECOMMENDED FOR ADOPTION**

4

5 1. Resolution 011 - Expanding Employee Leave to Include Miscarriage and Stillbirth

6 2. Resolution 017 - Assessing the Humanitarian Impact of Sanctions

7 3. Resolution 029 - Increasing the Availability of Automated External Defibrillators

8 4. Delegate Report A – Status of Pending MSS-Authored Resolutions to the House

9 of Delegates

10 5. COLRP Report A – Region Bylaw Review

11 6. CSI Report B - Supporting Further Study of Kratom

12 7. WIM CEQM Report B - National Fertility Coverage Mandate

13 8. WIM CME Report A - Amendment to Policy H-405.960, Policies for Parental,

14 Family, and Medical Necessity Leave

15 9. CSI Report C - Support for Creation of Diagnostic Category for Climate-

16 Associated Distress

17 10. CEQM Report B - Ensuring Competitive Pricing for Pharmaceutical Drugs

18 11. CAIA Report A - Addressing Longitudinal Health Care Needs of Children in

19 Foster Care

20 12. WIM Report A - Access to Naloxone for Vulnerable and Underserved Populations

21 13. WIM CEQM Report A - Amending H-420.978, Access to an Appropriate

22 Reimbursement for Group Prenatal Care

23 14. CGPH CSI Report A - Mitigating the Impact of Air Pollution on Pediatric Health

24

25 **RECOMMENDED FOR ADOPTION AS AMENDED**

26

27 15. Resolution 004 - Pain Management for Long-Acting Reversible Contraception

28 and other Gynecological Procedures

29 16. Resolution 005 - Supporting Intimate Partner and Sexual Violence Safe Leave

30 17. Resolution 006 - Recognizing Child Poverty and the Racial Wealth Gap as Public

31 Health Issues and Extending the Child Tax Credit for Low-Income Families

32 18. Resolution 008 - Increased Access to HIV Treatment and Supportive Services in

33 the Unstably Housed and Homeless Population

34 19. Resolution 010 - Inclusion of Disability in Medical Student Mistreatment

35 Reporting

36 20. Resolution 012 - Revision of H-185.921, Removal of AMA Support for ABA

37 21. Resolution 014 - Increased Education and Access to Fertility-Related Resources

38 for U.S. Physicians

39 22. Resolution 015 - Supporting the Use of Gender-Neutral Language

40 23. Resolution 016 - Amending Policy H-525.988, "Sex and Gender Differences in

41 Medical Research"

42 24. Resolution 018 - Protecting Access to Abortion and Reproductive Healthcare

43 25. Resolution 026 - Promoting a Fragrance-Free Health Care Environment

- 1 26. Resolution 027 - Recognizing the Burden of Rare Disease
- 2 27. Resolution 031 - Indigenous Data Sovereignty
- 3 28. Resolution 037 - Strengthening Interview Guidelines for American Indian and
- 4 Alaska Native Medical School, Residency, and Fellowship Applicants
- 5 29. Resolution 040 - Protecting Workers During Catastrophes
- 6 30. Resolution 052 - Promoting Algorithmic Stewardship in Healthcare Systems
- 7 31. GC Report A – Review of MSS Sunset Mechanism and Process
- 8 32. MIC Report A - Addressing Health Insurance Coverage Disparity among Latinx
- 9 Children
- 10 33. CSI CGPH Report A - Addressing Inequity in Onsite Wastewater Treatment
- 11 34. CAIA Report B - Amending Policy on Public Option to Maximize AMA Advocacy
- 12 35. CSI Report A - Advocating for Plant-Based Meat Research and Regulation
- 13 36. COLA CGPH Report A - Reducing Burden of Incarceration on Public Health
- 14 37. CEQM Report A - Studying Population-Based Insurance and Payment Policy
- 15 Disparities
- 16 38. CGPH CBH Report A - Opposing Use of Vulnerable Incarcerated People in
- 17 Response to Public Health Emergencies of Infectious Disease Origin
- 18 39. CDA CME Report A - Expanding Support for Medical Students and Physicians
- 19 with Disabilities

20

21 **RECOMMENDED FOR ADOPTION IN LIEU OF**

22

- 23 40. Resolution 001 - Opposing the Censorship of Sexuality and Gender Identity
- 24 Discussions in Public Schools
- 25 41. Resolution 003 - Accessible Electronic Charting Software and Alternative Access
- 26 to Health Information for Visually Impaired Patients
- 27 42. Resolution 007 - Interrupted Patient Sleep
- 28 43. Resolution 009 - Addressing the Use of Mail-order Naloxone to Curb the Opioid
- 29 Epidemic
- 30 44. Resolution 013 - Dismantling Homelessness Brick by Brick - An Eviction & Rate-
- 31 Centered Action to Prevent Homelessness
- 32 45. Resolution 020 - Adoption of Accessible Medical Diagnostic Equipment
- 33 Standards
- 34 46. Resolution 022 - Accuracy and Awareness for Sex Representation in Medical
- 35 Textbooks
- 36 47. Resolution 024 - Reforming the FDA Accelerated Approval Process
- 37 48. Resolution 030 - SNAP Expansion for DACA Recipients
- 38 49. Resolution 033 - Reforming the Medicare Part B “Buy and Bill” Process to
- 39 Encourage Biosimilar Use
- 40 50. Resolution 035 - FDA Indications for Off-Label & Over-the-Counter Drugs
- 41 51. Resolution 055 - Incorporating Holocaust Education in Medical Schools on
- 42 International Remembrance Day
- 43 52. IOP/ETF Report - Internal Operating Procedures/Election Task Force Report
- 44 53. COLRP COLA Report A – Promotion and Support of Physician, Student, and
- 45 Patient Participation in Government
- 46 Resolution 002 – Supporting Voting for Hospitalized Patients

47

48 **RECOMMENDED FOR REFERRAL**

49

- 50 54. Resolution 021 - Expanding and Reclassifying Emergency Medical Services

- 1 55. Resolution 036 - Fortifying Fat-Soluble Foods with Vitamin D
- 2 56. Resolution 042 - Condemnation of Non-Therapeutic Sterilization for
- 3 Contraception of Women with Disabilities without Informed Patient Consent
- 4 57. Resolution 049 - Advocating for the Inclusion of Weight Bias Training for Medical
- 5 Students
- 6 58. GC Report B – Resolution Task Force 2022 Update
- 7 59. MIC CGPH Report A - Mental Health Reform in Prisons

8

9 **RECOMMENDED FOR NOT ADOPTION**

- 10 60. Resolution 019 - Improving Safety of Planned Home Births through Midwifery
- 11 Licensing and Regulation
- 12 61. Resolution 025 - Medical Histories of Gamete Donors and Donor Conceived
- 13 People
- 14 62. Resolution 032 - Support for Mandated Nurse-Patient Ratios
- 15 63. Resolution 034 - Pharmacy Access to Human Immunodeficiency Virus (HIV) Pre-
- 16 Exposure Prophylaxis (PrEP) & Post-Exposure Prophylaxis (PEP)
- 17 64. Resolution 038 - Supporting Research into Artificial Womb Technologies
- 18 65. Resolution 043 - The Impacts of COVID-19 and Telemedicine on National Opioid
- 19 Prescription Patterns
- 20 66. Resolution 054 - Decreasing Screen Time in School and for School-related
- 21 Activities
- 22 67. COLA MIC Report A - IMG Exemptions from Immigration Caps on IMG-Specific
- 23 Immigration Category for Green Cards and Visas

24

25 **RECOMMENDED FOR REAFFIRMATION IN LIEU OF**

- 26 68. Resolution 023 - Incorporation of Evidence-Based Vaccine Communication
- 27 Strategies in Medical School Curriculum
- 28 69. Resolution 028 - Treatment Programs for Adolescents with Substance Use
- 29 Disorder
- 30 70. Resolution 039 - Medical Reversal
- 31 71. Resolution 041 - Encouraging Increased Dermatologic Training in Primary Care
- 32 Settings to Reduce Racial Disparities in Melanoma Outcomes
- 33 72. Resolution 044 - Increased Doula Access to Support Pregnant and Birthing
- 34 People
- 35 73. Resolution 045 - Reforming The Residency Match System
- 36 74. Resolution 046 - Subsidizing Research into Molecular Nanotechnology and
- 37 Molecular Nanomachines in Medicine
- 38 75. Resolution 047 - Subsidizing Research into Bacteriophage Medicine
- 39 76. Resolution 048 - Ensure Fair Practices by Staffing Agencies
- 40 77. Resolution 050 - Accurately Quantifying E-cigarette Usage
- 41 78. Resolution 051 - Expanding Access to Telerehabilitation
- 42 79. Resolution 053 - Repurposing Medical Surplus for Humanitarian Relief and
- 43 Medical Education
- 44 80. Resolution 056 - Regulation of Data from Mobile Health Technology
- 45 81. Resolution 057 - Supporting the Research and Development of the “Perfect
- 46 Potato”

1 **RECOMMENDED FOR FILING**

2

3 82. LGBTQ+ Report A – A Report on the Status of Requests Relating to LGBTQ+
4 Affairs Made by the AMA-MSS to the AMA

RECOMMENDED FOR ADOPTION

(1) RESOLUTION 011 - EXPANDING EMPLOYEE LEAVE TO INCLUDE MISCARRIAGE AND STILLBIRTH

RECOMMENDATION:

Resolution 011 be adopted.

RESOLVED, That our AMA amends Policy H-405.960, "Policies for Parental, Family, and Medical Necessity Leave":

Policies for Parental, Family and Medical Necessity Leave H-405.960

AMA adopts as policy the following guidelines for, and encourages the implementation of, Parental, Family and Medical Necessity Leave for Medical Students and Physicians:

1. Our AMA urges medical schools, residency training programs, medical specialty boards, the Accreditation Council for Graduate Medical Education, and medical group practices to incorporate and/or encourage development of leave policies, including parental, family, and medical leave policies, as part of the physician's standard benefit agreement.

2. Recommended components of parental leave policies for medical students and physicians include: (a) duration of leave allowed before and after delivery; (b) category of leave credited; (c) whether leave is paid or unpaid; (d) whether provision is made for continuation of insurance benefits during leave, and who pays the premium; (e) whether sick leave and vacation time may be accrued from year to year or used in advance; (f) how much time must be made up in order to be considered board eligible; (g) whether make-up time will be paid; (h) whether schedule accommodations are allowed; and (i) leave policy for adoption; and (j) leave policy for miscarriage or stillbirth.

3. AMA policy is expanded to include physicians in practice, reading as follows: (a) residency program directors and group practice administrators should review federal law concerning maternity leave for guidance in developing policies to assure that pregnant physicians are allowed the same sick leave or disability benefits as those physicians who are ill or disabled; (b) staffing levels and scheduling are encouraged to be flexible enough to allow for coverage without creating intolerable increases in other physicians' workloads, particularly in residency programs; and (c) physicians should be able to return to their practices or training programs after taking parental leave without the loss of status.

4. Our AMA encourages residency programs, specialty boards, and medical group practices to incorporate into their parental leave policies a six-week minimum leave allowance, with the understanding that no parent should be required to take a minimum leave.

5. Residency program directors should review federal and state law for guidance in developing policies for parental, family, and medical leave.

6. Medical students and physicians who are unable to work because of pregnancy, childbirth, and other related medical conditions should be entitled to such leave and other benefits on the same basis as other physicians who are temporarily unable to work for other medical reasons.

1 7. Residency programs should develop written policies on parental leave, family
2 leave, and medical leave for physicians. Such written policies should include the
3 following elements: (a) leave policy for birth or adoption; (b) duration of leave
4 allowed before and after delivery; (c) duration of leave allowed after miscarriage or
5 stillbirth; (e)(d) category of leave credited (e.g., sick, vacation, parental, unpaid
6 leave, short term disability); (d)(e) whether leave is paid or unpaid; (e)(f) whether
7 provision is made for continuation of insurance benefits during leave and who pays
8 for premiums; (f)(g) whether sick leave and vacation time may be accrued from
9 year to year or used in advance; (g)(h) extended leave for resident physicians with
10 extraordinary and long-term personal or family medical tragedies for periods of up
11 to one year, without loss of previously accepted residency positions, for
12 devastating conditions such as terminal illness, permanent disability, or
13 complications of pregnancy that threaten maternal or fetal life; (h)(i) how time can
14 be made up in order for a resident physician to be considered board eligible; (i)(j)
15 what period of leave would result in a resident physician being required to complete
16 an extra or delayed year of training; (j)(k) whether time spent in making up a leave
17 will be paid; and (k)(l) whether schedule accommodations are allowed, such as
18 reduced hours, no night call, modified rotation schedules, and permanent part-time
19 scheduling.

20 8. Our AMA endorses the concept of equal parental leave for birth, stillbirth,
21 miscarriage, and adoption as a benefit for resident physicians, medical students,
22 and physicians in practice regardless of gender or gender identity.

23 9. Staffing levels and scheduling are encouraged to be flexible enough to allow for
24 coverage without creating intolerable increases in the workloads of other
25 physicians, particularly those in residency programs.

26 10. Physicians should be able to return to their practices or training programs after
27 taking parental leave, family leave, or medical leave without the loss of status.

28 11. Residency program directors must assist residents in identifying their specific
29 requirements (for example, the number of months to be made up) because of leave
30 for eligibility for board certification and must notify residents on leave if they are in
31 danger of falling below minimal requirements for board eligibility. Program directors
32 must give these residents a complete list of requirements to be completed in order
33 to retain board eligibility.

34 12. Our AMA encourages flexibility in residency training programs, incorporating
35 parental leave and alternative schedules for pregnant house staff.

36 13. In order to accommodate leave protected by the federal Family and Medical
37 Leave Act, our AMA encourages all specialties within the American Board of
38 Medical Specialties to allow graduating residents to extend training up to 12 weeks
39 after the traditional residency completion date while still maintaining board
40 eligibility in that year.

41 14. These policies as above should be freely available online and in writing to all
42 applicants to medical school, residency or fellowship.

43 and be it further

44

45 RESOLVED, that due to the prevalence of miscarriage and stillbirth and the need for
46 physical and psychological healing afterwards, our AMA amends H-420.979 "AMA
47 Statement on Family and Medical Leave" as follows:

48

49 **AMA Statement on Family and Medical Leave H-420.979**

1 Our AMA supports policies that provide employees with reasonable job security
2 and continued availability of health plan benefits in the event leave by an employee
3 becomes necessary due to documented medical conditions. Such policies should
4 provide for reasonable periods of paid or unpaid: (1) medical leave for the
5 employee, including pregnancy; miscarriage, and stillbirth;
6 (2) maternity leave for the employee-mother;
7 (3) leave if medically appropriate to care for a member of the employee's
8 immediate family, i.e., a spouse or children; and
9 (4) leave for adoption or for foster care leading to adoption. Such periods of leave
10 may differ with respect to each of the foregoing classifications, and may vary with
11 reasonable categories of employers. Such policies should encourage voluntary
12 programs by employers and may provide for appropriate legislation (with or without
13 financial assistance from government). Any legislative proposals will be reviewed
14 through the Association's normal legislative process for appropriateness, taking
15 into consideration all elements therein, including classifications of employees and
16 employers, reasons for the leave, periods of leave recognized (whether paid or
17 unpaid), obligations on return from leave, and other factors involved in order to
18 achieve reasonable objectives recognizing the legitimate needs of employees and
19 employers.

20
21 VRC testimony was entirely supportive of the resolution. The Reference Committee
22 agrees with VRC testimony that the resolution succinctly addresses an important gap in
23 policy. While we of course realize that both this resolution and Resolution 005 on safe
24 leave amend the same policy, we refrained from combining these resolutions to avoid
25 conflating these two distinct and highly important issues. We recognize that the
26 proposed amendments do not conflict with each other, so if these resolutions were to be
27 adopted in the House of Delegates, they could both be cleanly amended into existing
28 policy simultaneously. We recommend Resolution 011 be adopted.

29
30 (2) RESOLUTION 017 – ASSESSING THE HUMANITARIAN IMPACT OF
31 SANCTIONS

32
33 **RECOMMENDATION:**

34
35 **Resolution 017 be adopted.**

36
37 RESOLVED, That our AMA recognizes that economic sanctions can negatively impact
38 health and exacerbate humanitarian crises; and be it further

39
40 RESOLVED, That our AMA supports legislative and regulatory efforts to study the
41 humanitarian impact of economic sanctions imposed by the United States.

42
43 VRC testimony was nearly universally supportive of the resolution with testimony from
44 the MSS Minority Issues Committee (MIC), the MSS representative to the Minority
45 Affairs Section (MAS), Region 1, Region 2, Region 3, and Region 6, with only one
46 individual in opposition. The Reference Committee agrees with testimony that the
47 resolution addresses a gap in policy and the asks are within the AMA's scope. We found
48 the resolution to be well-researched and were compelled by the authors' testimony that
49 global and humanitarian health issues—and how they are affected by federal policy—are
50 within our purview for advocacy, as noted by their discussion of the AMA's statement on

1 the war in Ukraine. We also recognize their testimony explaining that this resolution does
2 not ask our AMA to oppose the use of sanctions or presume to make those foreign
3 policy decisions for Congress and the White House, but simply asks for recognition of
4 their well-evidenced potential health consequences and for support of efforts to
5 understand their impact and inform future global decisions. We note that the authors'
6 second resolve clause on legislative and regulatory study mirrors existing Congressional
7 legislation. We recommend Resolution 017 be adopted.

8
9 (3) RESOLUTION 029 - INCREASING THE AVAILABILITY OF AUTOMATED
10 EXTERNAL DEFIBRILLATORS

11
12 **RECOMMENDATION:**

13
14 **Resolution 029 be adopted.**

15
16 RESOLVED, That our AMA amend Policy H-130.938, "Cardiopulmonary Resuscitation
17 (CPR) and Defibrillators," by addition to read as follows:

18
19 **Cardiopulmonary Resuscitation (CPR) and Defibrillators H-130.938**

20
21 Our AMA:

22 (1) supports publicizing the importance of teaching CPR, including the use of
23 automated external defibrillation;
24 (2) strongly recommends the incorporation of CPR classes as a voluntary part of
25 secondary school programs;
26 (3) encourages the American public to become trained in CPR and the use of
27 automated external defibrillators;
28 (4) advocates the widespread placement of automated external defibrillators,
29 including on all grade K-12 school campuses and locations at which school
30 events are held;
31 (5) encourages all grade K-12 schools to develop an emergency action plan for
32 sudden cardiac events;
33 (6) supports increasing government and industry funding for the purchase of
34 automated external defibrillator devices;
35 (7) endorses increased funding for cardiopulmonary resuscitation and
36 defibrillation training of community organization and school personnel;
37 (8) supports the development and use of universal connectivity for all
38 defibrillators;
39 (9) supports legislation that would encourage high school students be trained in
40 cardiopulmonary resuscitation and automated external defibrillator use;
41 (10) will update its policy on cardiopulmonary resuscitation and automated
42 external defibrillators (AEDs) by endorsing efforts to promote the importance of
43 AED use and public awareness of AED locations, by using solutions such as
44 integrating AED sites into widely accessible mobile maps and applications;
45 (11) urges AED vendors to remove labeling from AED stations that stipulate that
46 only trained medical professionals can use the defibrillators; and
47 (12) supports consistent and uniform legislation across states for the legal
48 protection of those who use AEDs in the course of attempting to aid a sudden
49 cardiac arrest victim.

1 (13) encourages the distribution of Automated External Defibrillators in an
2 equitable manner through the utilization of targeted placement strategies in order
3 to increase availability and decrease disparities in areas where disproportionate
4 rates of out-of-hospital cardiac arrest episodes exist.

5
6 VRC testimony was supportive but limited. The Reference Committee agrees with
7 testimony that supports equitable distribution of Automated External Defibrillators
8 (AEDs). While we recognize that implementation of this policy may be difficult, we also
9 believe that this should not hinder us from supporting logically sound efforts to allocate
10 public health resources such as AEDs. We were compelled by the resolution's argument
11 that existing community AED placement, a widespread investment purportedly made to
12 improve rapid care for cardiac arrest, may be inadequate to address the numbers and
13 locations of cardiac arrests that occur, particularly in communities geographically
14 deprioritized by public health departments due to systemic racism and poverty. The
15 resolution presents reasonable evidence for this argument, especially given that such
16 data may be limited in part because of well-documented and well-understood inequities
17 widely accepted by our MSS and in line with our values. We recommend Resolution 029
18 be adopted.

19
20 (4) DELEGATE REPORT A – STATUS OF PENDING MSS-AUTHORED
21 RESOLUTIONS TO THE HOUSE OF DELEGATES

22
23 **RECOMMENDATION:**

24
25 **The Recommendations in Delegate Report A be adopted and the remainder
26 of the report be filed.**

27
28 Your Section Delegates recommend that the following resolutions be discharged from the
29 transmittal queue:

- 30 1. Addressing Healthcare Accessibility for Current and Aged-Out Youth in the
31 Foster Care System
- 32 2. Updating Policy on Immigration Laws, Rules, Legislation, and Health Disparities
33 to Better Address National Crises [only discharging the second Resolved clause]
- 34 3. Improving Support and Access for Medical Students with Disabilities
- 35 4. Patient Education and Security Risks Involving DTC Genetic Testing
- 36 5. Reducing Complexity in the Public Service Loan Forgiveness
- 37 6. Support for Vote-by-Mail
- 38 7. Amending D-440.985, Health Care Payment for Undocumented Persons, to
39 Study Methods to Increase Health Care Access for Undocumented Immigrants

40
41 Your Section Delegates further recommend that the following resolutions be combined:

- 42 1. Ending Tax Subsidies for Advertisements Promoting Food and Drink of Poor
43 Nutritional Quality Among Children/Amend H-150.927, to Include Food Products
44 with Added Sugar (new title: Increasing Awareness and Reducing Consumption of
45 Food and Drink of Poor Nutritional Quality)
- 46 2. Updating Policy on Immigration Laws, Rules, Legislation, and Health Disparities
47 to Better Address National Crises/Using X-Ray and Dental Records for Assessing
48 Immigrant Age (new title: Updating Policy on Immigration Laws, Rules, Legislation,
49 and Health Disparities)

- 1 3. Addressing Need for Firearm Safety in Medical School Curricula/Amend H-
2 145.976, to Reimburse Physicians for Firearm Counseling (new title: Training and
3 Reimbursement for Firearm Safety Counseling)
- 4 4. Support Removal of BMI as a Standard Measure in Medicine/Increased
5 Recognition and Treatment of Eating Disorders in Minority Populations (new title:
6 Support Removal of BMI as a Standard Measure in Medicine and Recognizing
7 Culturally-Diverse and Varied Presentations of Eating Disorders)
- 8 5. Protections for Incarcerated Mothers in the Perinatal Period/Opposition to
9 Immediate Separation of Infants from Incarcerated Pregnant Persons (new title:
10 Protections for Incarcerated Mothers and Infants in the Perinatal Period)
- 11 6. Online Medical School Interview Option/Supporting a Hybrid Residency and
12 Fellowship Interview Process (new title: Studying Virtual and Hybrid Options for
13 Medical School, Residency, and Fellowship Interviews)

14
15 Your Section Delegates further recommend that the titles of the following resolutions be
16 updated as follows:

- 17 1. Government Manufacturing of Generic Drugs to Address Market Failures
18 (formerly Pharmaceutical Drug Pricing: Parameters around Medicare Negotiation
19 and Government Manufacturing of Generic Drugs)
- 20 2. Amending H-90.968 to Expand Policy on Medical Care of Persons with
21 Disabilities (formerly: H-90.968, Medical Care of Persons with Developmental
22 Disabilities Amendment)
- 23 3. Support of Vision Screenings and Visual Aids for Adults Covered by Medicaid
24 (formerly: Support of Research on Vision Screenings and Visual Aids for Adults
25 Covered by Medicaid)
- 26 4. Advocating for the Elimination of Hepatitis C Treatment Restrictions (formerly:
27 Opposition to Sobriety Requirement for Hepatitis C Treatment)

28
29 Your Section Delegates further recommend that the following resolutions be held in the
30 queue for the duration of the current meeting being due to other ongoing movement on
31 related items:

- 32 1. Addressing Longitudinal Health Care Needs of Children in Foster Care
- 33 2. Amending H-160.903, Eradicating Homelessness to Include Support for Street
34 Medicine Programs
- 35 3. Encouraging Collaboration between Physicians and Industry in AI Development
- 36 4. Establishing Comprehensive Dental Benefits Under State Medicaid Programs
- 37 5. Gender Neutral Language in AMA Policy
- 38 6. Reducing Disparities in HIV Incidence through PREP for HIV
- 39 7. Support of Research on Vision Screenings and Visual Aids for Adults Covered
40 by Medicaid

41
42 Your Section Delegates further recommend updating the Resolved clauses in the following
43 resolution to spell out the acronyms used therein:

- 44 1. Amending Policy H-155.955, Increasing Accessibility to Incontinence Products
45 to Include Diaper Tax Exemptions

46
47 There was no VRC testimony on Delegate Report A. The Reference Committee
48 recognizes the MSS Section Delegates for their work on the transmittal process. We
49 recognize that the transmittal process has evolved in various ways over the last few cycles
50 to best rapidly adapt to the changing nature of the House of Delegates Resolutions

1 Committee. With the hopeful return of in-person HOD meetings allowing our MSS Caucus
2 to more efficiently transmit the remainder of our backlog, we would encourage future
3 transmittal processes to involve reviewing resolved clauses to ensure topical alignment
4 before combining resolutions, consulting with the original authors prior to combining items
5 or changing titles to clarify whether such decisions logically flow or present the individual
6 issues in the best light, hosting transmittal meetings that are open to and visibly advertised
7 to all MSS members (especially original resolution and report authors), including a
8 formalized comment period for input by all MSS members (again, especially authors) on
9 transmittal decisions, and making an easily accessible and readable list of all confirmed
10 transmittals for the upcoming meeting available to all MSS members (beyond the table
11 included in this report describing all items in queue). Your Reference Committee
12 recommends that the recommendations in Delegate Report A be adopted and the
13 remainder of the report be filed.

14
15 (5) COLRP REPORT A – REGION BYLAW REVIEW

16
17 **RECOMMENDATION:**

18
19 **The Recommendations of COLRP Report A be adopted and the remainder of
20 the report be filed.**

21
22 In alignment with MSS policy 665.012MSS, your COLRP recommends the following:

23
24 1. That our MSS Speaker and Vice Speaker monitor all MSS Regions to ensure
25 compliance with the minimum requirements in GC Report D, A-15; and
26 2. That Region 6 modify their bylaws to specify the responsibilities of the Region
27 Chair to be in accordance with MSS IOP 8.1.3; and
28 3. That Region 7 modify their bylaws to describe the Region Chair responsibilities
29 and the selection of Region Delegation Chair to be in accordance with MSS IOP
30 8.1.3 and MSS IOP 8.3; and
31 4. That our MSS-COLRP reevaluate the accordance of each Region's bylaws with
32 the categories in Tables 1 – 5b and release its findings in an informational report
33 to the Assembly at A-24; and
34 5. The remainder of this report be filed.

35
36 VRC testimony was supportive of COLRP Report A. We agree with testimony noting that
37 COLRP found some important discrepancies that should be addressed and suggesting
38 that the recommendations are reasonable. Your Reference Committee recommends that
39 the recommendations in COLRP Report A be adopted and the remainder of the report be
40 filed.

41
42 (6) CSI REPORT B – SUPPORTING FURTHER STUDY OF KRATOM

43
44 **RECOMMENDATION:**

45
46 **The Recommendations of CSI Report B be adopted and the remainder of the
47 report be filed.**

1 Our AMA: supports ~~legislative or regulatory efforts to prohibit the sale or~~
2 ~~distribution of Kratom in the United States which do not inhibit proper scientific~~
3 ~~research. efforts to further study the clinical uses, benefits, and potential harms of~~
4 ~~Kratom, and opposes efforts that may restrict research.~~

5
6 VRC testimony was limited but all supportive of CSI Report B. Your Reference Committee
7 commends CSI on this well-written report and agrees with CSI's amendments to remove
8 our support for Kratom prohibition while strengthening our stance on Kratom research.
9 While your Reference Committee considered whether the proposed CSI language should
10 include mention of possible bans or criminalization of Kratom, we remembered that we
11 have a pending MSS transmittal on overall decriminalization of drugs that would achieve
12 that ask broadly, while keeping this ask specific to the clinical and scientific questions
13 surrounding Kratom. The Reference Committee recommends the recommendations of
14 this report be adopted and the remainder of the report be filed.

15
16 (7) WIM CEQM REPORT B - NATIONAL FERTILITY COVERAGE MANDATE

17
18 **RECOMMENDATION:**

19
20 **The Recommendation of WIM CEQM Report B be adopted and the remainder**
21 **of the report be filed.**

22
23 Your Women in Medicine Standing Committee and Committee on Economics & Quality
24 in Medicine recommends that the following be adopted and the remainder of this report
25 be filed:

26
27 RESOLVED, That our AMA amend Policy H-185.990, "Infertility and Fertility
28 Preservation Insurance Coverage" by addition and deletion to read as follows:

29
30 1. Our AMA ~~encourages third party payer health insurance carriers to make~~
31 ~~available insurance benefits supports federal protections that ensure insurance~~
32 ~~coverage by all payers for the diagnosis and treatment of recognized male and~~
33 ~~female infertility.~~

34
35 2. Our AMA supports payment for fertility preservation therapy services by all
36 payers when iatrogenic infertility may be caused directly or indirectly by
37 necessary medical treatments as determined by a licensed physician, and will
38 lobby for appropriate federal legislation requiring payment for fertility preservation
39 therapy services by all payers when iatrogenic infertility may be caused directly
40 or indirectly by necessary medical treatments as determined by a licensed
41 physician.

42
43 3. Our AMA will study feasibility of insurance coverage for fertility preservation for
44 reasons other than iatrogenic infertility.

45
46 VRC testimony was limited but supportive. Your Reference Committee agrees with
47 testimony that the recommendations of this report would increase access to fertility
48 benefits for all who seek these services and appreciate the removal of the reference to
49 binary sex. We thank WIM for a well-written report that simplifies the ask of the original
50 resolution referred to them, retaining the strength of our original stances on infertility and

1 iatrogenic infertility specifically without altering this language unnecessarily or
2 inadvertently removing existing policy. We agree that the addition of another clause is
3 the most effective way to address coverage of general fertility preservation and also
4 agree that an external AMA study is appropriate for this issue, especially given the
5 controversial exclusion of many types of health services believed to be "optional" from
6 both public and private plans. We recommend the recommendations in the report be
7 adopted and the remainder of the report be filed.

8
9 (8) WIM CME REPORT A - AMENDMENT TO POLICY H-405.960, POLICIES FOR
10 PARENTAL, FAMILY, AND MEDICAL NECESSITY LEAVE

11
12 **RECOMMENDATION:**

13
14 **The Recommendation of WIM CME Report A be adopted and the remainder
15 of the report be filed.**

16
17 Your Committees on Women in Medicine (WIM) and Medical Education (CME)
18 recommend that the following recommendation be adopted as amended and that the
19 remainder of this report be filed:

20
21 **Policies for Parental, Family and Medical Necessity Leave, H-405.960**

22 AMA adopts as policy the following guidelines for, and encourages the
23 implementation of, Parental, Family and Medical Necessity Leave for
24 Medical Students and Physicians:

- 25 1. Our AMA urges ~~medical schools~~, residency training programs,
26 medical specialty boards, the Accreditation Council for Graduate
27 Medical Education, and medical group practices to incorporate and/or
28 encourage development of leave policies, including parental, family,
29 and medical leave policies, as part of the physician's standard benefit
30 agreement.
- 31 2. Recommended components of parental leave policies for ~~medical~~
32 ~~students and physicians~~ include: (a) duration of leave allowed before
33 and after delivery; (b) category of leave credited; (c) whether leave is
34 paid or unpaid; (d) whether provision is made for continuation of
35 insurance benefits during leave, and who pays the premium; (e)
36 whether sick leave and vacation time may be accrued from year to
37 year or used in advance; (f) how much time must be made up in order
38 to be considered board eligible; (g) whether make-up time will be paid;
39 (h) whether schedule accommodations are allowed; and (i) leave
40 policy for adoption.
- 41 3. AMA policy is expanded to include physicians in practice, reading as
42 follows: (a) residency program directors and group practice administrators
43 should review federal law concerning maternity leave for guidance in
44 developing policies to assure that pregnant physicians are allowed the
45 same sick leave or disability benefits as those physicians who are ill or
46 disabled; (b) staffing levels and scheduling are encouraged to be flexible
47 enough to allow for coverage without creating intolerable increases in
48 other physicians' workloads, particularly in residency programs; and (c)
49 physicians should be able to return to their practices or training programs
50 after taking parental leave without the loss of status.

1 4. Our AMA encourages medical schools, residency programs, specialty
2 boards, and medical group practices to incorporate into their parental
3 leave policies a six-week minimum leave allowance, with the
4 understanding that no parent should be required to take a minimum
5 leave.
6 5. Residency program directors should review federal and state law for
7 guidance in developing policies for parental, family, and medical leave.
8 6. Medical students and physicians who are unable to work because of
9 pregnancy, childbirth, and other related medical conditions should be
10 entitled to such leave and other benefits on the same basis as other
11 physicians who are temporarily unable to work for other medical reasons.
12 7. Residency programs should develop written policies on parental leave,
13 family leave, and medical leave for physicians. Such written policies
14 should include the following elements: (a) leave policy for birth or
15 adoption; (b) duration of leave allowed before and after delivery; (c)
16 category of leave credited (e.g., sick, vacation, parental, unpaid leave,
17 short term disability); (d) whether leave is paid or unpaid; (e) whether
18 provision is made for continuation of insurance benefits during leave and
19 who pays for premiums; (f) whether sick leave and vacation time may be
20 accrued from year to year or used in advance; (g) extended leave for
21 resident physicians with extraordinary and long-term personal or family
22 medical tragedies for periods of up to one year, without loss of previously
23 accepted residency positions, for devastating conditions such as terminal
24 illness, permanent disability, or complications of pregnancy that threaten
25 maternal or fetal life; (h) how time can be made up in order for a resident
26 physician to be considered board eligible; (i) what period of leave would
27 result in a resident physician being required to complete an extra or
28 delayed year of training; (j) whether time spent in making up a leave will
29 be paid; and (k) whether schedule accommodations are allowed, such as
30 reduced hours, no night call, modified rotation schedules, and permanent
31 part-time scheduling.
32 8. Medical schools should develop written policies on parental leave,
33 family leave, and medical leave for medical students. Such written
34 policies should include the following elements: (a) leave policy for birth or
35 adoption; (b) duration of leave allowed before and after delivery; (c)
36 extended leave for medical students with extraordinary and long-term
37 personal or family medical tragedies, without loss of previously accepted
38 medical school seats, for devastating conditions such as terminal illness,
39 permanent disability, or complications of pregnancy that threaten
40 maternal or fetal life; (d) how time can be made up in order for a medical
41 students to be eligible for graduation without delays; (e) what period of
42 leave would result in a medical student being required to complete an
43 extra or delayed year of training; and (f) whether schedule
44 accommodations are allowed, such as modified rotation schedules, no
45 night duties, and flexibility with academic testing schedules.
46 8. 9. Our AMA endorses the concept of equal parental leave for birth and
47 adoption as a benefit for resident physicians, medical students, and
48 physicians in practice regardless of gender or gender identity.

1 9. 10. Staffing levels and scheduling are encouraged to be flexible
2 enough to allow for coverage without creating intolerable increases in the
3 workloads of other physicians, particularly those in residency programs.
4 10. 11. Physicians should be able to return to their practices or training
5 programs after taking parental leave, family leave, or medical leave
6 without the loss of status.
7 11. 12. Residency program directors must assist residents in identifying
8 their specific requirements (for example, the number of months to be
9 made up) because of leave for eligibility for board certification and must
10 notify residents on leave if they are in danger of falling below minimal
11 requirements for board eligibility. Program directors must give these
12 residents a complete list of requirements to be completed in order to
13 retain board eligibility.
14 12. 13. Our AMA encourages flexibility in residency training programs and
15 medical schools incorporating parental leave and alternative schedules
16 for pregnant trainees ~~house staff~~.
17 13. 14. In order to accommodate leave protected by the federal Family
18 and Medical Leave Act, our AMA encourages all specialties within the
19 American Board of Medical Specialties to allow graduating residents to
20 extend training up to 12 weeks after the traditional residency completion
21 date while still maintaining board eligibility in that year.
22 14. 15. These policies as above should be freely available online and in
23 writing to all current trainees and applicants to medical school, residency
24 or fellowship.

25
26 VRC testimony was supportive. The Reference Committee agrees with testimony that
27 the recommendations address a gap in existing policy by expanding parental leave to
28 medical students. We thank WIM and CME for a well-written report and resolve
29 language that neatly and effectively creates a separate clause for leave conditions
30 specific to medical students, mirroring the preceding clause on residents, while allowing
31 reasonable flexibility for individual medical schools and variable curricula timelines. We
32 recommend the recommendation of this report be adopted and the remainder of the
33 report be filed.

34
35 (9) CSI REPORT C - SUPPORT FOR CREATION OF DIAGNOSTIC CATEGORY
36 FOR CLIMATE-ASSOCIATED DISTRESS

37
38 **RECOMMENDATION:**

39
40 **The Recommendation of CSI Report C be adopted and the remainder of the**
41 **report be filed.**

42
43 Your Committee on Scientific Issues recommends that Resolution 061 not be adopted,
44 and the remainder of this report be filed.

45
46 VRC testimony was limited and supportive of the report recommendation. The
47 Reference Committee agrees with testimony in support of the report's recommendation
48 to not adopt the antecedent resolution because the AMA opposes the International
49 Classification of Diseases (ICD) classification system and the report did not find
50 evidence for direct causation of pathological mental distress from climate change. Lastly,

1 climate-associated distress is not a diagnosis listed in the DSM V, and the reference
2 committee agrees that a resolution like should be put forward by or in partnership with
3 the APA. While we remember that the November 2021 MSS Reference Committee
4 recommended adopting the antecedent resolution with major amendments to clarify its
5 intent, we recognize CSI's consideration of this proposal as well and appreciate their
6 discussion. Thus, we recommend the recommendations of CSI Report C be adopted
7 and the remainder of the report be filed.

8
9 (10) CEQM REPORT B - ENSURING COMPETITIVE PRICING FOR
10 PHARMACEUTICAL DRUGS

11
12 **RECOMMENDATION:**

13
14 **The Recommendation of CEQM Report B be adopted and the remainder of**
15 **the report be filed.**

16
17 Your Committee on Economics and Quality in Medicine recommends that the Resolution
18 057 not be adopted, and the remainder of this report be filed.

19
20 VRC testimony was limited but supportive. We thank CEQM for an excellent and
21 comprehensive report on a very complex issue. The Reference Committee agrees with
22 testimony pointing out concerns that Quality of Added Life Years (QALY) thresholds
23 could introduce, including for patients with disabilities and chronic illnesses. We also
24 appreciate the report's discussion of alternatives mentioned in the antecedent resolution,
25 such as the equal value of life-years gained (evLYG) measure. We agree with CEQM's
26 ultimate conclusion that due to the uncertainty over these measures, we should refrain
27 from support of these measures. We also recognize that existing AMA policy already
28 broadly supports value-based pricing for pharmaceuticals and that explicit endorsement
29 of specific cost effectiveness measures may be unnecessary. We recommend that the
30 recommendation of CEQM Report B be adopted, and the remainder of this report be
31 filed.

32
33 (11) CAIA REPORT A - ADDRESSING LONGITUDINAL HEALTH CARE NEEDS OF
34 CHILDREN IN FOSTER CARE

35
36 **RECOMMENDATION:**

37
38 **The Recommendations of CAIA Report A be adopted and the remainder of**
39 **the report be filed.**

40
41 Your Committee on American Indian Affairs recommends that the following
42 recommendations be adopted, and the remainder of this report is filed:

43
44 1. The AMA supports federal legislation preventing the removal of American Indian and
45 Alaska Native children from their homes by public and private agencies without
46 cause.
47 2. The AMA will work with local and state medical societies and other relevant
48 stakeholders to support legislation preventing the removal of American Indian and
49 Alaska Native children from their homes by public and private agencies without
50 cause.

1 3. The AMA supports state and federal funding opportunities for American Indian and
2 Alaska Native child welfare systems.
3 4. Our AMA-MSS will immediately forward this report to the A-22 meeting of the AMA
4 House of Delegates.

5
6 VRC testimony was supportive of the report recommendations. The Reference
7 Committee agrees with testimony that the immediate forward clause is important
8 because arguments about the Indian Child Welfare Act (ICWA) will soon be heard by the
9 United States Supreme Court. We also commend our new MSS Committee on American
10 Indian Affairs (CAIA) on their establishment and their thoughtful analysis on protection of
11 AI/AN children's rights. We thank the authors for a well-written report and recommend
12 the recommendations of the report be adopted and the remainder of the report be filed.

13
14 (12) WIM REPORT A - ACCESS TO NALOXONE FOR VULNERABLE AND
15 UNDERSERVED POPULATIONS

16
17 **RECOMMENDATION:**

18
19 **The Recommendation of WIM Report A be adopted and the remainder of the**
20 **report be filed.**

21
22 Your AMA-MSS Women in Medicine Standing Committee recommends that the
23 following be adopted and the remainder of this report be filed:

24
25 RESOLVED, That our AMA amend Policy H-420.950, "Substance Use Disorders During
26 Pregnancy" by addition and deletion to read as follows:

27
28 Our AMA will: (1) oppose any efforts to imply that the diagnosis of substance use
29 disorder during pregnancy represents child abuse; (2) support legislative and
30 other appropriate efforts for the expansion and improved access to evidence-
31 based treatment for substance use disorders during pregnancy; (3) oppose the
32 removal of infants from their mothers solely based on a single positive prenatal
33 drug screen without appropriate evaluation; and (4) advocate for appropriate
34 medical evaluation prior to the removal of a child, which takes into account (a)
35 the desire to preserve the individual's family structure, (b) the patient's treatment
36 status, and (c) current impairment status when substance use is suspected, and
37 (5) that our AMA support universal opioid use screenings at prenatal care visits
38 with early intervention, comprehensive naloxone use education and distribution
39 for those who screen positive and following overdose-related emergency
40 department visits.

41
42 VRC testimony was supportive. The Reference Committee agrees with testimony that
43 the report is well written. We recognize that the proposed addition is robustly supported
44 by clinical guidelines from the American College of Obstetricians and Gynecologists
45 (ACOG), American Academy of Pediatrics (AAP), American Society of Addiction
46 Medicine (ASAM), and American Academy of Addiction Psychiatry (AAAP). We

1 recommend the report recommendation be adopted and the remainder of the report be
2 filed.

3
4 (13) WIM CEQM REPORT A - AMENDING H-420.978, ACCESS TO AN
5 APPROPRIATE REIMBURSEMENT FOR GROUP PRENATAL CARE

6
7 **RECOMMENDATION:**

8
9 **The Recommendation of WIM CEQM Report A be adopted and the remainder
10 of the report be filed.**

11
12 Our Women in Medicine (WIM) Committee and Committee on Economics and Quality in
13 Medicine (CEQM) recommend that the Resolution 038 not be adopted, and the remainder
14 of the report is filed.

15
16 VRC testimony on WIM CEQM Report A was limited. We recognize that WIM and
17 CEQM have written multiple drafts of this report and thank them for their excellent and
18 comprehensive effort. The Reference Committee agrees with testimony that the
19 antecedent resolution appears to be covered by existing policy. H-160.911, "Value of
20 Group Medical Appointments," which states "Our AMA promotes education about the
21 potential value of group medical appointments for diagnoses that might benefit from
22 such appointments including chronic diseases, pain, and pregnancy." We also agree
23 with the authors that the variability of group prenatal care programs and their
24 implementation in specific settings makes the creation of model legislation by our AMA
25 difficult. We also appreciate their extensive discussion of the health equity
26 considerations with group prenatal care. We believe that the authors' analysis and
27 existing AMA policy align with The American College of Obstetricians and Gynecologists'
28 (ACOG) 2018 Committee Opinion (reaffirmed in 2021) on group prenatal care cited in
29 the report, which says that "individual and group care models warrant additional study
30 with a goal of demonstrating differences in outcomes and identifying populations that
31 benefit most from specific care models." Future MSS members interested in group
32 prenatal care specifically may consider working directly with ACOG on this issue. Thus,
33 we recommend that the recommendations of this report be adopted, and the remainder
34 of the report filed.

35
36 (14) CGPH CSI REPORT A - MITIGATING THE IMPACT OF AIR POLLUTION ON
37 PEDIATRIC HEALTH

38
39 **RECOMMENDATION:**

40
41 **The Recommendation of CGPH CSI Report A be adopted and the remainder
42 of the report be filed.**

43
44 Your Committee on Scientific Issues and Committee on Global and Public Health
45 recommend that the Resolution 029 not be adopted, and the remainder of this report is
46 filed.

47
48 VRC testimony was limited. Your Reference Committee agrees with testimony that the
49 asks of Resolution 029 are supported by the AMA through its specific policy on the
50 reduction of diesel emissions, D-135.996, which can be sufficient justification of support

1 for the federal regulatory standards taking place in 2027, including the EPA's proposed
2 "Control of Air Pollution From New Motor Vehicles: Heavy-Duty Engine and Vehicle
3 Standard" which includes transitioning away from diesel buses. Therefore, we recommend
4 the recommendations of this report be adopted and the remainder of the report filed.
5

6 D-135.996 Reducing Sources of Diesel Exhaust
7 Our AMA will: (1) encourage the US Environmental Protection Agency (EPA) to
8 set and enforce the most stringent feasible standards to control pollutant emissions
9 from both large and small non-road engines including construction equipment,
10 farm equipment, boats and trains; (2) encourage all states to continue to pursue
11 opportunities to reduce diesel exhaust pollution, including reducing harmful
12 emissions from glider trucks and existing diesel engines; (3) call for all trucks
13 traveling within the United States, regardless of country of origin, to be in
14 compliance with the most stringent and current diesel emissions standards
15 promulgated by US EPA; and (4) send a letter to US EPA Administrator opposing
16 the EPA's proposal to roll back the "glider Kit Rule" which would effectively allow
17 the unlimited sale of re-conditioned diesel truck engines that do not meet current
18 EPA new diesel engine emission standards.

RECOMMENDED FOR ADOPTION AS AMENDED

(15) RESOLUTION 004 - PAIN MANAGEMENT FOR LONG-ACTING REVERSIBLE CONTRACEPTION AND OTHER GYNECOLOGICAL PROCEDURES

RECOMMENDATION A:

The first Resolve of Resolution 004 be amended by deletion:

RESOLVED, That our AMA encourages the availability of training for physicians to incorporate information on the use of local pain control techniques for gynecological procedures; and be it further

RECOMMENDATION B:

The second Resolve of Resolution 004 be amended by addition to read as follows:

RESOLVED, That our AMA recognizes the disproportionate impacts of pain in gynecological procedures and encourages discussion of pain control options, risks, and benefits with patients as a part of the shared decision-making process for gynecological procedures as a part of the informed consent discussion; and be it further

RECOMMENDATION C:

Resolution 004 be adopted as amended.

RESOLVED, That our AMA encourages the availability of training for physicians to incorporate information on the use of local pain control techniques for gynecological procedures; and be it further

RESOLVED, That our AMA encourages discussion of pain control options, risks, and benefits with patients as a part of the shared decision-making process for gynecological procedures as a part of the informed consent discussion; and be it further

RESOLVED, That our AMA supports further research into evidence-based anesthetic and anxiolytic medication options for long-acting reversible contraception procedures and other gynecological procedures, including but not limited to colposcopy, endometrial biopsy, and LEEP procedures.

VRC testimony was mixed. Your Reference Committee recommends that the first resolved clause be deleted due to such physician training being more appropriately the purview of American College of Obstetricians and Gynecologists (ACOG), American Academy of Family Physicians (AAFP), and other societies that specialize in gynecological procedures and can appropriately address any clinical guidelines. While we recognize the authors' argument that AMA policy on neonatal male circumcision includes language on training programs for local pain control, we also note that this policy is from 1999. The more contemporary H-185.931, which is not cited in the resolution, states that "Our AMA

1 supports guidance on pain management for different clinical indications developed by the
2 specialties who manage those conditions and disseminated the same way other clinical
3 guidelines are promoted," and this policy seems more appropriately related for the authors'
4 asks. The authors may consider working directly with ACOG, AAFP, and other societies
5 to achieve this ask. Additionally, we simplified the second resolve to emphasize the shared
6 decision-making process, which would presumably include informed consent, and added
7 language that captures the intent of the resolution, noting that inadequate pain
8 management for these procedures is a problem. Lastly, we agree with testimony that the
9 third resolved clause on research is novel and well written. The Reference Committee
10 recommends this resolution be adopted as amended to address concerns outlined above.

11
12 (16) RESOLUTION 005 – SUPPORTING INTIMATE PARTNER AND SEXUAL
13 VIOLENCE SAFE LEAVE

14 **RECOMMENDATION A:**

15
16 **The first Resolve of Resolution 005 be amended by deletion to read as**
17 **follows:**

18
19 **RESOLVED, That our AMA recognize the positive impact of paid safe leave**
20 **on public health outcomes and support legislation that offers ~~paid and~~**
21 **~~unpaid~~ safe leave; and be it further**

22
23 **RECOMMENDATION B:**

24
25 **Resolution 005 be adopted as amended.**

26
27 **RESOLVED, That our AMA recognize the positive impact of paid safe leave on public**
28 **health outcomes and support legislation that offers paid and unpaid safe leave; and be it**
29 **further**

30
31 **RESOLVED, That our AMA amend the existing policy H-420.979 AMA Statement on**
32 **Family and Medical Leave to promote inclusivity by addition as follows:**

33
34 AMA Statement on Family and Medical Leave, H-420.979
35 Our AMA supports policies that provide employees with reasonable job security
36 and continued availability of health plan benefits in the event leave by an employee
37 becomes necessary due to documented medical conditions and/or concerns for
38 safety. Such policies should provide for reasonable periods of paid or unpaid: (1)
39 medical leave for the employee, including pregnancy; (2) maternity leave for the
40 employee-mother; (3) leave if medically appropriate to care for a member of the
41 employee's immediate family, i.e., a spouse or children; (4) leave for adoption or
42 for foster care leading to adoption; and (5) safe leave provisions for those
43 experiencing any instances of violence, including but not limited to intimate partner
44 violence, sexual violence or coercion, and stalking. Such periods of leave may
45 differ with respect to each of the foregoing classifications, and may vary with
46 reasonable categories of employers. Such policies should encourage voluntary
47 programs by employers and may provide for appropriate legislation (with or without
48 financial assistance from government). Any legislative proposals will be reviewed
49 through the Association's normal legislative process for appropriateness, taking
50

1 into consideration all elements therein, including classifications of employees and
2 employers, reasons for the leave, periods of leave recognized (whether paid or
3 unpaid), obligations on return from leave, and other factors involved in order to
4 achieve reasonable objectives recognizing the legitimate needs of employees and
5 employers.

6
7 VRC testimony was overall supportive of the resolution. The Reference Committee
8 agrees with VRC testimony that encourages the clarification of safe leave through
9 amendments. We believe the general term "safe leave" covers both paid and unpaid
10 leave as supported by the whereas clauses. We amended the first resolve to emphasize
11 paid safe leave, given the whereas clauses, to aspire for legislation on paid safe leave
12 without removing the possibility of supporting even the far less preferable option of
13 unpaid safe leave. We retained "paid or unpaid" in the second resolve's amendment to
14 existing policy, just as the authors did, to remain agnostic on this point, especially since
15 that policy also discusses many other types of leave. Finally, while we of course realize
16 that both this resolution and Resolution 011, which discusses leave for stillbirth and
17 miscarriage, amend the same policy, we refrained from combining these resolutions to
18 avoid conflating these two distinct and highly important issues. We recognize that the
19 proposed amendments do not conflict with each other, so if these resolutions were to be
20 adopted in the House of Delegates, they could both be cleanly amended into existing
21 policy simultaneously. Thus, your Reference Committee recommends Resolution 005 be
22 adopted as amended.

23
24 (17) RESOLUTION 006 - RECOGNIZING CHILD POVERTY AND THE RACIAL
25 WEALTH GAP AS PUBLIC HEALTH ISSUES AND EXTENDING THE CHILD
26 TAX CREDIT FOR LOW-INCOME FAMILIES

27
28 **RECOMMENDATION A:**

29
30 **Policy H-65.952 be reaffirmed in lieu of the second Resolve of Resolution**
31 **006.**

32
33 **RECOMMENDATION B:**

34
35 **The third Resolve of Resolution 006 be amended by deletion as follows:**

36
37 **RESOLVED, That our AMA advocate for ~~monthly, fully refundable, and~~**
38 **expanded child tax credit payments and other evidence-based cash**
39 **assistance programs to alleviate child poverty, ameliorate the racial wealth**
40 **gap, and advance health equity for low-income U.S. residents; and be it**
41 **further**

42
43 **RECOMMENDATION C:**

44
45 **Resolution 006 be adopted as amended.**

46
47 **RESOLVED, That our AMA recognize child poverty as a public health issue and a crucial**
48 **social determinant of health across the life course; and be it further**

1 RESOLVED, That our AMA recognize that the disproportionate concentration of child
2 poverty and generational wealth gaps experienced by Black, Indigenous, and Hispanic
3 families are a consequence of structural racism and a barrier to achieving racial health
4 equity; and be it further
5

6 RESOLVED, That our AMA advocate for monthly, fully refundable, and expanded child
7 tax credit payments and other evidence-based cash assistance programs to alleviate child
8 poverty, ameliorate the racial wealth gap, and advance health equity for low-income U.S.
9 residents; and be it further
10

11 RESOLVED, That our AMA-MSS immediately forward this resolution to the A-22 AMA
12 House of Delegates.
13

14 VRC testimony was supportive of the first resolved clause as written and your Reference
15 Committee concurs. The second resolved clause was placed on the reaffirmation
16 consent calendar by the House Coordination Committee (HCC). Your Reference
17 Committee recognizes the authorship team's extensive testimony against reaffirmation
18 of this clause. However, while this cycle HCC graciously granted us the ability to remove
19 a resolve from the reaffirmation consent calendar if we amended it to make it novel, we
20 could not devise a way to effectively amend the second resolve to address HCC's
21 concerns and ultimately agreed with their reaffirmation of H-65.952 in lieu of the clause.
22 The third resolve clause had mixed testimony on the VRC. The authorship team offered
23 a response to various amendments on the third resolve clause, and we found their
24 rationale to keep the race-specific language compelling. We also believe that our
25 retention of this language effectively includes the key points from the reaffirmed second
26 resolve. We made additional amendments to the third resolve to avoid prescriptiveness
27 and possible technical questions in the House of Delegates that distract from the key
28 issue here. We understand the arguments made in the resolution for the benefits of
29 monthly and fully refundable payments. We recognize that Congress' American Rescue
30 Plan of 2021 (ARP) included both these provisions and that the proposed but unpassed
31 Build Back Better Act of 2021 (BBB) would have made the fully refundable expanded
32 payments permanent and would have extended monthly payments through 2022, as the
33 implementation of monthly payments was in part due to the timeline of passage of each
34 bill before tax season. However, since the BBB did not necessarily make monthly
35 payments permanent, and given the politically difficult nature of that bill in the Senate,
36 we believe that "expanded" is appropriately inclusive of the various efforts proposed by
37 the ARP and BBB and allows our AMA to flexibly advocate for the most likely passage of
38 increased payments. Your Reference Committee agrees with VRC and supports the
39 immediate forwarding clause due to the ongoing national debate surrounding child tax
40 credits. We also recognize that the Michigan delegation has transmitted a similar
41 resolution on the expanded child tax credit to the 2022 Annual Meeting of the House of
42 Delegates as well. While the asks are aligned and overlap, we believe that transmitting
43 our resolution alongside theirs will increase awareness of this issue and allow the best
44 language of both resolutions, such as our resolution's mention of child poverty and the
45 racial wealth gap, to be combined effectively. We recommend Resolution 006 be
46 adopted as amended.
47

48 H-65.952 – RACISM AS A PUBLIC HEALTH THREAT
49 1. Our AMA acknowledges that, although the primary drivers of
50 racial health inequity are systemic and structural racism, racism and unconscious

1 bias within medical research and health care delivery have caused and continue
2 to cause harm to marginalized communities and society as a whole.
3 2. Our AMA recognizes racism, in its systemic, cultural, interpersonal, and other
4 forms, as a serious threat to public health, to the advancement of health equity,
5 and a barrier to appropriate medical care.
6 3. Our AMA will identify a set of current, best practices for healthcare institutions,
7 physician practices, and academic medical centers to recognize, address, and
8 mitigate the effects of racism on patients, providers, international medical
9 graduates, and populations.
10 4. Our AMA encourages the development, implementation, and evaluation of
11 undergraduate, graduate, and continuing medical education programs and
12 curricula that engender greater understanding of: (a) the causes, influences, and
13 effects of systemic, cultural, institutional, and interpersonal racism; and (b) how to
14 prevent and ameliorate the health effects of racism.
15 5. Our AMA: (a) supports the development of policy to combat racism and its
16 effects; and (b) encourages governmental agencies and nongovernmental
17 organizations to increase funding for research into the epidemiology of risks and
18 damages related to racism and how to prevent or repair them.
19 6. Our AMA will work to prevent and combat the influences of racism and bias in
20 innovative health technologies.
21

22 (18) RESOLUTION 008 - INCREASED ACCESS TO HIV TREATMENT AND
23 SUPPORTIVE SERVICES IN THE UNSTABLY HOUSED AND HOMELESS
24 POPULATION

25 **RECOMMENDATION A:**

26 The third Resolve of Resolution 008 be amended by addition and deletion
27 to read as follows:

28 **RESOLVED**, That our AMA amend current policy HIV/AIDS as a Global
29 Public Health Priority H-20.922 to state the following
30 HIV/AIDS as a Global Public Health Priority H-20.922
31 In view of the urgent need to curtail the transmission of HIV infection in
32 every segment of the population, our AMA:
33 (1) Strongly urges, as a public health priority, that federal agencies (in
34 cooperation with medical and public health associations and state
35 governments) develop and implement effective programs and strategies for
36 the prevention and control of the HIV/AIDS epidemic;
37 (2) Supports adequate public and private funding for all aspects of the
38 HIV/AIDS epidemic, including research, education, and patient care, and
39 ~~access to stable housing through programs such as Housing Opportunities~~
40 ~~for Persons with AIDS (HOPWA)~~ for the full spectrum of the disease. Public
41 and private sector prevention and care efforts should be proportionate to
42 the best available statistics on HIV incidence and prevalence rates;
43 (3) Will join national and international campaigns for the prevention of HIV
44 disease and care of persons with this disease;
45 (4) Encourages cooperative efforts between state and local health
46 agencies, with involvement of state and local medical societies, in the
47
48
49

1 **planning and delivery of state and community efforts directed at HIV**
2 **testing, counseling, prevention, and care;**
3 **(5) Encourages community-centered HIV/AIDS prevention planning and**
4 **programs as essential complements to less targeted media communication**
5 **efforts;**
6 **(6) In coordination with appropriate medical specialty societies, supports**
7 **addressing the special issues of heterosexual HIV infection, the role of**
8 **intravenous drugs and HIV infection in women, and initiatives to prevent**
9 **the spread of HIV infection through the exchange of sex for money or**
10 **goods;**
11 **(7) Supports working with concerned groups to establish appropriate and**
12 **uniform policies for neonates, school children, and pregnant adolescents**
13 **with HIV/AIDS and AIDS-related conditions;**
14 **(8) Supports increased availability of and financial assistance for**
15 **antiretroviral drugs and drugs to prevent active tuberculosis infection to**
16 **countries where HIV/AIDS is pandemic by supporting funding for programs**
17 **that provide financial assistance to HIV/AIDS patients including but not**
18 **limited to the AIDS Drug Assistance Program (ADAP)**; and be it further; and
19 **(9) Supports programs raising physician awareness of the benefits of early**
20 **treatment of HIV and of "treatment as prevention," and the need for linkage**
21 **of newly HIV-positive persons to clinical care and partner services.**

22
23 **RECOMMENDATION B:**

24
25 **Resolution 008 be adopted as amended.**

26
27 **RESOLVED**, That our AMA supports the development of regulations and incentives to
28 encourage retention of homeless patients in HIV/AIDS treatment programs; and be it
29 further

30
31 **RESOLVED**, That our AMA recognizes that stable housing promotes adherence to HIV
32 treatment; and be it further

33
34 **RESOLVED**, That our AMA amend current policy HIV/AIDS as a Global Public Health
35 Priority H-20.922 to state the following

36 **HIV/AIDS as a Global Public Health Priority H-20.922**

37 In view of the urgent need to curtail the transmission of HIV infection in every
38 segment of the population, our AMA:

39 (1) Strongly urges, as a public health priority, that federal agencies (in
40 cooperation with medical and public health associations and state governments)
41 develop and implement effective programs and strategies for the prevention and
42 control of the HIV/AIDS epidemic;

43 (2) Supports adequate public and private funding for all aspects of the HIV/AIDS
44 epidemic, including research, education, and patient care, and access to stable
45 housing through programs such as Housing Opportunities for Persons

46 with AIDS (HOPWA) for the full spectrum of the disease. Public and private
47 sector prevention and care efforts should be proportionate to the best available
48 statistics on HIV incidence and prevalence rates;

49 (3) Will join national and international campaigns for the prevention of HIV
50 disease and care of persons with this disease;

1 (4) Encourages cooperative efforts between state and local health agencies, with
2 involvement of state and local medical societies, in the planning and delivery of
3 state and community efforts directed at HIV testing, counseling, prevention, and
4 care;
5 (5) Encourages community-centered HIV/AIDS prevention planning and
6 programs as essential complements to less targeted media communication
7 efforts;
8 (6) In coordination with appropriate medical specialty societies, supports
9 addressing the special issues of heterosexual HIV infection, the role of
10 intravenous drugs and HIV infection in women, and initiatives to prevent the
11 spread of HIV infection through the exchange of sex for money or goods;
12 (7) Supports working with concerned groups to establish appropriate and uniform
13 policies for neonates, school children, and pregnant adolescents with HIV/AIDS
14 and AIDS-related conditions;
15 (8) Supports increased availability of antiretroviral drugs and drugs to prevent
16 active tuberculosis infection to countries where HIV/AIDS is pandemic by
17 supporting funding for programs that provide financial assistance to
18 HIV/AIDS patients including but not limited to the AIDS Drug Assistance
19 Program (ADAP); and be it further ; and
20 (9) Supports programs raising physician awareness of the benefits of early
21 treatment of HIV and of "treatment as prevention," and the need for linkage of
22 newly HIV-positive persons to clinical care and partner services.

23 VRC testimony was mixed. Your Reference Committee agrees with testimony that this
24 resolution addresses a gap in policy because it addresses the intersection between
25 HIV/AIDS and housing insecurity. We agree with testimony requesting that authors strike
26 the specific examples of financial assistance programs/housing programs because if
27 programs cease to exist, the AMA would have to go back and amend our policies. We
28 recommend this resolution be adopted as amended.

29
30 (19) RESOLUTION 010 - INCLUSION OF DISABILITY IN MEDICAL STUDENT
31 MISTREATMENT REPORTING

32
33 **RECOMMENDATION A:**

34
35 **Resolution 010 be amended by addition and deletion to read as follows:**

36
37 **RESOLVED, Our AMA ~~encourages~~ will work with the Association of**
38 **American Medical Colleges (AAMC) and other relevant bodies to encourage**
39 **data collection of medical student mistreatment based on disability ~~in~~**
40 **~~parity with other protected categories in medical schools' internal~~**
41 **~~mistreatment surveys and the AAMC Medical School Graduation~~**
42 **~~Questionnaire as a protected category in internal and external~~**
43 **~~mistreatment surveys, including the AAMC Medical School Graduation~~**
44 **~~Questionnaire.~~**

45
46 **RECOMMENDATION B:**

47
48 **Resolution 010 be adopted as amended.**

1 RESOLVED, Our AMA encourages data collection of medical student mistreatment based
2 on disability in parity with other protected categories in medical schools' internal
3 mistreatment surveys and the AAMC Medical School Graduation Questionnaire.

4
5 VRC testimony was supportive and offered clarifying amendments. The Reference
6 Committee agrees with testimony to amend the resolution, specifically in order to make it
7 more actionable by the inclusion of stakeholders and broad by the addition of multiple
8 external mistreatment surveys, including the AAMC Medical School Graduation
9 Questionnaire. We recommend the resolution be adopted as amended.

10
11 (20) RESOLUTION 012 - REVISION OF H-185.921, REMOVAL OF AMA SUPPORT
12 FOR ABA

13
14 **RECOMMENDATION A:**

15
16 **Resolution 012 be amended by the addition of a new second resolved**
17 **clause to read as follows:**

18
19 **RESOLVED, That our AMA work with relevant stakeholders to advocate for**
20 **a comprehensive spectrum of primary and specialty care that recognizes**
21 **the diversity and personhood of individuals who are neurodivergent,**
22 **including people with autism; and be it further**

23
24 **RECOMMENDATION B:**

25
26 **The second Resolve of Resolution 012 be amended by deletion to read as**
27 **follows:**

28
29 **RESOLVED, That our AMA amend Policy H-185.921 "Standardizing**
30 **Coverage of Applied Behavioral Analysis Therapy for Persons with Autism**
31 **Spectrum Disorder" by addition and deletion as follows:**

32
33 **Standardizing Coverage of Applied Behavioral Analysis Therapy**
34 **Services****Resources****for Persons with Autism Spectrum Disorder, H-185.921**
35 **Our AMA supports coverage and reimbursement for evidence-based**
36 **treatment of services resources for Autism Spectrum Disorder including,**
37 **but not limited to, Applied Behavior Analysis Therapy. and advocates for a**
38 **more comprehensive spectrum of primary and preventive care to**
39 **individuals with autism that recognizes the diversity of the neurodivergent**
40 **community and their personhood.**

41
42 **RECOMMENDATION C:**

43
44 **Resolution 012 be adopted as amended.**

45
46 RESOLVED, That our AMA supports research towards the evaluation and the
47 development of interventions and programs for autistic individuals; and be it further

1 RESOLVED, That our AMA amend Policy H-185.921 "Standardizing Coverage of
2 Applied Behavioral Analysis Therapy for Persons with Autism Spectrum Disorder" by
3 addition and deletion as follows:

4 **Standardizing Coverage of Applied Behavioral Analysis Therapy Resources**
5 **for Persons with Autism Spectrum Disorder, H-185.921**

6 Our AMA supports coverage and reimbursement for evidence-based treatment of
7 resources for Autism Spectrum Disorder including, but not limited to, Applied
8 Behavior Analysis Therapy. and advocates for a more comprehensive spectrum
9 of primary and preventive care to individuals with autism that recognizes the
10 diversity of the neurodivergent community and their personhood.

11
12 VRC testimony is supportive of the spirit of the resolution but offered clarifying
13 amendments. The Reference Committee agrees with testimony that advocating "for a
14 more comprehensive spectrum" of care should be separate from the amendment to
15 existing policy regarding coverage and reimbursement. We recommend the addition of a
16 new resolved clause to address this concern. Your Reference Committee recommends
17 Resolution 012 be adopted as amended to include an additional resolved clause and
18 amendments to clarify the removal of ABA support.

19
20 (21) RESOLUTION 014 – INCREASED EDUCATION AND ACCESS TO FERTILITY-
21 RELATED RESOURCES FOR U.S. PHYSICIANS

22
23 **RECOMMENDATION A:**

24
25 **Resolution 014 be amended by addition to read as follows:**

26
27 **RESOLVED, That our AMA-MSS work with appropriate stakeholders to**
28 **develop gender and sexuality inclusive educational initiatives for medical**
29 **trainees of all levels to raise awareness about the high rate of physician**
30 **infertility, family planning options including cryopreservation, and the**
31 **financial implications of fertility management; and be it further**

32
33 **RESOLVED, That our AMA-MSS urges academic and private hospitals and**
34 **employers to offer family planning resources and counseling for options**
35 **such as gamete cryopreservation and in vitro fertilization, for medical**
36 **residents, fellows, and physicians.**

37
38 **RECOMMENDATION B:**

39
40 **Resolution 014 be adopted as amended.**

41
42 **RESOLVED, That our AMA develop gender and sexuality inclusive educational initiatives**
43 **for medical trainees of all levels to raise awareness about the high rate of physician**
44 **infertility, family planning options including cryopreservation, and the financial implications**
45 **of fertility management; and be it further**

46
47 **RESOLVED, That our AMA urges academic and private hospitals and employers to offer**
48 **family planning resources and counseling for options such as gamete cryopreservation**
49 **and in vitro fertilization, for medical residents, fellows, and physicians.**

1 VRC testimony was supportive of the spirit of the resolution, but offered amendments
2 regarding scope. The AMA itself does not create curriculum, so your Reference
3 Committee decided to amend the first resolved clause to ask for collaboration with
4 stakeholders to develop curriculum. Given the upcoming resolution being sent to the
5 AMA House of Delegates on this issue, we decided to make this resolution internal so
6 that we may offer our support in lieu of a duplicative resolution. The Reference
7 Committee recommends Resolution 014 be adopted as amended.

8
9 (22) RESOLUTION 015 - SUPPORTING THE USE OF GENDER-NEUTRAL
10 LANGUAGE

11 **RECOMMENDATION A:**

12
13 **The second Resolve of Resolution 015 be amended by addition and**
deletion to read as follows:

14
15 **RESOLVED, That our AMA-MSS amend our existing policy and pending**
transmittal 65.040MSS “Gender Neutral Language in AMA Policy” by
addition and deletion as follows:

16
17 **Gender Neutral Language in AMA Policy, 65.040MSS**

18 **Our AMA-MSS will ask our AMA to:**

19
20 **(1) Recognize the importance of using gender-neutral language such as**
gender-neutral pronouns, terms, imagery, and symbols in respecting the
spectrum of gender identity

21
22 **(2) Revise all relevant policies to utilize gender-neutral pronouns and other**
non-gendered language in place of gendered language where such text
inappropriately appears and

23
24 **(3) Utilize gender-neutral pronouns and other non-gendered language in**
future policies, internal communications, and external communications
where gendered language does not specifically need to be used.

25
26 **(4) Encourage the use of gender-neutral language in public health and**
medical messaging, including but not limited to messaging put forth by
federal organizations such as the Office of the Surgeon General and the
U.S. Department of Health and Human Services

27
28 **(5) Encourage other professional societies to utilize gender-neutral**
language in their work

29
30 **(6) Support the use of gender-neutral language in clinical spaces that may**
serve both cisgender and gender-diverse individuals

31
32 **RECOMMENDATION B:**

33
34 **Resolution 015 be adopted as amended.**

35
36 **RESOLVED, That our AMA-MSS amend the title of our existing policy and pending**
transmittal 65.040MSS “Gender Neutral Language in AMA Policy” to be “Supporting the
Use of Gender-Neutral Language”; and be it further

1 RESOLVED, That our AMA-MSS amend our existing policy and pending transmittal
2 65.040MSS "Gender Neutral Language in AMA Policy" by addition and deletion as
3 follows:

4 **Gender Neutral Language in AMA Policy, 65.040MSS**

5 Our AMA-MSS will ask our AMA to:

6 Recognize the importance of using gender-neutral language such as gender-
7 neutral pronouns, terms, imagery, and symbols in respecting the spectrum of
8 gender identity

9 Revise all relevant policies to utilize gender-neutral ~~pronouns and other non-~~ gendered language in place of gendered language where such text
10 inappropriately appears and

11 Utilize gender-neutral pronouns and other non-gendered language in future
12 polices, internal communications, and external communications where
13 gendered language does not specifically need to be used.

14 Encourage the use of gender-neutral language in public health messaging,
15 including but not limited to messaging put forth by federal organizations such
16 as the Office of the Surgeon General and the U.S. Department of Health and
17 Human Services

18 Encourage other professional societies to utilize gender-neutral language in
19 their work

20 Support the use of gender-neutral language in clinical spaces that may serve
21 both cisgender and gender-diverse individuals

22 VRC testimony was supportive. The Reference Committee agrees with testimony to
23 amend the second resolve to request the use of gender-neutral language in AMA, federal,
24 and professional organization's internal/external communications and policies. We
25 recommend adoption of this resolution as amended.

26 (23) RESOLUTION 016 - AMENDING POLICY H-525.988, "SEX AND GENDER
27 DIFFERENCES IN MEDICAL RESEARCH"

28
29 **RECOMMENDATION A:**

30
31 **Resolution 016 be amended by addition and deletion to read as follows:**

32
33 **RESOLVED, Our AMA amend Policy H-525.988, "Sex and Gender Differences**
34 **in Medical Research," by insertion as follows** ~~The inclusion of women, and~~
35 ~~sexual and gender minority participants in clinical research studies and~~
36 ~~reporting of how the sex and gender of these participants influenced study~~
37 ~~outcomes requires the cooperation of researchers, federal agencies, and~~
38 ~~journal editors, which our AMA shall facilitate by amending Policy H-525.988,~~
39 ~~"Sex and Gender Differences in Medical Research", such that:~~

40
41 **Sex and Gender Differences in Medical Research, H-525.988**

42
43 **Our AMA: (1) reaffirms that gender exclusion in broad medical studies**
44 **questions the validity of the studies' impact on the health care of society at**
45 **large;**

46
47 **(2) affirms the need to include both all genders in studies that involve the**
48 **health of society at large and publicize its policies;**

1 (3) supports increased funding into areas of women's health and sexual and
2 gender minority health research;
3 (4) supports increased research on women's health and sexual and gender
4 minority health and the participation of women and sexual and gender
5 minorities in clinical trials, the results of which will permit development of
6 evidence-based prevention and treatment strategies for all women and
7 sexual and gender minorities from diverse cultural and ethnic groups,
8 geographic locations, and socioeconomic status; and
9 (5) recommends that all medical/scientific journal editors require, where
10 appropriate, a sex-based and gender-based analysis of data, even if such
11 comparisons are negative.
12 (6) recommends that medical and scientific journals diversify their review
13 processes to better represent women and sexual and gender minorities
14 recommends that all medical/scientific journals conduct an annual review to
15 assess the quantity and quality of sex and gender based research
16 presented
17 (7) supports the creation of a government sponsored, publicly available
18 online repository that provides centralized access to sex stratified and
19 gender stratified data from government sponsored research, including but
20 not limited to that from the National Institutes of Health, Centers for Disease
21 Control, and Agency of Healthcare Research and Quality
22 (78) encourages the FDA to internally develop criteria for identifying and
23 labelling medication and medical devices seeking FDA approval that were
24 developed based on research that did not include adequate participation of
25 women, and sexual and gender minorities.

26
27 **RECOMMENDATION B:**

28 **Resolution 016 be adopted as amended.**

29 RESOLVED, The inclusion of women, and sexual and gender minority participants in
30 clinical research studies and reporting of how the sex and gender of these participants
31 influenced study outcomes requires the cooperation of researchers, federal agencies, and
32 journal editors, which our AMA shall facilitate by amending Policy H-525.988, "Sex and
33 Gender Differences in Medical Research", such that:

34 Sex and Gender Differences in Medical Research, H-525.988
35 Our AMA: (1) reaffirms that gender exclusion in broad medical studies questions
36 the validity of the studies' impact on the health care of society at large;
37 (2) affirms the need to include both all genders in studies that involve the health of
38 society at large and publicize its policies;
39 (3) supports increased funding into areas of women's health and sexual and
40 gender minority health research;
41 (4) supports increased research on women's health and sexual and gender
42 minority health and the participation of women, and sexual and gender minorities
43 in clinical trials, the results of which will permit development of evidence-based
44 prevention and treatment strategies for all women from diverse cultural and ethnic
45 groups, geographic locations, and socioeconomic status; and

1 (5) recommends that all medical/scientific journal editors require, where
2 appropriate, a sex-based and gender-based analysis of data, even if such
3 comparisons are negative.
4 (6) recommends that all medical/scientific journals conduct an annual review to
5 assess the quantity and quality of sex- and gender-based research presented
6 (7) supports the creation of a government-sponsored, publicly available online
7 repository that provides centralized access to sex-stratified and gender-stratified
8 data from government-sponsored research, including but not limited to that from
9 the National Institutes of Health, Centers for Disease Control, and Agency of
10 Healthcare Research and Quality
11 (8) encourages the FDA to internally develop criteria for identifying and labelling
12 medication and medical devices seeking FDA approval that were developed based
13 on research that did not include adequate participation of women, and sexual and
14 gender minorities

15
16 VRC testimony was mixed. Your Reference Committee agrees with testimony that
17 supports the resolution with amendments. We recommend these amendments to address
18 concerns of inclusive language for sexual and gender minorities and feasibility of the
19 resolved clauses. In particular, our amendment to clause 6 was motivated by the authors'
20 compelling VRC testimony regarding the American Geophysical Union's internal audit for
21 gender bias in their peer review process emphasizing the need for diverse peer reviewers.
22 We recommend Resolution 016 be adopted as amended.

23
24 (24) RESOLUTION 018 - PROTECTING ACCESS TO ABORTION AND
25 REPRODUCTIVE HEALTHCARE

26
27 **RECOMMENDATION A:**

28
29 The first Resolve of Resolution 018 be amended by addition to read as
30 follows:

31
32 **RESOLVED**, That our AMA amends policy H-100.948, "Ending the Risk
33 Evaluation and Mitigation Strategy (REMS) Policy on Mifepristone
34 (Mifeprex)," by addition and deletion as follows:
35 ~~Ending the Risk Evaluation and Mitigation Strategy (REMS) Policy on~~
36 ~~Supporting Access to Mifepristone (Mifeprex), H-100.948~~
37 ~~Our AMA will support mifepristone availability for reproductive health~~
38 ~~indications, including via telemedicine, telehealth, and at retail pharmacies~~
39 ~~efforts urging the Food and Drug Administration to lift the Risk Evaluation~~
40 ~~and Mitigation Strategy on mifepristone.~~

41
42 **RECOMMENDATION B:**

43
44 Policy H-160.946 be reaffirmed in lieu of the second Resolve of Resolution
45 018.

46
47 **RECOMMENDATION C:**

48
49 The third Resolve of Resolution 018 be amended by addition to read as
50 follows:

1 **RESOLVED, That our AMA amends policy H-5.980, “Oppose the**
2 **Criminalization of Self-Induced Abortion,” by addition and deletion as**
3 **follows:**

4
5 **Oppose the Criminalization of Self-Induced Abortion, H-5.980**
6 **Our AMA: (1) opposes the criminalization of self-induced-managed abortion**
7 **and the criminalization of patients who access abortions as it increases**
8 **patients’ medical risks and deters patients from seeking medically**
9 **necessary services; and (2) will advocate against any legislative efforts to**
10 **criminalize self-induced-managed abortion and the criminalization of**
11 **patients who access abortions; and (3) will oppose efforts to enforce**
12 **criminal and civil penalties or other retaliatory efforts against these**
13 **patients and requirements that physicians function as agents of law**
14 **enforcement - gathering evidence for prosecution rather than provider of**
15 **treatment.**

16
17 **RECOMMENDATION D:**

18
19 **Resolution 018 be adopted as amended.**

20
21 RESOLVED, That our AMA amends policy H-100.948, “Ending the Risk Evaluation and
22 Mitigation Strategy (REMS) Policy on Mifepristone (Mifeprex),” by addition and deletion
23 as follows:

24 **Ending the Risk Evaluation and Mitigation Strategy (REMS) Policy on**
25 **Supporting Access to Mifepristone (Mifeprex), H-100.948**
26 Our AMA will support mifepristone availability via telemedicine, telehealth, and at
27 retail pharmacies efforts urging the Food and Drug Administration to lift the Risk
28 Evaluation and Mitigation Strategy on mifepristone.

29
30 RESOLVED, That our AMA amends policy H-160.946, “The Criminalization of Health
31 Care Decision Making,” by addition as follows:

32
33 **The Criminalization of Health Care Decision Making, H-160.946**

34 The AMA opposes the attempted criminalization of health care decision-making
35 especially as represented by the current trend toward criminalization of
36 malpractice and abortion care; it interferes with appropriate decision making and
37 is a disservice to the American public; and will develop model state legislation
38 properly defining criminal conduct and prohibiting the criminalization of health
39 care decision-making, including cases involving clinicians who perform abortions
40 and allegations of medical malpractice, and implement an appropriate action plan
41 for all components of the Federation to educate opinion leaders, elected officials
42 and the media regarding the detrimental effects on health care resulting from the
43 criminalization of health care decision-making.

44
45 RESOLVED, That our AMA amends policy H-5.980, “Oppose the Criminalization of Self-
46 Induced Abortion,” by addition and deletion as follows:

47
48 **Oppose the Criminalization of Self-Induced Abortion, H-5.980**

49 Our AMA: (1) opposes the criminalization of self-induced-managed abortion and
50 the criminalization of patients who access abortions as it increases patients’

1 medical risks and deters patients from seeking medically necessary services;
2 and (2) will advocate against any legislative efforts to criminalize self-induced
3 managed abortion and the criminalization of patients who access abortions; and
4 (3) will oppose efforts to enforce criminal and civil penalties or other retaliatory
5 efforts against these patients.

6
7 RESOLVED, That this resolution be immediately forwarded to the AMA House of
8 Delegates.

9
10 VRC testimony was mixed, with support for adoption as written, support for adoption with
11 amendments, and opposition. Your Reference Committee agrees with testimony to
12 amend the first and third resolved clauses. We agree with the House Coordination
13 Committee (HCC) that the second resolved clause is reaffirmation of existing policy H-
14 160.946. Additionally, we agree with testimony that this resolution should be immediately
15 forwarded. Thus, your Reference Committee recommends Resolution 018 be adopted
16 as amended.

17
18 H-160.946 The Criminalization of Health Care Decision Making
19 The AMA opposes the attempted criminalization of health care decision-making
20 especially as represented by the current trend toward criminalization of
21 malpractice; it interferes with appropriate decision making and is a disservice to
22 the American public; and will develop model state legislation properly defining
23 criminal conduct and prohibiting the criminalization of health care decision-
24 making, including cases involving allegations of medical malpractice, and
25 implement an appropriate action plan for all components of the Federation to
26 educate opinion leaders, elected officials and the media regarding the
27 detrimental effects on health care resulting from the criminalization of health care
28 decision-making.

29
30 (25) RESOLUTION 026 - PROMOTING A FRAGRANCE-FREE HEALTH CARE
31 ENVIRONMENT

32
33 **RECOMMENDATION A:**

34
35 The first Resolve of Resolution 026 be amended by deletion to read as
36 follows:

37
38 RESOLVED, Our AMA recognizes fragrance sensitivity as an ~~invisible~~
39 disability where the presence of fragranced products can limit accessibility
40 of healthcare settings; and be it further

41
42 **RECOMMENDATION B:**

43
44 The third Resolve of Resolution 026 be amended by deletion to read as
45 follows:

46
47 RESOLVED, Our AMA encourage places of medical practice to opt for
48 fragrance-free green cleaning products that emit lower levels of volatile
49 organic compounds when possible, and ban the use of scented aerosols or

1 ~~fragrance diffusers that do not have a direct disinfectant or medicinal~~
2 ~~purpose within the facilities; and be it further~~

3
4 **RECOMMENDATION C:**

5
6 **The fourth Resolve of Resolution 026 be amended by addition and deletion**
7 **to read as follows:**

8
9 **RESOLVED, Our AMA will work with relevant stakeholders to advocate for**
10 **governmental regulatory bodies, including but not limited to the**
11 **Occupational Safety & and Health Administration (OSHA), the Centers for**
12 **Disease Control and Prevention (CDC), and the National Institute for**
13 **Occupational Safety and Health (NIOSH) to recommend fragrance-free**
14 **policies in all medical offices, buildings, and places of patient care.**

15
16 **RECOMMENDATION D:**

17
18 **Resolution 026 be adopted as amended.**

19
20 **RESOLVED, Our AMA recognizes fragrance sensitivity as an invisible disability where**
21 **the presence of fragranced products can limit accessibility of healthcare settings; and be**
22 **it further**

23
24 **RESOLVED, Our AMA encourages all hospitals, outpatient clinics, urgent cares, and**
25 **other patient care areas inclusive of medical schools to adopt a fragrance-free policy that**
26 **pertains to employees, patients, and visitors of any kind; and be it further**

27
28 **RESOLVED, Our AMA encourage places of medical practice to opt for fragrance-free**
29 **green cleaning products that emit lower levels of volatile organic compounds when**
30 **possible, and ban the use of scented aerosols or fragrance diffusers that do not have a**
31 **direct disinfectant or medicinal purpose within the facilities; and be it further**

32
33 **RESOLVED, Our AMA will work with relevant stakeholders to advocate for the**
34 **Occupational Safety & Health Administration to recommend fragrance-free policies in all**
35 **medical offices, buildings, and places of patient care.**

36
37 **VRC testimony was supportive. Your Reference Committee agrees with testimony that**
38 **the third resolved clause is not supported by evidence in the whereas clauses.**
39 **Additionally, we agree with testimony that the fourth resolved clause should be**
40 **broadened to align with evidence and include additional regulatory bodies. The**
41 **Reference Committee recommends Resolution 026 be adopted as amended.**

42
43 (26) **RESOLUTION 027 – RECOGNIZING THE BURDEN OF RARE DISEASE**

44
45 **RECOMMENDATION A:**

46
47 **Resolution 027 be amended by addition and deletion to read as follows:**

48
49 **RESOLVED, That our AMA recognize the under-treatment and under-**
50 **diagnosis of orphan diseases, the burden of costs to health care systems**

1 **and affected individuals, and the health disparities among patients with**
2 **orphan diseases; and be it further**

4 **RESOLVED, That our AMA support efforts to increase awareness of patient**
5 **registries, to improve diagnostic and genetic tests, and to incentivize drug**
6 **companies to develop novel therapeutics to better understand and treat**
7 **orphan diseases; and be it further**

9 **RESOLVED, That our AMA encourages the use of national patient registries**
10 **by clinicians and researchers to gain a more comprehensive and patient-**
11 **centered understanding of orphan diseases; and be it further**

13 **RESOLVED, That our AMA support further efforts for improved diagnostic**
14 **testing and genomic sequencing efforts to address health disparities in the**
15 **orphan diseases community.**

17 **RECOMMENDATION B:**

19 **Resolution 027 be adopted as amended.**

21 RESOLVED, That our AMA recognizes the under-treatment and under-diagnosis of
22 orphan diseases and the burden of costs to health care systems and affected individuals;
23 and be it further

25 RESOLVED, That our AMA support efforts to incentivize drug companies to develop novel
26 therapeutics to better treat orphan diseases; and be it further

28 RESOLVED, That our AMA encourages the use of national patient registries by clinicians
29 and researchers to gain a more comprehensive and patient-centered understanding of
30 orphan diseases; and be it further

32 RESOLVED, That our AMA support further efforts for improved diagnostic testing and
33 genomic sequencing efforts to address health disparities in the orphan diseases
34 community.

36 VRC testimony was supportive of the resolution with amendments. Your Reference
37 Committee agrees with testimony that the first resolved clause is novel. We agree with
38 concerns surrounding the term "incentivize" in the second resolve clause. We decided to
39 amend Resolution 027 to address the third and fourth resolved clauses within the first
40 and second resolved clauses. Thus, the Reference Committee disagrees with the House
41 Coordination Committee's decision to place the third and fourth resolved clauses on the
42 reaffirmation calendar. Given that "orphan disease" has a legal definition distinct from
43 "rare disease", and this resolution was written with the Orphan Disease Act in mind, we
44 preserved this phrasing. We recommend Resolution 027 be adopted as amended.

46 (27) **RESOLUTION 031 - INDIGENOUS DATA SOVEREIGNTY**

48 **RECOMMENDATION A:**

1 **The Substitute Second Resolve be adopted in lieu of the second Resolve of**
2 **Resolution 031.**

4 **RESOLVED**, Our AMA supports that American Indian and Alaska Native
5 (AI/AN) Tribes and Villages' Institutional Review Boards and research
6 departments retain the right to oversee and regulate the collection,
7 ownership, and management of research data generated by their members,
8 and that individual members of AI/AN Tribes and Villages retain their
9 autonomy and privacy regarding research data shared with researchers,
10 AI/AN Tribes and Villages, and governments, consistent with existing
11 protections under 45 CFR 46;

12 **RECOMMENDATION B:**

15 **The Substitute Fourth Resolve be adopted in lieu of the fourth Resolve of**
16 **Resolution 031.**

18 **RESOLVED**, Our AMA encourages the National Institutes of Health and
19 other stakeholders to provide flexible funding to American Indian and
20 Alaska Native Tribes and Villages for research efforts, including the
21 creation and maintenance of Institutional Review Boards (IRBs).

22 **RECOMMENDATION C:**

25 **Resolution 031 be adopted as amended.**

27 **RESOLVED**, Our AMA recognizes that American Indian and Alaska Native Tribes and
28 Villages are sovereign governments that should be consulted before the conduct of
29 research specific to their members, lands, and properties; and be it further

31 **RESOLVED**, Our AMA supports the right of American Indian and Alaska Native Tribes
32 and Villages to govern the collection, ownership, and management of research data
33 generated by their members; and be it further

35 **RESOLVED**, Our AMA encourages the use and regular review of data-sharing
36 agreements for all studies between academic medical centers and American Indian and
37 Alaska Native Tribes and Villages; and be it further

39 **RESOLVED**, Our AMA amends H-460.921 by addition and deletion:

41 (Support for Institutional Review Boards H-460.921):

42 Our AMA: (1) commends the thousands of Institutional Review Board (IRB) members
43 who each have volunteered hundreds of hours annually; (2) urges medical schools, and
44 teaching hospitals to provide IRBs with adequate personnel and other resources to
45 accomplish their mission to safeguard the rights and welfare of human research
46 subjects; and 3) encourages the National Institutes of Health to develop a program that
47 provides flexible funding to institutions **and American Indian and Alaska Native Tribes**
48 **and Villages**, including support directed at **forming and maintaining** IRBs.

1 VRC testimony was supportive. The Reference Committee agrees with testimony that
2 the second Resolve should include explicit clarification that the autonomy and privacy of
3 individuals is considered with respect to all parties involved and with respect to the
4 explicit longstanding, established federal protections for human subjects governing all
5 human subjects research, while still giving deference to AI/AN Tribes and Villages'
6 oversight and regulatory authorities. Additionally, we agree with testimony that AI/AN
7 Institutional Review Boards (IRBs) are unique, and their data collection should be kept
8 separate from existing policy relating to medical schools and teaching hospitals in the
9 fourth resolved clause and grouped together with the remaining three resolve clauses of
10 new policy when this resolution is considered in the House of Delegates. Your
11 Reference Committee believes that these amendments capture the intent of the authors
12 as well as address concerns brought up in additional testimony. We recommend this
13 Resolution 031 be adopted as amended.

14
15 (28) RESOLUTION 037 - STRENGTHENING INTERVIEW GUIDELINES FOR
16 AMERICAN INDIAN AND ALASKA NATIVE MEDICAL SCHOOL, RESIDENCY,
17 AND FELLOWSHIP APPLICANTS

18
19 **RECOMMENDATION A:**

20
21 The first Resolve of Resolution 037 be amended by addition to read as
22 follows:

23
24 RESOLVED, Our AMA will work with the Accreditation Council for Graduate
25 Medical Education, the National Residency Matching Program, the
26 Association of American Medical Colleges, and other interested parties to
27 eliminate questioning about or discrimination based on American Indian
28 and Alaska Native blood quantum during the medical school, residency,
29 and fellowship application process.

30
31 **RECOMMENDATION B:**

32
33 Resolution 037 be adopted as amended.

34
35 RESOLVED, Our AMA will work with the Accreditation Council for Graduate Medical
36 Education, the National Residency Matching Program, and other interested parties to
37 eliminate questioning about or discrimination based on American Indian and Alaska
38 Native blood quantum during the medical school, residency, and fellowship application
39 process.

40
41 VRC testimony was supportive. Your Reference Committee agrees with testimony that
42 this resolution is not a reaffirmation of existing policy. We recommend adoption of this
43 resolution as amended with the addition of the Association of American Medical
44 Colleges (AAMC) as a stakeholder.

45
46 (29) RESOLUTION 040 - PROTECTING WORKERS DURING CATASTROPHES

47
48 **RECOMMENDATION A:**

49

1 **The first Resolve of Resolution 040 be amended by addition and deletion to**
2 **read as follows:**

3
4 **RESOLVED, That our AMA will advocate for support legislation that creates**
5 **federal standards of safety and protection of workers during natural or man-**
6 **made catastrophes; and be it further**

7
8 **RECOMMENDATION B:**

9
10 **The second Resolve of Resolution 040 be amended by addition and**
11 **deletion to read as follows:**

12
13 **RESOLVED, That our AMA will advocate ~~that~~encourage the United States**
14 **Department of Labor, the Occupational Safety and Health Administration**
15 **(OSHA), and other appropriate stakeholders to develop and enforce**
16 **evidence-based policies, guidelines, and protections for workers at their**
17 **place of employment and traveling to and from their place of employment**
18 **during catastrophes.**

19
20 **RECOMMENDATION C:**

21
22 **Resolution 040 be adopted as amended.**

23
24 **RESOLVED, That our AMA will advocate for legislation that creates federal standards of**
25 **safety and protection of workers during catastrophes; and be it further**

26
27 **RESOLVED, That our AMA will advocate that the United States Department of Labor,**
28 **the Occupational Safety and Health Administration (OSHA), and other appropriate**
29 **stakeholders to develop and enforce evidence-based policies, guidelines, and**
30 **protections for workers at their place of employment and traveling to and from their place**
31 **of employment during catastrophes.**

32
33 VRC testimony was mixed. Your Reference Committee agrees with testimony that the
34 amendment to the first Resolve is important to align language with Federal Emergency
35 Management Agency (FEMA) definitions ("natural or man-made"). The Reference
36 Committee does not agree with suggestions to specify "environmental" catastrophe in
37 the first resolved clause, and found the complete FEMA definition of catastrophe from
38 author's amended language to be unnecessary. We recommend that Resolution 040 be
39 adopted as amended.

40
41 (30) **RESOLUTION 052 - PROMOTING ALGORITHMIC STEWARDSHIP IN**
42 **HEALTHCARE SYSTEMS**

43
44 **RECOMMENDATION A:**

45
46 **Policy D-350.981 be reaffirmed in lieu of the first Resolve of Resolution 052.**

47
48 **RECOMMENDATION B:**

49

1 **The third Resolve of Resolution 052 be amended by addition and deletion to**
2 **read as follows:**

4 **RESOLVED, That our AMA support the development of works with**
5 **~~appropriate stakeholders to develop~~ criteria for premarket assurance of**
6 **safety and effectiveness of augmented intelligence technology that requires**
7 **a data quality check ensuring datasets are made of diverse patient**
8 **populations, addressing bias, and mitigating healthcare disparities.; and be**
9 **it further,**

10 **RECOMMENDATION C:**

13 **Policy H-480.940 be reaffirmed in lieu of the fourth Resolve of Resolution**
14 **052.**

16 **RECOMMENDATION D:**

18 **Resolution 052 be adopted as amended.**

20 RESOLVED, That our AMA support Algorithmic Stewardship in hospital systems, either
21 as a multidisciplinary team, or individuals to monitor inequitable algorithmic decision
22 making; and be it further

24 RESOLVED, That our AMA works with appropriate stakeholders to support creation
25 of training modules highlighting the dangers of algorithmic bias and preventative
26 measures for Institutional Review Boards to use and/or modify for their unique
27 institutional needs as it relates to research utilizing augmented intelligence; and be it
28 further

30 RESOLVED, That our AMA works with appropriate stakeholders to develop criteria for
31 premarket assurance of safety and effectiveness of augmented intelligence technology
32 that requires a data quality check ensuring datasets are made of diverse patient
33 populations, addressing bias, and mitigating healthcare disparities; and be it further,

35 RESOLVED, That our AMA support post-approval surveillance measures, including but
36 not limited to requiring technology firms and health care systems to regularly audit any
37 algorithms that influence patient care utilizing frameworks developed by appropriate
38 regulatory agencies.

40 VRC testimony was split. Your Reference Committee agrees with testimony that the first
41 and fourth Resolves are reaffirmation of existing policy and are not novel as written. We
42 recommend that the second Resolve should be removed from the House Coordination
43 Committee's reaffirmation consent calendar because it is novel and within the AMA's
44 scope. We agree with testimony that the third Resolve should be amended to fit within
45 the scope of the AMA by changing the action from "work with" to "support." The
46 Reference Committee recommends this resolution be adopted as amended.

48 (31) GC REPORT A – REVIEW OF MSS SUNSET MECHANISM AND PROCESS

50 **RECOMMENDATION A:**

1 The Recommendation of GC Report A be amended by deletion to read as
2 follows:

3 That AMA-MSS policy 630.044MSS, Sunset Mechanism for AMA-MSS Policy,
4 be amended by addition and deletion as follows:

5 AMA-MSS will establish and use a sunset mechanism for AMA-MSS policy
6 with a five-year time horizon whereby a policy will remain viable for five years
7 unless action is taken by the Assembly to reestablish or refer it. The
8 implementation of a sunset mechanism for AMA-MSS policy shall follow the
9 following procedures: (1) review of policies will be the ultimate responsibility
10 of the Governing Council, whereby the report is authored by the Chair of the
11 Governing Council with initial policy recommendations being solicited from
12 relevant Standing Committees as appropriate; (2) The Governing Council will
13 provide Standing Committees clear guidance regarding criteria for
14 recommendations of retention, retention with amendments, or sunset; (3)
15 policy recommendations will be reported to the AMA-MSS Assembly at each
16 Interim Meeting on the five or five and one-half year anniversary of a policy's
17 adoption, with a brief rationale accompanying each recommendation; (34) a
18 consent calendar format will be used by the Assembly in considering the
19 policies encompassed within the report; and (45) a vote will not be necessary
20 on policies recommended for rescission as they will automatically expire
21 under the auspices of the sunset mechanism unless referred back to the
22 Governing Council; and (6) policies solely reaffirming existing AMA policy
23 shall be sunset by default unless otherwise recommended for retention.

25 RECOMMENDATION B:

26 GC Report A be amended by addition of a new Recommendation to read as
27 follows:

28 That the Governing Council study whether policies solely reaffirming
29 existing AMA policy should be sunset by default unless otherwise
30 recommended for retention.

31 RECOMMENDATION C:

32 Recommendations in GC Report A be adopted as amended and the
33 remainder of the report be filed.

34 Your MSS Governing Council recommends:

35 That AMA-MSS policy 630.044MSS, Sunset Mechanism for AMA-MSS Policy, be
36 amended by addition and deletion as follows:

37 AMA-MSS will establish and use a sunset mechanism for AMA-MSS policy with a
38 five-year time horizon whereby a policy will remain viable for five years unless
39 action is taken by the Assembly to reestablish or refer it. The implementation of a
40 sunset mechanism for AMA-MSS policy shall follow the following procedures: (1)
41 review of policies will be the ultimate responsibility of the Governing Council,
42 whereby the report is authored by the Chair of the Governing Council with initial

1 policy recommendations being solicited from relevant Standing Committees as
2 appropriate; (2) The Governing Council will provide Standing Committees clear
3 guidance regarding criteria for recommendations of retention, retention with
4 amendments, or sunset; (3) policy recommendations will be reported to the AMA-
5 MSS Assembly at each Interim Meeting on the five or five and one-half year
6 anniversary of a policy's adoption, with a brief rationale accompanying each
7 recommendation; (34) a consent calendar format will be used by the Assembly in
8 considering the policies encompassed within the report; and (45) a vote will not be
9 necessary on policies recommended for rescission as they will automatically expire
10 under the auspices of the sunset mechanism unless referred back to the
11 Governing Council; and (6) policies solely reaffirming existing AMA policy shall be
12 sunset by default unless otherwise recommended for retention.

13
14 VRC testimony was mixed, but limited. Your Reference Committee agrees with testimony
15 that the first five parts of the recommendation are well-supported and adequately address
16 concerns related to the sunset process, and we recommend adoption. However, VRC
17 testimony opposed the sixth clause. We agree that the ask of the sixth clause does not
18 have as much support from the rest of the report and that a more in-depth review process
19 should be developed to prevent unintended sunsetting by default. We encourage further
20 study of the implications and consequences of this change by a MSS Standing Committee
21 such as the Committee on Long Range Planning. We therefore recommend further study
22 of the sixth clause of the recommendation of GC Report A. Your Reference Committee
23 recommends GC Report A be adopted as amended and the remainder of the report be
24 filed.

25
26 (32) MIC REPORT A - ADDRESSING HEALTH INSURANCE COVERAGE
27 DISPARITY AMONG LATINX CHILDREN

28
29 **RECOMMENDATION A:**

30
31 **The Recommendation of MIC Report A be amended by addition and**
32 **deletion to read as follows:**

33
34 Your AMA-MSS Minority Issues Committee Standing Committee
35 recommends that the following recommendations are ~~not~~ adopted as
36 ~~amended due to reaffirmation of existing policy~~ and the remainder of this
37 report is filed:

38
39 1. That our AMA advocate for the removal of eligibility criteria based
40 on ~~citizenship~~ immigration status from Medicaid and CHIP.

41
42 **RECOMMENDATION B:**

43
44 **The Recommendation of MIC Report A be adopted as amended and the**
45 **remainder of the report be filed with a title change:**

46
47 Title: "Immigration Status in Medicaid & CHIP"
48

1 Your AMA-MSS Minority Issues Committee Standing Committee recommends that the
2 following recommendations are not adopted due to reaffirmation of existing policy and the
3 remainder of this report is filed:

4 1. That our AMA advocate for the removal of eligibility criteria based on citizenship
5 status from Medicaid and CHIP.

6
7 VRC testimony was supportive. Your Reference Committee agrees with testimony that
8 opposes reaffirmation of existing policy in lieu of the original Resolution 021. We
9 recommend reversal of the report's recommendation to not adopt and instead
10 recommend adopting the recommendation of the report as amended. Additionally, we
11 agree with testimony to amend the recommendation to specify "the removal of eligibility
12 criteria based on immigration status" because removing restrictions based on citizenship
13 status would be insufficient. Therefore, the Reference Committee recommends the
14 recommendations of MIC Report A be adopted as amended and the remainder of the
15 report be filed. Additionally, we recommend a title change to clarify the title based on the
16 recommended amendments.

17
18 (33) CSI CGPH REPORT A - ADDRESSING INEQUITY IN ONSITE WASTEWATER
19 TREATMENT

20
21 **RECOMMENDATION A:**

22
23 **CSI CGPH Report A be amended by addition of a new first resolved clause
24 to read as follows:**

25
26 **RESOLVED, That our AMA supports that federal, state, and local
27 governments abate financial and criminal penalties for insufficient
28 wastewater management, especially those placed on underserved
29 communities due to environmental racism and socioeconomic disparities;
30 and be it further**

31
32 **RECOMMENDATION B:**

33
34 **The second Resolve of CSI CGPH Report A be amended by addition and
35 deletion to read as follows:**

36
37 **RESOLVED, That our AMA supports research by into federal, state, and
38 local governments to develop strategies tofor reducing insufficient
39 wastewater management and eliminate detrimental health effects due to
40 inadequate wastewater systems.**

41
42 **RECOMMENDATION C:**

43
44 **The Recommendations of CSI CGPH Report A be adopted as amended and
45 the remainder of the report be filed.**

46
47 **RESOLVED, That our AMA supports research into federal, state, and local governments
48 to develop strategies for reducing insufficient wastewater management.**

1 VRC testimony was mixed. Your Reference Committee agrees with testimony to add the
2 first resolved clause to align with the intent of the report. We recommend the
3 recommendations of CSI CGPH Report A be adopted as amended and the remainder of
4 the report be filed.

5 (34) CAIA REPORT B - AMENDING POLICY ON PUBLIC OPTION TO MAXIMIZE
6 AMA ADVOCACY

7
8 **RECOMMENDATION A:**

9
10 The Recommendation of CAIA Report B be amended by addition and
11 deletion to read as follows:

12
13 Our AMA will advocate that physicians at Indian Health Service, Tribal, and
14 Urban Indian Health Programs be exempt from duplicative licensure
15 requirements, such as requirements for state licensure when these
16 physicians are already federally licensed for a single licensing standard for
17 physicians employed at Indian Health Service facilities that exempt them
18 from state licensing requirements in their respective state of practice.

19
20 **RECOMMENDATION B:**

21
22 CAIA Report B be amended by addition of a new Recommendation to read
23 as follows:

24
25 Our AMA will advocate that future health reform proposals include
26 corresponding licensure and eligibility exceptions for Indian Health Service,
27 Tribal, and Urban Indian Health Program facilities and physicians to ensure
28 that these physicians can fully participate.

29
30 **RECOMMENDATION C:**

31
32 The Recommendations of CAIA Report B be adopted as amended and the
33 remainder of the report be filed with a title change.

34
35 **Title: "Indian Health Service Licensure Exemptions"**

36
37 Your Committee on American Indian Affairs recommends that the following
38 recommendations are adopted, and the remainder of this report is filed:

39
40 Our AMA will advocate for a single licensing standard for physicians employed at Indian
41 Health Service facilities that exempt them from state licensing requirements in their
42 respective state of practice.

43
44 VRC testimony was supportive of the report recommendations. The Reference
45 Committee agrees with testimony to support a single licensing standard and we
46 amended the first resolve to more explicitly state this and broaden the language to be
47 inclusive of all duplicative licensure requirements. The recommended addition of a
48 second resolved clause was done to make sure that future health reform includes the
49 exceptions outlined in the report, to preempt the issues that occurred during the
50 Affordable Care Act's passage requiring a separate amendment for these exceptions.

1 Your Reference Committee recommends the recommendations of CAIA Report B be
2 adopted and the remainder of the report be filed. Additionally, we recommend a title
3 change to accurately reflect the intent of the resolved clauses.

4
5 (35) CSI REPORT A - ADVOCATING FOR PLANT-BASED MEAT RESEARCH AND
6 REGULATION

7
8 **RECOMMENDATION A:**

9
10 The first Resolve of CSI Report A be amended by addition and deletion to
11 read as follows:

12
13 **RESOLVED, That our AMA supports works with appropriate stakeholders to**
14 **advocate for support plant-based meat research funding; and be it further**

15
16 **RECOMMENDATION B:**

17
18 The Recommendations of CSI Report A be adopted as amended and the
19 remainder of the report be filed with a title change:

20
21 **Title: "Support for Research on Plant-Based Meat"**

22
23 Your Committee on Scientific Issues recommends that Resolution 065 be adopted as
24 amended by insertion and deletion, and the remainder of this report be filed:

25
26 1. **RESOLVED, That our AMA supports works with appropriate stakeholder to**
27 **advocate for plant-based meat research funding; and be it further**

28
29 2. **RESOLVED, That our AMA supports federal regulation and oversight of plant-**
30 **based meat producers.**

31
32 VRC testimony was supportive and offered amendments. Your Reference Committee
33 agrees with testimony to change the action of the first resolved clause from "advocate" to
34 "support" to avoid a higher fiscal note, noting specific rationale for the change was not
35 provided in the report. We recommend that the recommendations of CSI Report A be
36 adopted as amended and the remainder of the report be filed. Additionally, we
37 recommend a title change to reflect the verbiage of the amended resolved clause.

38
39 (36) COLA CGPH REPORT A - REDUCING BURDEN OF INCARCERATION ON
40 PUBLIC HEALTH

41
42 **RECOMMENDATION A:**

43
44 The second Resolve of COLA CGPH Report A be amended by addition and
45 deletion to read as follows:

46
47 **RESOLVED, That our AMA partner with the American Public Health**
48 **Association and other stakeholders to urge Congress, the Department of**
49 **Justice, and the Department of Health & Human Services the Centers for**
50 **Disease Control and Prevention, and the National Institutes of Health to**

1 minimize the negative health effects of incarceration ~~via support for~~
2 ~~programs to facilitate access to housing and employment after release from~~
3 ~~incarceration by supporting efforts to pilot evidence-based alternatives to~~
4 ~~incarceration that maintain public safety.~~

5 **RECOMMENDATION B:**

6
7 **The Recommendations of COLA CGPH Report A be adopted as amended and**
8 **the remainder of the report be filed.**

9
10 Your Committee on Legislation and Advocacy and Committee on Global and Public Health
11 recommend that the following resolve clauses be adopted in lieu of the original resolution
12 and the remainder of the report be filed:

13
14 **RESOLVED**, That our AMA support efforts to reduce the negative health impacts of
15 incarceration, such as

16 1) implementation and incentivization of adequate funding and resources towards
17 indigent defense systems;
18 2) implementation of practices that promote access to stable employment and laws
19 that ensure employment non-discrimination for workers with previous non-felony
20 criminal records;
21 3) housing support for formerly incarcerated people, including programs that
22 facilitate access to immediate housing after release from carceral settings; and be
23 it further

24
25 **RESOLVED**, That our AMA partner with the American Public Health Association and other
26 stakeholders to urge Congress, the Centers for Disease Control and Prevention, and the
27 National Institutes of Health to minimize the negative health effects of incarceration via
28 support for programs to facilitate access to housing and employment after release from
29 incarceration.

30
31 VRC testimony was supportive. The Reference Committee recommends amending the
32 language of the second resolved clause to add phrases from the original Resolution 046
33 that are aspirational and broad regarding the actions that stakeholders can take. We
34 recommend the recommendations of this report be adopted as amended and the
35 remainder of the report be filed.

36
37 (37) **CEQM REPORT A - STUDYING POPULATION-BASED INSURANCE AND**
38 **PAYMENT POLICY DISPARITIES**

39
40 **RECOMMENDATION A:**

41
42 **The second Resolve of CEQM Report A be amended by addition to read as**
43 **follows:**

44
45 **RESOLVED**, That our AMA-MSS support addressing potential insufficiencies
46 in coding and disparities in reimbursement for historically underserved
47 populations including, but not limited to, categorization of services
48 performed by gender, race, ethnicity, ability, or age of the patient.

49
50 **RECOMMENDATION B:**

1 CEQM Report A be amended by addition of a new Recommendation to read
2 as follows:

3
4 **RESOLVED, Our AMA study possible disparities in physician reimbursement**
5 **for health services primarily provided to women and sexual and gender**
6 **minorities, children, elder patients, patients with disabilities, and other**
7 **underserved populations and subsequent effects on physician income,**
8 **especially in specialties that primarily serve those populations.**

9
10 **RECOMMENDATION C:**

11
12 The Recommendations of CEQM A be adopted as amended and the
13 remainder of the report be filed.

14
15 The Committee on Economics and Quality in Medicine recommends that the following
16 policy be adopted and the remainder of the report filed:

17
18 RESOLVED, That our AMA-MSS supports existing AMA policy H-65.961 Principles for
19 Advancing Gender Equity in Medicine given its principles of equitable compensation;
20 and be it further

21
22 RESOLVED, That our AMA-MSS support addressing potential insufficiencies in coding
23 and disparities in reimbursement for historically underserved populations including, but
24 not limited to, categorization by gender, race, ethnicity, ability, or age.

25
26 RESOLVED, That our AMA-MSS support addressing insufficiencies in coding and
27 relative valuation for care that may lead to disparities in reimbursement for physicians
28 treating underserved populations, including but not limited to increasing diversity and
29 representation on appropriate decision-making bodies.

30
31 VRC testimony was supportive. We thank the MSS Committee on Economics & Quality
32 in Medicine for an excellent report on a very complex issue. Your Reference Committee
33 recommends amendments to the second resolve clause to clarify the language. We
34 agree with testimony that supports the internal asks of the report recommendations.
35 Additionally, we recommend the addition of a fourth resolved clause to ask for direct
36 AMA action, which we felt was justified by the report's evidence that this issue exists.
37 We recognize that the original resolution's language may have been too prescriptive and
38 direct in its asks and possible interference with the processes of specific stakeholders,
39 but we believe that a more general AMA report on the issue could glean useful
40 information. While we agree that MSS internal policy on this issue is useful, we believe
41 that action on this issue from AMA is unlikely without a direct attempt to at least open a
42 conversation. The Reference Committee recommends the recommendations be adopted
43 as amended and the remainder of the report be filed.

44
45 (38) CGPH CBH REPORT A - OPPOSING USE OF VULNERABLE INCARCERATED
46 PEOPLE IN RESPONSE TO PUBLIC HEALTH EMERGENCIES OF
47 INFECTIOUS DISEASE ORIGIN

48
49 **RECOMMENDATION A:**

50

1 **The second Resolve of CGPH CBH Report A be amended by addition and**
2 **deletion to read as follows:**

3
4 **RESOLVED**, That our AMA supports that any labor performed by
5 incarcerated individuals or other captive populations should include (1)
6 adequate workplace safety and fairness standards similar to those outside
7 of carceral institutions and support their reintegration into the workforce
8 after incarceration and (2) transferable skills or tangible value in
9 reintegrating into the workforce.

10
11 **RECOMMENDATION B:**

12
13 **The Recommendations of CGPH CBH Report A be adopted as amended and**
14 **the remainder of the report be filed**.

15
16 Your Committee on Global and Public Health and Committee on Bioethics and
17 Humanities recommend that the following alternate resolution be adopted in lieu of MSS
18 Resolution 013:

19
20 **RESOLVED**, That our AMA opposes the use of forced or coercive labor practices for
21 incarcerated populations; and be it further

22
23 **RESOLVED**, That our AMA supports that any labor performed by incarcerated
24 individuals or other captive populations should include (1) adequate workplace safety
25 and fairness standards similar to those outside of carceral institutions and (2)
26 transferable skills or tangible value in reintegrating into the workforce.

27
28 VRC testimony was limited. We agree with testimony that this report is well-written and
29 addresses a gap in existing policy. We recommend an amendment to the second
30 resolve clause to emphasize that the intent of any labor should support reintegration ,
31 especially since “transferable skills or tangible value” may be variably defined by those
32 that exploit the labor of incarcerated individuals. Your Reference Committee
33 recommends the report be adopted as amended.

34
35 (39) CDA CME REPORT A – EXPANDING SUPPORT FOR MEDICAL STUDENTS
36 AND PHYSICIANS WITH DISABILITIES

37
38 **RECOMMENDATION A:**

39
40 **The first Resolve of CDA CME Report A be amended by addition to read as**
41 **follows:**

42
43 **RESOLVED**, That our AMA-MSS will prioritize the input, direction, and
44 partnership of members with personal and lived experience of disability,
45 especially those with intersecting marginalized identities, to ensure those
46 most impacted guide the direction of change; and be it further

47
48 **RECOMMENDATION B:**

1 **The fourth Resolve of CDA CME Report A be referred to study.**

2 **RECOMMENDATION C:**

3 **The Recommendations of CDA CME Report A be adopted as amended and**
4 **the remainder of the report be filed.**

5
6 Your Committee on Disability Affairs and Committee of Medical Education recommends
7 that the following recommendations for LR 001 are adopted as amended and the
8 remainder of this report is filed:

9
10 RESOLVED, That our AMA will prioritize the input, direction, and partnership of
11 members with personal and lived experience of disability, especially those with
12 intersecting marginalized identities, to ensure those most impacted guide the direction of
13 change; and be it further

14
15 1. ~~RESOLVED, That our AMA will collaborate with the relevant testing institutions to~~
16 ~~study and report back on the present barriers for applicants, medical students,~~
17 ~~and physicians with disabilities regarding admission, curricular, and licensing~~
18 ~~exams, and recommended practices that improve accessibility for and inclusion~~
19 ~~of those with disabilities; and be it further~~

20
21 2. ~~RESOLVED, That our AMA will study and report back on persisting barriers to~~
22 ~~employment for physicians with disabilities, and recommend hiring and~~
23 ~~workplace practices (e.g. experienced disability service offices) that improve~~
24 ~~accessibility for and inclusion of those with disabilities; and be it further~~

25
26 RESOLVED, That our AMA will collaborate with the Association of American Medical
27 Colleges and The Coalition for Disability Access in Health Science Education to develop
28 national standards for disability service providers (DSPs) that serve medical students,
29 residents, and physicians, to ensure consistent training, practices, and availability of
30 healthcare-specific DSPs.

31
32 VRC testimony opposed the report recommendations as written. Your Reference
33 Committee agrees with testimony that the first resolved clause is not supported by
34 enough research and so we recommend an amendment to make this clause internal to
35 the AMA-MSS. We agree with testimony that the fourth resolved clause should be
36 referred because the AMA is not the appropriate organization to develop national
37 standards. The Reference Committee recommends adoption of the first Resolve as
38 internal policy and referral of the fourth resolved clause.

RECOMMENDED FOR ADOPTION IN LIEU OF

(40) RESOLUTION 001 - OPPOSING THE CENSORSHIP OF SEXUALITY AND GENDER IDENTITY DISCUSSIONS IN PUBLIC SCHOOLS

RECOMMENDATION:

Substitute Resolution 001 be adopted in lieu of Resolution 001:

RESOLVED, That our AMA opposes censorship of LGBTQIA+ topics and opposes any policies that limit discussion or restricts mention of sexuality, gender identity and the LGBTQIA+ human experience in schools or educational curricula; and be it further

RESOLVED, That our AMA will support policies that ensure an inclusive, well-rounded education free from censorship of discussions surrounding sexuality and gender identity in public schools.

RESOLVED, That this resolution be immediately forwarded to our AMA House of Delegates at the June 2022 Meeting.

RESOLVED, That our AMA opposes censorship of information about LGBTQIA+ issues and any legislation that similarly harms LGBTQIA+ youth and reduces health literacy; and be it further

RESOLVED, That our AMA will support legislation that ensures an inclusive, well-rounded education free from censorship of discussions surrounding sexuality and gender identity in public schools.

VRC testimony was supportive of the resolution with friendly amendments. The Reference Committee agrees with testimony that clarifies the intent of the first resolved clause. Additionally, we agree with testimony from The Gay and Lesbian Medical Association (GLMA) that this resolution should be immediately forwarded to the AMA House of Delegates. Your Reference Committee recommends a substitute resolution be adopted in lieu of Resolution 001 to clarify the resolved clauses and add an immediate forwarding clause.

(41) RESOLUTION 003 - ACCESSIBLE ELECTRONIC CHARTING SOFTWARE AND ALTERNATIVE ACCESS TO HEALTH INFORMATION FOR VISUALLY IMPAIRED PATIENTS

RECOMMENDATION:

Substitute Resolution 003 be adopted in lieu of Resolution 003.

RESOLVED, That our AMA strongly urge electronic health record companies to improve their software to be accessible for patients with visual impairments without requiring them to use third-party programs.

1 RESOLVED, That our AMA will work with relevant organizations and digital healthcare
2 communication companies to improve the accessibility of electronic charting software
3 that allows visually impaired and blind patients to review and receive health information
4 independently without the use of third-party software in order to maintain privacy; and be
5 it further

6
7 RESOLVED, That our AMA will encourage hospitals and clinics without accessible
8 healthcare software for the visually impaired to adopt policies for patients that allow them
9 to communicate with healthcare providers in order to review and receive test results,
10 health charts, and medical information independently.

11
12 VRC testimony was supportive of this resolution. The Reference Committee agrees with
13 testimony that Resolution 003 addresses a gap in current policy. We believe that the
14 AMA should work with electronic health record companies directly instead of relevant
15 organization as outline in the first resolve. Additionally, we believe the second resolve is
16 an intuitive ask that is not well-supported by the whereas clauses. Thus, your Reference
17 Committee recommends adopting Substitute Resolution 003 in lieu of Resolution 003.

18 (42) RESOLUTION 007 - INTERRUPTED PATIENT SLEEP

21 **RECOMMENDATION:**

23 **Substitute Resolution 007 be adopted in lieu of Resolution 007.**

25 **RESOLVED, Our AMA will work with relevant stakeholders, including the
26 American Hospital Association (AHA), to evaluate current patient sleep
27 interruption practices and develop strategies to minimize excessive patient
28 sleep interruptions.**

30 RESOLVED, Our AMA urges hospital administration to evaluate current patient sleep
31 guidelines and decrease the number of nightly interruptions.

33 VRC testimony was mixed. The Reference Committee agrees with concerns surrounding
34 the feasibility of the resolution's ask. We agree with testimony that sleep guidelines are
35 not well-established and recommend a substitute resolution to better align the ask with
36 evidence from the whereas clauses. Your Reference Committee recommends adoption
37 of a substitute resolution in lieu of Resolution 007 to offer a more evidence-based
38 solution.

40 (43) RESOLUTION 009 - ADDRESSING THE USE OF MAIL-ORDER NALOXONE
41 TO CURB THE OPIOID EPIDEMIC

43 **RECOMMENDATION:**

45 **Substitute Resolution 009 be adopted in lieu of Resolution 009 with a title
46 change.**

48 **Title: "Support for Mail-Order Naloxone"**

1 **RESOLVED, That our AMA supports efforts to increase the availability,**
2 **delivery, possession and use of mail-order Naloxone to help prevent**
3 **opioid-related overdose, especially in underserved communities.**

5 Resolved, Our AMA supports the development of infrastructure that allows for the
6 administration of mail-order Naloxone for the treatment of opioid use disorder where this
7 practice is underutilized, particularly in rural and Tribal areas.

9 VRC testimony was supportive of the spirit of the resolution, and was split between
10 adoption and reaffirmation. Your Reference Committee agrees with testimony that the
11 resolution addresses a gap in existing policy because Resolution 009 addresses mail-
12 order naloxone as a method for delivery. However, we have concerns with the
13 actionability of the language as written, given that the AMA typically cannot create
14 infrastructure in this capacity. We also share concerns that listing specific groups may
15 unintentionally limit access for underserved urban communities. We recommend this
16 substitute resolution be adopted in lieu of Resolution 009 with a title change.

18 (44) RESOLUTION 013 - DISMANTLING HOMELESSNESS BRICK BY BRICK - AN
19 EVICTION & RATE-CENTERED ACTION TO PREVENT HOMELESSNESS

21 **RECOMMENDATION:**

23 Substitute Resolution 013 be adopted in lieu of Resolution 013.

25 **RESOLVED, That our AMA-MSS change the title of our current transmittal**
26 **“Amending H-160.903, Eradicating Homelessness to Include Support for**
27 **Street Medicine Programs” to read “Amending H-160.903, Eradicating**
28 **Homelessness to Include Support for Street Medicine Programs and**
29 **Reduce Evictions”**

31 **RESOLVED, That our MSS amend our pending transmittal, “Amending H-**
32 **160.903, Eradicating Homelessness to Include Support for Street Medicine**
33 **Programs” by addition and deletion to read as follows:**

34 **Eradicating Homelessness, H-160.903**

35 **Our AMA:**

36 **(1) supports improving the health outcomes and decreasing the health care**
37 **costs of treating the chronically homeless through clinically proven, high**
38 **quality, and cost-effective approaches which recognize the positive impact**
39 **of stable and affordable housing coupled with social services;**
40 **(2) recognizes that stable, affordable housing as a first priority, without**
41 **mandated therapy or services compliance, is effective in improving**
42 **housing stability and quality of life among individuals who are chronically-**
43 **homeless;**

44 **(3) recognizes adaptive strategies based on regional variations, community**
45 **characteristics and state and local resources are necessary to address this**
46 **societal problem on a long-term basis;**

47 **(4) supports the use of street medicine programs, which travel to**
48 **individuals who are unhoused or unsheltered and provide healthcare and**
49 **social services, as well as funds, including Medicaid and other public**
50 **insurance reimbursement, for their maintenance;**

1 (45) recognizes the need for an effective, evidence-based national plan to
2 eradicate homelessness;
3 (56) encourages the National Health Care for the Homeless Council to
4 study the funding, implementation, and standardized evaluation of Medical
5 Respite Care for homeless persons;
6 (67) will partner with relevant stakeholders to educate physicians about the
7 unique healthcare and social needs of homeless patients and the
8 importance of holistic, cost effective, evidence-based discharge planning,
9 and physicians' role therein, in addressing these needs;
10 (78) encourages the development of holistic, cost-effective, evidence-
11 based discharge plans for homeless patients who present to the
12 emergency department but are not admitted to the hospital;
13 (89) encourages the collaborative efforts of communities, physicians,
14 hospitals, health systems, insurers, social service organizations,
15 government, and other stakeholders to develop comprehensive
16 homelessness policies and plans that address the healthcare and social
17 needs of homeless patients;
18 (910) (a) supports laws protecting the civil and human rights of individuals
19 experiencing homelessness, and (b) opposes laws and policies that
20 criminalize individuals experiencing homelessness for carrying out life-
21 sustaining activities conducted in public spaces that would otherwise be
22 considered non-criminal activity (i.e., eating, sitting, or sleeping) when
23 there is no alternative private space available; and
24 (1011) recognizes that stable, affordable housing is essential to the health
25 of individuals, families, and communities, and supports policies that
26 preserve and expand affordable housing across all neighborhoods.; and
27 (12) supports federal and state efforts to enact just cause eviction statutes
28 and examine and restructure punitive eviction practices; instate inflation-
29 based rent control; guarantee tenants' right to counsel in housing disputes
30 and improve affordability of legal fees; and create national, state, and/or
31 local rental registries.
32

33 RESOLVED, That our American Medical Association (AMA) supports evidence-based
34 approaches for combating homelessness, such as but not limited to:

- 35 (1) an overhaul of local eviction laws in states that have unfair and power laden
36 eviction policies;
- 37 (2) rent control that would limit the ability of landlords to increase rents annually by
38 more than a moderate sum tied to inflation with vacancy decontrol;
- 39 (3) just cause eviction statutes;
- 40 (4) access to legal representation for individuals confronted with eviction;
- 41 (5) the creation of local, state, and/or national rental registries; and
- 42 (6) other proven methods^{13,20,21}; and be it further

43 RESOLVED, That our AMA amend their current policy to reduce the prevalence of
44 homelessness in the context of socioeconomic implications of public health crises and/or
45 emergencies (i.e., housing crisis, unregulated rental inflation, and instability of the certain
46 job sectors particularly employed by low income and minority individuals), Policy
47 440.060MSS, "Housing Provision and Social Support to Immediately Alleviate Chronic
48 Homelessness in the United States" by addition and deletion to read as follows:
49
50

1 Housing Provision and Social Support to Immediately Alleviate Chronic
2 Homelessness in the United States, 440.060MSS
3 Our American Medical Association: (1) supports improving the health outcomes
4 and decreasing the health care costs of treating the chronically homeless through
5 clinically proven, high quality, and cost effective approaches which recognize the
6 positive impact of stable and affordable housing coupled with social services; (2)
7 will work with state medical societies to advocate for legislation implementing
8 stable, affordable housing, and appropriate voluntary social services as a first
9 priority in the treatment of chronically homeless individuals, without mandated
10 therapy or services compliance; and (3) supports the appropriate organizations in
11 developing an effective national plan to eradicate homelessness; and (4) supports
12 policy, including but not limited to, which endorses the restructuring of unfair and
13 power laden eviction policies, inflation-based rent control, just cause eviction
14 statutes, right to counsel, local, state, and/or national rental registries, and other
15 evidence-based measures (MSS Res 38, I-16) (AMA Res 208, A-17 Referred)
16 (Reaffirmed: MSS GC Report A, I-21); and be it further
17
18 RESOLVED, That our AMA amend their current policy to reduce the prevalence of
19 homelessness in the context of socioeconomic implications of public health crises and/or
20 emergencies (i.e., housing crisis, unregulated rental inflation, and instability of the
21 certain job sectors particularly employed by low income and minority individuals), Policy
22 H-160.903, "Eradicating Homelessness" by addition and deletion to read as follows:
23

24 Eradicating Homelessness, H-160.903
25 Our AMA:
26 (1) supports improving the health outcomes and decreasing the health care costs
27 of treating the chronically homeless through clinically proven, high quality, and
28 cost-effective approaches which recognize the positive impact of stable and
29 affordable housing coupled with social services;
30 (2) recognizes that stable, affordable housing as a first priority, without mandated
31 therapy or services compliance, is effective in improving housing stability and
32 quality of life among individuals who are chronically-homeless;
33 (3) recognizes adaptive strategies based on regional variations, community
34 characteristics and state and local resources are necessary to address this societal
35 problem on a long-term basis;
36 (4) recognizes the need for an effective, evidence-based national plan to eradicate
37 homelessness;
38 (5) encourages the National Health Care for the Homeless Council to study the
39 funding, implementation, and standardized evaluation of Medical Respite Care for
40 homeless persons;
41 (6) will partner with relevant stakeholders to educate physicians about the unique
42 healthcare and social needs of homeless patients and the importance of holistic,
43 cost-effective, evidence-based discharge planning, and physicians' role therein, in
44 addressing these needs;
45 (7) encourages the development of holistic, cost-effective, evidence-based
46 discharge plans for homeless patients who present to the emergency department
47 but are not admitted to the hospital;
48 (8) encourages the collaborative efforts of communities, physicians, hospitals,
49 health systems, insurers, social service organizations, government, and other

1 stakeholders to develop comprehensive homelessness policies and plans that
2 address the healthcare and social needs of homeless patients;
3 (9) (a) supports laws protecting the civil and human rights of individuals
4 experiencing homelessness, and (b) opposes laws and policies that criminalize
5 individuals experiencing homelessness for carrying out life-sustaining activities
6 conducted in public spaces that would otherwise be considered non-criminal
7 activity (i.e., eating, sitting, or sleeping) when there is no alternative private space
8 available; and
9 (10) recognizes that stable, affordable housing is essential to the health of
10 individuals, families, and communities, and supports policies that preserve and
11 expand affordable housing across all neighborhoods; and
12 (11) advocates for an overhaul of local eviction laws in states that have unfair and
13 power laden eviction policies, inflation-based rent control, just cause eviction
14 statutes, right to counsel, and creation of local, state, and/or national rental
15 registries to reduce the prevalence of homelessness; and be it further

16
17 RESOLVED, That our AMA amend their current policy to reduce the prevalence of
18 homelessness in the context of socioeconomic implications of public health crises and/or
19 emergencies (i.e., housing crisis, unregulated rental inflation, and instability of the certain
20 job sectors particularly employed by low income and minority individuals), Policy D-
21 440.920, "Support for the Prevention of Eviction and the Termination of Life-Essential
22 Utility Services During Public Health Emergencies" by addition and deletion to read as
23 follows:

24
25 Support for the Prevention of Eviction and the Termination of Life-Essential Utility
26 Services During Public Health Emergencies, D-440.920
27 Our AMA will advocate for: (1) policies that prevent evictions during public health
28 emergencies; and (2) prevention of termination of life-essential utilities during
29 public health emergencies; and (3) policies that reduce evictions and
30 homelessness including but not limited to the overhaul of highly punitive eviction
31 policies, inflation-based rent control, just cause eviction statutes, right to counsel,
32 and local, state, and/or national rental registries; and be it further

33
34 RESOLVED, That this resolution be immediately forwarded to our AMA House of
35 Delegates at the June 2022 Meeting.

36
37 VRC testimony was supportive. The Reference Committee agrees with amendments to
38 incorporate this resolution into a current pending MSS transmittal that seeks to
39 amend Eradicating Homelessness, H-160.903. We concluded that the immediate
40 forwarding clause is not needed because of the pending transmittal. Your Reference
41 Committee recommends the adoption of a substitute resolution in lieu of Resolution 013.

42
43 (45) RESOLUTION 020 - ADOPTION OF ACCESSIBLE MEDICAL DIAGNOSTIC
44 EQUIPMENT STANDARDS

45
46 **RECOMMENDATION A:**

47
48 **Substitute Resolution 020 be adopted in lieu of Resolution 020.**

1 **RESOLVED, That our AMA study the optimal ways to enforce proposed**
2 **federal accessibility standards for medical diagnostic equipment, with**
3 **report back by the 2023 Annual Meeting of the House of Delegates.**

5 **RESOLVED, Our AMA supports the formal adoption of enforceable accessibility**
6 **standards for Medical Diagnostic Equipment.**

8 VRC testimony was mixed. Your Reference Committee agrees that adoption of
9 accessibility standards is necessary, but also agrees with testimony that it is unclear who
10 will pay for the cost of meeting new Medical Diagnostic Equipment (MDE) standards. As
11 it remains unclear how to transition to those standards with minimal harm done to small
12 and privately-owned practices, more research is needed. We recommend a substitute
13 resolution be adopted in lieu of Resolution 020 refer the item for an external AMA study
14 with report back at time certain, given the possibility of pending regulations in the next
15 one to two years, and clarify the financial implications and the enforcement of proposed
16 MDE standards.

18 (46) **RESOLUTION 022 - ACCURACY AND AWARENESS FOR SEX**
19 **REPRESENTATION IN MEDICAL TEXTBOOKS**

21 **RECOMMENDATION A:**

23 **Policy D-295.310 and H-525.976 be reaffirmed in lieu of the second Resolve**
24 **of Resolution 022.**

26 **RECOMMENDATION B:**

28 **Substitute Resolution 022 be adopted in lieu of the remainder of Resolution**
29 **022 with a title change.**

31 **Title: “Accuracy of Sex & Gender Representation in Medical Educational**
32 **Materials”**

34 **RESOLVED, That our AMA support that medical textbooks and other medical**
35 **educational materials equitably, accurately, and comprehensively represent**
36 **people across the spectra of gender identity and phenotypic sex, especially**
37 **cisgender women and sexual and gender minorities; and be it further**

39 **RESOLVED, That our AMA support that anatomic images in medical**
40 **textbooks and other medical educational materials represent the diversity**
41 **and variations of human anatomy, in the contexts of both sexual physiology**
42 **and other organ physiology.**

44 **RESOLVED, Our AMA supports increased female sex, intersex, and transgender**
45 **representation in medical textbooks including anatomical images in sex specific and**
46 **nonspecific content; and be it further**

48 **RESOLVED, Our AMA recognizes the need for accurate depictions of female sex**
49 **anatomy including the clitoris and vulva length, morphology, nerves, and vasculature,**
50 **and variations in medical textbooks.**

1 VRC testimony was supportive of the spirit of the resolution but with amendments. The
2 Reference Committee agrees with the House Coordination Committee (HCC) that the
3 second resolved clause is reaffirmation of existing policies D-295.310 and H-525.976.
4 We agree with testimony to expand the language to include all medical educational
5 materials and recommend a substitute resolution to further clarify the intent of equitable
6 representation. Your Reference Committee recommends adoption of a substitute
7 resolution in lieu of Resolution 022.

8
9 D-295.310 Sex and Gender Based Medicine in Clinical Education
10 1. Our AMA will collaborate with Accreditation Council for Graduate Medical
11 Education, Liaison Committee on Medical Education, Commission on Osteopathic
12 College Accreditation, Association of American Medical Colleges, and
13 Accreditation Council for Continuing Medical Education to disseminate the work
14 produced by medical schools participating in the Accelerating Change in Medical
15 Education consortium and distribute pertinent information and a comprehensive
16 bibliography about the influence that sex and gender have upon clinical medicine.
17 2. Our AMA will work collaboratively with the Liaison Committee on Medical
18 Education and other interested organizations for the inclusion of sex- and gender-
19 based differences within the curricular content for medical school accreditation.

20
21 H-525.976 An Expanded Definition of Women's Health
22 Our AMA recognizes the term "women's health" as inclusive of all health
23 conditions for which there is evidence that women's risks, presentations, and/or
24 responses to treatments are different from those of men, and encourages that
25 evidence-based information regarding the impact of sex and gender be
26 incorporated into medical practice, research, and training.

27
28 (47) RESOLUTION 024 - REFORMING THE FDA ACCELERATED APPROVAL
29 PROCESS

30
31 **RECOMMENDATION A:**

32
33 **Substitute Resolution 024 be adopted in lieu of Resolution 024.**

34
35 **RESOLVED, Our AMA study potential mechanisms to address issues in the**
36 **Food & Drug Administration's Accelerated Approval process, which may**
37 **include ameliorating delays in post-marketing confirmatory study timelines,**
38 **expiration dates for accelerated approvals, withdrawal of approvals when**
39 **post-marketing studies fail, justifications for the use of surrogate endpoints**
40 **used to demonstrate clinical benefit, and special considerations for certain**
41 **diseases.**

42
43 **RESOLVED, Our AMA supports ongoing efforts to clarify regulations regarding the Food**
44 **and Drug Administration's Accelerated Approval process to 1) set explicit standards for**
45 **the enrollment and completion timeline of post-marketing confirmatory studies prior to the**
46 **granting of accelerated approval to avoid the persistent delays observed with post-**
47 **marketing trials to date 2) introduce standardized expiration dates for accelerated**
48 **approvals to significantly ease the process of withdrawing drugs for which post-marketing**
49 **studies fail and 3) set explicit guidelines for the endpoints used in confirmatory studies to**
50 **ensure that confirmatory studies demonstrate clinical benefit.**

1 RESOLVED, Our AMA supports granting the Food and Drug Administration flexibility to
2 grant exemptions to new standards for post-marketing surveillance if the agency
3 determines that the nature of the disease indication prevents a sponsor from acting in
4 accordance with the established standards.

5
6 VRC testimony was split between those supporting and those offering amendments.
7 Your Reference Committee thanks the authors for bringing this important issue forward
8 and agrees with VRC testimony that the resolution would benefit from further external
9 study by the AMA to make recommendations on how they would proceed in this complex
10 regulatory space, with the explicit suggestions included in the language here for possible
11 issues to address. We recommend Substitute Resolution 024 be adopted in lieu of
12 Resolution 024.

13
14 (48) RESOLUTION 030 - SNAP EXPANSION FOR DACA RECIPIENTS

15
16 **RECOMMENDATION A:**

17
18 **Substitute Resolution 030 be adopted in lieu of Resolution 030.**

19
20 **RESOLVED, That our AMA will actively support expansion of SNAP to**
21 **Deferred Action Childhood Arrivals (DACA) recipients who would otherwise**
22 **qualify.**

23
24 RESOLVED, our AMA will amend Resolution D-440.927, Opposition to Regulations that
25 Penalize Immigrants for Accessing Health Care Services, by insertion to read as follows:

26
27 Opposition to Regulations that Penalize Immigrants for Accessing Health Care Services,
28 D-440.927

29
30
31
32
33
34
35

1. Our AMA will, upon the release of a proposed rule, regulations, or policy
that would deter immigrants and/or their dependents from utilizing non-
cash public benefits including but not limited to Medicaid, CHIP, WIC, and
SNAP, issue a formal comment expressing its opposition.
2. Our AMA will actively support expansion of SNAP to Deferred Action
Childhood Arrivals (DACA) recipients.

36
37 VRC testimony supports the novelty of the resolution. Your Reference Committee
38 agrees with VRC concerns that the resolves did not specify if the AMA should support
39 expanding SNAP to all DACA recipients or just those who would qualify for SNAP. We
therefore recommend adoption of substitute language in lieu of Resolution 030.

40
41 (49) RESOLUTION 035 - FDA INDICATIONS FOR OFF-LABEL & OVER-THE-
42 COUNTER DRUGS

43
44 **RECOMMENDATION:**

45
46 **Substitute Resolution 035 be adopted in lieu of Resolution 035 with a title**
change.

47
48
49 **Title: "Comparative Effectiveness Research"**

1 **RESOLVED, That our AMA study the feasibility of including comparative**
2 **effectiveness studies in various FDA drug regulatory processes, including**
3 **comparisons with existing standard of care, available generics and**
4 **biosimilars, and drugs commonly used off-label and over-the-counter; and**
5 **be it further**

6
7 **RESOLVED, That our AMA ask the National Institutes of Health to support**
8 **and fund comparative effectiveness research for approved drugs, including**
9 **comparisons with existing standard of care, available generics and**
10 **biosimilars, and drugs commonly used off-label and over-the-counter.**

11
12 RESOLVED, That our AMA ask the Food & Drug Administration (FDA) to consider
13 reforms to the investigational new drug (IND) approval process, such that clinical trials
14 compare INDs to widely available structurally similar drugs with reasonable evidence-
15 based likelihood of benefit for the same purpose, especially generics, biosimilars, and
16 drugs used off-label or over-the-counter; and be it further

17
18 RESOLVED, That our AMA ask the National Institutes of Health to support and fund
19 research comparing already approved medications to widely available structurally similar
20 drugs with reasonable evidence-based likelihood of benefit for the same clinical purpose,
21 especially generics, biosimilars, and drugs used off-label or over-the-counter.

22
23 VRC testimony was mixed. Your Reference Committee agrees with testimony that the first
24 Resolve should be amended to request an external study to examine the nuances of the
25 FDA's processes. Additionally, we agree with testimony that the language of the second
26 Resolve can be clarified to reflect the intent. We support this substitute resolution put
27 forward by the authors to be adopted in lieu of Resolution 035. Lastly, the title change
28 reflects the clarified intent of the resolution.

29
30 (50) **RESOLUTION 033 - REFORMING THE MEDICARE PART B "BUY AND BILL"**
31 **PROCESS TO ENCOURAGE BIOSIMILAR USE**

32
33 **RECOMMENDATION:**

34
35 **The Substitute Resolution 033 be adopted in lieu of Resolution 033.**

36
37 **RESOLVED, That our AMA encourage the Centers for Medicare and**
38 **Medicaid Services (CMS) to:**

39 (a) **identify groups of Physician-Administered Drugs (PADs), comprised of**
40 **both branded/patented drugs and all generics and biosimilar versions**
41 **(based on FDA approvals), to be reimbursed at the same rate to incentivize**
42 **selection of less expensive generics and biosimilars for patients; and**
43 (b) **decide the rate at which a group of PADs will be reimbursed such that**
44 **physicians are compensated appropriately for acquisition, inventory,**
45 **carrying, and administration costs, including but not limited to using the**
46 **average or median ASP for all PADs in a group, creating fixed fees to be**
47 **used for all PADs in a group when multiple exist, and indexing spending**
48 **increases for a group of PADs to the rate of inflation.**

1 RESOLVED, That our AMA encourage the Centers for Medicare and Medicaid Services
2 (CMS) to identify groups of Physician-Administered Drug biosimilars (based on FDA
3 approvals) to be reimbursed at the same rate to incentivize selection of less expensive
4 biosimilars for patients; and be it further

5
6 RESOLVED, That our AMA encourages the Centers for Medicare and Medicaid
7 Services to decide the rate at which a group of biosimilars will be reimbursed such that
8 physicians are compensated appropriately for acquisition, inventory, carrying, and
9 administration costs, including but not limited to using the average or median ASP for all
10 biosimilars in a group, created fixed fees to be used for all biosimilars in a group when
11 multiple exist, and indexing spending increases for a group of biosimilars to the rate of
12 inflation.

13
14 VRC testimony was mixed. Your Reference Committee agrees with testimony from the
15 authors to clarify the language by merging the second Resolve into the first. We are
16 open to an external study if this is passed by the MSS Assembly and forwarded to the
17 AMA House of Delegates. The Reference Committee recommends adoption of the
18 substitute resolution in lieu of Resolution 033.

19
20 (51) RESOLUTION 055 - INCORPORATING HOLOCAUST EDUCATION IN MEDICAL
21 SCHOOLS ON INTERNATIONAL REMEMBRANCE DAY

22
23 **RECOMMENDATION:**

24
25 **Substitute Resolution 055 be adopted in lieu of Resolution 055.**

26
27 RESOLVED, Our AMA host an annual event in support of International
28 Holocaust Remembrance Day (January 27) to provide education to medical
29 trainees about the role of physicians in the Holocaust.

30
31 RESOLVED, Our AMA encourage allopathic and osteopathic medical schools to provide
32 education about physician roles in the Holocaust in an annual event to be held on
33 International Holocaust Remembrance Day (January 27) or a time near this date; and be
34 it
35 further

36 RESOLVED, Our AMA encourage the LCME to continue to survey medical schools on a
37 regular basis (e.g., every 5 years) on the manner in which education is presented on the
38 roles of physicians in the Holocaust, thus creating an opportunity to track progress and
39 share creative strategies and successes; and be it further

40
41 RESOLVED, Our AMA consider bringing the issue of education regarding physician roles
42 in the Holocaust to the World Medical Association; and be it further

43
44 RESOLVED, Our AMA supports investigation, evaluation and dissemination activities to
45 enhance student and practitioner understanding of and reflection on the complex legacies
46 of physician involvement in the Holocaust.

47
48 VRC testimony was supportive of amendments due to concerns of feasibility. The
49 Reference Committee agrees with testimony to address the lack of feasibility by placing

1 the onus on the AMA to organize education around this issue. Therefore, we recommend
2 adoption of a substitute resolution in lieu of Resolution 055.

3
4 (52) IOP/ETF REPORT - INTERNAL OPERATING PROCEDURES/ELECTION TASK
5 FORCE REPORT

6
7 **RECOMMENDATION:**

8
9 The following Substitute Recommendations be adopted in lieu of IOP/ETE
10 Report.

11
12 1. That our AMA-MSS Governing Council disband the 2021-2022 IOP/Election
13 Task Force.

14
15 2. That our AMA-MSS Governing Council establish a task force entitled “2022
16 IOP Task Force” with the following parameters:

17 (i) The task force shall be composed of at least one (1) and no more than two
18 (2) members of each AMA-MSS region.

19 (ii) Members of the 2021-2022 IOP/Election Task Force shall be given first
20 priority to serve on the 2022 IOP Task Force.

21 (iii) Remaining regional seats on the 2022 IOP Task Force shall be filled
22 through recommendation by Region Chairs and decision by the AMA-MSS
23 Governing Council.

24 (iv) Members of the 2022 IOP Task Force shall not be eligible to run for a
25 nationally-elected position within the AMA-MSS for the duration of their
26 tenure.

27 (v) The task force shall be created by July 2022, and it shall exist for the
28 duration required to complete the requested study.

29
30 3. That our AMA-MSS charge the 2022 IOP Task Force with studying the
31 changes to the MSS Internal Operating Procedures (IOP) proposed by the
32 2021-2022 IOP/Election Task Force through a report due by the Interim 2022
33 MSS Assembly meeting, or its equivalent.

34
35 4. That the 2022 IOP Task Force conduct regular and frequent open forums
36 between the Annual 2022 and Interim 2022 meetings, in partnership with
37 regional and local leadership, that equitably allow for a diversity of AMA-
38 MSS members to provide feedback on the 2021-2022 IOP/Election Task Force
39 Report.

40
41 5. That the 2022 IOP Task Force includes a section in their report that details
42 the process of conducting these open forums; the diversity of participation
43 by AMA-MSS members, regions, and leadership; the feedback received; and
44 their responses to the feedback.

45
46 Several students on the VRC commended the efforts of this task force in constructing such
47 a thoughtful and comprehensive report, and your Reference Committee would like to echo
48 their sentiments. Multiple concerns were raised on VRC from a range of individuals,
49 committees, and leadership. To allow for the incorporation of this feedback and to allow

1 additional parties to be involved in this process, we recommend the substitute
2 recommendations.

3
4 Due to the complex and interdependent process that is IOP revision, we believe it is
5 important to move forward with a single unified proposal incorporating carefully considered
6 feedback from all stakeholders with all changes prior to review by OGC and eventual
7 adoption.

8
9 Our substitute recommendations address concerns enumerated on the VRC. Due to
10 multiple concerns that previous task force members would not have the option to run for
11 elections, we have come to the recommendation of creating a new task force and allowing
12 prior members to continue on if they wish.

13
14 We understand that there have also been concerns that the MSS members have not been
15 able to have adequate time nor knowledge of this report. To address this concern, we
16 have recommended that there should be more involvement on behalf of regional leaders
17 and local leaders in the process of getting feedback on the proposed changes to our IOPs.
18 We offer these substitute recommendations with the intent that a structured comment
19 period will allow for the development of a robust, fully-reviewed, and unified proposal that
20 can be dispatched in an efficient and organized manner at our I-22 meeting.

21
22 Your Reference Committee recommends adoption of the substitute recommendations in
23 lieu of the IOP/ETF Report.

24
25 (53) COLRP COLA REPORT A - PROMOTION AND SUPPORT OF PHYSICIAN,
26 STUDENT, AND PATIENT PARTICIPATION IN GOVERNMENT
27 RESOLUTION 002 - SUPPORTING VOTING FOR HOSPITALIZED PATIENTS

28 **RECOMMENDATION A:**

30
31 **COLRP COLA Report A be amended by addition of a new Recommendation**
32 **to read as follows:**

33
34 **That our AMA-MSS study trends in voting participation of physicians and**
35 **trainees in order to make recommendations on how to engage medical**
36 **professionals in the voting process, with report back by the I-22 AMA-MSS**
37 **meeting (or its equivalent).**

38 **RECOMMENDATION B:**

40
41 **COLRP COLA Report A be adopted as amended in lieu of Resolution 002.**

43 **COLRP COLA Report A**

44 Your Committee on Long Range Planning and Committee on Legislation and Advocacy

45 recommends that the following recommendations be adopted:

46 RESOLVED, That our AMA recognize voting as a dimension of public health; and be it
47 further

48
49 RESOLVED, That our AMA formally support non-partisan voter registration in healthcare

1 settings, including efforts to identify and aid patients who require additional assistance to
2 vote in national elections.

3
4 Your Committee on Long Range Planning and Committee on Legislation and Advocacy
5 recommends that the following recommendations be not adopted and the remainder of
6 this report be filed:

7 RESOLVED, That our AMA promote civic engagement among its members through
8 actions, including but not limited to:

9 a) Partnering with Civic Health Month or another stakeholder at the crossroads of civic
10 engagement and health
11 b) Disseminating nonpartisan election information for national elections to its members
12 c) Encourage its members to identify patients who may require additional
13 assistance to vote in national elections; and be it further

14
15 RESOLVED, That our AMA encourage medical schools and entities employing healthcare
16 professionals to target and facilitate 100% eligible employee voter registration and
17 participation.

18
19 Resolution 002

20
21 RESOLVED, That our AMA amend policy H-440.805, "Support for Safe and Equitable
22 Access to Voting" by insertion as follows:

23
24 **H-440.805 Support for Safe and Equitable Access to Voting**

25 Our AMA will support measures to facilitate safe and equitable access to voting as a
26 harm-reduction strategy to safeguard public health and mitigate unnecessary risk of
27 infectious disease transmission by measures including but not limited to: (a) extending
28 polling hours; (b) increasing the number of polling locations; (c) extending early voting
29 periods; (d) mail-in ballot postage that is free or prepaid by the government; (e)
30 adequate resourcing of the United States Postal Service and election operational
31 procedures; (f) improve access to drop off locations for mail-in or early ballots; (g) use of
32 a PO Box for voter registration; (h) improving accessible voting measures for
33 hospitalized patients.

34 Our AMA will oppose requirements for voters to stipulate a reason in order to receive a
35 ballot by mail and other constraints for eligible voters to vote-by-mail.

36
37 VRC testimony was supportive of COLRP COLA Report A and Resolution 002. MSS
38 recently supported a resolution that will be brought to the AMA Annual Meeting of the
39 House of Delegates to address what the authors are attempting to amend in Resolution
40 002. We recommend further study of the third and fourth Resolve clauses of COLRP
41 COLA Report A. Thus, Your Reference Committee recommends adopting the COLRP
42 COLA Report A as amended in lieu of Resolution 002.

1 RECOMMENDED FOR REFERRAL 2

3 (54) RESOLUTION 021 - EXPANDING AND RECLASSIFYING EMERGENCY
4 MEDICAL SERVICES

5 **RECOMMENDATION:**

6 **Resolution 021 be referred.**

7
8 RESOLVED, Our AMA recognizes the impact of health care services provisioned by
9 emergency medical service (EMS) providers on patient health outcomes; and be it
10 further

11 RESOLVED, Our AMA supports state and federal classification and establishment of
12 EMS as an essential service; and be it further

13 RESOLVED, That our AMA amend H-130.970 by addition:

14
15 **Access to Emergency Services H-130.970**

16 (A) Emergency services should be defined as those health
17 care services that are provided in a hospital emergency facility
18 or involving out-of-hospital treatment and transportation after
19 the sudden onset of a medical condition that manifests itself by
20 symptoms of sufficient severity, including severe pain, that the
21 absence of immediate medical attention could reasonably be
22 expected by a prudent layperson, who possesses an average
23 knowledge of health and medicine, to result in: (1) placing the
24 patient's health in serious jeopardy; (2) serious impairment to
25 bodily function; or (3) serious dysfunction of any bodily organ
26 or part.

27 (B) All physicians and health care facilities have an ethical
28 obligation and moral responsibility to provide needed
29 emergency services to all patients, regardless of their ability to
30 pay. (Reaffirmed by CMS Rep. 1, I-96)

31 (C) All health plans should be prohibited from requiring prior
32 authorization for emergency services.

33 (D) Health plans may require patients, when able, to notify the
34 plan or primary physician at the time of presentation for
35 emergency services, as long as such notification does not
36 delay the initiation of appropriate assessment and medical
37 treatment.

38 (E) All health payers should be required to cover emergency
39 services provided by physicians, and hospitals to plan
40 enrollees, as required under Section 1867 of the Social
41 Security Act (i.e., medical screening examination and further

1 examination and treatment needed to stabilize an "emergency
2 medical condition" as defined in the Act) without regard to prior
3 authorization or the emergency care physician's contractual
4 relationship with the payer.

5
6 (F) Failure to obtain prior authorization for emergency services
7 should never constitute a basis for denial of payment by any
8 health plan or third party payer whether it is retrospectively
9 determined that an emergency existed or not.

10
11 (G) States should be encouraged to enact legislation holding
12 health plans and third party payers liable for patient harm
13 resulting from unreasonable application of prior authorization
14 requirements or any restrictions on the provision of emergency
15 services.

16
17 (H) Health plans should educate enrollees regarding the
18 appropriate use of emergency facilities and the availability of
19 community-wide 911 and other emergency access systems
20 that can be utilized when for any reason plan resources are not
21 readily available.

22
23 (I) In instances in which no private or public third party
24 coverage is applicable, the individual who seeks emergency
25 services is responsible for payment for such services.

26
27 2. Our AMA will work with state insurance regulators, insurance
28 companies and other stakeholders to immediately take action
29 to halt the implementation of policies that violate the "prudent
30 layperson" standard of determining when to seek emergency
31 care.

32
33 VRC testimony was supportive. The Reference Committee agrees with the spirit of this
34 resolution. We also agree with testimony from the American College of Emergency
35 Physicians (ACEP) that this is a complicated issue and would benefit from clarification of
36 the second and third resolved clauses. We recommend Resolution 021 be referred.

37
38 (55) RESOLUTION 036 - FORTIFYING FAT-SOLUBLE FOODS WITH VITAMIN D

39
40 **RECOMMENDATION:**

41
42 **Resolution 036 be referred.**

43
44 RESOLVED, That our AMA encourages relevant federal agencies such as the FDA to
45 adopt a standard of identity encompassing the addition of vitamin D to a variety of fat-
46 soluble food items.

47
48 VRC testimony was supportive of the spirit to address the timely issue of Vitamin D
49 deficiency. There was testimony to share concern about the feasibility of the ask. Your
50 Reference Committee found that the whereas clauses lack sufficient evidence and the

1 ask of the resolve needs more specificity. We recommend referral of Resolution 036 to a
2 committee with subject-matter expertise to consider additional evidence and explore
3 what actions the FDA and USDA can take.
4

5 (56) RESOLUTION 042 - CONDEMNATION OF NON-THERAPEUTIC
6 STERILIZATION FOR CONTRACEPTION OF WOMEN WITH DISABILITIES
7 WITHOUT INFORMED PATIENT CONSENT
8

9 **RECOMMENDATION:**

10 **Resolution 042 be referred.**

11 RESOLVED, That our AMA advocate for and actively support national legislation that
12 bans guardians from attaining a sterilization deemed non-therapeutic for their disabled
13 patient in their care.

14 VRC testimony was supportive of referral. Your Reference Committee agrees with
15 testimony that referral to study would help expand the ask and include person first
16 language. The resolution as written is not supported by sufficient evidence, and can be
17 expanded to encompass a broader scope for harm of forced sterilization. Of note,
18 The American College of Obstetricians and Gynecologists (ACOG) commented that this
19 topic is currently being looked into, although support for this as of now may be
20 premature. We recommend this resolution be referred.
21

22 (57) RESOLUTION 049 - ADVOCATING FOR THE INCLUSION OF WEIGHT BIAS
23 TRAINING FOR MEDICAL STUDENTS
24

25 **RECOMMENDATION:**

26 **Resolution 049 be referred.**

27 RESOLVED, Our AMA recognizes the negative effects of weight bias on patients and
28 physicians and be committed to addressing it alongside other forms of bias; further be it

29 RESOLVED, Our AMA supports the inclusion of weight bias education for medical
30 students as part of the anti-bias training curricula, while working with relevant
31 stakeholders; further be it

32 RESOLVED, To support weight-inclusive health policy, our AMA amends Policy
33 H440.821, "Person-First Language for Obesity"
34

35 **Person-First Language for Obesity to Decrease Weight Bias, H-440.821**

36 Our AMA: (1) encourages the use of person-first language (patients with obesity,
37 patients affected by obesity) in all discussions, resolutions and reports regarding
38 obesity; (2) encourages the use of preferred terms in discussions, resolutions and
39 reports regarding patients affected by obesity including weight and unhealthy
40 weight, and discourage the use of stigmatizing terms including obese, morbidly
41 obese, and fat; (3) encourages healthcare providers to use evidence-based
42 interventions when discussing health and disease with patients; and (43) will
43 educate health care providers on the importance of person-first language for

1 treating patients with obesity, including the harmful effects of weight bias and other
2 similar assumptions; equipping their health care facilities with proper sized
3 furniture, medical equipment and gowns for patients with obesity; and having
4 patients weighed respectfully.

5
6 VRC testimony was mixed. Your Reference Committee agrees with testimony that the
7 resolution is not well-supported by evidence. We believe the authors have managed to
8 establish that weight bias in providers is an issue, but more data is needed to support
9 which solution(s) will be best to address this. The Reference Committee recommends
10 Resolution 049 be referred to study.

11
12 (58) GC REPORT B – RESOLUTION TASK FORCE UPDATE 2022
13

14 **RECOMMENDATION:**

15 **Recommendations from GC Report B be referred.**

16 Your AMA-MSS GC recommends the following recommendations be adopted and the
17 remainder of the report be filed:

18 RESOLVED, That the original recommendations of the 2018 AMA-MSS Resolutions
19 Task Force continue to be upheld, implemented, or supplemented as follows:

20 **~~630.075MSS Pilot Implementation of the 2018 Resolution Task Force~~**
21 **~~Recommendations~~Ongoing implementation of MSS resolution process**
22 **reforms:**

23 MSS will:

- 24 1. Invest in further education efforts of the resolution process by: a) training
25 RD/ADs to provide better guidance on the various mechanisms available for
26 advocacy through the AMA and MSS; and
27 b) Making a Maintaining videos and “cheat sheets” explaining the basics of
28 Parliamentary Procedure and the most common mistakes made;
- 29 2. Elevate the stature of non-resolution avenues for advocacy by: a) clarifying
30 what makes a successful GC Action Item, publicizing GC Action Item Requests
31 widely, and increasing the prestige of these proposals; b) creating a new,
32 informational category of business for the Assembly, which would be presented
33 by authors in a separate programming session at the meeting. The process for
34 accepting and reviewing submissions for this category of business and executing
35 this session will be directed by MSS Standing Committees and the MSS GC Vice
36 Chair; c) Providing a formal document to its members as proof of significant, non-
37 resolution-related work, which they can provide as support for a conference
38 funding and time-off request. Examples of significant, non-resolution-related work
39 include serving as a Delegate or on a Committee;
- 40 3. Encourage mentorship between its members and throughout the AMA by: a)
41 Creating a voluntary indicator on the Open Forum and during the resolution draft
42 phase that shows if the originator is a first-time author. This visibility would allow
43 more experienced writers to help new authors and mentor them through the
44 process; and b) Requiring that all external resolutions authors to contact be sent
45 to the relevant specialty society prior to submission to the MSS Assembly to
46 receive input for consideration by the Reference Committee;

1 4. Improve transparency of resolution feedback among all actors throughout the
2 resolution process by: a) tasking the Government Relations Advocacy Fellow and
3 Section Delegates with analyzing the Open Forum and resolution drafts for
4 resolutions that the AMA Federal Advocacy Office would be interested in
5 reviewing. These roles are noted by the MSS GC to have an appropriate level of
6 understanding of what would be suitable for review by the Federal Advocacy
7 Office; b) Broadening the functional scope of the House of Delegates
8 Coordinating Committee (HCC) so HCC members can contact Region leaders to
9 improve resolutions that would otherwise likely be reaffirmed; c) Requiring
10 primary reviewers' to ~~send~~ feedback summary emails to be sent to the primary
11 author's Region Chair and Region Delegation Chair in order to allow Regions to
12 incorporate draft feedback into their Region authorship voting if they choose to;
13 d) Requesting that HCC post a summary of their comments from the draft review
14 process to the VRC; e) Requesting that RD/ADs provide meaningful testimony on
15 the VRC for resolutions they reviewed, especially in cases where important
16 recommendations from feedback provided to authors were not considered;
17 5. Streamline existing procedures in the resolution process by: a) Coordinating
18 Region resolution authorship/support through a central AMA email process so
19 more medical school sections can be reached; b) Giving HCC responsibility to
20 review all submissions and place items on a Reaffirmation Consent Calendar.
21 Items on the Reaffirmation Consent calendar will not receive detailed staff review
22 except analysis from Legal Counsel; c) Adjusting resolution deadlines to allow
23 more time for review between the final submission and the VRC;
24 6. Change its scoring rubric to: a) Reaffirm its existing rubric categories of
25 authorship, clarity, research quality, scope, feasibility, novelty, addressing the
26 MSS Policy Objectives and AMA Strategic Focus Areas, thoughtful response to
27 feedback, and scoring on a quantitative scale; b) For external resolutions,
28 increase the scoring weight of addressing the MSS Policy Objectives over that of
29 addressing the AMA Strategic Focus Areas, as a way to promote Section
30 objectives; c) Include scoring of the fiscal note as a consideration for feasibility,
31 instead of as a separate rubric category;
32 7. Reaffirm its existing process of creating the Assembly's Order of Business
33 according to quantitative resolution scores;
34 8. Create and further opportunities for high-quality discussion in the Assembly by:
35 a) The MSS Reference Committee noting in its rationale whether resolutions are
36 suitable for a GC Action Item. GC Action items may be submitted by the
37 originating author or by individual members of the Section; and
38 9. Improve continuity of its advocacy efforts from meeting to meeting by: a) Requiring
39 authors of external resolutions to sign a virtual acknowledgement
40 agreeing to help the Section Delegates and Regional Delegates in bringing their
41 resolution to the AMA HOD if their resolution is passed by the Assembly; b) Tracking
42 the outcome of MSS-initiated external resolutions that have had
43 influence or impact. An example of influence or impact is action taken or
44 statements made by the AMA Board of Trustees. These outcomes can be
45 recorded by the MSS GC HOD Reference Committee Team Leads, and
46 Regional Delegation Chairs and shared with the Section membership; and c)
47 Giving the MSS GC responsibility for conducting an annual survey that sets MSS
48 Policy Objectives for the given year;
49 10. Continue creating a process by which Standing Committee reports undergo
50 review in a similar manner to the resolution review process

1 11. Continue a trial period of virtual extractions from the Reference Committee
2 Report for future in-person meetings and report on the satisfaction and outcomes
3 of this process to the Section;
4 12. Work with relevant stakeholders including relevant AMA-MSS Standing
5 Committees, AMA liaisons, partner medical student organizations, the AMA
6 Center for Health Equity, and others to continue building more permanent
7 processes by which our AMA-MSS can better evaluate its resolutions for their
8 impact on equity; and
9 13. Continue investigating methods to improve institutional memory, including
10 potentially a system of guides required from AMA-MSS original authors
11 whenever their resolution is adopted to be sent to the AMA HOD.
12 ; and be it further
13

14 RESOLVED, That these changes, and the AMA-MSS resolutions process as a whole,
15 will be re-evaluated in an AMA-MSS Governing Council report to be presented 5 years
16 after the adoption of these recommendations.

17 VRC testimony was not supportive of the report recommendations as written and offered
18 amendments and/or supported for referral. The Reference Committee agrees with VRC
19 testimony that the trial period of virtual extractions in subpoint 11 is concerning.

21 We believe that contributions from other MSS stakeholders is important to ensure MSS
22 Report B includes input from MSS Caucus, Regions, and general MSS members.

25 Your Reference Committee shares concerns with VRC testimony on subpoint 12 to
26 evaluate resolutions based on their equity impact. The MSS has many policy objectives
27 that should be taken into consideration in addition to equity.

29 We believe that allowing extractions to take place both virtually and in person, soliciting
30 input from MSS members, and integrating MSS policy objectives into the
31 recommendations would strengthen the report. We encourage referral of this report to a
32 committee with subject matter expertise. Your Reference Committee recommends referral
33 of GC Report B.

35 (59) MIC CGPH REPORT A - MENTAL HEALTH REFORM IN PRISONS

37 **RECOMMENDATION:**

39 **Recommendations from MIC CGPH Report A be referred.**

41 Your Minority Issues Committee and Committee on Global and Public Health
42 recommend that the following Resolved clauses be adopted in lieu of the proposed
43 Resolved clause(s) and the remainder of this report be filed:

45 RESOLVED That our AMA supports conducting mental health screening of all
46 individuals entering or reentering the prison system in order to improve diversion
47 practices as well as treatment access

1 RESOLVED our AMA advocates for the continuation of mental health care for individuals
2 post-incarceration and the development or exacerbation of mental health illness/needs
3 by screening individuals upon release
4
5 RESOLVED our AMA supports research for other ways to best help individuals with
6 mental health needs (universalized method and implementation of effective screening)
7
8 VRC testimony was limited. Your Reference Committee agrees with testimony that the
9 language in the second resolved clause can be clarified and the third resolved clause is
10 not supported by the report. We recommend referral of the recommendations of MIC
11 CGPH Report A.

1 RECOMMENDED FOR NOT ADOPTION 2

3 (60) RESOLUTION 019 - IMPROVING SAFETY OF PLANNED HOME BIRTHS
4 THROUGH MIDWIFERY LICENSING AND REGULATION

5 **RECOMMENDATION:**

6 **Resolution 019 not be adopted.**

7
8
9 RESOLVED, Our AMA will encourage integration of community-based midwifery
10 practice into the healthcare system to promote maternal and neonatal health and health
11 equity by amending policy D-35.989, Midwifery Scope of Practice and Licensure, to read
12 as follows:

13
14 **Midwifery Scope of Practice and Licensure, D-35.989:**

15 Our AMA will:

16 (1) only advocate in legislative and regulatory arenas for the licensing of
17 midwives who are certified by the American College of Nurse-Midwives (or its
18 predecessor organizations) or whose education meets the International
19 Confederation of Midwives Global Standards for Midwifery Education;
20 (2) support state legislation regarding appropriate physician and regulatory
21 oversight of midwifery practice, under the jurisdiction of state nursing and/or
22 medical boards;
23 (3) continue to monitor state legislative activities regarding the licensure and
24 scope of practice of midwives; and
25 (4) work with state medical societies and interested specialty societies to
26 advocate in the interest of safeguarding maternal and neonatal health regarding
27 the licensure and the scope of practice of midwives.

28
29 RESOLVED, Our AMA will encourage informed choice in birth setting and support
30 legislation to improve safety of planned home birth by amending policy H-245.971,
31 Home Deliveries, to read as follows:

32
33 **Planned Home Births Deliveries H-245.971**

34 Our AMA: (1) supports the recent American College of Obstetricians and
35 Gynecologists (ACOG) statement that "the safest setting for labor, delivery, and
36 the immediate post-partum period is in the hospital, or a birthing center within a
37 hospital complex, that meets standards jointly outlined by the American Academy
38 of Pediatrics (AAP) and ACOG, or in a freestanding birthing center that meets the
39 standards of the Accreditation Association for Ambulatory Health Care, The Joint
40 Commission, or the American Association of Birth Centers" informing pregnant
41 people inquiring about planned home birth of its risks and benefits based on
42 recent evidence; and (2) supports state legislation that helps ensure safe
43 deliveries and healthy babies by acknowledging that the safest setting for labor,
44 delivery and the immediate post-partum period is in the hospital, or a birthing
45 center within a hospital complex, that meets standards jointly outlined by the AAP
46 and ACOG, or in a freestanding birthing center that meets the standards of the
47 Accreditation Association for Ambulatory Health Care, The Joint Commission, or
48 the American Association of Birth Centers; and (3) supports state legislation that

1 helps achieve favorable home birth outcomes by facilitating the appropriate
2 selection of candidates for home birth; increasing the availability of a certified
3 nurse-midwife, certified midwife or midwife whose education and licensure meet
4 International Confederation of Midwives' Global Standards for Midwifery
5 Education; and establishing protocols for ready access to consultation and safe
6 and timely transport to nearby hospitals.

7
8 VRC testimony was mixed. Your Reference Committee agrees with testimony from
9 The American College of Obstetricians and Gynecologists (ACOG) that the resolution as
10 written would create an unnecessary scope battle. Additionally, we agree with testimony
11 that the whereas clauses do not support the link between lack of licensing and poorer
12 outcomes. Therefore, the Reference Committee recommends Resolution 019 not be
13 adopted.

14
15 (61) RESOLUTION 025 - MEDICAL HISTORIES OF GAMETE DONORS AND
16 DONOR CONCEIVED PEOPLE

17
18 **RECOMMENDATION:**

19
20 **Resolution 025 not be adopted.**

21
22 RESOLVED, That our AMA recognize that physicians have an ethical duty to verify the
23 accuracy of medical histories provided by gamete donors with medical records at the
24 time of gamete donation; and it be further

25
26 RESOLVED, That our AMA encourage physicians to obtain regular and pertinent
27 updates to the medical histories provided by gamete donors and donor conceived
28 persons in their care, and communicate these updates to recipient families or the sperm
29 or oocyte clinics from where the gametes were obtained, so that pertinent medical
30 updates may be shared with the gamete donor and all recipient families that used the
31 same donor.

32
33 VRC testimony was limited and opposed the resolution as written. Your Reference
34 Committee agrees with concerns that this resolution is adding an unintended liability
35 burden to physicians. We recommend Resolution 025 not be adopted.

36
37 (62) RESOLUTION 032 - SUPPORT FOR MANDATED NURSE-PATIENT RATIOS

38
39 **RECOMMENDATION:**

40
41 **Resolution 032 not be adopted.**

42
43 RESOLVED; That our AMA amend policy H-360.986 to read as follows

44
45 **Professional Nurse Staffing in Hospitals H-360.986**

46 The AMA: (1) encourages medical and nursing staffs in each facility to closely monitor
47 the quality of medical care to help guide hospital administrations toward the best use of
48 resources for patients;
49 (2) encourages medical and nursing staffs to work together to develop and implement in-
50 service education programs and promote compliance with established or pending

1 guidelines for unlicensed assistive personnel and technicians that will help assure the
2 highest and safest standards of patient care;
3 (3) encourages medical and nursing staffs to use identification mechanisms, e.g.
4 badges, that provide the name, credentials, and/or title of the physicians, nurses, allied
5 health personnel, and unlicensed assistive personnel in facilities to enable patients to
6 easily note the level of personnel providing their care;
7 (4) encourages medical and nursing staffs to develop, promote, and implement
8 educational guidelines for the training of all unlicensed personnel working in critical care
9 units, according to the needs at each facility; and
10 (5) encourages medical and nursing staffs to work with hospital administrations to
11 assure that patient care and safety are not compromised when a hospital's environment
12 and staffing are restructured.
13 (6) supports the development of mandated minimum nurse-patient ratios based on
14 acuity level and patient safety.

15
16 VRC testimony was mixed. The Reference Committee agrees with testimony that the
17 specifics of practice of other healthcare providers is outside the AMA's scope. We
18 recommend Resolution 032 not be adopted.

19
20 (63) RESOLUTION 034 - PHARMACY ACCESS TO HUMAN IMMUNODEFICIENCY
21 VIRUS (HIV) PRE-EXPOSURE PROPHYLAXIS (PREP) & POST-EXPOSURE
22 PROPHYLAXIS (PEP)

23
24 **RECOMMENDATION:**

25
26 **Resolution 034 not be adopted.**

27
28 RESOLVED, That our AMA support federal and state efforts to make HIV PrEP
29 prescribable by pharmacists with evidence of a recent negative HIV test in accordance
30 with best practice guidelines, including efforts to make rapid HIV tests available and
31 affordable to patients requesting PrEP; and be it further

32
33 RESOLVED, That our AMA support federal and state efforts to make HIV Post-Exposure
34 Prophylaxis (PEP) prescribable by pharmacists.

35
36 VRC testimony was mixed, with support for the spirit of the resolution but concerns
37 around scope. Your Reference Committee agreed with testimony from the Gay &
38 Lesbian Medical Association (GLMA) that the monitoring and intervention required for
39 patients using PrEP or PEP could fall out of scope for pharmacists. The prescription of
40 PrEP or PEP is not only contingent upon HIV status, but also a myriad of other factors
41 that should involve a physician. We recommend Resolution 034 not be adopted.

42
43 (64) RESOLUTION 038 - SUPPORTING RESEARCH INTO ARTIFICIAL WOMB
44 TECHNOLOGIES

45
46 **RECOMMENDATION:**

47
48 **Resolution 038 not be adopted.**

1 RESOLVED, That our AMA supports comprehensive research into artificial womb
2 technologies which seeks to understand its ethical, societal, and legal consequences.
3

4 VRC testimony was opposed to Resolution 038. Your Reference Committee agrees with
5 testimony that the resolved clause is not supported by research. Additionally, we believe
6 this ask to be outside of the scope of the AMA and note that relevant societies such as
7 American College of Obstetricians and Gynecologists (ACOG) have no stance on this
8 issue. The Reference Committee recommends Resolution 038 not be adopted.
9

10 (65) RESOLUTION 043 - THE IMPACTS OF COVID-19 AND TELEMEDICINE ON
11 NATIONAL OPIOID PRESCRIPTION PATTERNS

12 **RECOMMENDATION:**

13 **Resolution 043 not be adopted.**

14 RESOLVED, That our AMA study how the patterns of opioid prescriptions and
15 overdoses have changed on a national scale since the relaxation of the Ryan Haight
16 Act's requirement of in-person visits prior to prescribing opioids; and be it further

17 RESOLVED, That our AMA study the factors that influence physician comfort with
18 prescribing controlled substances such as buprenorphine for medication assisted
19 treatment (MAT) via telemedicine on a national scale.
20

21 VRC testimony was mixed. Your Reference Committee agrees with testimony that the
22 resolution as written does not align with current AMA priorities. Notably, we are
23 concerned that this resolution will unintentionally negatively impact the use of
24 medications for opioid use disorder (MOUD) and could create a barrier to medication
25 access. We deliberated multiple outcomes and ultimately recommend that this resolution
26 not be adopted.
27

28 (66) RESOLUTION 054 - DECREASING SCREEN TIME IN SCHOOL AND FOR
29 SCHOOL-RELATED ACTIVITIES

30 **RECOMMENDATION:**

31 **Resolution 054 not be adopted.**

32 RESOLVED; that our AMA ask teachers, schools, and other educational entities to take
33 into account how much screen time children and adolescents are exposed to at school
34 when developing curricula and limit educational screen time at school and for school-
35 related activities and be it further

36 RESOLVED; that our AMA supports research efforts evaluating how much screen time
37 is appropriate for adolescents and children over the age of 6 in schools.
38

39 VRC testimony was mixed. Your Reference Committee agrees with testimony from the
40 American Academy of Pediatrics (AAP) that the AMA is not the best organization to
41 accomplish the asks of this resolution. We recommend that Resolution 054 not be
42 adopted.
43

1 (67) COLA MIC REPORT A - IMG EXEMPTIONS FROM IMMIGRATION CAPS ON
2 IMG-SPECIFIC IMMIGRATION CATEGORY FOR GREEN CARDS AND VISAS
3

4 **RECOMMENDATION:**

5 **The Recommendations of COLA MIC Report A not be adopted.**

6 Your Committee on Legislation and Advocacy and Minority Issues Committee
7 recommend that the following recommendation be adopted, and the remainder of this
8 report filed:

9 RESOLVED, Our AMA-MSS support the implementation of a healthcare worker VISA
10 category specifically for IMGs and IMSs, which could ease post-VISA foreign
11 residence requirements and allow for appropriate VISA travel guidelines to continue
12 patient care; and be it further

13 RESOLVED, Our AMA-MSS support the creation of broad and accessible IMG-
14 specific bridge programs between education-based and employment-based VISAs to
15 increase retention of J-1 VISA recipients who complete medical training in the US; and
16 be it further

17 RESOLVED, Our AMA-MSS support the implementation of profession-specific or
18 education level exemptions for residents and physicians from the annual caps for EB-
19 1,2 green cards and H-1B temporary work VISAs in order to decrease barriers of non-
20 citizen International Medical Graduates from practicing in the US.

21 VRC testimony was mixed. Your Reference Committee agrees with testimony from
22 the International Medical Graduates Section (IMGS) that this report does not
23 accurately convey immigration processes. We support the spirit of this report, but we
24 believe that this topic falls outside of the MSS's scope. Your Reference Committee
25 recommends that COLA MIC Report A not be adopted.

RECOMMENDED FOR REAFFIRMATION IN LIEU OF

(68) RESOLUTION 023 - INCORPORATION OF EVIDENCE-BASED VACCINE
COMMUNICATION STRATEGIES IN MEDICAL SCHOOL CURRICULUM

RECOMMENDATION:

Policy H-440.877, D-440.921, H-440.977, and H-440.849 be reaffirmed in lieu of Resolution 023.

RESOLVED, That our AMA works with relevant stakeholders to support the adoption of evidence-based strategies for vaccination advocacy and communication into medical school curricula.

VRC testimony was mixed. Your Reference Committee agrees with testimony that this resolution is covered under existing policies. We recommend the authors submit a Medical Student Section Action Item (MSSAI) to work with stakeholders to enact curricular change as an extension of existing policies around the distribution of vaccines. The Reference Committee recommends reaffirmation of existing policies in lieu of Resolution 023.

H-440.877 Distribution and Administration of Vaccines

1. It is optimal for patients to receive vaccinations in their medical home to ensure coordination of care. This is particularly true for pediatric patients and for adult patients with chronic disease and co-morbidities. If a vaccine is administered outside the medical home, all pertinent vaccine-related information should be transmitted back to the patient's primary care physician and entered into an immunization registry when one exists to provide a complete vaccination record.
2. All physicians and other qualified health care providers who administer vaccines should have fair and equitable access to all ACIP recommended vaccines. However, when there is a vaccine shortage, those physicians and other health care providers immunizing patients who are prioritized to receive the vaccine based upon medical risks/needs according to ACIP recommendations must be ensured timely access to adequate vaccine supply.
3. Physicians and other qualified health care providers should: (a) incorporate immunization needs into clinical encounters, as appropriate; (b) strongly recommend needed vaccines to their patients in accordance with ACIP recommendations and consistent with professional guidelines; (c) either administer vaccines directly or refer patients to another qualified health care provider who can administer vaccines safely and effectively, in accordance with ACIP recommendations and professional guidelines and consistent with state laws; (d) ensure that vaccination administration is documented in the patient medical record and an immunization registry when one exists; and (e) maintain professional competencies in immunization practices, as appropriate.
4. All vaccines should be administered by a licensed physician, or by a qualified health care provider pursuant to a prescription, order, or protocol agreement from a physician licensed to practice medicine in the state where the vaccine is to be administered or in a manner otherwise consistent with state law.

1 5. Patients should be provided with documentation of all vaccinations for
2 inclusion in their medical record, particularly when the vaccination is provided by
3 someone other than the patient's primary care physician.

4 6. Physicians and other qualified health care providers who administer vaccines
5 should seek to use integrated and interoperable systems, including electronic
6 health records and immunization registries, to facilitate access to accurate and
7 complete immunization data and to improve information-sharing among all
8 vaccine providers.

9 7. Vaccine manufacturers, medical specialty societies, electronic medical record
10 vendors, and immunization information systems should apply uniform bar-coding
11 on vaccines based on standards promulgated by the medical community.

12 8. Our AMA encourages vaccine manufacturers to make small quantities of
13 vaccines available for purchase by physician practices without financial penalty.

14
15 D-440.921 An Urgent Initiative to Support COVID-19 Vaccination and Information
16 Programs

17 Our AMA will institute a program to promote the integrity of a COVID-19
18 vaccination information program by: (1) educating physicians on speaking with
19 patients about COVID-19 infection and vaccination, bearing in mind the historical
20 context of "experimentation" with vaccines and other medication in communities
21 of color, and providing physicians with culturally appropriate patient education
22 materials; (2) educating the public about up-to-date, evidence-based information
23 regarding COVID-19 and associated infections as well as the safety and efficacy
24 of COVID-19 vaccines, by countering misinformation and building public
25 confidence; (3) forming a coalition of health care and public health organizations
26 inclusive of those respected in communities of color committed to developing and
27 implementing a joint public education program promoting the facts about,
28 promoting the need for, and encouraging the acceptance of COVID-19
29 vaccination; (4) supporting ongoing monitoring of COVID-19 vaccines to ensure
30 that the evidence continues to support safe and effective use of vaccines among
31 recommended populations; (5) educating physicians and other healthcare
32 professionals on means to disseminate accurate information and methods to
33 combat medical misinformation online; and (6) supporting the public purchase
34 and cost-free distribution and administration of COVID-19 booster vaccine doses.

35
36 H-440.977 Hepatitis B Vaccine

37 The AMA urges the appropriate use of hepatitis B vaccine and the dissemination
38 of professional educational materials to increase the use of the hepatitis B
39 vaccine by physicians whose patients are in high risk groups, including
40 physicians in training and other medical personnel who come into contact with
41 blood and blood products, tissues, secretions and excretions demonstrated to be
42 potential reservoirs of hepatitis B virus.

43
44 H-440.849 Adult Immunization

1 Our AMA (1) supports the development of a strong adult and adolescent
2 immunization program in the United States; (2) encourages physicians and other
3 health and medical workers (in practice and in training) to set positive examples
4 by assuring that they are completely immunized; (3) urges physicians to
5 advocate immunization with all adult patients to whom they provide care, to
6 provide indicated vaccines to ambulatory as well as hospitalized patients, and to
7 maintain complete immunization records, providing copies to patients as
8 necessary; (4) encourages the National Influenza Vaccine Summit to examine
9 mechanisms to ensure that patient immunizations get communicated to their
10 personal physician; (5) promotes use of available public and professional
11 educational materials to increase use of vaccines and toxoids by physicians and
12 to increase requests for and acceptance of these antigens by adults for whom
13 they are indicated; and (6) encourages third party payers to provide coverage for
14 adult immunizations.

15
16 (69) RESOLUTION 028 - TREATMENT PROGRAMS FOR ADOLESCENTS WITH
17 SUBSTANCE USE DISORDER

18
19 **RECOMMENDATION:**

20
21 **Policy H-95.975 be reaffirmed in lieu of Resolution 028.**

22
23 RESOLVED, the AMA recognizes targeted treatment options designed specifically for
24 adolescents with a substance use disorder are necessary to care for the special needs
25 of this patient population; and be it further

26
27 RESOLVED, the AMA supports the need for adequate federal funding for research into
28 developmentally and age-appropriate treatment options for adolescents with a
29 substance use disorders.

30
31 VRC testimony was mixed. The House Coordination Committee (HCC) slated Resolution
32 028 for reaffirmation on their consent calendar. Your Reference Committee agrees that
33 existing Policy H-95.975 covers all people, and that adolescents do not need to be
34 separately specified. We therefore recommend reaffirmation of Policy H-95.975 in lieu of
35 Resolution 028.

36
37 H-95.975 - Substance Use Disorders as a Public Health Hazard

38 Our AMA: (1) recognizes that substance use disorders are a major public health
39 problem in the United States today and that its solution requires a multifaceted
40 approach;

41 (2) declares substance use disorders are a public health priority;
42 (3) supports taking a positive stance as the leader in matters concerning substance
43 use disorders, including addiction;
44 (4) supports studying innovative approaches to the elimination of substance use
45 disorders and their resultant street crime, including approaches which have been
46 used in other nations; and
47 (5) opposes the manufacture, distribution, and sale of substances created by
48 chemical alteration of illicit substances, herbal remedies, and over-the-counter

1 drugs with the intent of circumventing laws prohibiting possession or use of such
2 substances.

3
4 (70) RESOLUTION 039 – MEDICAL REVERSAL
5

6 **RECOMMENDATION:**
7

8 **Policy H-460.909 be reaffirmed in lieu of Resolution 039.**
9

10 RESOLVED, That our AMA recognizes medical reversal and lower standards for approval
11 of a treatment/procedure guideline as a contributing factor to that treatment/procedure
12 guideline eventually becoming medically reversed; and be it further

13 RESOLVED, That our AMA oppose the adoption of treatment/procedure guidelines on
14 lower standards for approval for the purpose of reducing the frequency of medical
15 reversals; and be it further

16 RESOLVED, That our AMA supports research efforts to identify and reduce the frequency
17 of medical reversals.

18 VRC testimony was split between opposition and reaffirmation. The House Coordination
19 Committee (HCC) slated the second resolve clause for reaffirmation. Your Reference
20 Committee agrees with testimony that Resolution 039 is covered by existing AMA policy.
21 We recommend Policy H-460.909 be reaffirmed in lieu of Resolution 039.

22 Comparative Effectiveness Research H-460.909
23 The following Principles for Creating a Centralized Comparative Effectiveness
24 Research Entity are the official policy of our AMA:

25 **PRINCIPLES FOR CREATING A CENTRALIZED COMPARATIVE
26 EFFECTIVENESS RESEARCH ENTITY:**

27 A. Value. Value can be thought of as the best balance between benefits and costs,
28 and better value as improved clinical outcomes, quality, and/or patient satisfaction
29 per dollar spent. Improving value in the US health care system will require both
30 clinical and cost information. Quality comparative clinical effectiveness research
31 (CER) will improve health care value by enhancing physician clinical judgment and
32 fostering the delivery of patient-centered care.

33 B. Independence. A federally sponsored CER entity should be an objective,
34 independent authority that produces valid, scientifically rigorous research.

35 C. Stable Funding. The entity should have secure and sufficient funding in order
36 to maintain the necessary infrastructure and resources to produce quality CER.
37 Funding source(s) must safeguard the independence of a federally sponsored
38 CER entity.

39 D. Rigorous Scientifically Sound Methodology. CER should be conducted using
40 rigorous scientific methods to ensure that conclusions from such research are
41 evidence-based and valid for the population studied. The primary responsibility for
42 the conduct of CER and selection of CER methodologies must rest with physicians
43 and researchers.

44 E. Transparent Process. The processes for setting research priorities, establishing
45 accepted methodologies, selecting researchers or research organizations, and

1 disseminating findings must be transparent and provide physicians and
2 researchers a central and significant role.

3 F. Significant Patient and Physician Oversight Role. The oversight body of the CER
4 entity must provide patients, physicians (MD, DO), including clinical practice
5 physicians, and independent scientific researchers with substantial representation
6 and a central decision-making role(s). Both physicians and patients are uniquely
7 motivated to provide/receive quality care while maximizing value.

8 G. Conflicts of Interest Disclosed and Minimized. All conflicts of interest must be
9 disclosed and safeguards developed to minimize actual, potential and perceived
10 conflicts of interest to ensure that stakeholders with such conflicts of interest do
11 not undermine the integrity and legitimacy of the research findings and
12 conclusions.

13 H. Scope of Research. CER should include long term and short term assessments
14 of diagnostic and treatment modalities for a given disease or condition in a defined
15 population of patients. Diagnostic and treatment modalities should include drugs,
16 biologics, imaging and laboratory tests, medical devices, health services, or
17 combinations. It should not be limited to new treatments. In addition, the findings
18 should be re-evaluated periodically, as needed, based on the development of new
19 alternatives and the emergence of new safety or efficacy data. The priority areas
20 of CER should be on high volume, high cost diagnosis, treatment, and health
21 services for which there is significant variation in practice. Research priorities and
22 methodology should factor in any systematic variations in disease prevalence or
23 response across groups by race, ethnicity, gender, age, geography, and economic
24 status.

25 I. Dissemination of Research. The CER entity must work with health care
26 professionals and health care professional organizations to effectively disseminate
27 the results in a timely manner by significantly expanding dissemination capacity
28 and intensifying efforts to communicate to physicians utilizing a variety of
29 strategies and methods. All research findings must be readily and easily accessible
30 to physicians as well as the public without limits imposed by the federally supported
31 CER entity. The highest priority should be placed on targeting health care
32 professionals and their organizations to ensure rapid dissemination to those who
33 develop diagnostic and treatment plans.

34 J. Coverage and Payment. The CER entity must not have a role in making or
35 recommending coverage or payment decisions for payers.

36 K. Patient Variation and Physician Discretion. Physician discretion in the treatment
37 of individual patients remains central to the practice of medicine. CER evidence
38 cannot adequately address the wide array of patients with their unique clinical
39 characteristics, co-morbidities and certain genetic characteristics. In addition,
40 patient autonomy and choice may play a significant role in both CER findings and
41 diagnostic/treatment planning in the clinical setting. As a result, sufficient
42 information should be made available on the limitations and exceptions of CER
43 studies so that physicians who are making individualized treatment plans will be
44 able to differentiate patients to whom the study findings apply from those for whom
45 the study is not representative.

46
47 (71) RESOLUTION 041 - ENCOURAGING INCREASED DERMATOLOGIC
48 TRAINING IN PRIMARY CARE SETTINGS TO REDUCE RACIAL DISPARITIES
49 IN MELANOMA OUTCOMES
50

1 **RECOMMENDATION:**

2

3 **Policy H-295.853 be reaffirmed in lieu of Resolution 041.**

4

5 RESOLVED, That our AMA amend current policy **H-55.972**, “Early Detection and
6 Prevention of Skin Cancer” by addition to read as follows:
7 Our AMA: (1) encourages all physicians to (a) perform skin self-examinations and to
8 examine themselves and their families on the first Monday of the month of May, which is
9 designated by the American Academy of Dermatology as Melanoma Monday; (b)
10 examine their patients' skins for the early detection of melanoma and nonmelanoma skin
11 cancer; (c) urge their patients to perform regular self-examinations of their skin and
12 assist their family members in examining areas that may be difficult to examine; and (d)
13 educate their patients concerning the correct way to perform skin self-examination, (2)
14 supports increased training for primary care physicians regarding common patient
15 misconceptions and best practices to counsel patients on skin self-examinations and
16 troublesome skin findings for patients of color; (3) supports mechanisms for the
17 education of lay professionals, such as hairdressers and barbers, on skin self-
18 examination to encourage early skin cancer referrals to qualified health care
19 professionals; and (4) supports and encourages prevention efforts to increase
20 awareness of skin cancer risks and sun-protective behavior in communities of color. Our
21 AMA will continue to work with the American Academy of Dermatology, National Medical
22 Association and National Hispanic Medical Association and public health organizations
23 to promote education on the importance of skin cancer screening and skin cancer
24 screening in patients of color; and (5) supports incorporation of training modules and
25 diagnostic technology, including but not limited to dermoscopy, to improve dermatologic
26 understanding in patients of color among primary care physicians.

27

28 VRC testimony was mixed, with support for reaffirmation, adoption with amendments,
29 and opposition. Your Reference Committee agrees with the House Coordination
30 Committee (HCC) that this resolution falls under existing policy. We recommend
31 reaffirmation of existing policy H-295.853 in lieu of this resolution.

32

33 H-295.853 Representation of Dermatological Pathologies in Varying Skin Tones
34 Our AMA encourages comprehensive, inclusive and equitable representation of a
35 diverse range of skin tones in all dermatologic and other relevant medical
36 educational resources for medical students, physicians, non-physician healthcare
37 providers and patients.

38

39 (72) RESOLUTION 044 - INCREASED DOULA ACCESS TO SUPPORT PREGNANT
40 AND BIRTHING PEOPLE

41

42 **RECOMMENDATION:**

43

44 **Policy H-185.917 be reaffirmed in lieu of Resolution 044.**

45

46 RESOLVED, Our AMA supports initiatives to improve the accessibility of support
47 personnel, such as a professional doula, for pregnant and birthing people, and the

1 availability of information about the benefits of doula services for patients and
2 physicians.

3
4 VRC testimony was mixed. The Reference Committee agrees with testimony that
5 defining the doula profession, and therefore this resolution, falls outside of the AMA's
6 scope. The Reference Committee also agrees that the evidence is inconclusive for this
7 as a solution to health disparities among pregnant and birthing people. The House
8 Coordination Committee (HCC) added this resolution to their reaffirmation consent
9 calendar. We would recommend a stance of not adopt given the issue of scope, but we
10 recommend reaffirmation of this resolution because it has been listed as reaffirmation by
11 HCC.

12
13 H-185.917 Reducing Inequities and Improving Access to Insurance for Maternal
14 Health Care

- 15 1. Our AMA acknowledges that structural racism and bias negatively impact the
16 ability to provide optimal health care, including maternity care, for people of color.
- 17 2. Our AMA encourages physicians to raise awareness among colleagues,
18 residents and fellows, staff, and hospital administrators about the prevalence of
19 racial and ethnic inequities and the effect on health outcomes, work to eliminate
20 these inequities, and promote an environment of trust.
- 21 3. Our AMA encourages physicians to pursue educational opportunities focused
22 on embedding equitable, patient-centered care for patients who are pregnant
23 and/or within 12 months postpartum into their clinical practices and encourages
24 physician leaders of health care teams to support similar appropriate professional
25 education for all members of their teams.
- 26 4. Our AMA will continue to monitor and promote ongoing research regarding the
27 impacts of societal (e.g., racism or unaffordable health insurance), geographical,
28 facility-level (e.g., hospital quality), clinician-level (e.g., implicit bias), and patient-
29 level (e.g., comorbidities, chronic stress or lack of transportation) barriers to
30 optimal care that contribute to adverse and disparate maternal health outcomes,
31 as well as research testing the effectiveness of interventions to address each of
32 these barriers.
- 33 5. Our AMA will promote the adoption of federal standards for clinician collection
34 of patient-identified race and ethnicity information in clinical and administrative
35 data to better identify inequities. The federal data collection standards should be:
36 (a) informed by research (including real-world testing of technical standards and
37 standardized definitions of race and ethnicity terms to ensure that the data
38 collected accurately reflect diverse populations and highlight, rather than
39 obscure, critical distinctions that may exist within broad racial or ethnic
40 categories), (b) carefully crafted in conjunction with clinician and patient input to
41 protect patient privacy and provide non-discrimination protections, and (c) lead to
42 the dissemination of best practices to guide respectful and non-coercive
43 collection of accurate, standardized data relevant to maternal health outcomes.
- 44 6. Our AMA supports the development of a standardized definition of maternal
45 mortality and the allocation of resources to states and Tribes to collect and
46 analyze maternal mortality data (i.e., Maternal Mortality Review Committees and
47 vital statistics) to enable stakeholders to better understand the underlying causes
48 of maternal deaths and to inform evidence-based policies to improve maternal
49 health outcomes and promote health equity.

1 7. Our AMA encourages hospitals, health systems, and state medical
2 associations and national medical specialty societies to collaborate with non-
3 clinical community organizations with close ties to minoritized and other at-risk
4 populations to identify opportunities to best support pregnant persons and new
5 families.

6 8. Our AMA encourages the development and funding of resources and outreach
7 initiatives to help pregnant individuals, their families, their communities, and their
8 workplaces to recognize the value of comprehensive prepregnancy, prenatal,
9 peripartum, and postpartum care. These resources and initiatives should
10 encourage patients to pursue both physical and behavioral health care, strive to
11 reduce barriers to pursuing care, and highlight care that is available at little or no
12 cost to the patient.

13 9. Our AMA supports adequate payment from all payers for the full spectrum of
14 evidence-based prepregnancy, prenatal, peripartum, and postpartum physical
15 and behavioral health care.

16 10. Our AMA encourages hospitals, health systems, and states to participate in
17 maternal safety and quality improvement initiatives such as the Alliance for
18 Innovation on Maternal Health program and state perinatal quality collaboratives.

19 11. Our AMA will advocate for increased access to risk-appropriate care by
20 encouraging hospitals, health systems, and states to adopt verified, evidence-
21 based levels of maternal care.

22
23 (73) RESOLUTION 045 - REFORMING THE RESIDENCY MATCH SYSTEM

24
25 RECOMMENDATION:

26
27 **Policy D-310.977 be reaffirmed in lieu of Resolution 045.**

28
29 RESOLVED, That our AMA study the impact of residency application and interview caps;
30 and be it further

31
32 RESOLVED, That our AMA support disclosure of all application filters (including but not
33 limited to Step 1 or Step 2CK scores, MD vs DO degree, or IMG status) used by residency
34 programs to facilitate applicant decision making and decrease overapplication; and be it
35 further

36
37 RESOLVED, That our AMA support the shortening of the residency interview season to
38 only October, November, and December, or a similar three-month period; and be it further

39
40 RESOLVED, That our AMA support the adoption by each specialty of a standardized
41 interview invitation date accompanied by a standardized interview acceptance period, with
42 subsequent rolling interview invitations permitted for unfilled interview slots.

43
44 VRC testimony was supportive of the spirit of the resolution, but with concerns around
45 unintended consequences and equity. The Young Physicians Section (YPS) expresses
46 concerns around the implications of disclosing application filters in the setting of a
47 holistic application process. The AMA International Medical Graduates Section (IMGS)
48 expresses concerns around shortening the interview season given that international
49 medical graduates historically may require a longer interview season. The House

1 Coordination Committee (HCC) slated this resolution as a reaffirmation of existing Policy
2 D-310.977. The AMA Council on Medical Education (CME) will bring a report forward at
3 the 2022 Interim Meeting on residency. Your Reference Committee agrees with HCC
4 that Resolution 045 is reaffirmation and looks forward to the upcoming CME report. We
5 recommend Policy D-310.977 be reaffirmed in lieu of Resolution 045.

6
7 National Resident Matching Program Reform D-310.977
8 Our AMA:
9 (1) will work with the National Resident Matching Program (NRMP) to develop
10 and distribute educational programs to better inform applicants about the NRMP
11 matching process;
12 (2) will actively participate in the evaluation of, and provide timely comments
13 about, all proposals to modify the NRMP Match;
14 (3) will request that the NRMP explore the possibility of including the Osteopathic
15 Match in the NRMP Match;
16 (4) will continue to review the NRMP's policies and procedures and make
17 recommendations for improvements as the need arises;
18 (5) will work with the Accreditation Council for Graduate Medical Education
19 (ACGME) and other appropriate agencies to assure that the terms of
20 employment for resident physicians are fair and equitable and reflect the unique
21 and extensive amount of education and experience acquired by physicians;
22 (6) does not support the current the "All-In" policy for the Main Residency Match
23 to the extent that it eliminates flexibility within the match process;
24 (7) will work with the NRMP, and other residency match programs, in revising
25 Match policy, including the secondary match or scramble process to create more
26 standardized rules for all candidates including application timelines and
27 requirements;
28 (8) will work with the NRMP and other external bodies to develop mechanisms
29 that limit disparities within the residency application process and allow both
30 flexibility and standard rules for applicant;
31 (9) encourages the National Resident Matching Program to study and publish the
32 effects of implementation of the Supplemental Offer and Acceptance Program on
33 the number of residency spots not filled through the Main Residency Match and
34 include stratified analysis by specialty and other relevant areas;
35 (10) will work with the NRMP and ACGME to evaluate the challenges in moving
36 from a time-based education framework toward a competency-based system,
37 including: a) analysis of time-based implications of the ACGME milestones for
38 residency programs; b) the impact on the NRMP and entry into residency
39 programs if medical education programs offer variable time lengths based on
40 acquisition of competencies; c) the impact on financial aid for medical students
41 with variable time lengths of medical education programs; d) the implications for
42 interprofessional education and rewarding teamwork; and e) the implications for
43 residents and students who achieve milestones earlier or later than their peers;
44 (11) will work with the Association of American Medical Colleges (AAMC),
45 American Osteopathic Association (AOA), American Association of Colleges of
46 Osteopathic Medicine (AACOM), and National Resident Matching Program
47 (NRMP) to evaluate the current available data or propose new studies that would
48 help us learn how many students graduating from US medical schools each year
49 do not enter into a US residency program; how many never enter into a US
50 residency program; whether there is disproportionate impact on individuals of

minority racial and ethnic groups; and what careers are pursued by those with an MD or DO degree who do not enter residency programs;

(12) will work with the AAMC, AOA, AACOM and appropriate licensing boards to study whether US medical school graduates and international medical graduates who do not enter residency programs may be able to serve unmet national health care needs;

(13) will work with the AAMC, AOA, AACOM and the NRMP to evaluate the feasibility of a national tracking system for US medical students who do not initially match into a categorical residency program;

(14) will discuss with the National Resident Matching Program, Association of American Medical Colleges, American Osteopathic Association, Liaison Committee on Medical Education, Accreditation Council for Graduate Medical Education, and other interested bodies potential pathways for reengagement in medicine following an unsuccessful match and report back on the results of those discussions;

(15) encourages the Association of American Medical Colleges to work with U.S. medical schools to identify best practices, including career counseling, used by medical schools to facilitate successful matches for medical school seniors, and reduce the number who do not match;

(16) supports the movement toward a unified and standardized residency application and match system for all non-military residencies;

(17) encourages the Educational Commission for Foreign Medical Graduates (ECFMG) and other interested stakeholders to study the personal and financial consequences of ECFMG-certified U.S. IMGs who do not match in the National Resident Matching Program and are therefore unable to get a residency or practice medicine; and

(18) encourages the AAMC, AACOM, NRMP, and other key stakeholders to jointly create a no-fee, easily accessible clearinghouse of reliable and valid advice and tools for residency program applicants seeking cost-effective methods for applying to and successfully matching into residency.

(74) RESOLUTION 046 – SUBSIDIZING RESEARCH INTO MOLECULAR NANOTECHNOLOGY AND MOLECULAR NANOMACHINES IN MEDICINE

RECOMMENDATION:

Policy H-480.949 and H-460.998 be reaffirmed in lieu of Resolution 046.

RESOLVED, That our AMA support the subsidization of research pertaining to molecular nanotechnology and molecular nanomachines in diagnostic applications, imaging applications, as an alternative form of treatment, and vehicle for therapeutic delivery.

VRC testimony was opposed to the resolution as written. Your Reference Committee agrees with testimony that points out concerns of scope and feasibility. The House Coordination Committee (HCC) did not place this resolution on the reaffirmation calendar; however, we found that existing policy covers the asks of the resolved clause. Therefore, your Reference Committee recommends reaffirmation of existing Policies H-480.949 and H-460.998 in lieu of this resolution.

H-480.949 Nanotechnology, Safety and Regulation

1 Our AMA: (1) recognizes the benefits and potential risks of nanotechnology; (2)
2 supports responsible regulation of nanomaterial products and applications to
3 protect the public's health and the environment; and (3) encourages continued
4 study on the health and environmental effects of exposure to nanomaterials.
5

6 H-460.998 Support of Biomedical Research
7

8 Our AMA endorses and supports the following ten principles considered essential
9 if continuing support and recognition of biomedical research vital to the delivery
10 of quality medical care is to be a national goal:

11 (1) The support of biomedical research is the responsibility of both government
12 and private resources.

13 (2) The National Institutes of Health must be budgeted so that they can exert
14 effective administrative and scientific leadership in the biomedical research
15 enterprise.

16 (3) An appropriate balance must be struck between support of project grants and
17 of contracts.

18 (4) Federal appropriations to promote research in specifically designated disease
19 categories should be limited and made cautiously.

20 (5) Funds should be specifically appropriated to train personnel in biomedical
21 research.

22 (6) Grants should be awarded under the peer review system.

23 (7) The roles of the private sector and of government in supporting biomedical
24 research are complementary.

25 (8) Although the AMA supports the principle of committed federal support of
26 biomedical research, the Association will not necessarily endorse all specific
27 legislative and regulatory action that affects biomedical research.

28 (9) To implement the objectives of section 8, the Board will establish
29 mechanisms for continuing study, review and evaluation of all aspects of federal
30 support of biomedical research.

31 (10) Our AMA will accept responsibility for informing the public on the relevance
32 of basic and clinical research to the delivery of quality medical care.

33 (75) RESOLUTION 047 - SUBSIDIZING RESEARCH INTO BACTERIOPHAGE
34 MEDICINE

35 **RECOMMENDATION:**

36 **Policy H-440.827 be reaffirmed in lieu of Resolution 047.**

37
38 RESOLVED, That our AMA supports increased funding to major research organizations
39 such as the National Institutes of Health to develop bacteriophage therapeutic
40 technologies as an alternative to the use of antibiotics.

41 VRC testimony was mixed. The Reference Committee agrees with testimony that AMA
42 policy already addresses alternatives to antibiotics, including bacteriophage technology,
43 and concerns around antibiotic resistance. The House Coordination Committee (HCC)
44 put this resolution on their reaffirmation calendar. Your Reference Committee agrees
45 with HCC and recommends existing policy be reaffirmed in lieu of this resolution.

46
47
48
49 H-440.827 Surveillance of Antibiotic Use and Resistance
50

1 Our AMA: (1) recognizes the importance of public health and veterinary health
2 surveillance for antimicrobial resistance and antibiotic use; and (2) recommends
3 that public health and veterinary health agencies be adequately funded, as outlined
4 in the President's Council of Advisors on Science and Technology Report, to
5 achieve the surveillance goals and objectives outlined in the National Action Plan
6 for Combating Antibiotic Resistant Bacteria.

7
8 (76) RESOLUTION 048 - ENSURE FAIR PRACTICES BY STAFFING AGENCIES
9

10 **RECOMMENDATION:**

11
12 **Policy D-360.998 and D-383.983 be reaffirmed in lieu of Resolution 048.**
13

14 RESOLVED, our AMA collaborates with the AHA and AHCA/ NCAL to address the
15 shortage of healthcare workers and increased rise in labor costs in healthcare facilities;
16 and be it further

17 RESOLVED, our AMA encourages the Federal Trade Commission to investigate potential
18 anticompetitive practices conducted by direct care staffing agencies. We use the word
19 "women" in the whereas clauses of this resolution when referring to people.

20
21 VRC testimony was split between reaffirmation and referral. The House Coordination
22 Committee (HCC) recommends reaffirmation of Resolution 048 due to existing AMA
23 policy. Your Reference Committee believes that referral of this resolution would not result
24 in an expansion of current advocacy efforts, and that existing policy already addresses
25 healthcare labor concerns and anticompetitive practices. We recommend reaffirmation of
26 Policy D-360.998 and D-383.983 in lieu of this resolution.

27
28 D-360.998 The Growing Nursing Shortage in the United States

29 Our AMA:

30 (1) recognizes the important role nurses and other allied health professionals
31 play in providing quality care to patients, and participate in activities with state
32 medical associations, county medical societies, and other local health care
33 agencies to enhance the recruitment and retention of qualified individuals to the
34 nursing profession and the allied health fields;

35 (2) encourages physicians to be aware of and work to improve workplace
36 conditions that impair the professional relationship between physicians and
37 nurses in the collaborative care of patients;

38 (3) encourages hospitals and other health care facilities to collect and analyze
39 data on the relationship between staffing levels, nursing interventions, and
40 patient outcomes, and to use this data in the quality assurance process;

41 (4) will work with nursing, hospital, and other appropriate organizations to
42 enhance the recruitment and retention of qualified individuals to the nursing and
43 other allied health professions;

44 (5) will work with nursing, hospital, and other appropriate organizations to seek to
45 remove administrative burdens, e.g., excessive paperwork, to improve
46 efficiencies in nursing and promote better patient care.

47
48 D-383.983 Collective Bargaining: Antitrust Immunity
49

1 Our AMA will: (1) continue to pursue an antitrust advocacy strategy, in
2 collaboration with the medical specialty stakeholders in the Antitrust Steering
3 Committee, to urge the Department of Justice and Federal Trade Commission to
4 amend the "Statements of Antitrust Enforcement Policy in Health Care" (or tacitly
5 approve expansion of the Statements) and adopt new policy statements
6 regarding market concentration that are consistent with AMA policy; and (2)
7 execute a federal legislative strategy.

8
9 (77) RESOLUTION 050 - ACCURATELY QUANTIFYING E-CIGARETTE USAGE

10
11 **RECOMMENDATION:**

12
13 **Policy H-495.972 be reaffirmed in lieu of Resolution 050.**

14
15 RESOLVED, Our AMA supports research that investigates more specific measures of e-
16 cigarette usage in relation to risk for respiratory (and other) illnesses in the context of
17 providing counseling strategies for patients and increasing public health awareness of
18 the long-term harms of e-cigarette use.

19
20 VRC testimony was supportive of the spirit of this resolution. However, your Reference
21 Committee agrees with testimony that this resolution is reaffirmation of existing policy. We
22 encourage the authors to submit a Medical Student Section Action Item (MSSAI) to ask
23 for more specific action. The Reference Committee agrees with HCC's decision to reaffirm
24 Policy H-495.972 in lieu of this resolution.

25
26 **H-495.972 Electronic Cigarettes, Vaping, and Health**

27
28 1. Our AMA urges physicians to: (a) educate themselves about electronic nicotine
29 delivery systems (ENDS), including e-cigarettes, be prepared to counsel patients
30 about the use of these products and the potential for nicotine addiction and the
31 potential hazards of dual use with conventional cigarettes, and be sensitive to the
32 possibility that when patients ask about e-cigarettes, they may be asking for help
33 to quit smoking; (b) consider expanding clinical interviews to inquire about "vaping"
34 or the use of e-cigarettes; (c) promote the use of FDA-approved smoking cessation
35 tools and resources for their patients and caregivers; and (d) advise patients who
36 use e-cigarettes to take measures to assure the safety of children in the home who
37 could be exposed to risks of nicotine overdose via ingestion of replacement e-
38 cigarette liquid that is capped or stored improperly.

39
40 2. Our AMA: (a) encourages further clinical and epidemiological research on e-
41 cigarettes; (b) supports education of the public on the health effects, including
42 toxins and carcinogens of electronic nicotine delivery systems (ENDS) including e-
43 cigarettes; and (c) recognizes that the use of products containing nicotine in any
44 form among youth, including e-cigarettes, is unsafe and can cause addiction.

45
46 3. Our AMA supports legislation and associated initiatives and will work in
47 coordination with the Surgeon General to prevent e-cigarettes from reaching youth
48 and young adults through various means, including, but not limited to, CDC
49 research, education and a campaign for preventing and reducing use by youth,
50 young adults and others of e-cigarettes, and combustible and emerging tobacco
products.

51
52 (78) RESOLUTION 051 - EXPANDING ACCESS TO TELEREHABILITATION

1 **RECOMMENDATION:**

2

3 **Policy be reaffirmed in lieu of Resolution 051.**

4

5 RESOLVED, That our AMA urge the federal government to pass legislation that expands
6 access to telerehabilitation services including but not limited to physical therapy,
7 nutritional therapy, social work, clinical psychology, occupational therapy, speech-
8 language pathology, and audiology; and be it further

9

10 RESOLVED, That our AMA urge state governments to adopt policies that cover
11 telerehabilitation services; and be it further

12

13 RESOLVED, That our AMA-MSS support the creation of interstate health compacts for
14 telerehabilitation services from providers including but not limited to physical therapists,
15 occupational therapists, clinical psychologists, speech-language pathologists, and
16 audiologists, thereby allowing for improved continuity of care and continued access to
17 follow-up; and be it further

18

19 RESOLVED, That our AMA support the inclusion of telerehabilitation on the Physician
20 Fee Schedule; and be it further

21

22 RESOLVED, That our AMA-MSS encourage the design and execution of studies to
23 identify healthcare providers that benefit the most from telerehabilitation services,
24 potentially including but not limited to physical therapists, clinical psychologists, and
25 occupational therapists, speech-language pathologists, and audiologists; and be it
26 further

27

28 RESOLVED, That our AMA-MSS supports advocating for the use of telerehabilitation
29 services; and be it further

30

31 RESOLVED, That the following current policy, D-480.963, "COVID-19 Emergency and
32 Expanded Telemedicine Regulations," be amended to reflect inclusion of
33 telerehabilitation services in the advocacy efforts and policymaking of the AMA and other
34 public and private organizations:

35

36 COVID-19 Emergency and Expanded Telemedicine Regulations D-480.963

37 1. Our AMA will continue to advocate for widespread adoption of telehealth
38 services, including telerehabilitation, in the practice of medicine for physicians
39 and physician-led teams post SARS-CoV-2

40 2. Our AMA will advocate that the Federal government, including the Centers for
41 Medicare & Medicaid Services (CMS) and other agencies, state governments
42 and state agencies, and the health insurance industry, adopt clear and uniform
43 laws, rules, regulations, and policies relating to telehealth services, including
44 telerehabilitation, that: (a) provide equitable coverage that allows patients to
45 access telehealth and telerehabilitation services wherever they are located, and
46 (b) provide for the use of accessible devices and technologies, with appropriate
47 privacy and security protections, for connecting physicians and patients

48 3. Our AMA will advocate for equitable access to telehealth services, including
49 telerehabilitation, especially for at-risk and under-resources patient populations
50 and communities, including but not limited to supporting increased funding and

1 planning for telehealth infrastructure such as broadband and internet-connected
2 devices for both physicians practices and patients
3 4. Our AMA supports the use of telehealth and telerehabilitation to reduce health
4 disparities and promote access to health care. Alt. Res. 203, I-20; Reaffirmed:
5 CMS Rep. 7, A-21; and be it further

6
7 RESOLVED, That the following current policy, D-480.965, "Reimbursement for
8 Telehealth," be amended to reflect inclusion of telerehabilitation services in insurance
9 coverage plans for all individuals:

10
11 Reimbursement for Telehealth, D-480.965
12 1. Our AMA will work with third-party payers, the Centers for Medicare and
13 Medicaid Services, Congress and interested state medical associations to
14 provide coverage and reimbursement for telehealth services, including
15 telerehabilitation, to ensure increased access and use of these services by
16 patients and physicians. Res. 122, A-19

17
18 VRC testimony was supportive of reaffirmation. The Reference Committee agrees,
19 noting that rehabilitation services fall under the umbrella of healthcare services. We
20 recommend the authors pursue a Medical Student Section Action Item (MSSAI) to send
21 a letter to request that telerehabilitation be included in future advocacy efforts. The
22 Reference Committee recommends reaffirmation of existing policy in lieu of this
23 resolution.

24
25 (79) RESOLUTION 053 - REPURPOSING MEDICAL SURPLUS FOR
26 HUMANITARIAN RELIEF AND MEDICAL EDUCATION

27
28 **RECOMMENDATION:**

29
30 **Policy D-120.961 and H-135.939 be reaffirmed in lieu of Resolution 053.**

31
32 RESOLVED, That our AMA encourage the development of systems that allow
33 healthcare facilities to 1) reduce medical waste by tracking their preventable waste and
34 2) develop standardized protocols for medical surplus recovery for humanitarian relief
35 and medical education.

36
37 VRC testimony was limited. Your Reference Committee supports the spirit of this
38 resolution, but agrees with testimony from the House Coordination Committee (HCC)
39 that this resolution is covered by existing policy. We recommend reaffirmation of existing
40 policies D-120.961 and H-135.939 in lieu of this resolution.

41
42 D-120.961 Personal Medication and Medical Supplies in Times of Disaster

1 Our AMA urges continued dialogue with appropriate federal agencies, medical
2 societies, health care organizations, and other appropriate stakeholders to: (a)
3 ensure timely distribution of and access to medications for acute and chronic
4 medical conditions in a disaster; (b) issue guidance to health professionals and
5 the public on the appropriate stockpiling of medications for acute and chronic
6 medical conditions in a disaster or other serious emergency; and (c) deliberate
7 the design, feasibility, and utility of a universal mechanism, that provides the
8 essential health and medical supplies and information that can assist emergency
9 medical responders and other health care personnel with the provision of medical
10 care and assistance in a disaster or other serious emergency.

11 H-135.939 Green Initiatives and the Health Care Community

12 Our AMA supports: (1) responsible waste management and clean energy
13 production policies that minimize health risks, including the promotion of
14 appropriate recycling and waste reduction; (2) the use of ecologically sustainable
15 products, foods, and materials when possible; (3) the development of products
16 that are non-toxic, sustainable, and ecologically sound; (4) building practices that
17 help reduce resource utilization and contribute to a healthy environment; (5) the
18 establishment, expansion, and continued maintenance of affordable, accessible,
19 barrier-free, reliable, and clean-energy public transportation; and (6) community-
20 wide adoption of 'green' initiatives and activities by organizations, businesses,
21 homes, schools, and government and health care entities.

22
23 (80) RESOLUTION 056 - REGULATION OF DATA FROM MOBILE HEALTH
24 TECHNOLOGY

25
26 **RECOMMENDATION:**

27
28 **Policy H-480.943 be reaffirmed in lieu of Resolution 056.**

29
30 RESOLVED, that AMA policy H-315.983 Patient Privacy and Confidentiality be amended
31 by addition and deletion as follows:

32
33 1. Our AMA affirms the following key principles that should be consistently
34 implemented to evaluate any proposal regarding patient privacy and the
35 confidentiality of medical information: (a) That there exists a basic right of patients
36 to privacy of their medical information and records, and that this right should be
37 explicitly acknowledged; (b) That patients' privacy should be honored unless
38 waived by the patient in a meaningful way or in rare instances when strong
39 countervailing interests in public health or safety justify invasions of patient privacy
40 or breaches of confidentiality, and then only when such invasions or breaches are
41 subject to stringent safeguards enforced by appropriate standards of
42 accountability; (c) That patients' privacy should be honored in the context of
43 gathering and disclosing information for clinical research and quality improvement
44 activities, and that any necessary departures from the preferred practices of
45 obtaining patients' informed consent and of de-identifying all data be strictly
46 controlled; (d) That any information disclosed should be limited to that information,
47 portion of the medical record, or abstract necessary to fulfill the immediate and
48 specific purpose of disclosure; and (e) That the Health Insurance Portability and
49 Accountability Act of 1996 (HIPAA) be the minimal standard for protecting clinician-
50 patient privilege, regardless of where care is received.

1 2. Our AMA affirms: (a) that physicians and medical students who are patients are
2 entitled to the same right to privacy and confidentiality of personal medical
3 information and medical records as other patients, (b) that when patients exercise
4 their right to keep their personal medical histories confidential, such action should
5 not be regarded as fraudulent or inappropriate concealment, and (c) that
6 physicians and medical students should not be required to report any aspects of
7 their patients' medical history to governmental agencies or other entities, beyond
8 that which would be required by law.

9 3. Employers and insurers should be barred from unconsented access to
10 identifiable medical information lest knowledge of sensitive facts form the basis of
11 adverse decisions against individuals. (a) Release forms that authorize access
12 should be explicit about to whom access is being granted and for what purpose,
13 and should be as narrowly tailored as possible. (b) Patients, physicians, and
14 medical students should be educated about the consequences of signing overly-
15 broad consent forms. (c) Employers and insurers should adopt explicit and public
16 policies to assure the security and confidentiality of patients' medical information.
17 (d) A patient's ability to join or a physician's participation in an insurance plan
18 should not be contingent on signing a broad and indefinite consent for release and
19 disclosure.

20 4. Whenever possible, medical records should be de-identified for purposes of use
21 in connection with utilization review, panel credentialing, quality assurance, and
22 peer review.

23 5. The fundamental values and duties that guide the safekeeping of medical
24 information should remain constant in this era of computerization. Whether they
25 are in computerized or paper form, it is critical that medical information be
26 accurate, secure, and free from unauthorized access and improper use.

27 6. Our AMA recommends that the confidentiality of data collected by race and
28 ethnicity as part of the medical record, be maintained.

29 7. Genetic information should be kept confidential and should not be disclosed to
30 third parties without the explicit informed consent of the tested individual.

31 8. When breaches of confidentiality are compelled by concerns for public health
32 and safety, those breaches must be as narrow in scope and content as possible,
33 must contain the least identifiable and sensitive information possible, and must be
34 disclosed to the fewest possible to achieve the necessary end.

35 9. Law enforcement agencies requesting private medical information should be
36 given access to such information only through a court order. This court order for
37 disclosure should be granted only if the law enforcement entity has shown, by clear
38 and convincing evidence, that the information sought is necessary to a legitimate
39 law enforcement inquiry; that the needs of the law enforcement authority cannot
40 be satisfied by non-identifiable health information or by any other information; and
41 that the law enforcement need for the information outweighs the privacy interest of
42 the individual to whom the information pertains. These records should be subject
43 to stringent security measures.

44 10. Our AMA must guard against the imposition of unduly restrictive barriers to
45 patient records that would impede or prevent access to data needed for medical
46 or public health research or quality improvement and accreditation activities.
47 Whenever possible, de-identified data should be used for these purposes. In those
48 contexts where personal identification is essential for the collation of data, review
49 of identifiable data should not take place without an institutional review board (IRB)
50 approved justification for the retention of identifiers and the consent of the patient.

1 In those cases where obtaining patient consent for disclosure is impracticable, our
2 AMA endorses the oversight and accountability provided by an IRB.
3 11. Marketing and commercial uses of identifiable patients' medical information
4 may violate principles of informed consent and patient confidentiality. Patients
5 divulge information to their physicians only for purposes of diagnosis and
6 treatment. If other uses are to be made of the information, patients must first give
7 their uncoerced permission after being fully informed about the purpose of such
8 disclosures
9 12. Our AMA, in collaboration with other professional organizations, patient
10 advocacy groups and the public health community, should continue its advocacy
11 for privacy and confidentiality regulations, including: (a) The establishment of rules
12 allocating liability for disclosure of identifiable patient medical information between
13 physicians and the health plans of which they are a part, and securing appropriate
14 physicians' control over the disposition of information from their patients' medical
15 records. (b) The establishment of rules to prevent disclosure of identifiable patient
16 medical information for commercial and marketing purposes; and (c) The
17 establishment of penalties for negligent or deliberate breach of confidentiality or
18 violation of patient privacy rights.
19 13. Our AMA will pursue an aggressive agenda to educate patients, the public,
20 physicians and policymakers at all levels of government about concerns and
21 complexities of patient privacy and confidentiality in the variety of contexts
22 mentioned.
23 14. Disclosure of personally identifiable patient information to public health
24 physicians and departments is appropriate for the purpose of addressing public
25 health emergencies or to comply with laws regarding public health reporting for the
26 purpose of disease surveillance.
27 15. In the event of the sale or discontinuation of a medical practice, patients should
28 be notified whenever possible and asked for authorization to transfer the medical
29 record to a new physician or care provider. Only de-identified and/or aggregate
30 data should be used for "business decisions," including sales, mergers, and similar
31 business transactions when ownership or control of medical records changes
32 hands.
33 16. The most appropriate jurisdiction for considering physician breaches of patient
34 confidentiality is the relevant state medical practice act. Knowing and intentional
35 breaches of patient confidentiality, particularly under false pretenses, for malicious
36 harm, or for monetary gain, represents a violation of the professional practice of
37 medicine.
38 17. Our AMA Board of Trustees will actively monitor and support legislation at the
39 federal level that will afford patients protection against discrimination on the basis
40 of genetic testing.
41 18. Our AMA supports privacy standards that would require pharmacies and
42 mobile health technology companies to obtain a prior written and signed consent
43 from patients to use their personal data for marketing purposes.
44 19. Our AMA supports privacy standards that require pharmacies, and drug store
45 chains, and mobile health technology companies to disclose the source of financial
46 support for drug mailings or phone calls.
47 20. Our AMA supports privacy standards that would prohibit pharmacies and
48 mobile health technology companies from using prescription refill reminders or
49 disease management programs as an opportunity for marketing purposes.

1 21. Our AMA will draft model state legislation requiring consent of all parties to the
2 recording of a physician-patient conversation.

3
4 VRC testimony was limited. The House Coordination Committee (HCC) included this
5 resolution on their reaffirmation consent calendar. Your Reference Committee agrees
6 with HCC that the resolution is covered under existing AMA policy, specifically H-
7 480.943 which discusses the privacy of mobile health applications.

8
9 H-480.943 Integration of Mobile Health Applications and Devices into Practice
10 1. Our AMA supports the establishment of coverage, payment and financial
11 incentive mechanisms to support the use of mobile health applications (mHealth
12 apps) and associated devices, trackers and sensors by patients, physicians and
13 other providers that: (a) support the establishment or continuation of a valid
14 patient-physician relationship; (b) have a high-quality clinical evidence base to
15 support their use in order to ensure mHealth app safety and effectiveness; (c)
16 follow evidence-based practice guidelines, especially those developed and
17 produced by national medical specialty societies and based on systematic reviews,
18 to ensure patient safety, quality of care and positive health outcomes; (d) support
19 care delivery that is patient-centered, promotes care coordination and facilitates
20 team-based communication; (e) support data portability and interoperability in
21 order to promote care coordination through medical home and accountable care
22 models; (f) abide by state licensure laws and state medical practice laws and
23 requirements in the state in which the patient receives services facilitated by the
24 app; (g) require that physicians and other health practitioners delivering services
25 through the app be licensed in the state where the patient receives services, or be
26 providing these services as otherwise authorized by that state's medical board;
27 and (h) ensure that the delivery of any services via the app be consistent with state
28 scope of practice laws.

29 2. Our AMA supports that mHealth apps and associated devices, trackers and sensors
30 must abide by applicable laws addressing the privacy and security of
31 patients' medical information.

32 3. Our AMA encourages the mobile app industry and other relevant stakeholders
33 to conduct industry-wide outreach and provide necessary educational materials to
34 patients to promote increased awareness of the varying levels of privacy and
35 security of their information and data afforded by mHealth apps, and how their
36 information and data can potentially be collected and used.

37 4. Our AMA encourages the mHealth app community to work with the AMA,
38 national medical specialty societies, and other interested physician groups to
39 develop app transparency principles, including the provision of a standard privacy
40 notice to patients if apps collect, store and/or transmit protected health information.

41 5. Our AMA encourages physicians to consult with qualified legal counsel if unsure
42 of whether an mHealth app meets Health Insurance Portability and Accountability
43 Act standards and also inquire about any applicable state privacy and security
44 laws.

45 6. Our AMA encourages physicians to alert patients to the potential privacy and
46 security risks of any mHealth apps that he or she prescribes or recommends, and
47 document the patient's understanding of such risks

48 7. Our AMA supports further development of research and evidence regarding the
49 impact that mHealth apps have on quality, costs, patient safety and patient privacy.

1 8. Our AMA encourages national medical specialty societies to develop guidelines
2 for the integration of mHealth apps and associated devices into care delivery.
3
4 (81) RESOLUTION 057 - SUPPORTING THE RESEARCH AND DEVELOPMENT OF
5 THE "PERFECT POTATO"

6
7 **RECOMMENDATION:**
8

9 **Policy H-480.958 be reaffirmed in lieu of Resolution 057.**

10
11 RESOLVED, That our AMA supports agricultural and genetic research that aims to
12 improve upon potatoes with factors such as increased heat-tolerance and micronutrient
13 diversity.

14
15 VRC testimony was opposed to this resolution due to its narrow scope and an overlap
16 with existing policy. The House Coordination Committee (HCC) recommends
17 reaffirmation of Policy H-480.958 in lieu of this resolution. Your Reference Committee
18 agrees with HCC's recommendation of reaffirmation.

RECOMMENDED FOR FILING

(82) LGBTQ+ REPORT A – A REPORT ON THE STATUS OF REQUESTS
RELATING TO LGBTQ+ AFFAIRS MADE BY THE AMA-MSS TO THE AMA

RECOMMENDATION:

LGBTQ+ Report A be filed.

Your Standing Committee on LGBTQ+ Affairs recommends this informational report be filed for use by the Medical Student Section.

The Reference Committee thanks the authors for a well-written informational report containing substantial evidence. VRC testimony, while limited, was supportive. This report can be used by MSS members to reference a history of LGBTQ+ policies and continued gaps in advocacy. Your Reference Committee recommends LGBTQ+ Report A be filed.
