CPT® Editorial Summary of Panel Actions September 2025

Please be aware that these actions are a reflection of the discussions at the most recent Panel meeting. Disclosure of Panel action and deliberation is limited to the information contained in this Summary of Actions. Premature release of coding information other than that contained in this document is prohibited under the [CPT Confidentiality Agreement](#). Codes are not assigned, nor exact wording finalized, until just prior to publication. Release of more specific CPT code set information is timed with the release of the entire set of coding changes in the CPT publication.

If an applicant or other interested party believes an action of the CPT Editorial Panel was in error, that individual or entity may request reconsideration of the Panel action. An “interested party” is an individual or entity that may potentially be impacted by the Panel’s decision, regardless of whether they participated in the Panel’s original consideration of the matter. Panel actions that are eligible for reconsideration include accept, reject, or postpone. A withdrawn tab is not an action of the Panel and is not eligible for reconsideration.

Submitting the Request: Requests for reconsideration must be received by AMA staff no later than midnight, Central, October 17, 2025, fourteen (14) days after the published posting date (October 3, 2025) of the Summary Grid of Editorial Panel Actions on the CPT website (<https://www.ama-assn.org/about/cpt-editorial-panel/summary-panel-actions>). The request should contain (1) the specific action requested for reconsideration; (2) the [standard for reconsideration](#) and why the requestor believes it has been met; and (3) all information relevant to the matter, including any literature (whether favorable or adverse) related to the requestor’s position. Requests for reconsideration and relevant information must be in writing and submitted (via email) to:

Samantha Ashley
Director, CPT Editorial & Regulatory Services
American Medical Association
samantha.ashley@ama-assn.org

Please note, the receipt of a request for reconsideration and the identity of the party seeking such will be noted in the summary grid of Editorial Panel actions for the agenda item. The applicant, CPT advisors, and interested parties are responsible for monitoring postings to the CPT website with respect to Panel actions and requests for reconsideration. The applicant(s) who submitted the original code change proposal is automatically considered an interested party and will receive notice of any request for reconsideration submitted by another party.

Note: Codes that contain an 'X' (e.g., 102X4, 234X2, 030XT) are placeholder codes that are intended, through the first three digits, to give readers an idea of the proposed placement in the code set of the potential code changes. These codes are not used for claims reporting and will be removed and not retained when the final CPT Datafiles are distributed in September of each year. To report the services for 'X' codes, please refer to the actual codes as they appear in the CPT Datafiles publication.

Note: Codes that contain an 'X' (e.g., 102X4, 234X2, 030XT) are placeholder codes that are intended, through the first three digits, to give readers an idea of the proposed placement in the code set of the potential code changes. CPT® Editorial Panel Summary of Panel Actions

September 2025

Tab #	Name	Code #	Request - Description	Effective Date	Request for Reconsideration
94	Clinically Meaningful Algorithmic Analyses – For Discussion Only	-----	The Panel engaged in a robust discussion of this proposal for a framework to report algorithmic and AI-enabled clinical services that do not include traditional interpretative physician or other qualified health care professional (QHP) work. The CPT Panel heard testimony for one hour from over 20 stakeholders representing nearly every sector of the health care industry. This proposal was for discussion only and no vote was taken at this meeting.		
95	Care Management Guideline Revisions	-----	Accepted revision of care management services guidelines.	January 2027
